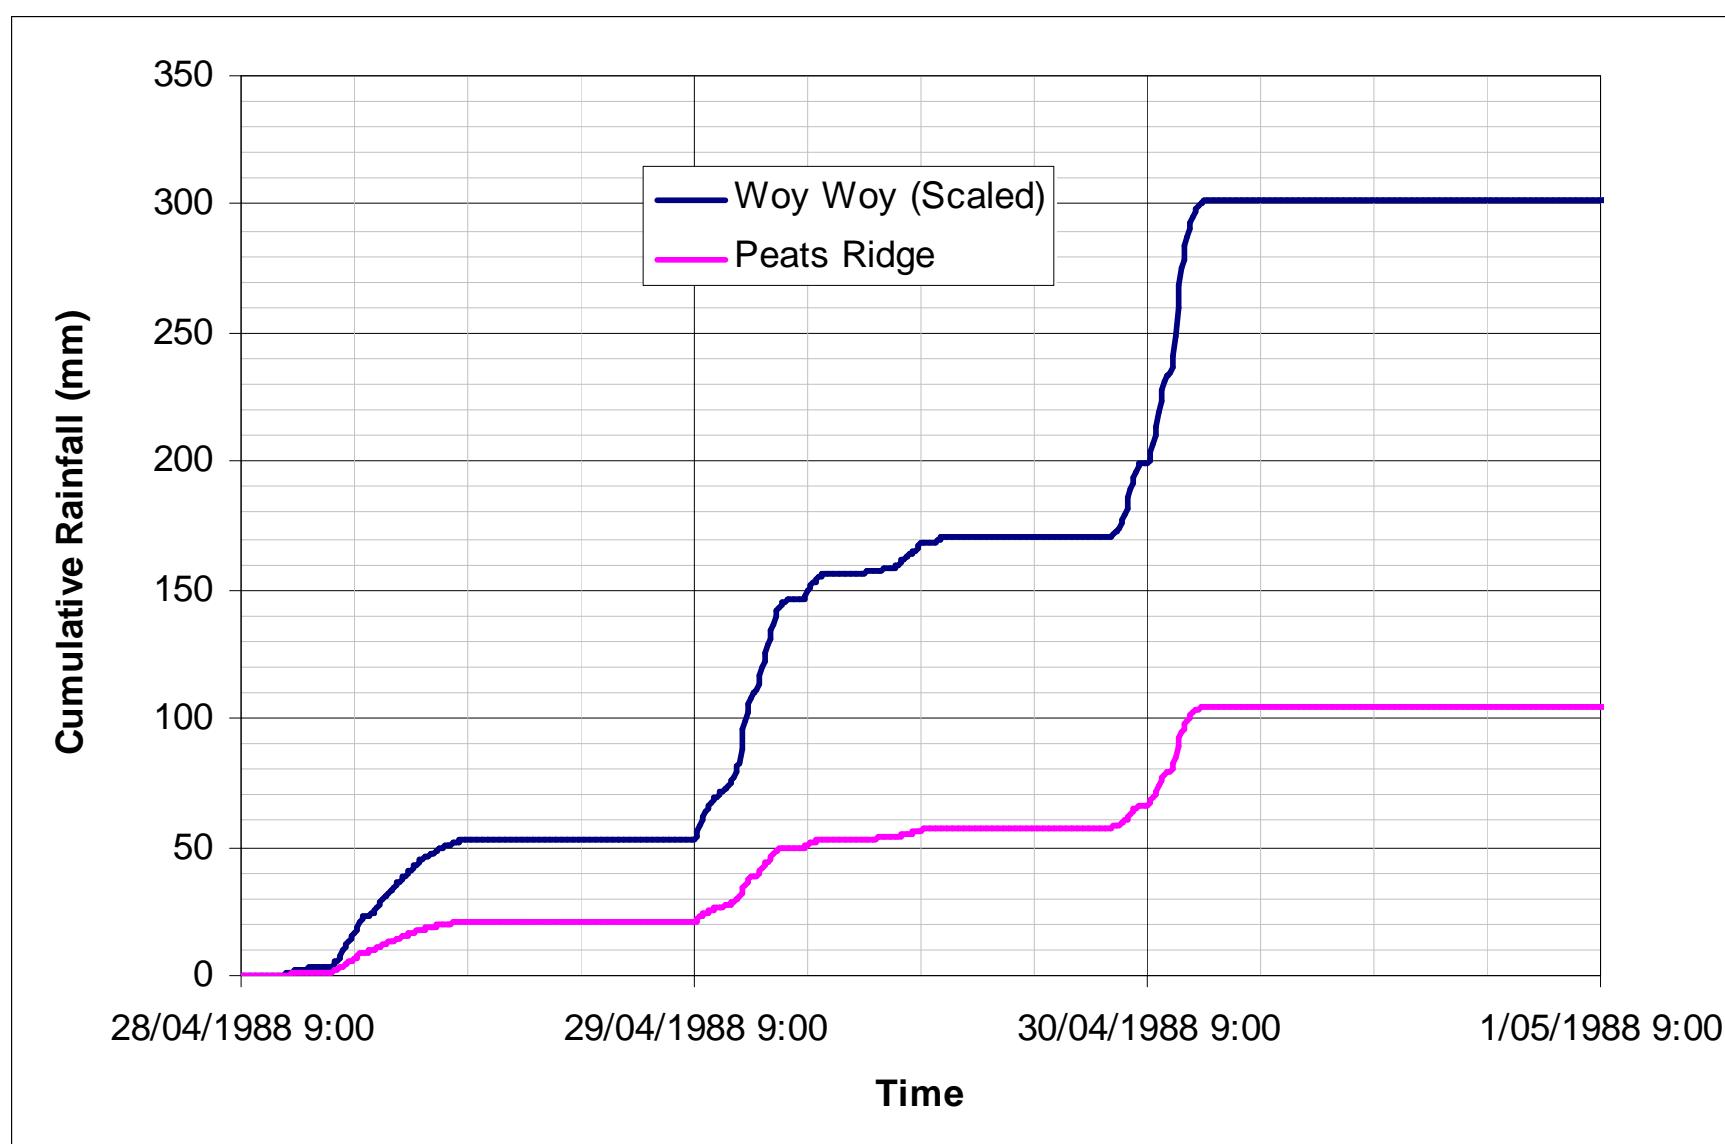

Figure 11 - 1988 Calibration Event Rainfall Hyetograph

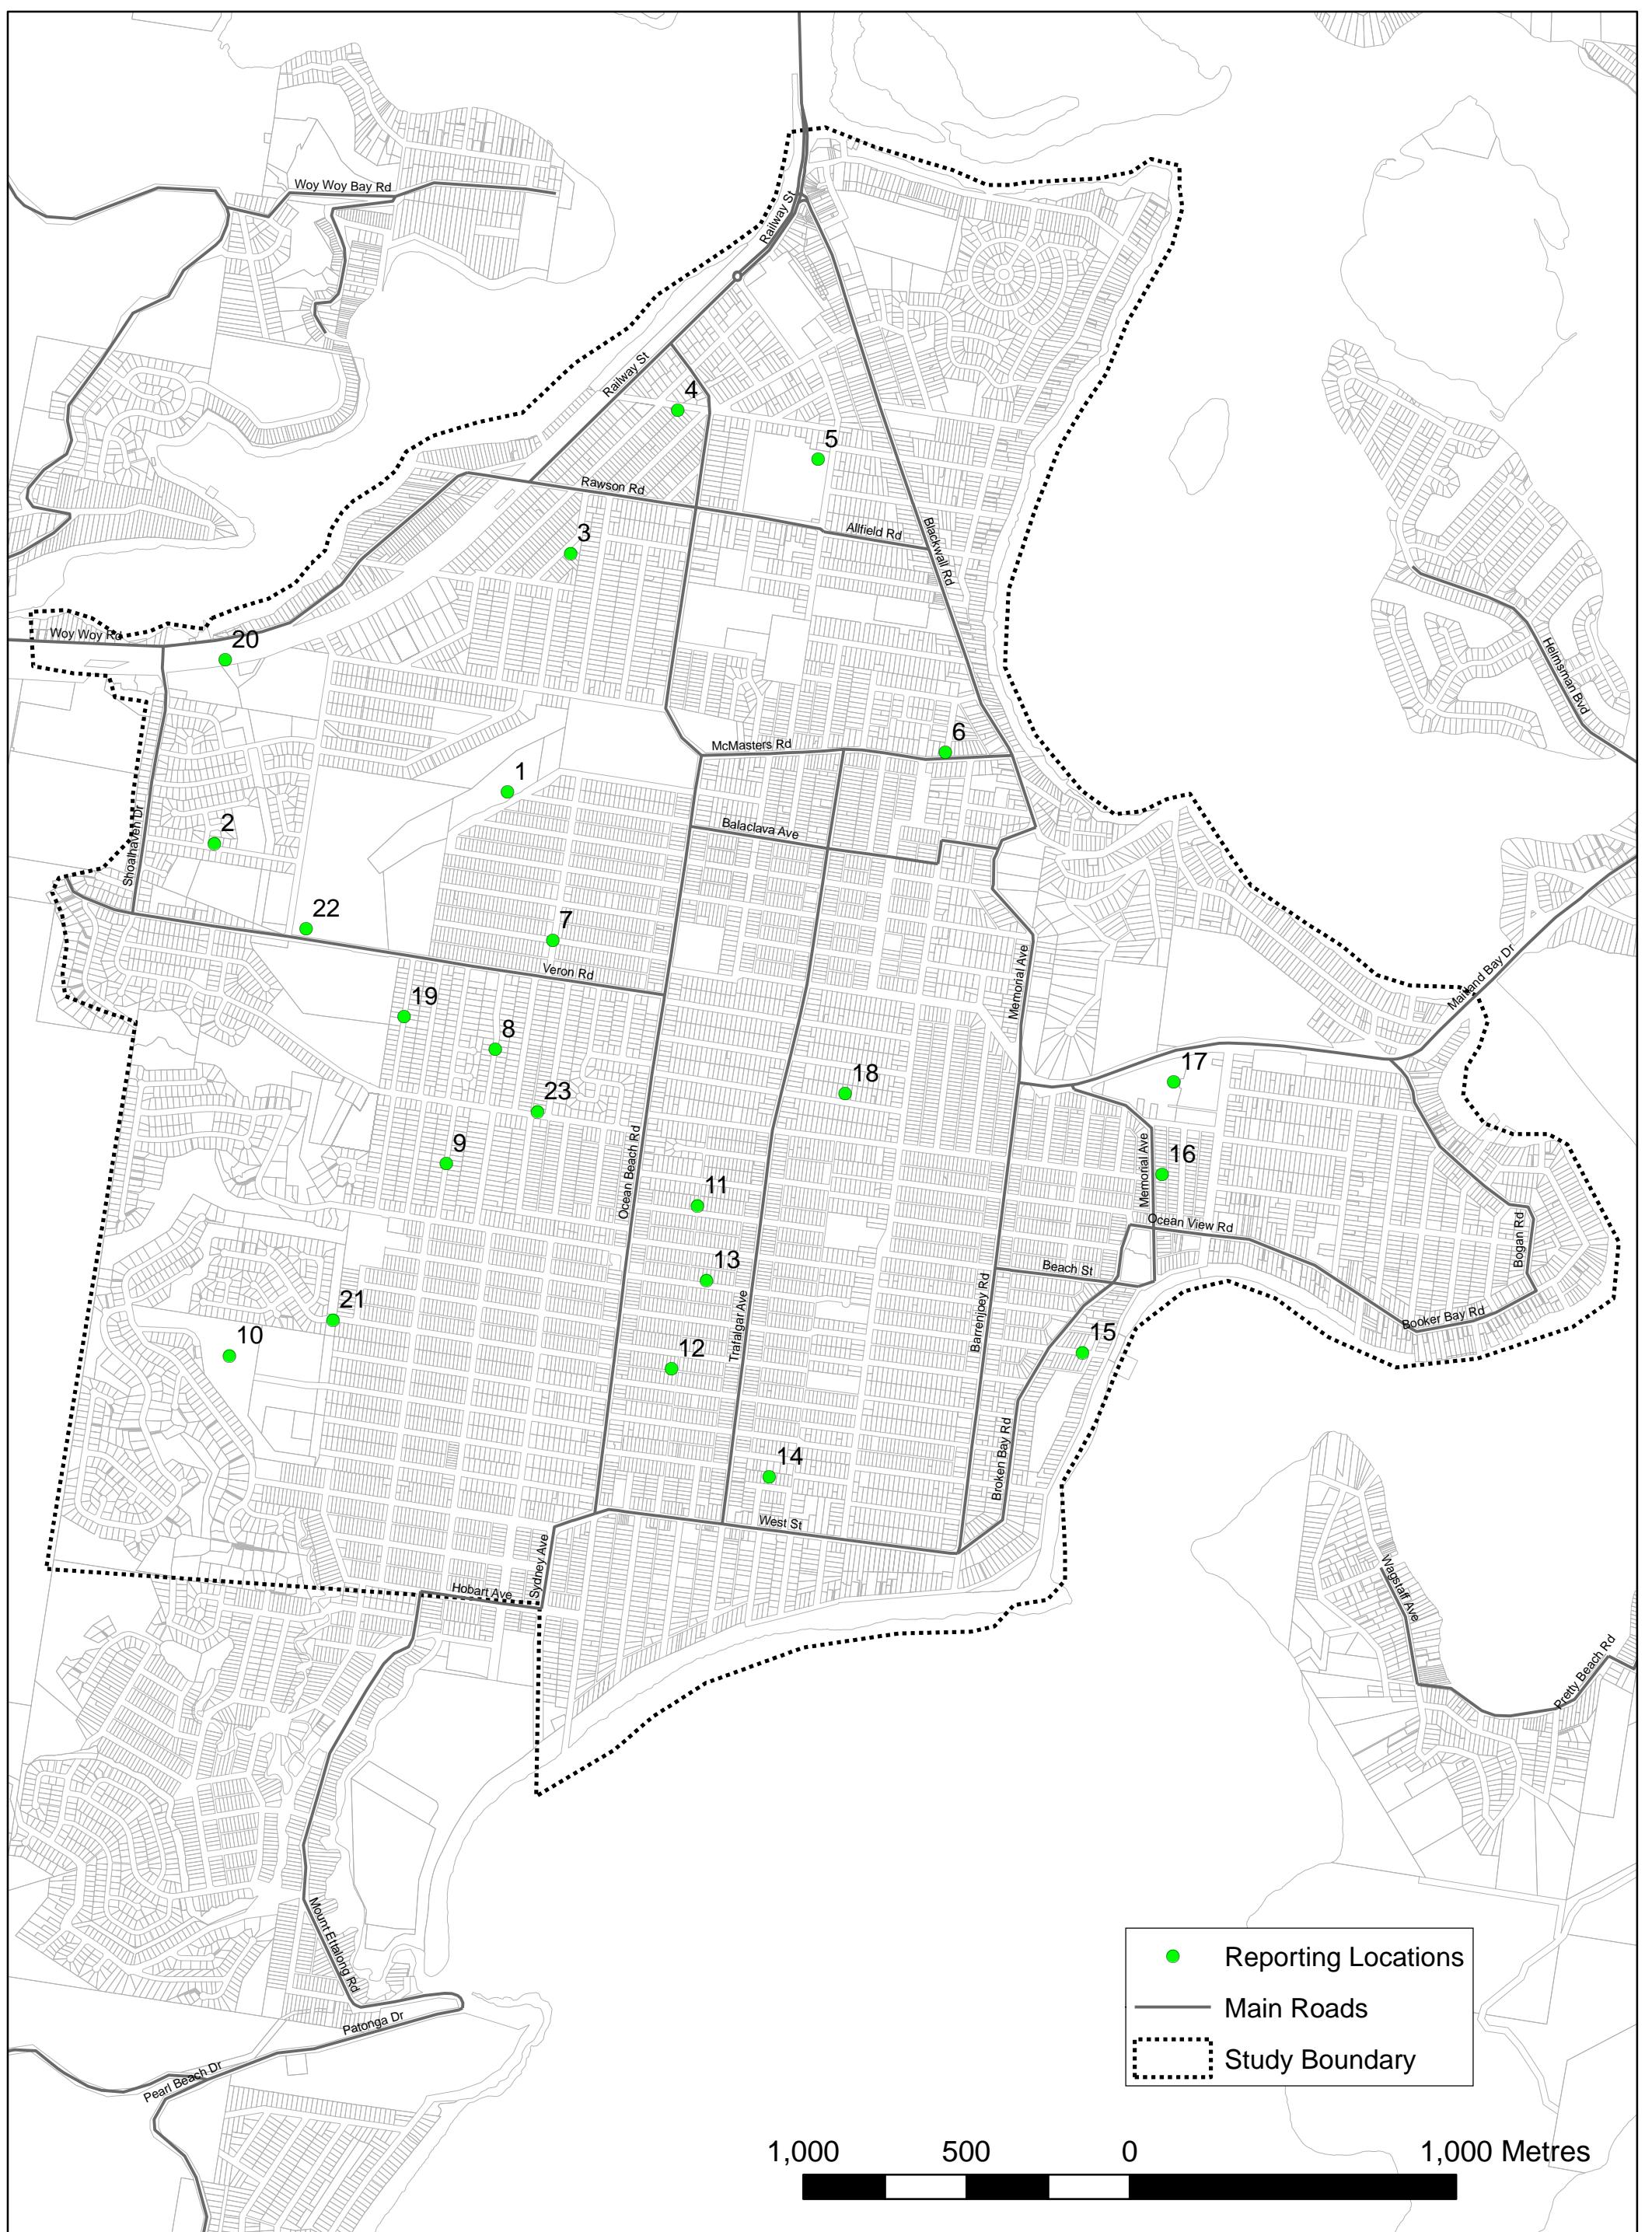

