Media release

2 February 2018

### Let's talk Terrigal - Council announces improvements for key tourism hub

Central Coast Council will shortly commence consultation with the community on a series of projects in and around the Terrigal commercial precinct.

Mayor Jane Smith said as Terrigal continues to grow as a popular destination for visitors and Central Coast residents alike, Council is working to enhance the amenity of the area through the delivery of major infrastructure and urban design projects.

"Throughout February, Council will be providing information to the community and seeking feedback on key projects including changes to traffic flow through the Terrigal CBD and the installation of smart parking sensors to improve parking in the area," Mayor Jane Smith said.

"Once completed, these projects will improve traffic flow and parking as well as deliver improvements to the general amenity of the area for tourists and residents alike.

"I encourage the community to come along to one of our *Let's Talk Terrigal* information sessions later this month."

The works planned for Terrigal CBD valued at \$2,209,000 have been funded through the NSW State Government's Stronger Communities Fund made available to all newly merged Councils.

The installation of smart parking sensors, including the development of a smartphone App that the community can use to find their closest available parking space, has been made possible through a grant of \$114,000 from the Australian Government's Smart Cities and Suburbs Program.

Council is also investigating further opportunities to improve parking in Terrigal as part of a region-wide parking strategy and will be seeking community input as this is developed.

Information sessions will be held on Monday 26 February and Wednesday 28 February from 6.30pm – 8.30pm at Terrigal Surf Club.

Detail about the plans and projects planned for Terrigal can be found at [www.yourvoiceourcoast.com](http://www.yourvoiceourcoast.com)

Community feedback is open until 2 March, 2018.

#### Coast Connect Story 15 February 2018

### Let's talk Terrigal

Over the coming years, Council is planning to deliver some exciting improvements in and around the Terrigal commercial precinct to enhance the amenity of the area, which continues to be a key tourism hub for the Central Coast.

These improvements include changes to traffic flow through the Terrigal CBD and the installation of smart parking sensors to improve parking in the area.

The works planned for Terrigal CBD are valued at \$2,209,000 and will be funded through the NSW State Government's Stronger Communities Fund made available to all newly merged Councils. This project was endorsed by the community as a priority project in late 2016 when Council asked the community how they would like us to spend Stronger Communities Funding. Council is consulting with the community on this project prior to construction, scheduled for May of this year.

The installation of smart parking sensors, including the development of a smartphone App designed to assist with finding available parking spaces, has been made possible through a grant of \$114,000 from the Australian Government's Smart Cities and Suburbs Program. Council will be informing the community of the planned placement of these sensors due to be rolled out later this year.

Council is also investigating further opportunities to improve parking in Terrigal as part of a region-wide parking strategy and will invite community input as this is developed.

Find out more about these and other Terrigal based projects and provide feedback on the proposed Terrigal traffic flow improvements by coming along to Information Sessions on Monday 26 February and Wednesday 28 February from 6.30pm – 8.30pm at Terrigal Surf Life Saving Club.

To view the plans and projects planned for Terrigal and register for an Information Session, go to [yourvoiceourcoast.com](http://yourvoiceourcoast.com) Community feedback is open until 2 March, 2018.

### Let's Talk Terrigal

Over the coming years, exciting improvements are planned for Terrigal that will enhance the amenity of the area through the delivery of a number of infrastructure and urban design projects.

The first of these include:

- CBD Traffic flow improvements
- Smart parking sensor installation

To find out more about these projects and provide your feedback on the proposed CBD Traffic flow improvements, come along to an information session:

<b>Monday 26 February</b>	<b>Wednesday 28 February</b>
6.30pm to 8.30pm	6.30pm to 8.30pm
Terrigal Surf Life Saving Club	Terrigal Surf Life Saving Club

Find out more and RSVP for a session at [yourvoiceourcoast.com](http://yourvoiceourcoast.com). Your feedback is invited until Friday 2 March 2018.

# CBD traffic flow improvements

## Open for consultation

Community feedback is being sought on proposed changes to traffic flow and pedestrian access in the Terrigal CBD. A design has been developed using feedback received from the community as part of a study conducted in 2016. The proposed changes will be delivered in two stages.

