

A boardwalk for Terrigal

Engagement Summary

Central Coast Council is proposing to build a boardwalk from Terrigal Beach promenade to The Haven. The concept designs, environmental assessment and geotechnical report were placed on public exhibition from 12 November to 14 December 2018. Further surveys were carried out in February 2019.

Two methods were used to collect feedback from the community and stakeholders:

Method 1: Written submissions

Method 2: Random face-to-face surveys of both Terrigal residents and non-Terrigal residents.

The overall majority of submissions and survey responses expressed support for the proposal.

Based on feedback provided through both methods, the key reasons to support the proposal were:

- Better access and recreation opportunities
- Tourism and economic benefits
- Favorable design
- Positive visual impact (eg complements the area)

Based on feedback provided through both methods, the key reasons not to support the proposal were:

- High cost of the project
- Negative visual impact
- Lack of need (eg there is already a path)
- Impact on current use of the rock platform / Haven Beach
- Ecological impact / litter and pollution

Council has provided response to the themes and issues raised during the consultation process in a full consultation report.

What's next?

A report to Council will be prepared recommending the boardwalk proceed and the allocation of \$2.98 million of Council funds to match State Government funding.

The feedback received from the community will be incorporated into the design where feasible during detailed design phase.