Figure 12 - Representative Locations for Reporting

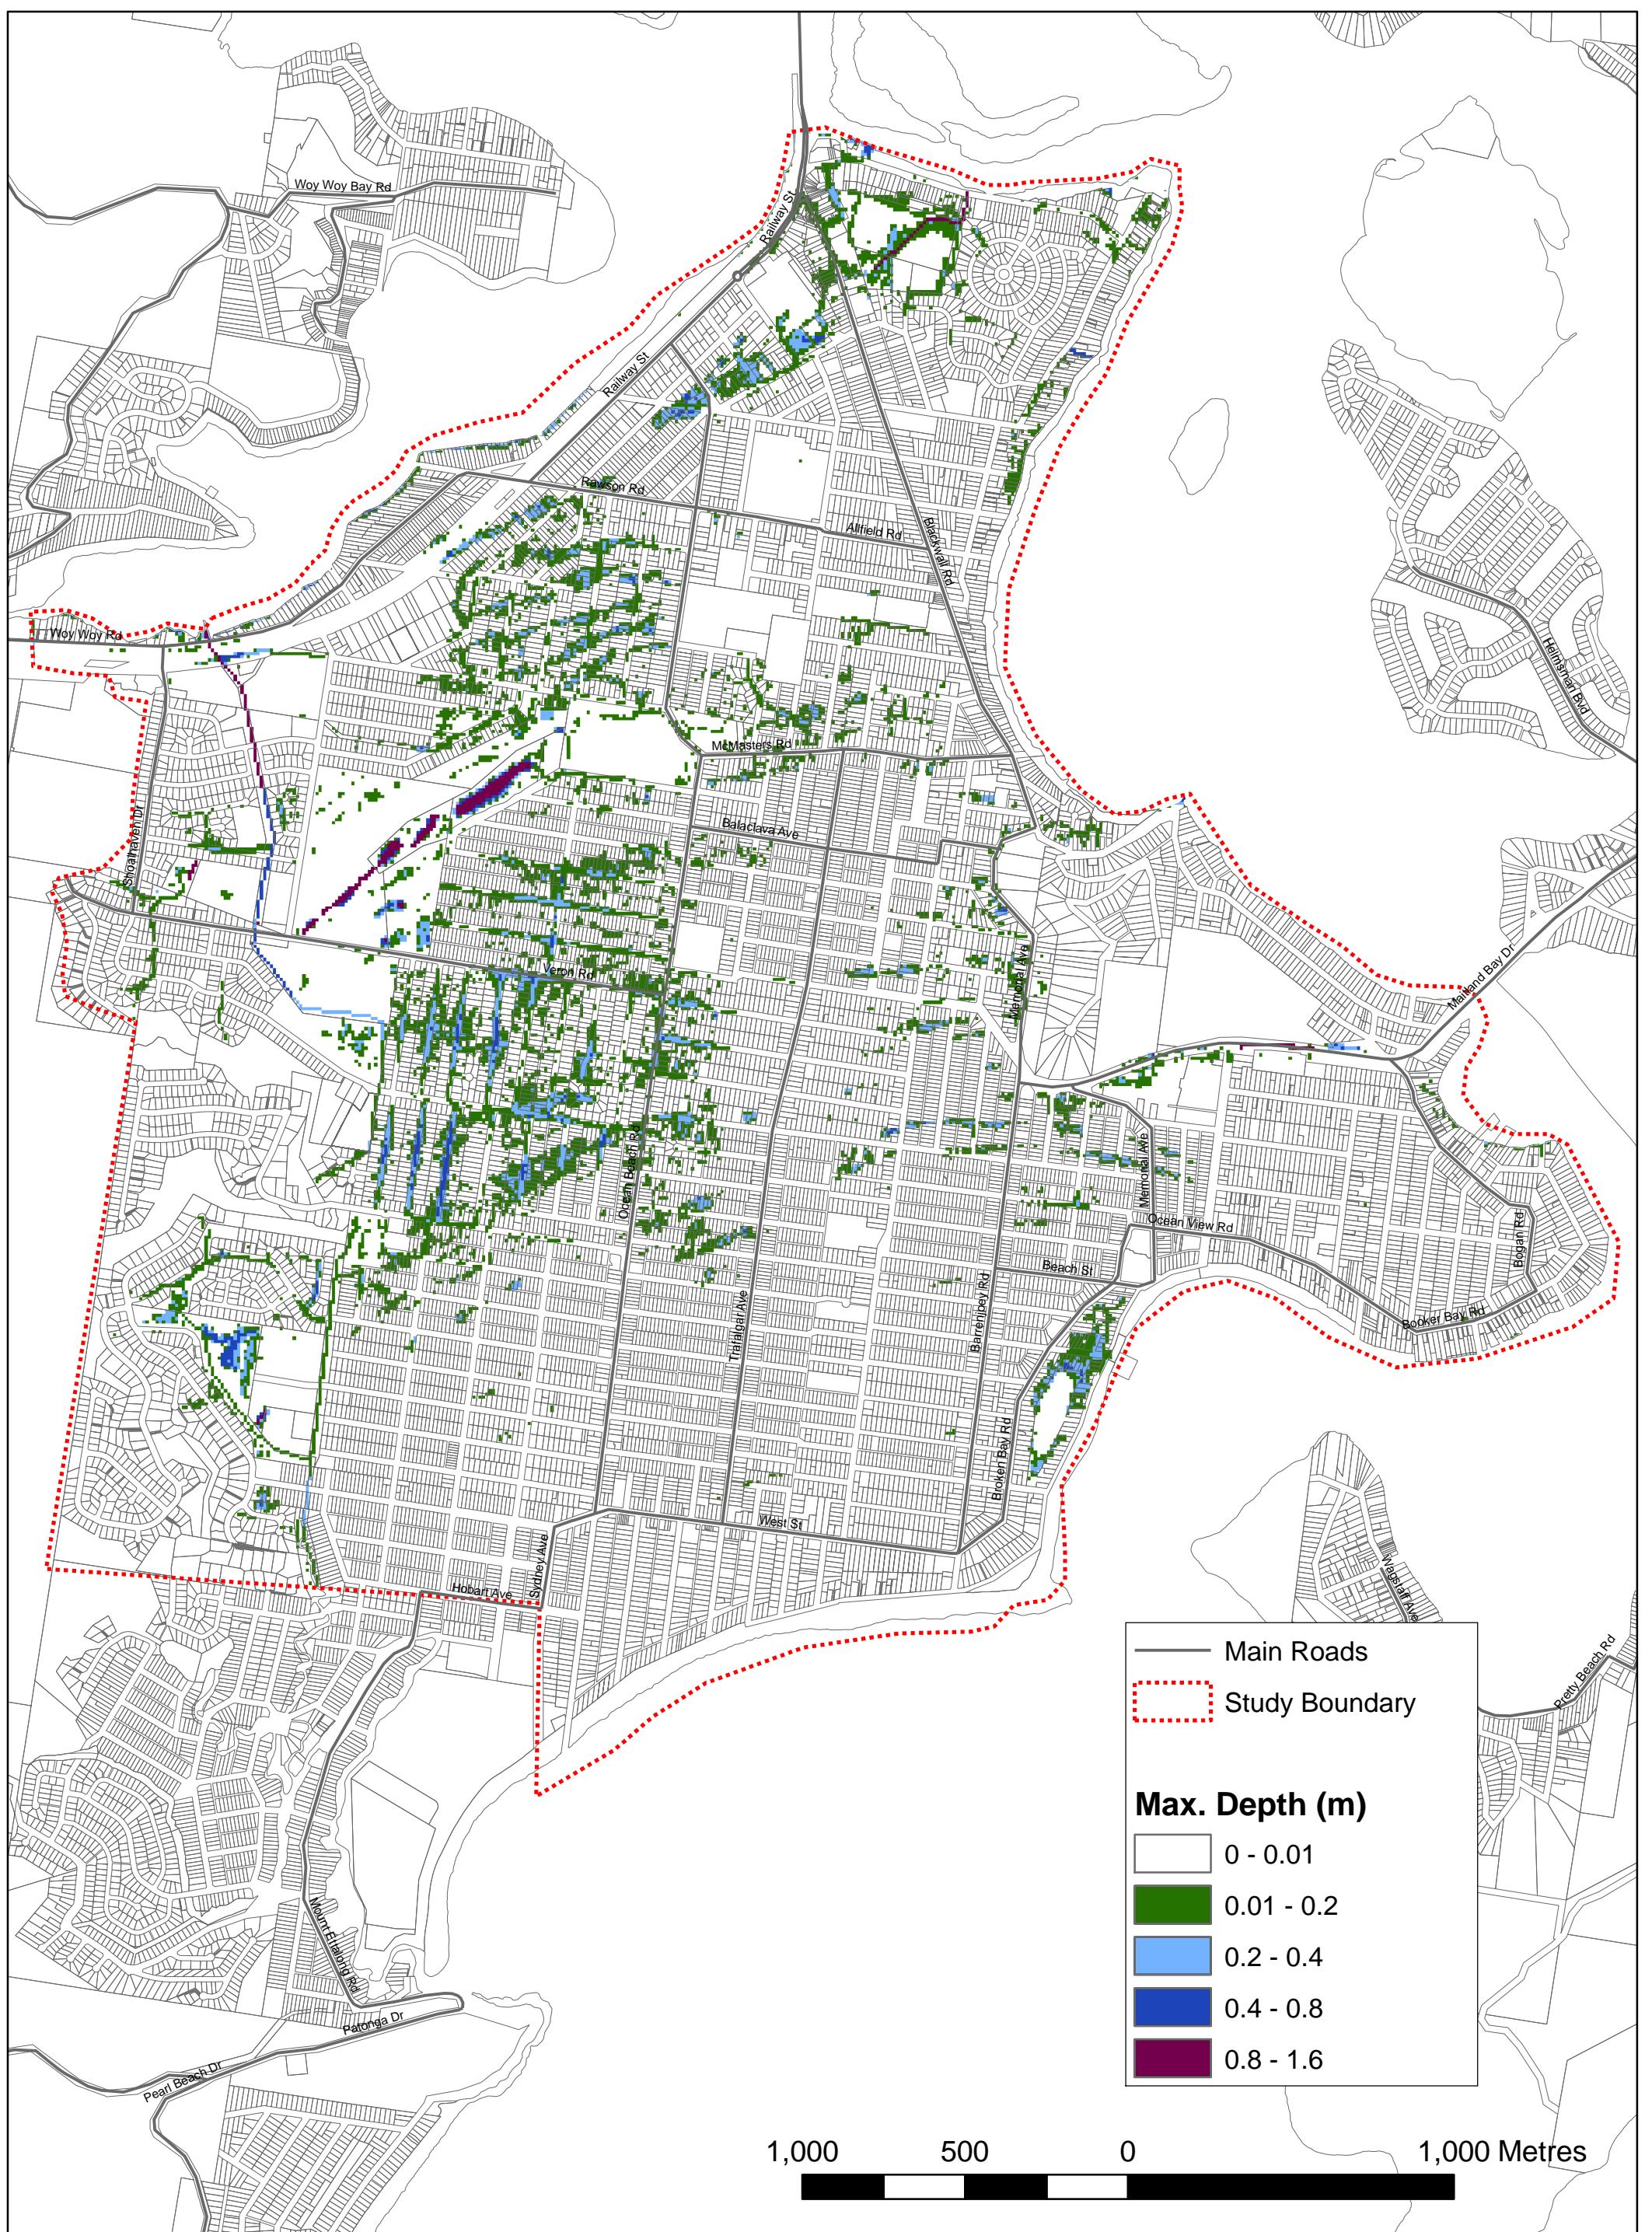

Figure 13 – Modelled Flood Depth for 2yr ARI (50% AEP) with Existing Development.