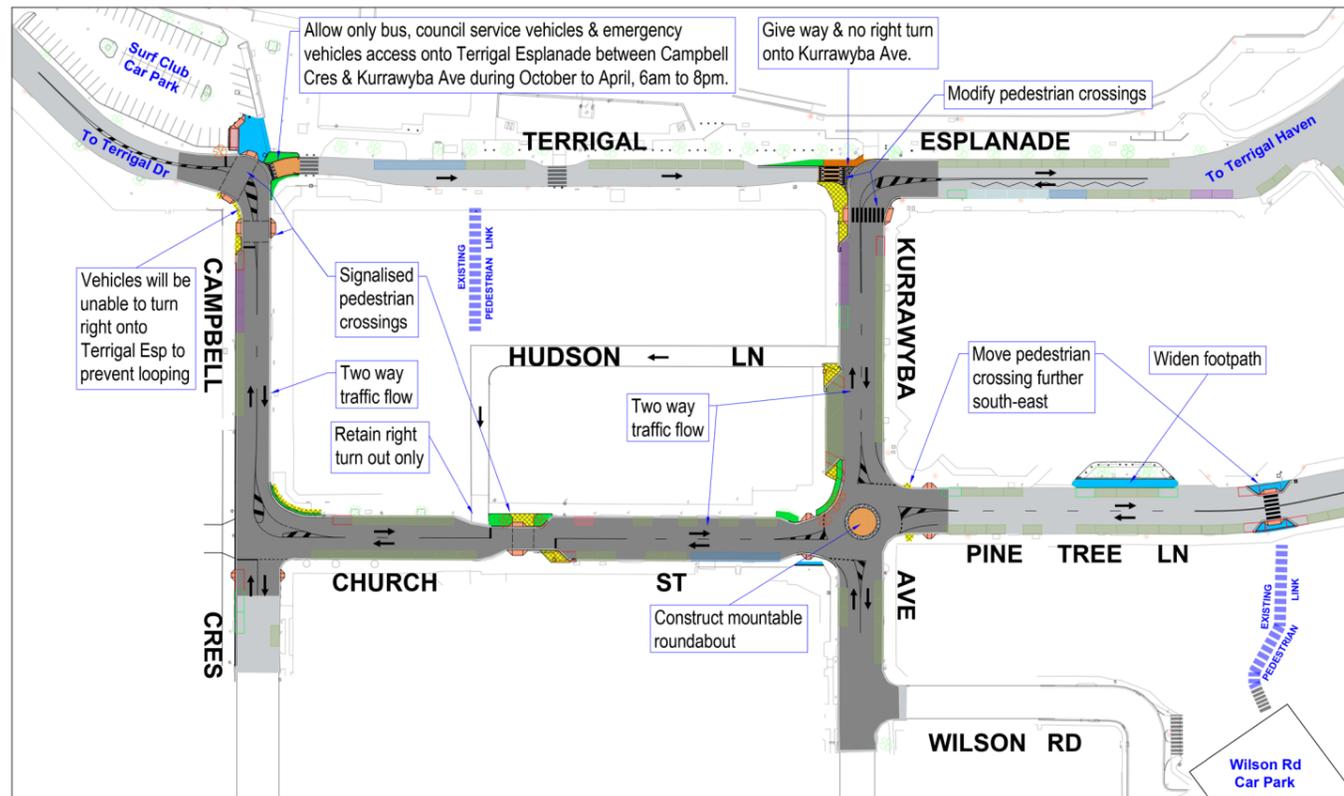

Feedback on the designs is open until **Friday 2 March**.

## Stage 1

This stage involves the conversion of Campbell Crescent, Church Street and Kurrawyba Avenue to two-way traffic, installing signalised pedestrian crossings to better manage unrestricted pedestrian movements, road and footpath adjustments and introducing vehicle access restrictions along Terrigal Esplanade during peak times. Buses and emergency vehicles will be allowed access at all times.