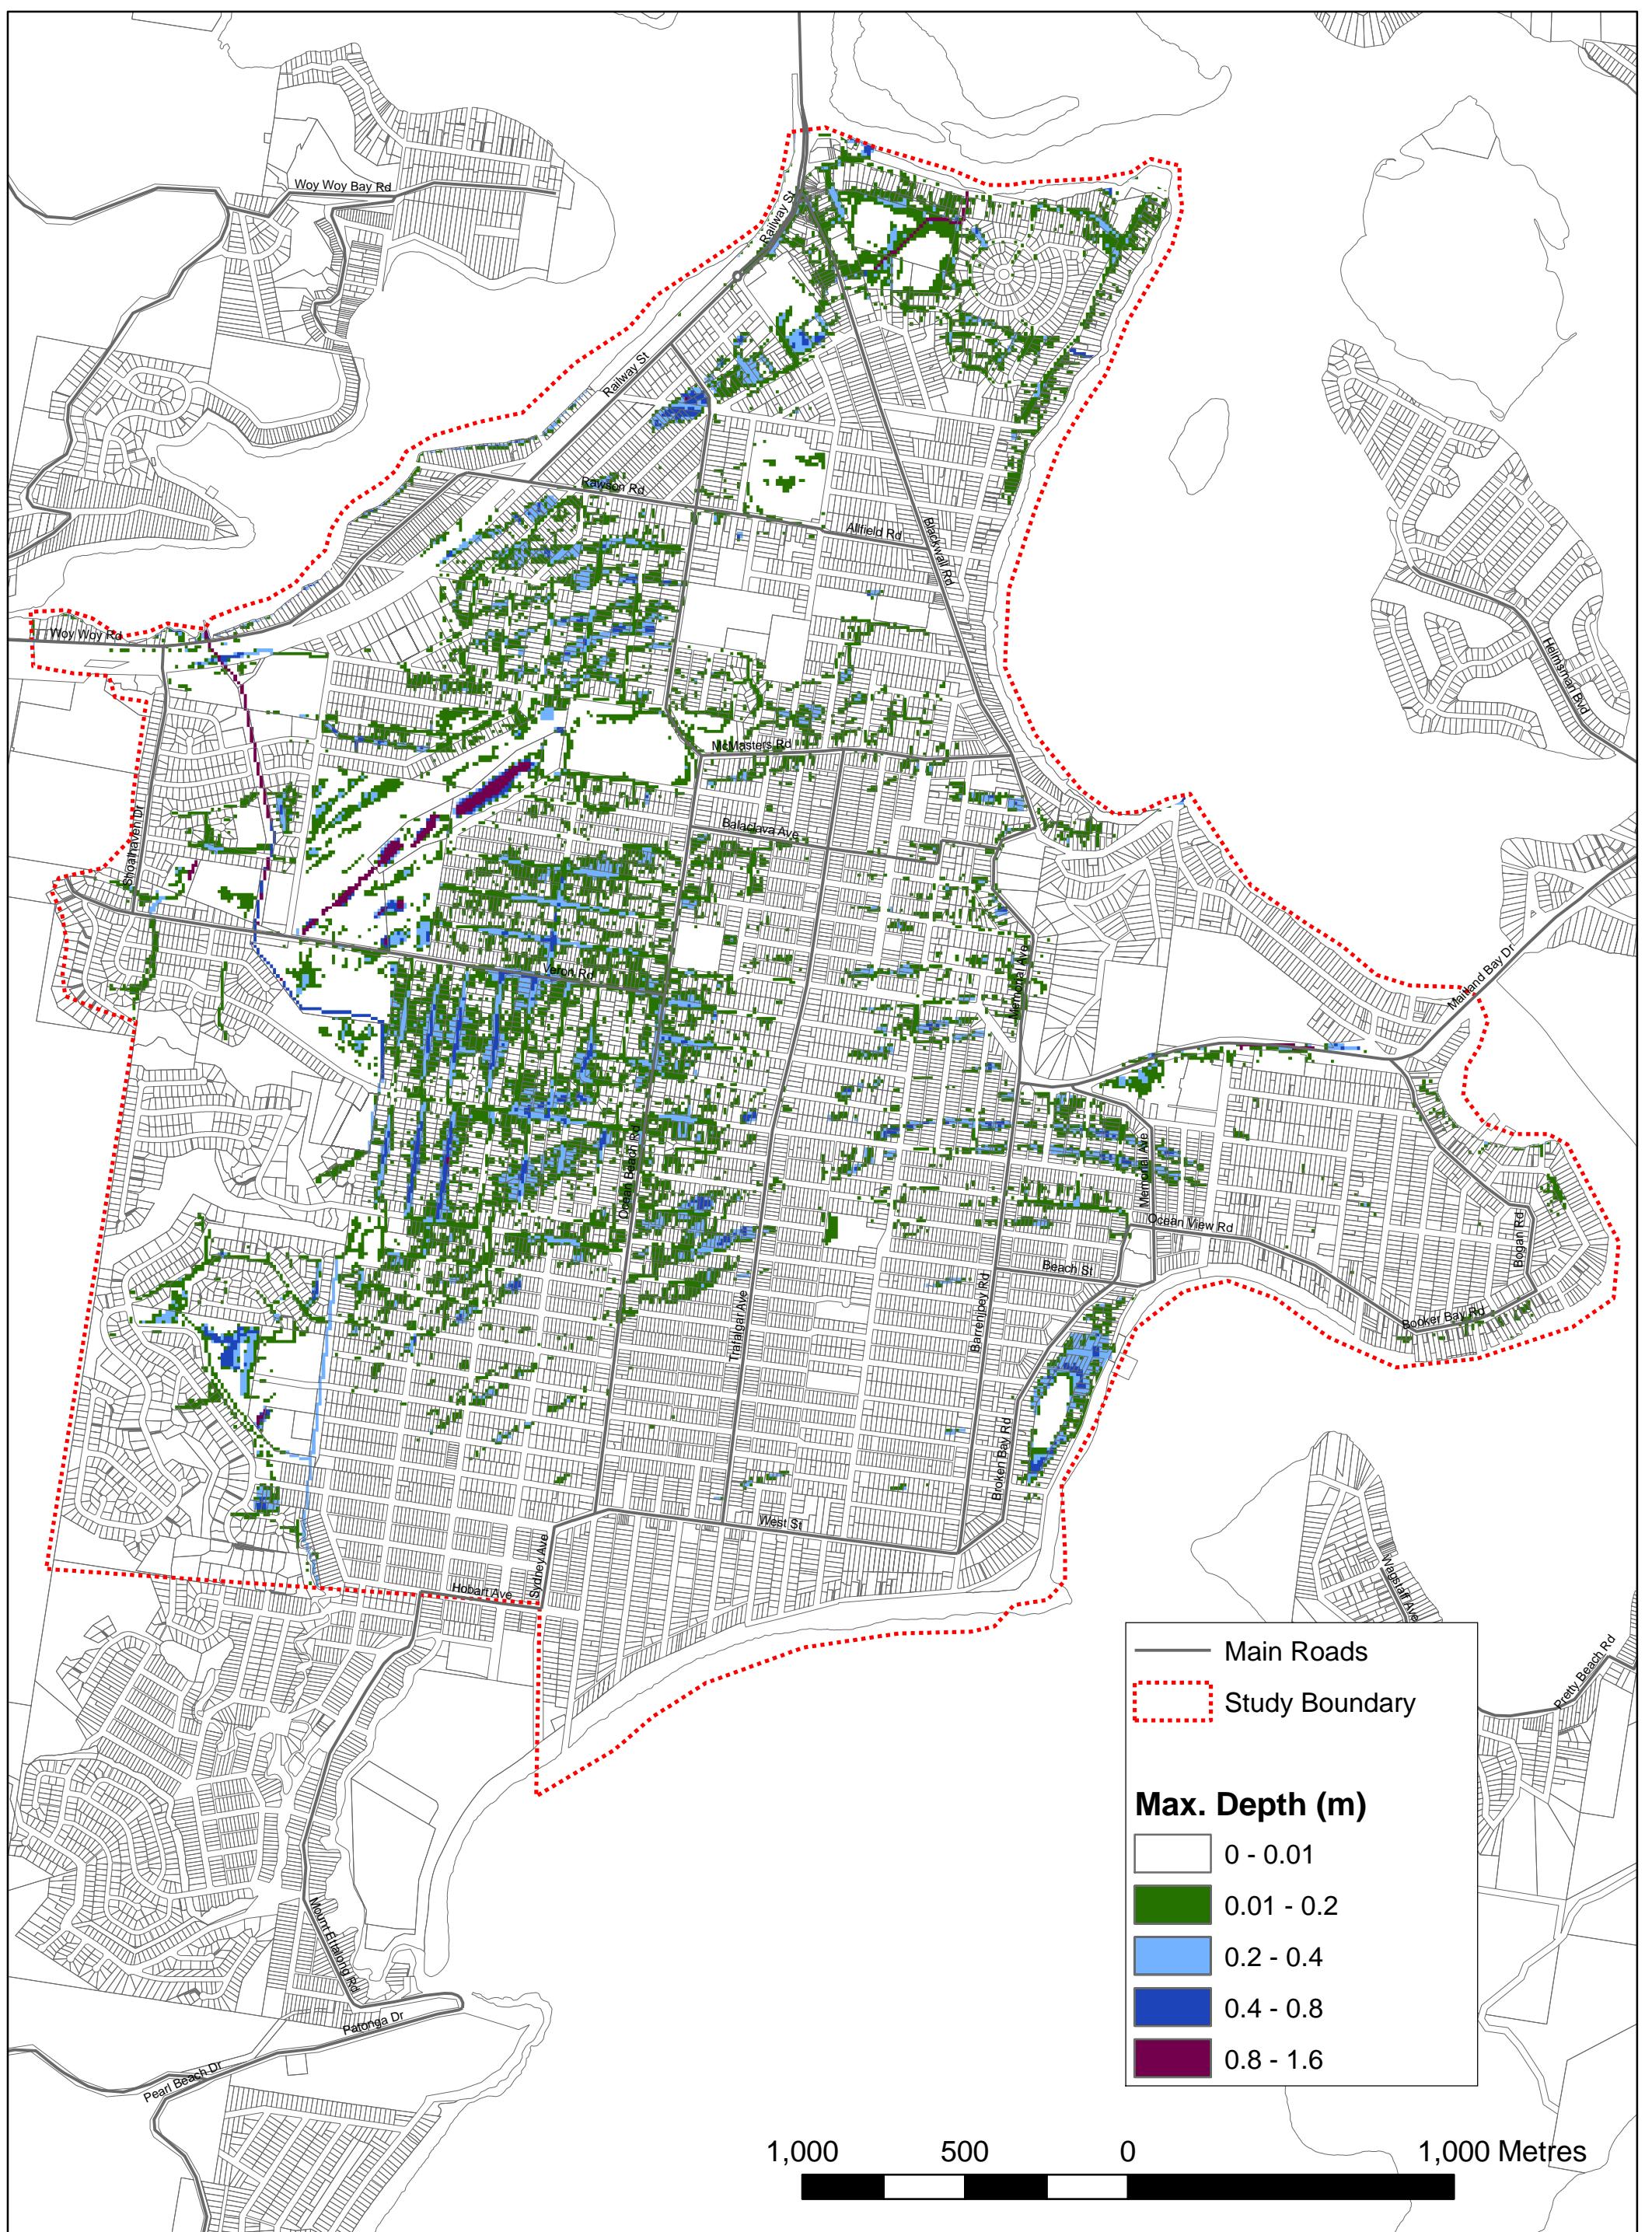

Figure 14 – Modelled Flood Depth for 10yr ARI (10% AEP) with Existing Development.

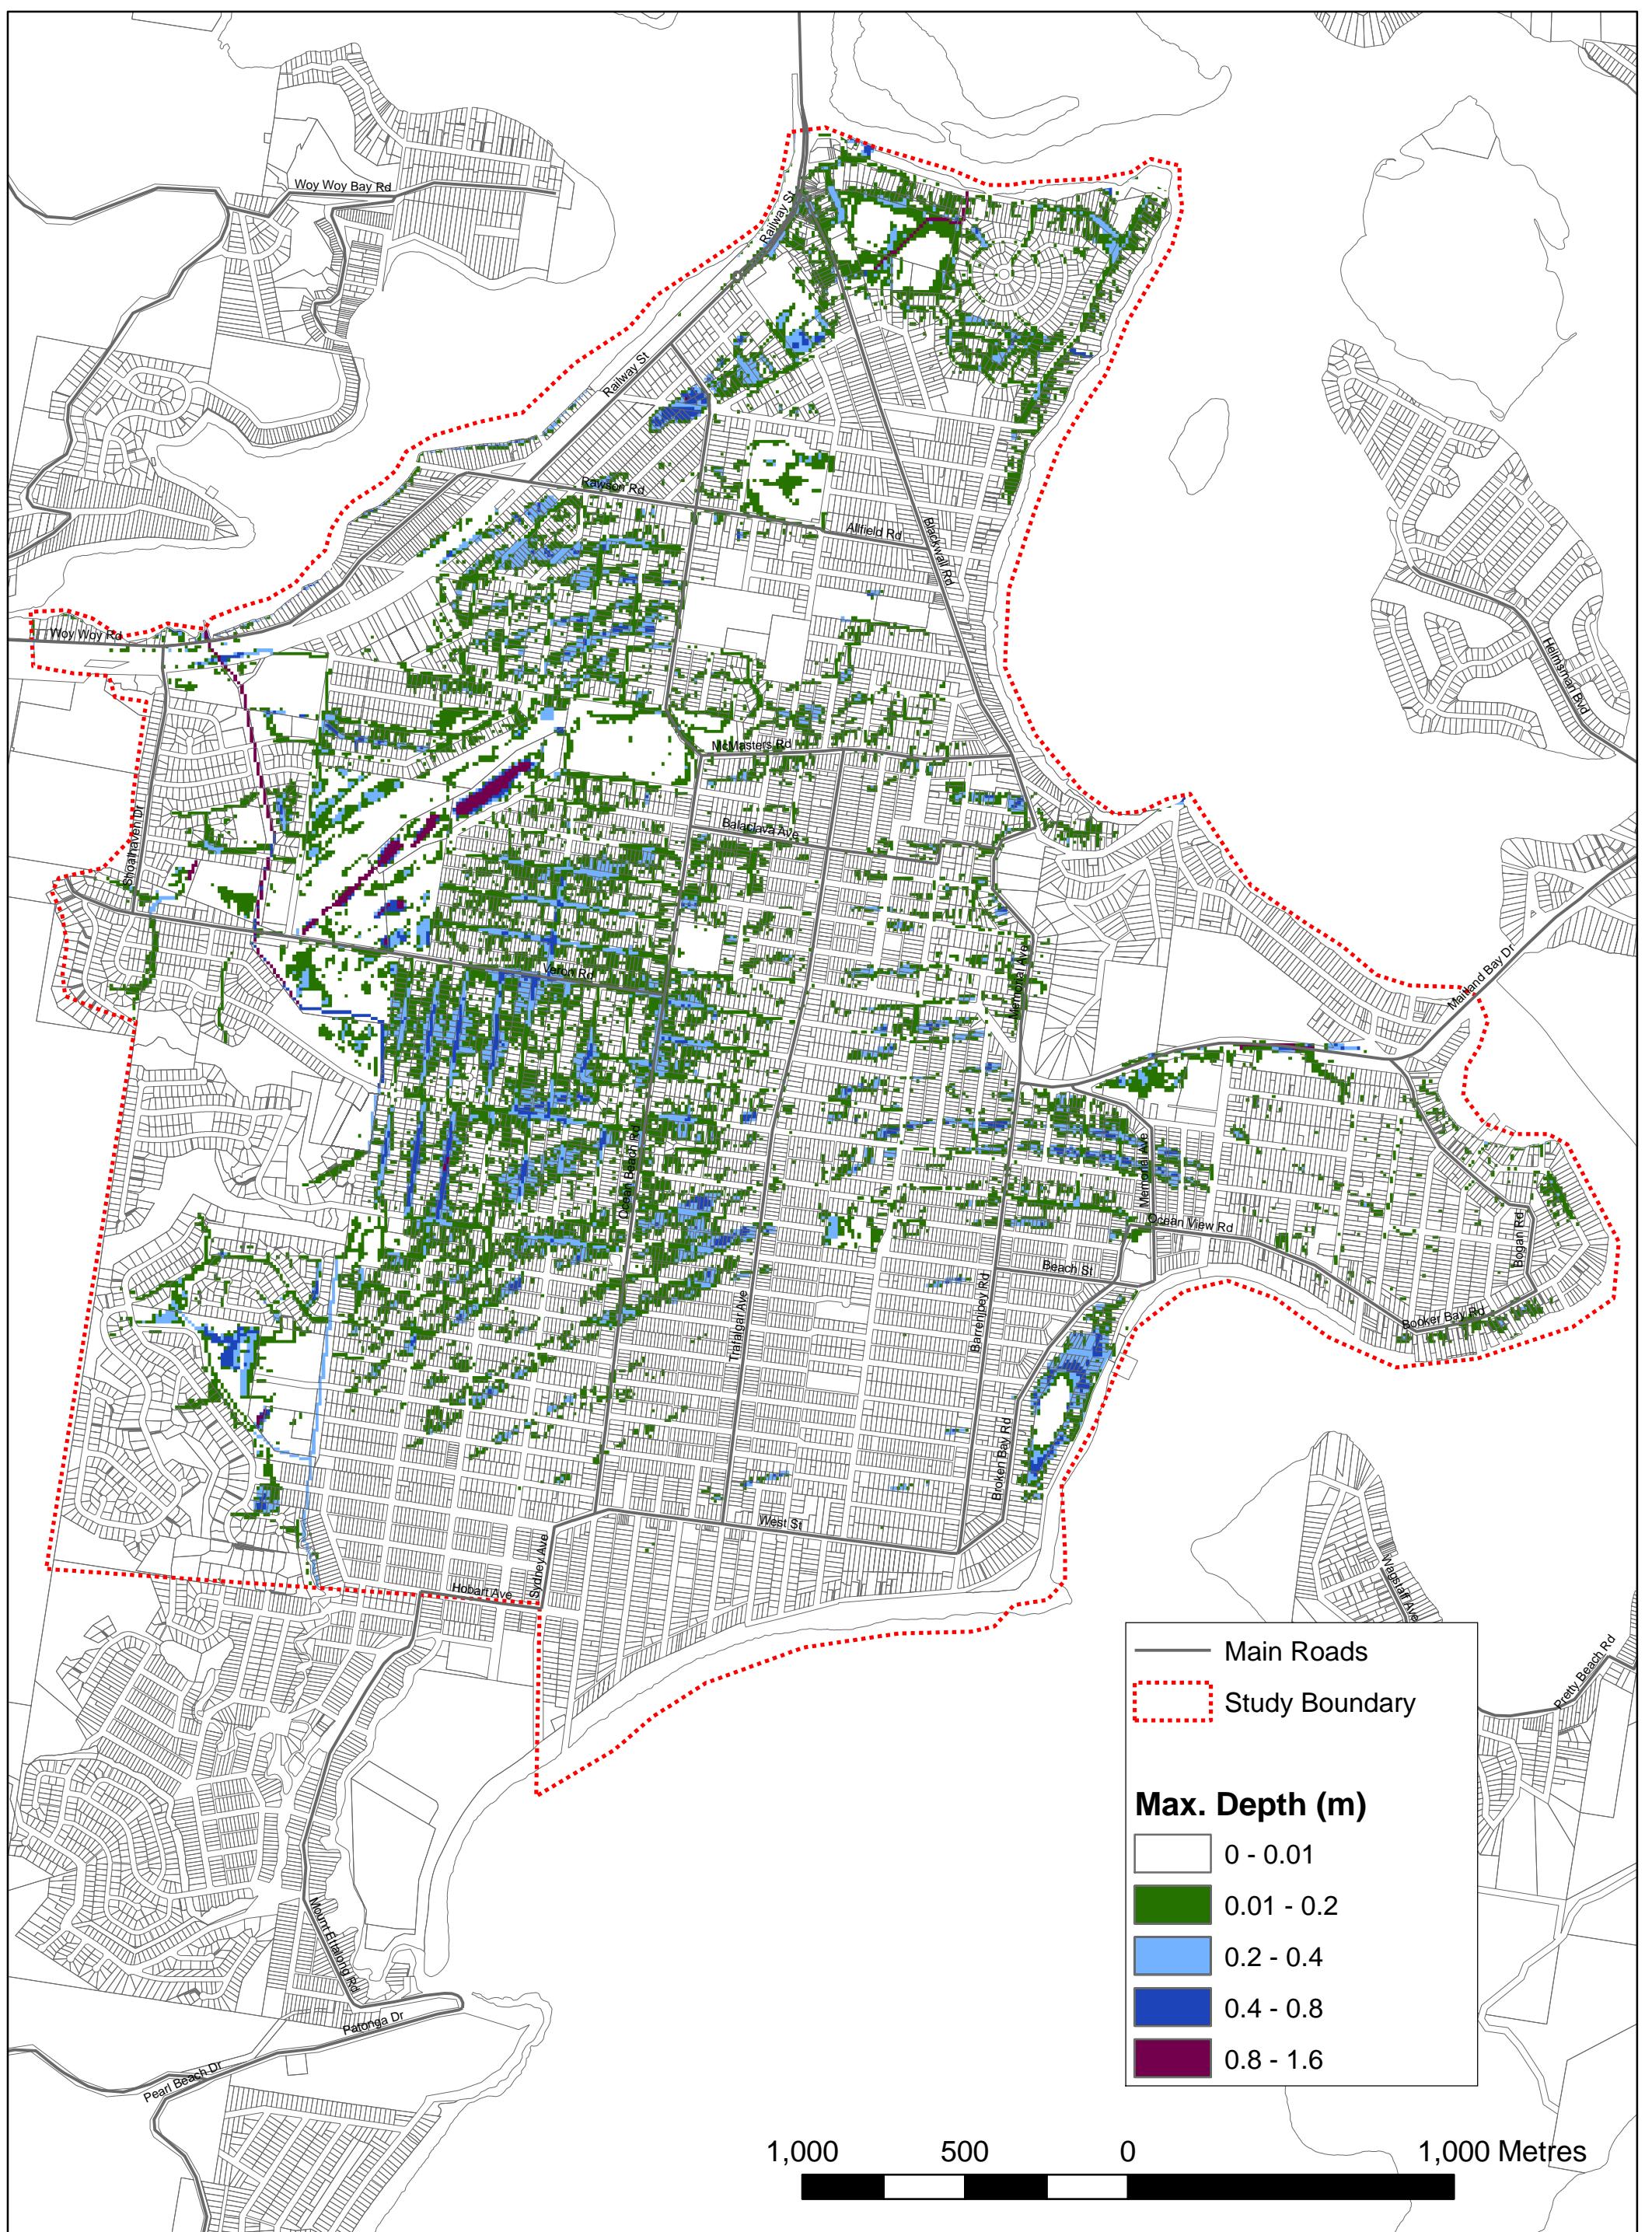

Figure 15 – Modelled Flood Depth for 20yr ARI (5% AEP) with Existing Development.