**Restricting vehicle access along Terrigal Esplanade during peak times will create a safer and more accessible area for pedestrians. The proposed restricted times would be in place between October to April from 6am to 8pm all days.**

Stage 1 has been enabled by the NSW State Government's Stronger Communities Funding made available to newly merged Councils. Council will consider community feedback to finalise the design. Construction is scheduled to commence in May 2018.

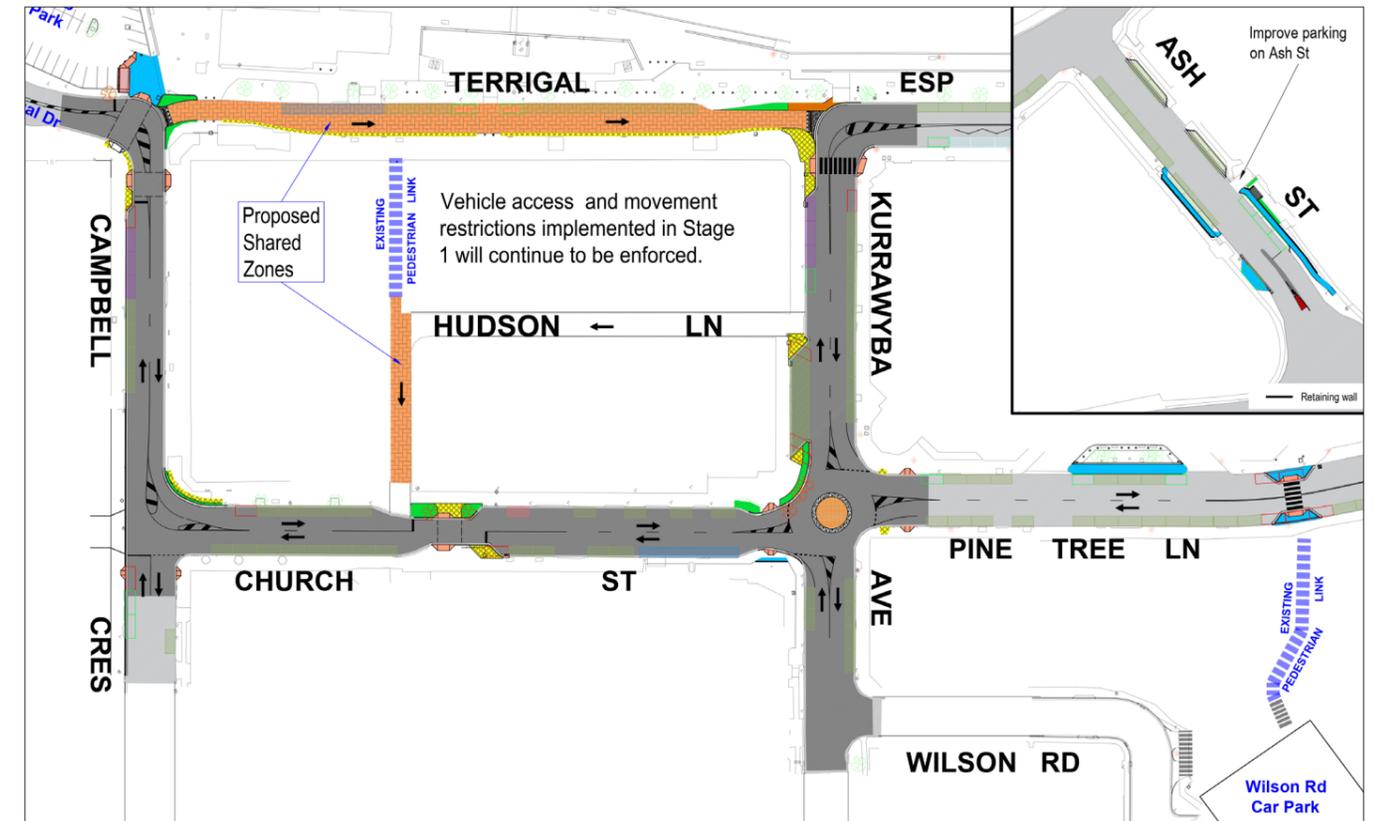

## Stage 2

Stage 2 involves raising and paving Terrigal Esplanade and a part of Hudson Lane to create a Shared Zone with a 10km/h speed limit.