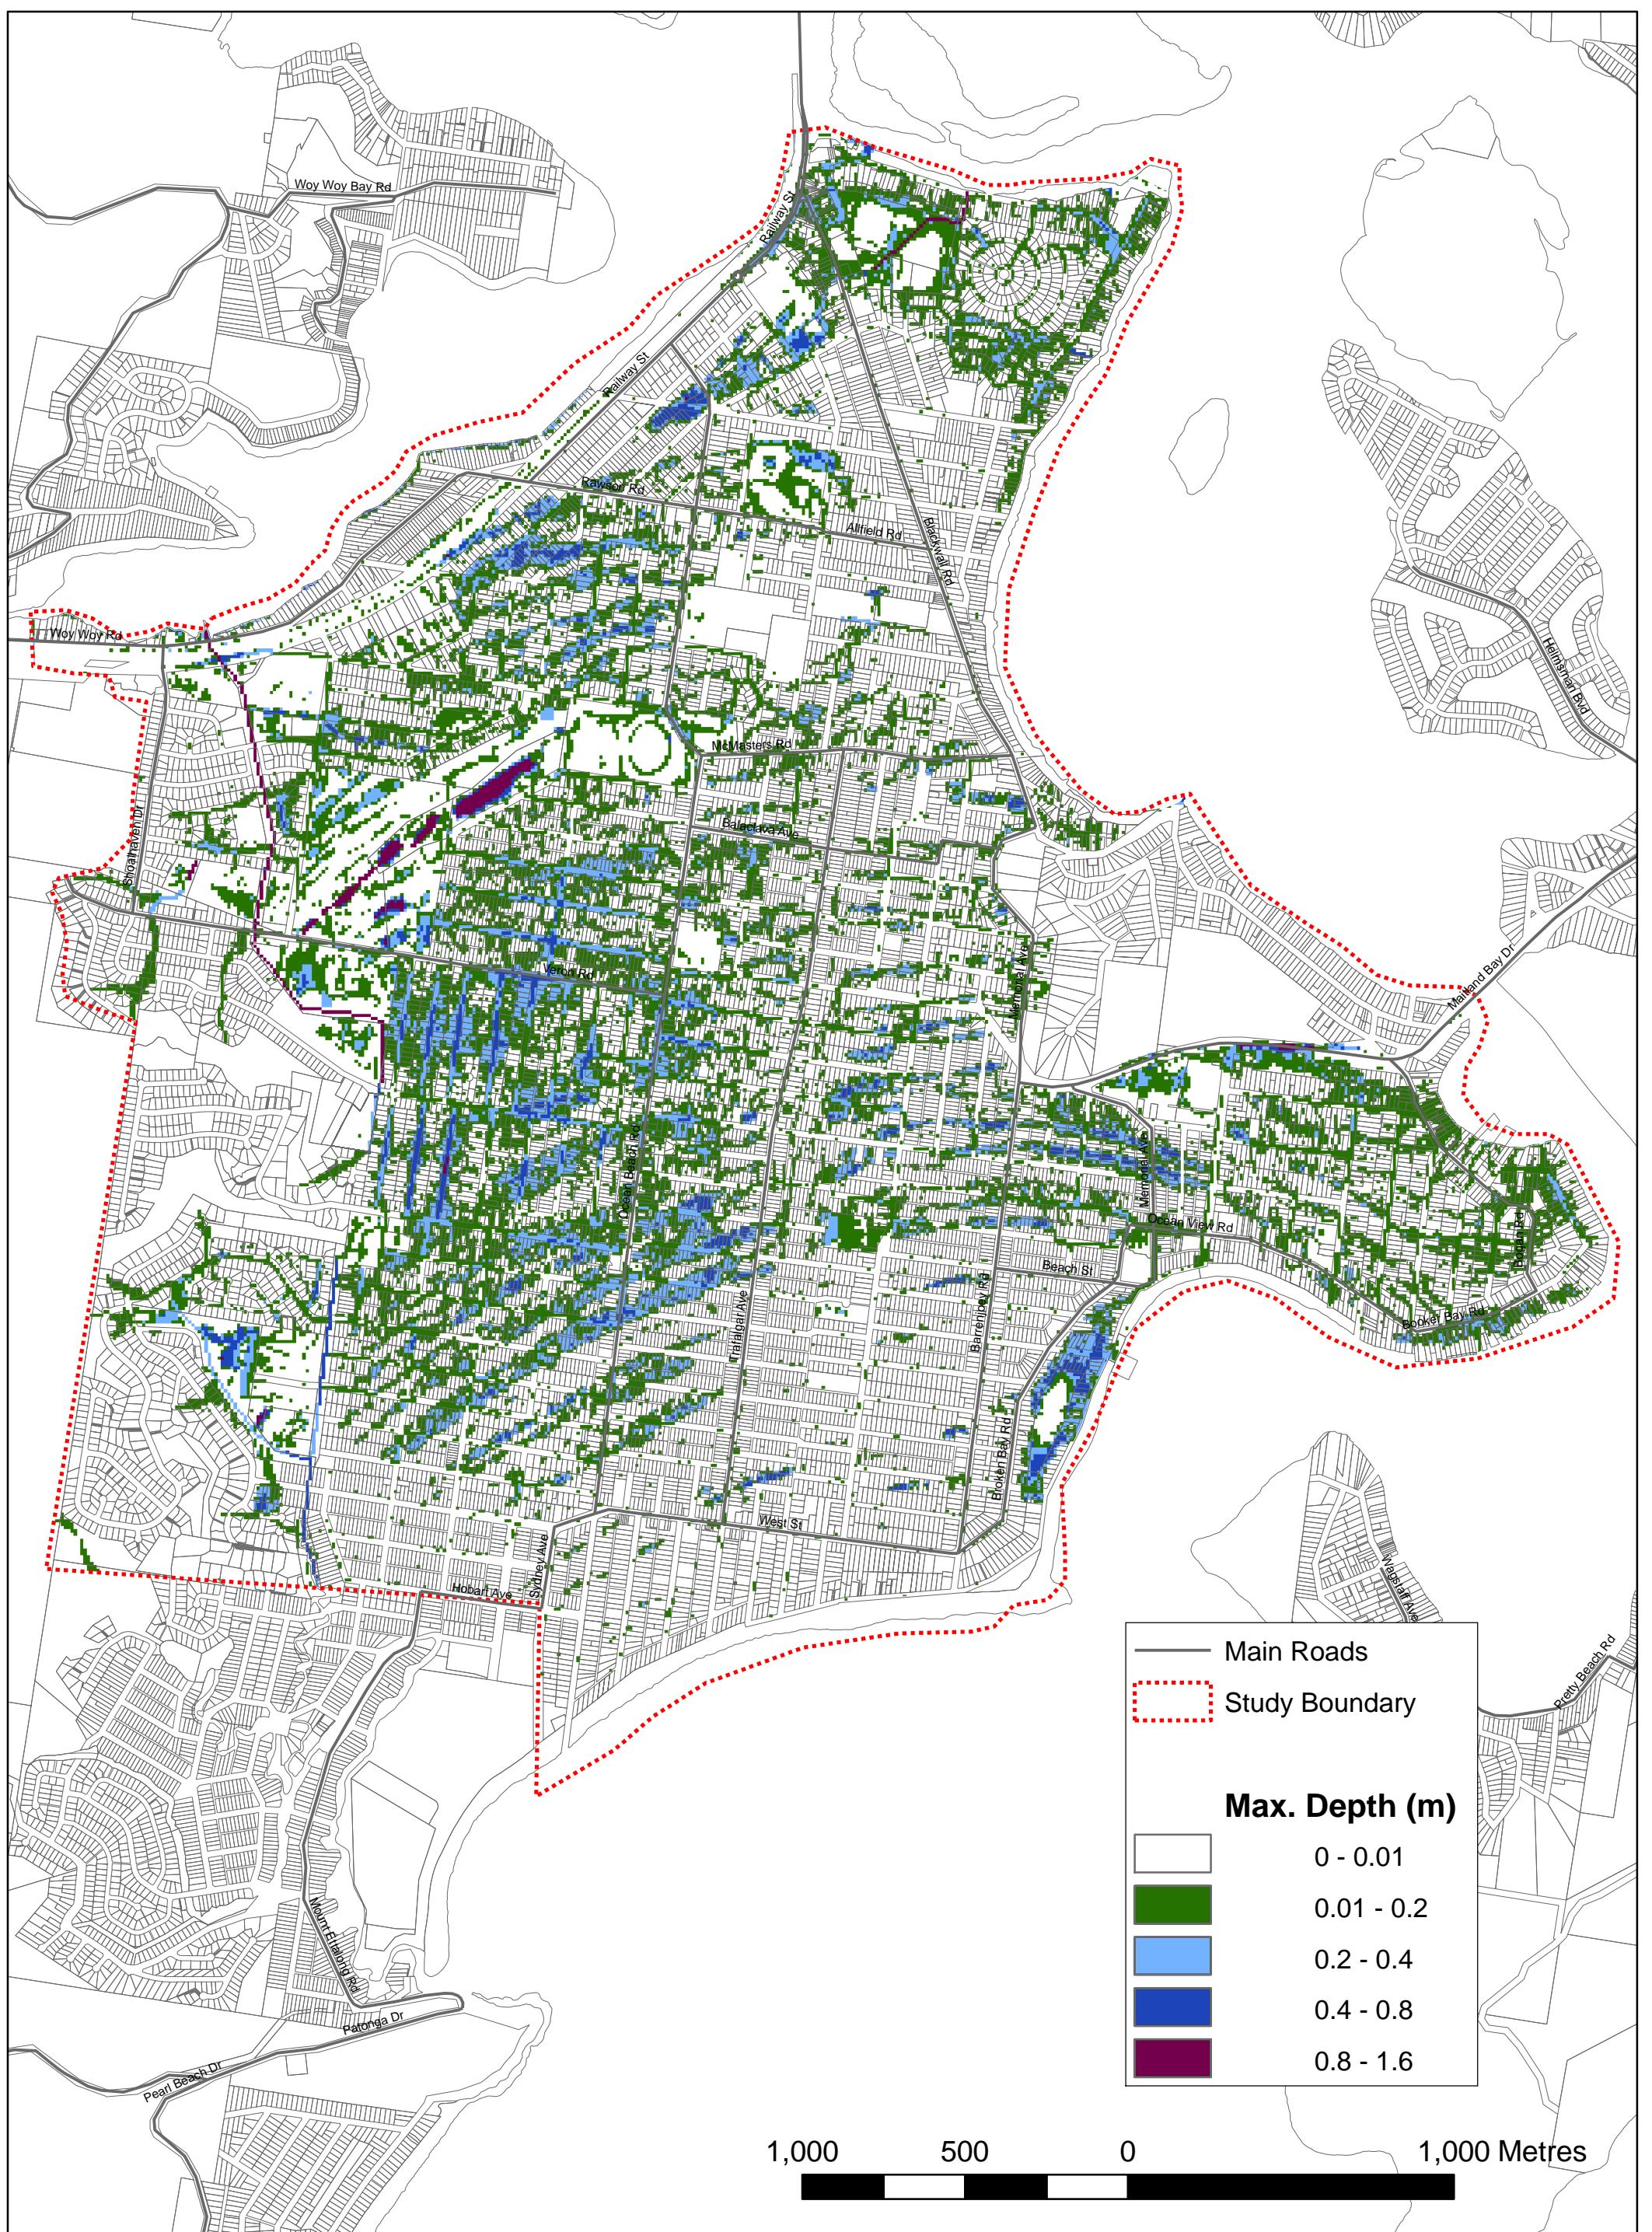

Figure 16 – Modelled Flood Depth for 100yr ARI (1% AEP) with Existing Development.

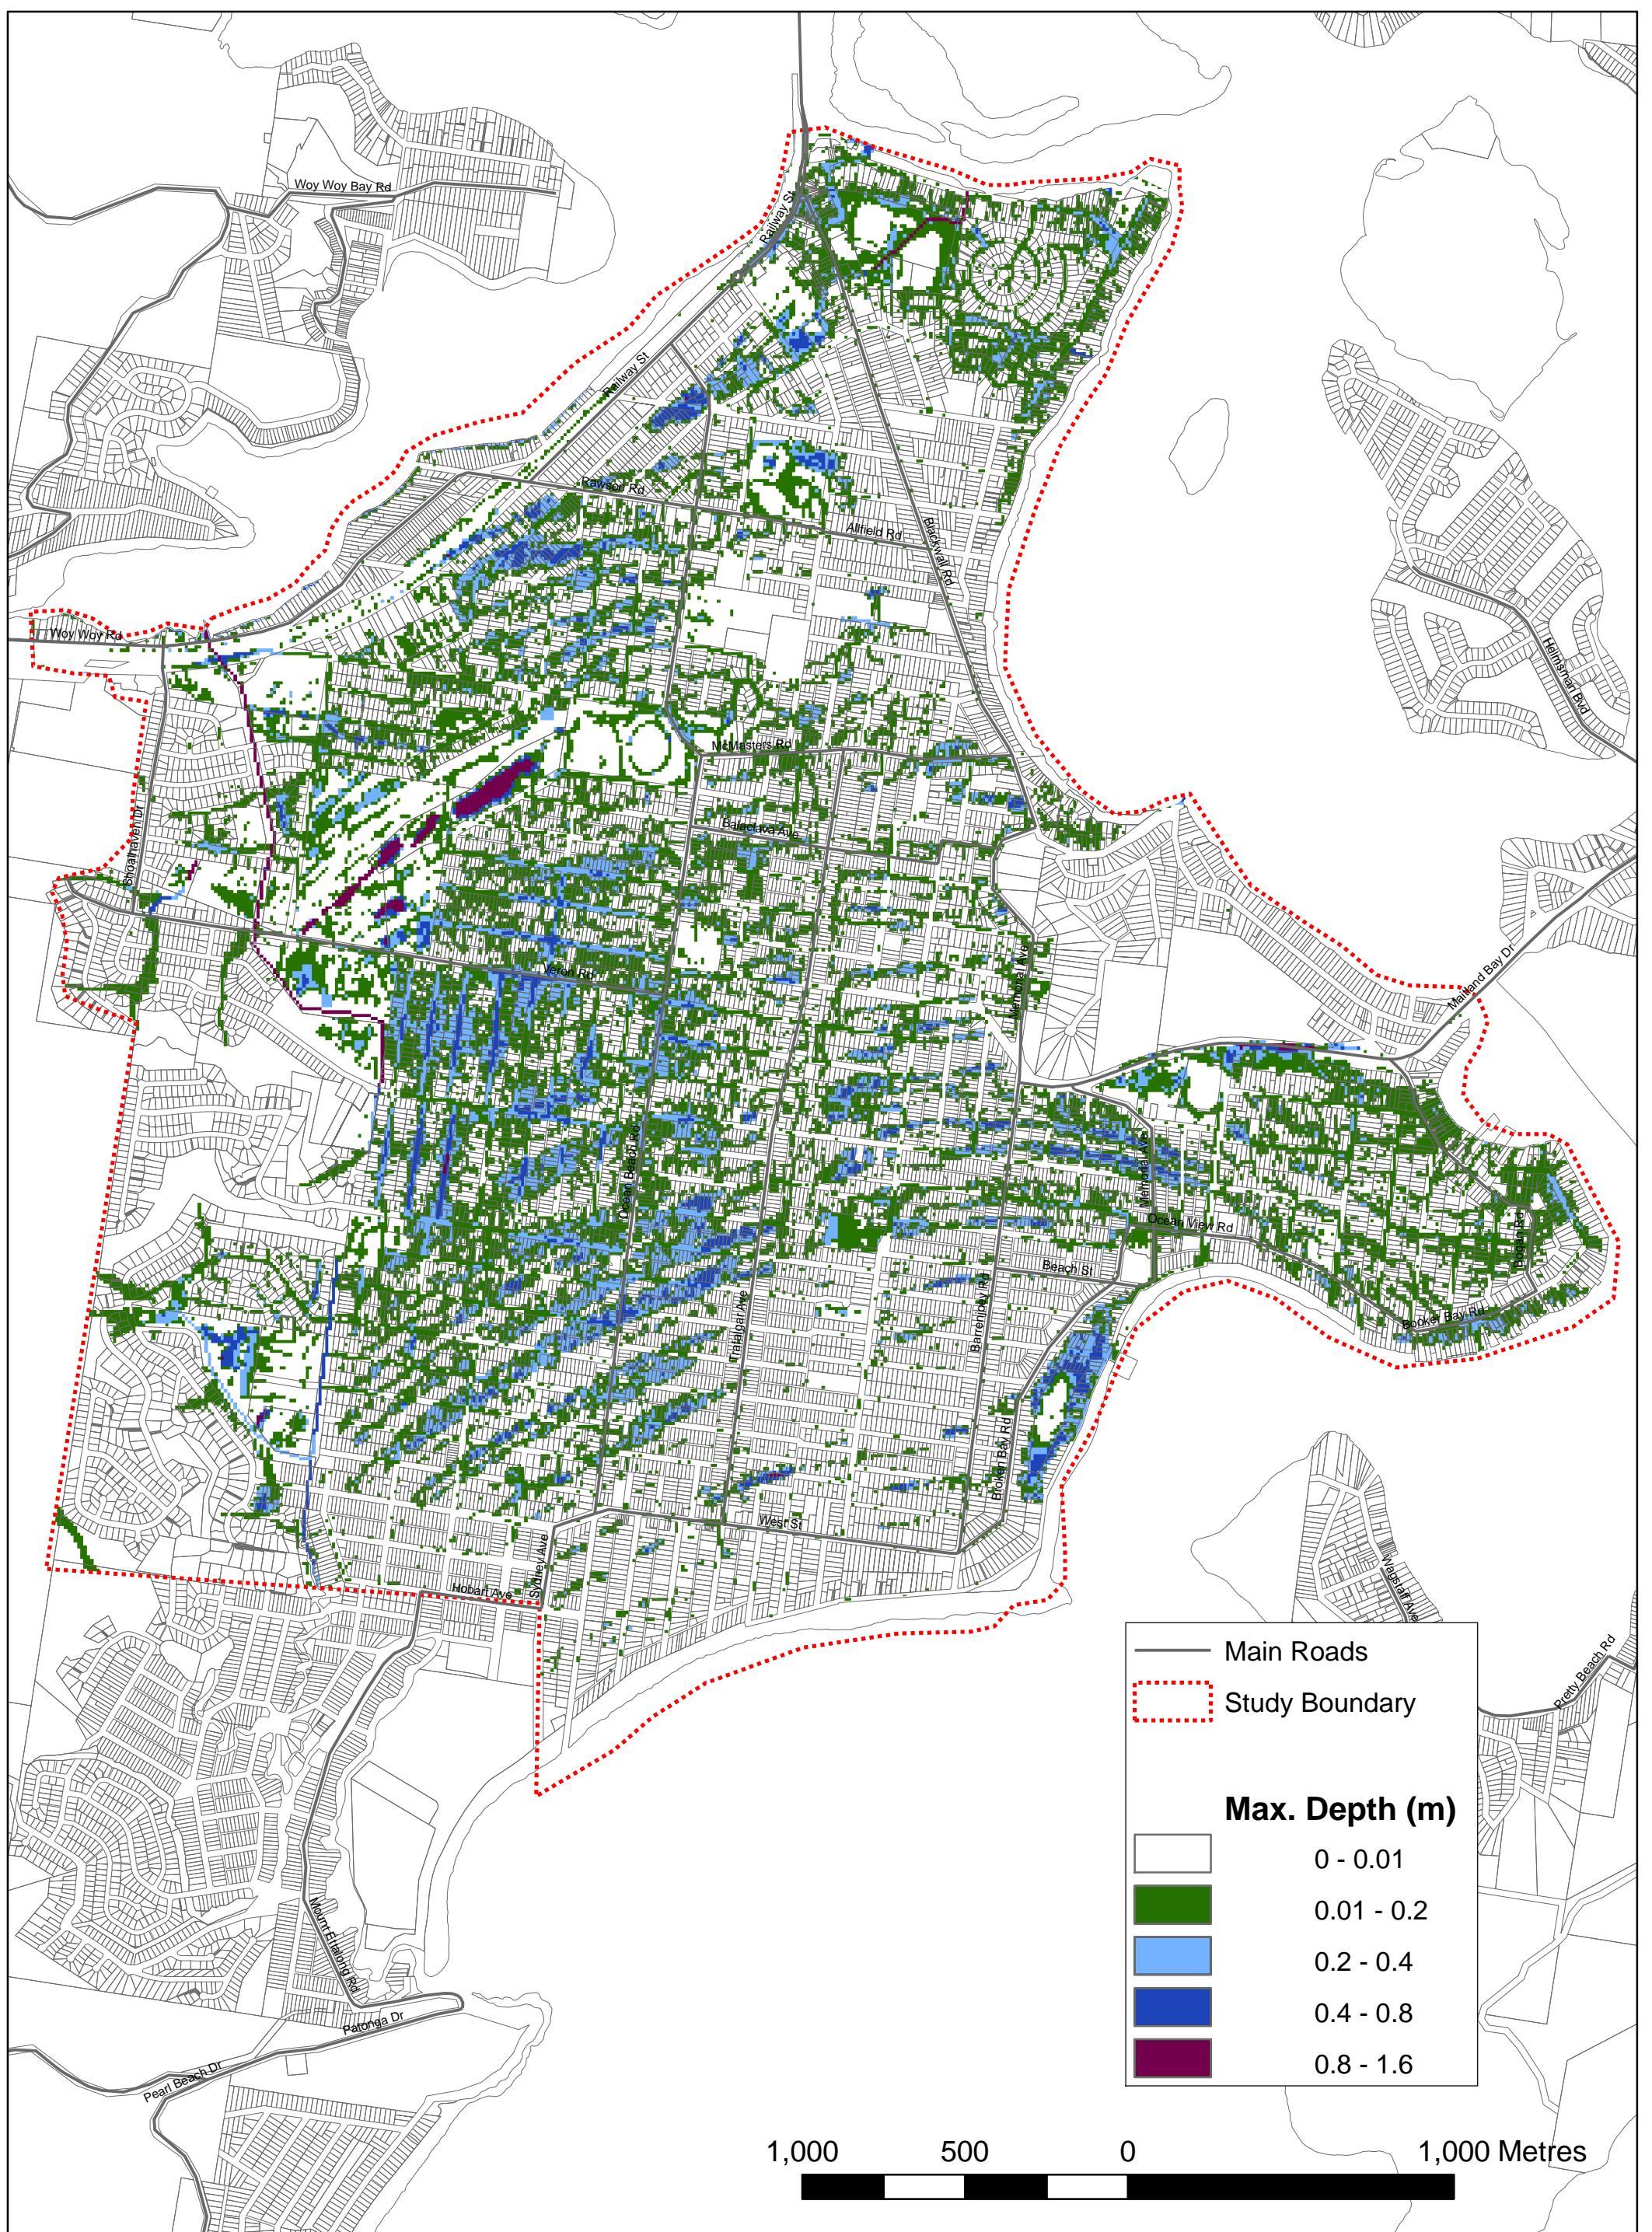

Figure 17 – Modelled Flood Depth for 200yr ARI (0.5% AEP) with Existing Development.