This zone will significantly improve the public amenity and allow unimpeded pedestrian access between the beach and the shops. Stage 2 will also involve improving on-street parking spaces on Ash Street.

Council will display a refined design for Stage 2 later this year however funding for Stage 2 has not been allocated.

### Go to [yourvoiceourcoast.com](http://yourvoiceourcoast.com) to:

- View the more detailed designs for Stage 1 & 2
- Read the FAQs
- View the Stage 1 construction timetable
- Make a submission for this project

This information is also available to view at Erina Library.

For more information, contact project manager David Medcalf on 4325 8237 or email [david.medcalf@centralcoast.nsw.gov.au](mailto:david.medcalf@centralcoast.nsw.gov.au)

## Terrigal parking update

This year council will be installing approximately 270 smart parking sensors in Terrigal to help residents and visitors find parking spots faster and improve parking turn over in the CBD. The sensors will be installed at the Terrigal Surf Club car park and The Haven.

Drivers will also be able to download a free parking app to check parking availability before heading to Terrigal. This same app can also be used once the sensor system is installed in the Gosford CBD.

This is scheduled to be completed in 2019.

In addition to the introduction of parking sensors and traffic flow improvements, Council is currently investigating further opportunities to improve parking in Terrigal as part of a region-wide parking strategy. The community will have an opportunity to provide input into this strategy as it is developed.

For more information, get in touch with our project managers:

## Banjo's Skate Park and Rotary Park playground upgrade

Award-winning skate park and youth space designers, Convic, who designed and constructed Bato Yard Skate Park in Bateau Bay, have been awarded the tender to design and construct Banjo's Skate Park in the south east corner of Terrigal Lagoon Reserve.

Due for completion mid this year, the new skate park will cater for local families and incorporate elements for both beginner and intermediate riders.

Until that time, the community can enjoy the new play equipment, park furniture and BBQ facilities at nearby Terrigal Rotary Park which continues to grow in popularity since opening in December 2017.

## Terrigal rock pool

The NSW Government has provided \$250,000 from the Public Reserves Management Fund Program to assist with works at Terrigal Rock Pool.

Council is currently investigating restoration options and will seek community feedback on the proposed repairs this year.

## **Appendix G**

Final concept design for Stage 1– June 2018

# Terrigal CBD Traffic Flow Improvement Stage 1 Final Concept Design

Road Transport & Drainage  
Date: 19.06.2018 Version: 1.3.3

## Key Design Changes Since the Consultation Period

1. To maximise on-street parking in the CBD, Terrigal Esplanade will remain open to traffic all year round. The existing raised pedestrian crossing on Terrigal Esplanade near Campbell Crescent will be removed to give priority to vehicles entering Terrigal Esplanade and improve traffic flow. A signalised pedestrian crossing will be provided on Terrigal Esplanade mid-way between Campbell Crescent and Kurrawyba Avenue to improve pedestrian safety and regulate traffic flow. The provision of pedestrian control signals is subject to RMS approval.
2. The pedestrian crossing in Church Street will be retained and funds reallocated to provide the signalised pedestrian crossing mid-way on Terrigal Esplanade.
3. The existing pedestrian crossing on Pine Tree Lane will be reinstated close to the

4. intersection with Kurrawyba Avenue to provide better pedestrian access to the CBD. Four parking spaces will be removed to ensure safe use of this crossing. The proposed pedestrian crossing further along Pine Tree Lane has been removed and the five associated parking spaces have been reinstated.
4. An additional pedestrian crossing will be provided on Kurrawyba Avenue near Church St to provide better pedestrian access to the northern part of the CBD.
5. Additional on-street car parking and motor bike parking spaces will be provided in various locations in the CBD to minimise impact on parking. This will result in a net loss of four car parking, and a net gain of nine motor bike parking spaces in the CBD and fringe areas. The proposed changes to on-street parking are subject to Local Traffic Committee approval.