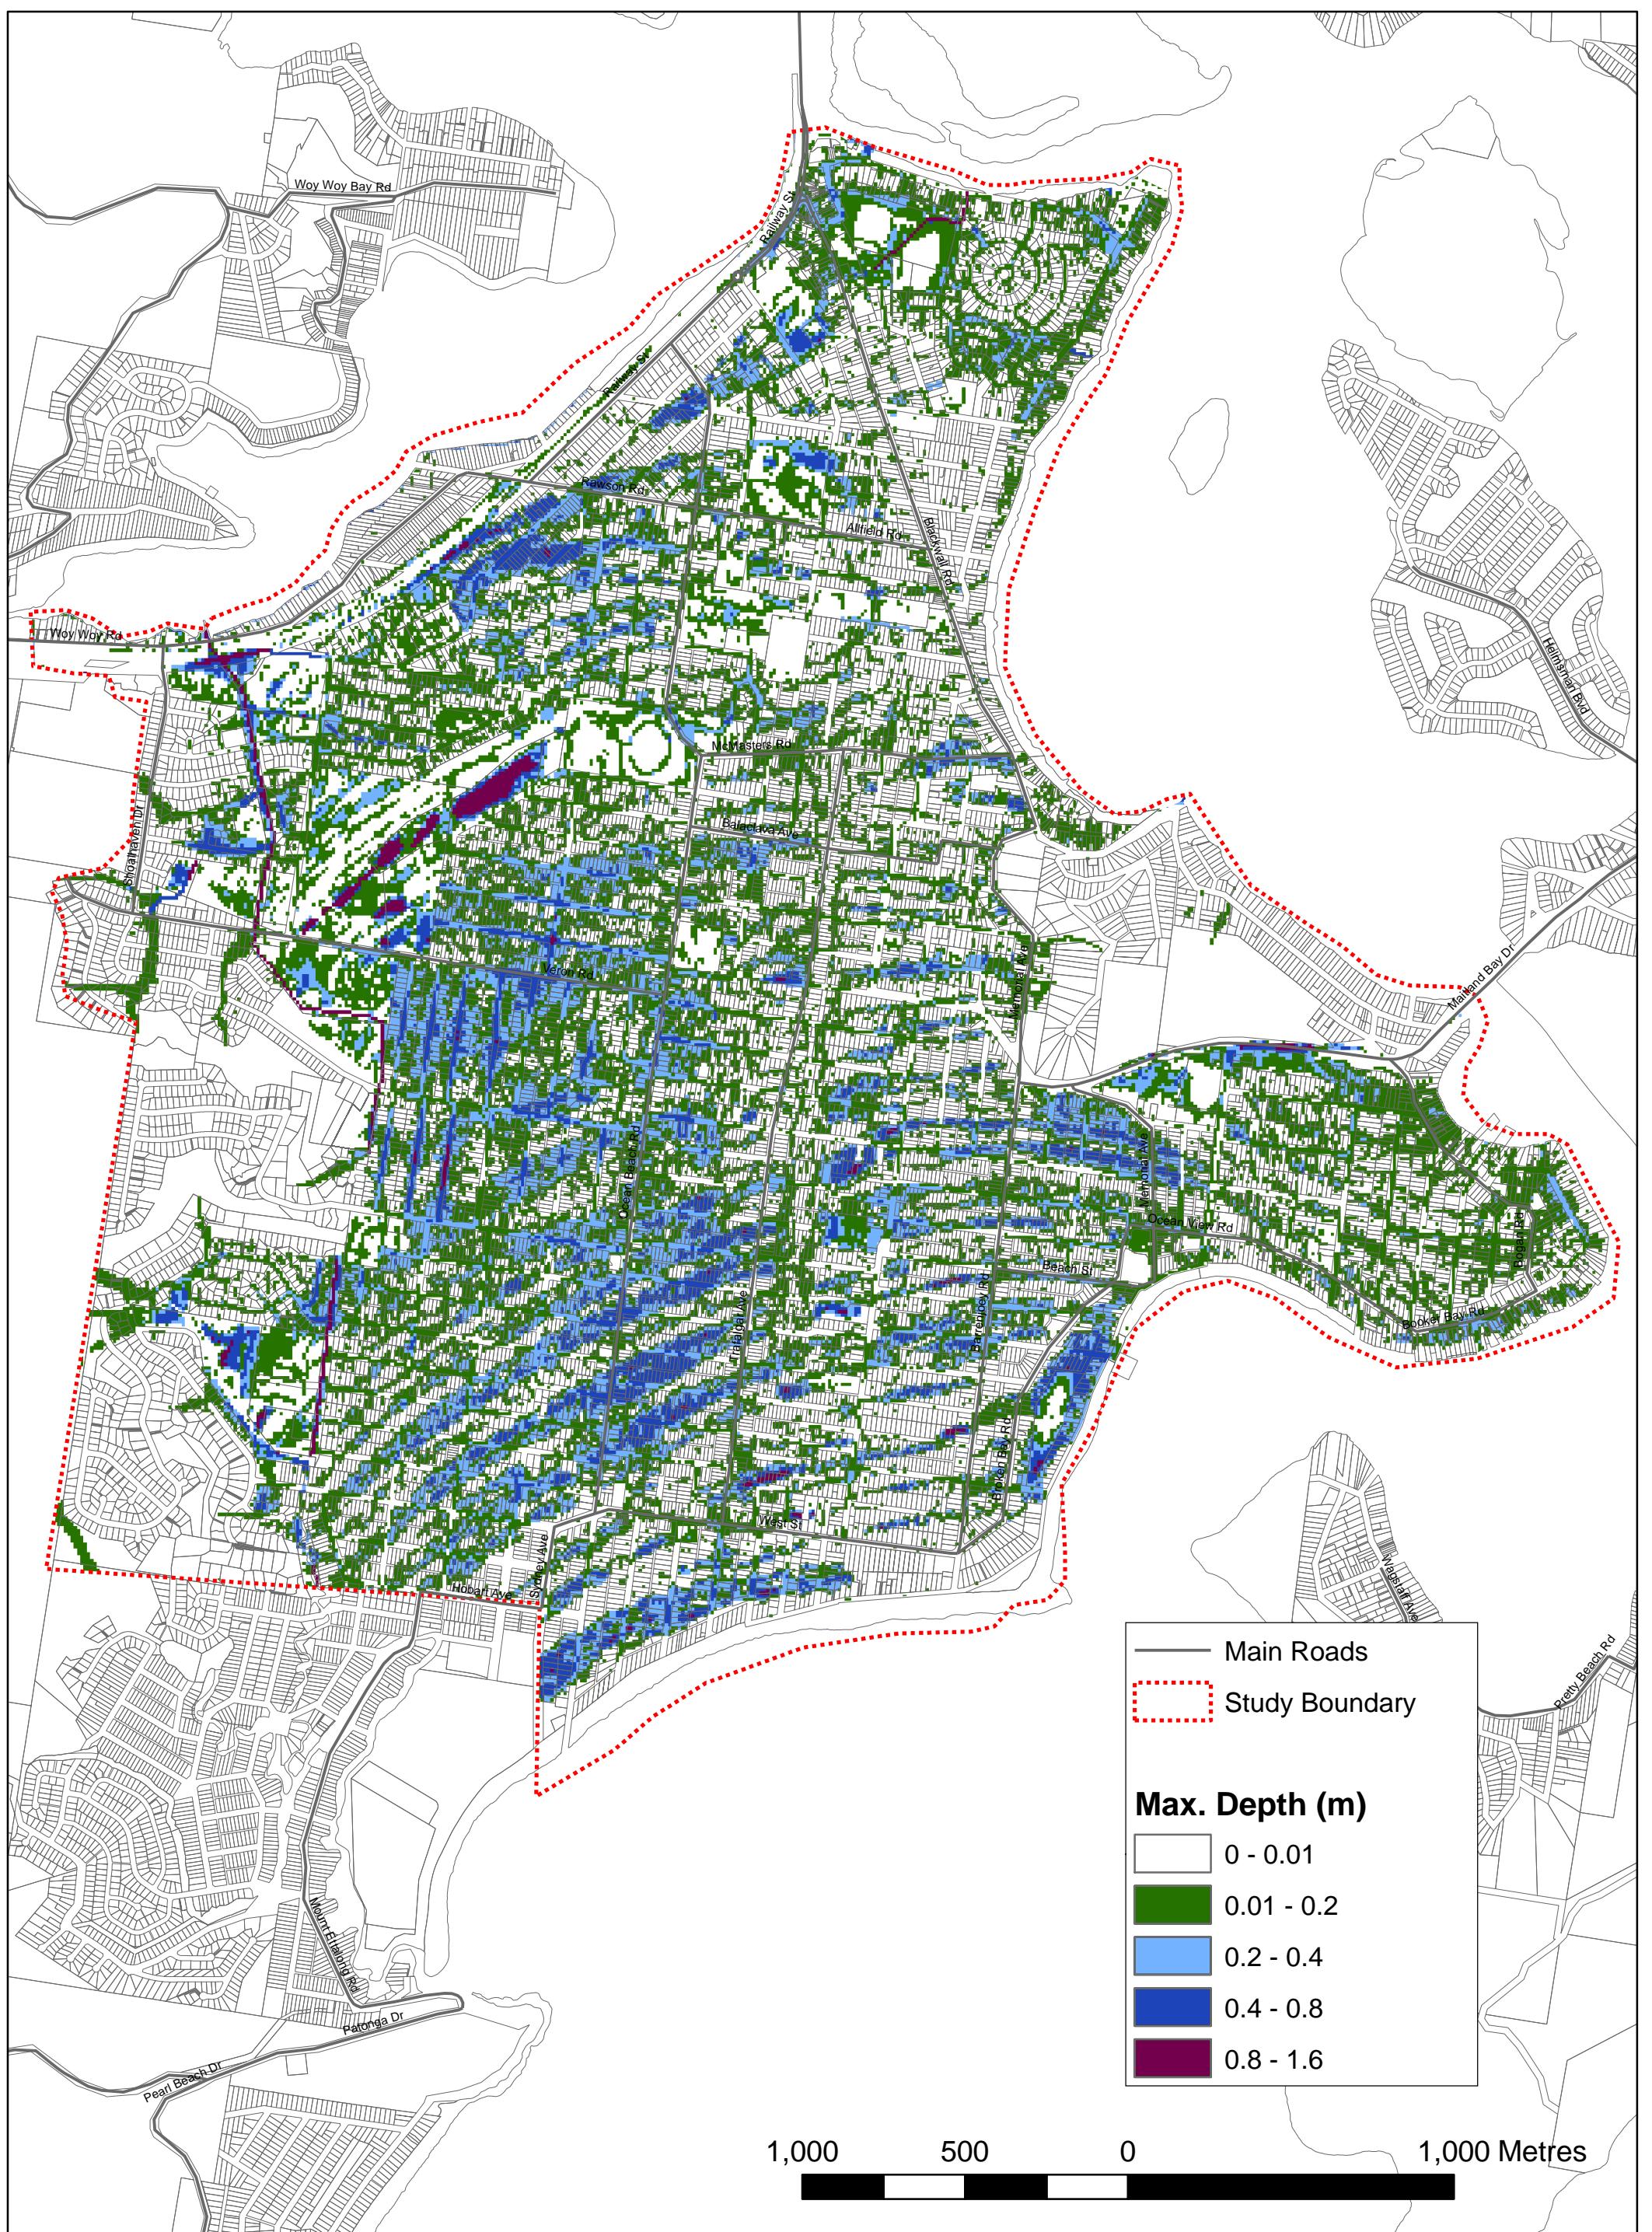

Figure 18 – Modelled Flood Depth for PMP Event with Existing Development.

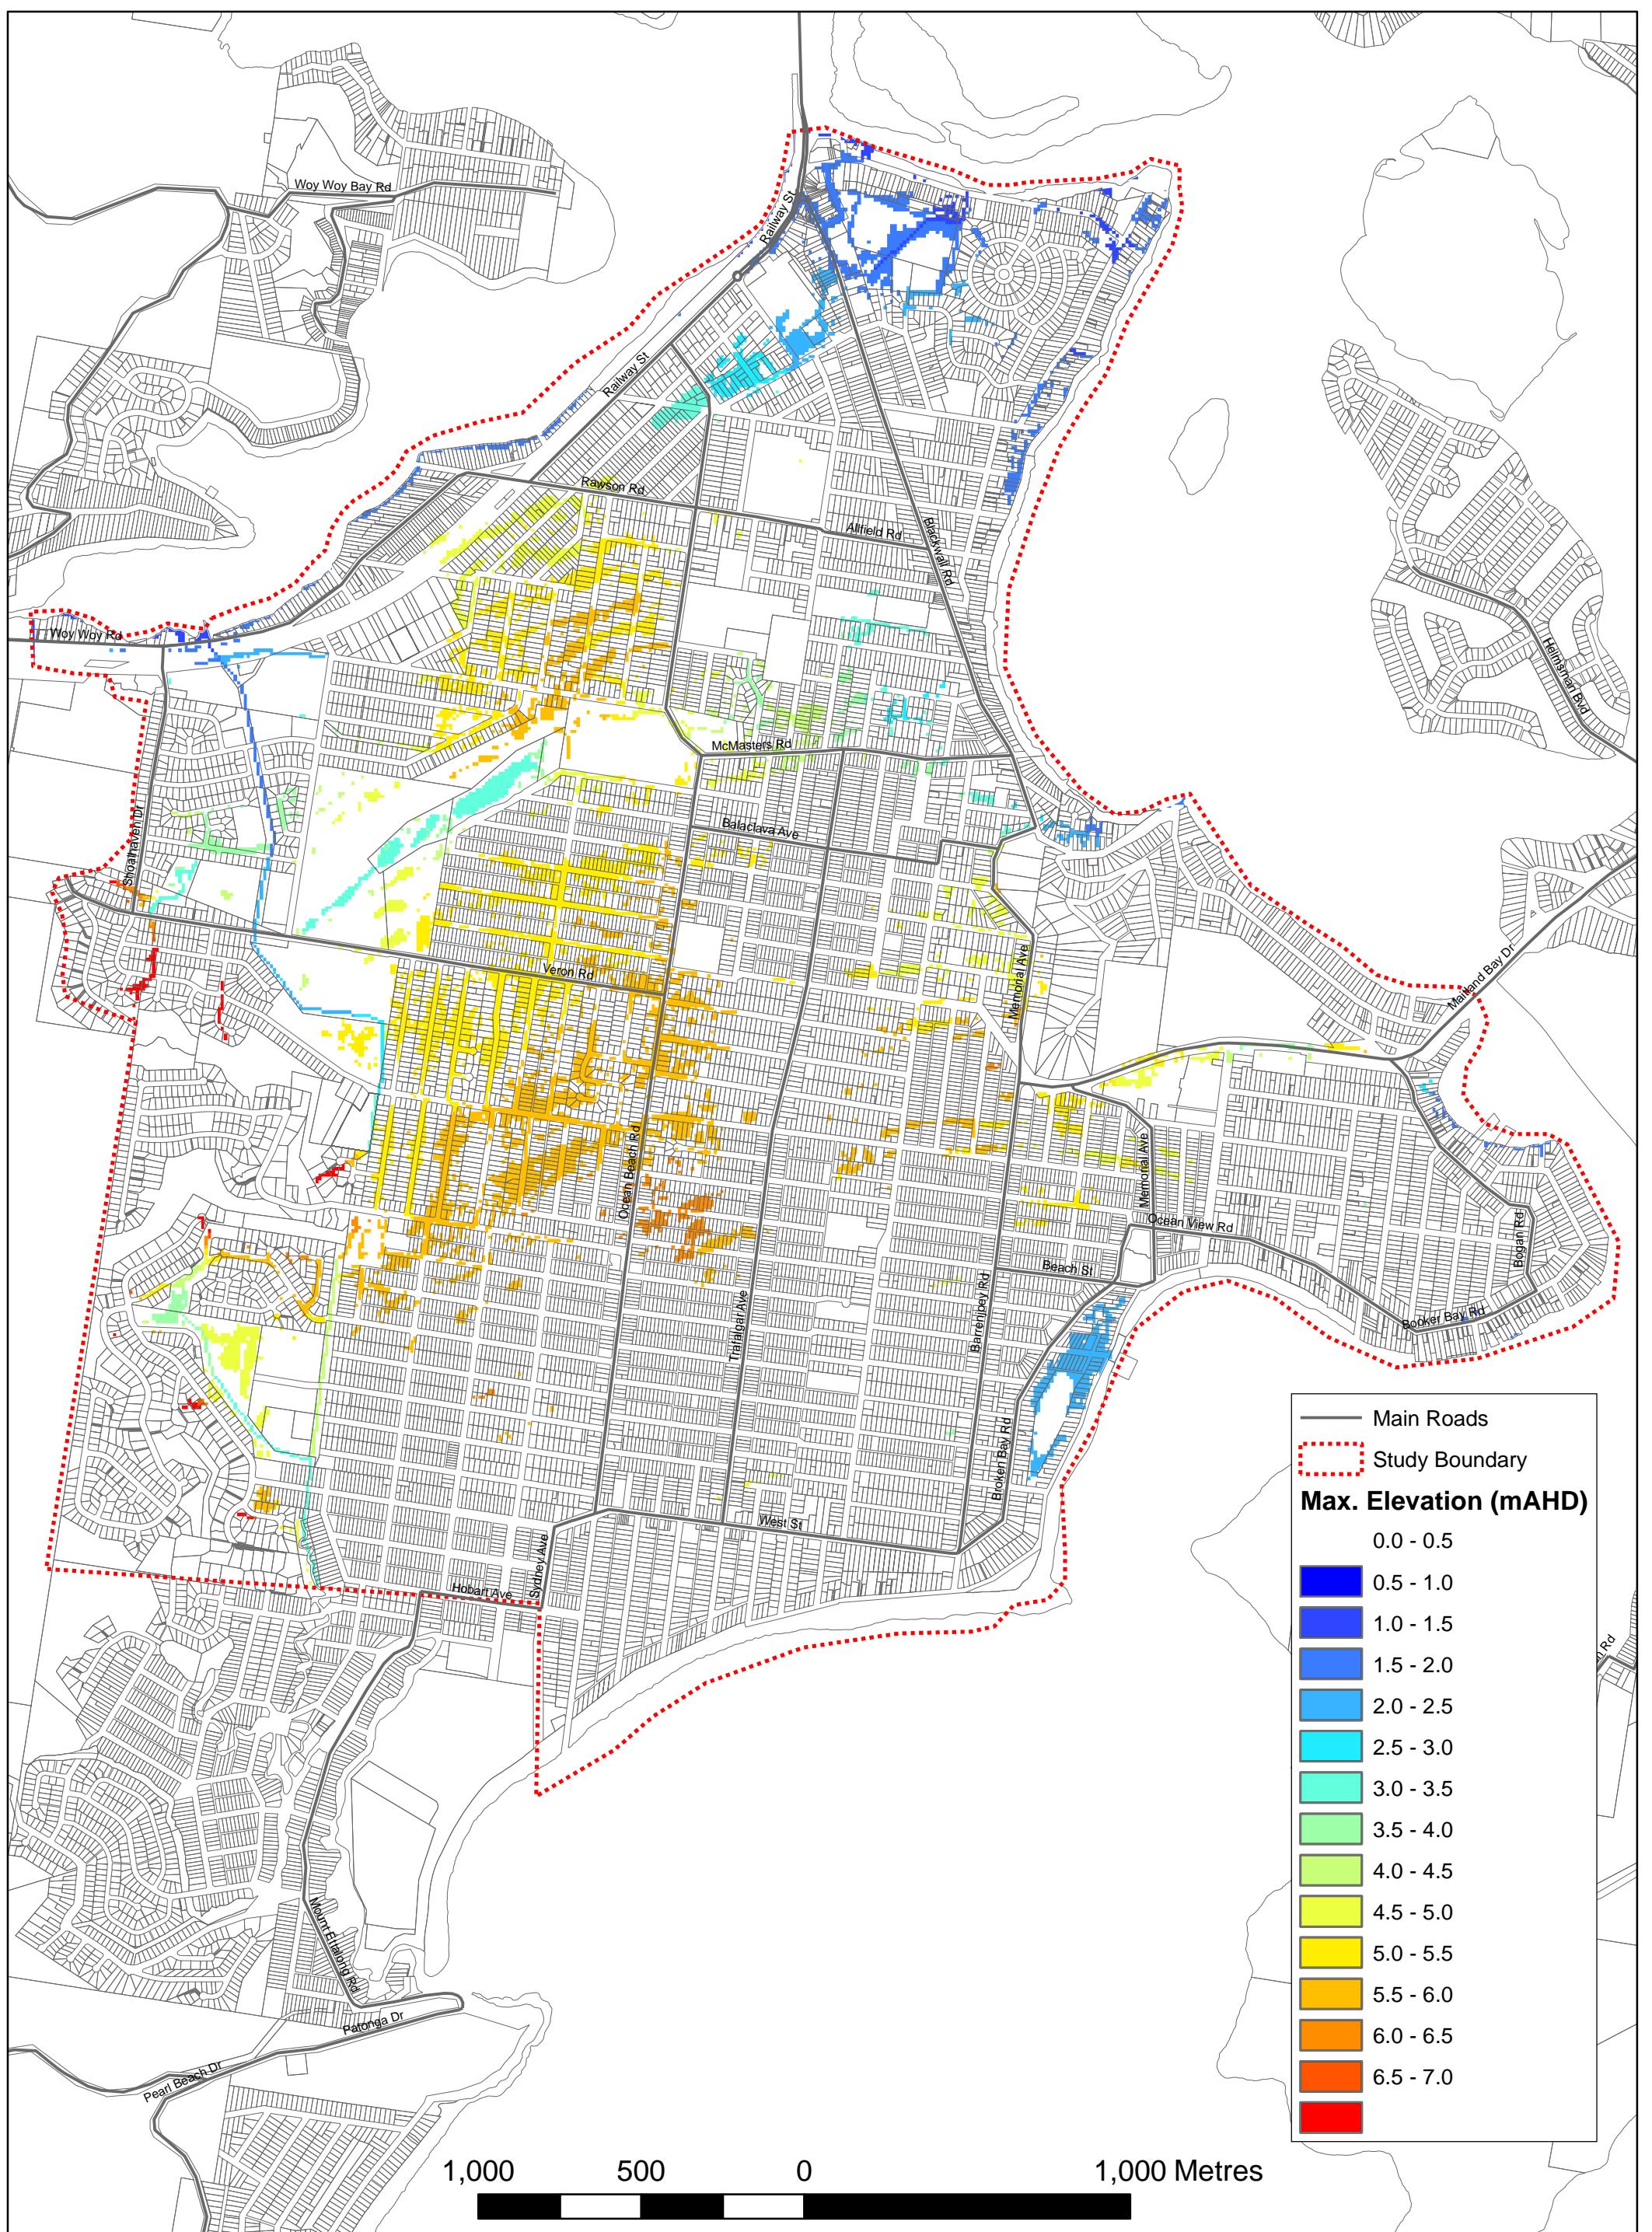

Figure 19 – Modelled Flood Elevation for 2yr ARI (50% AEP) with Existing Development.

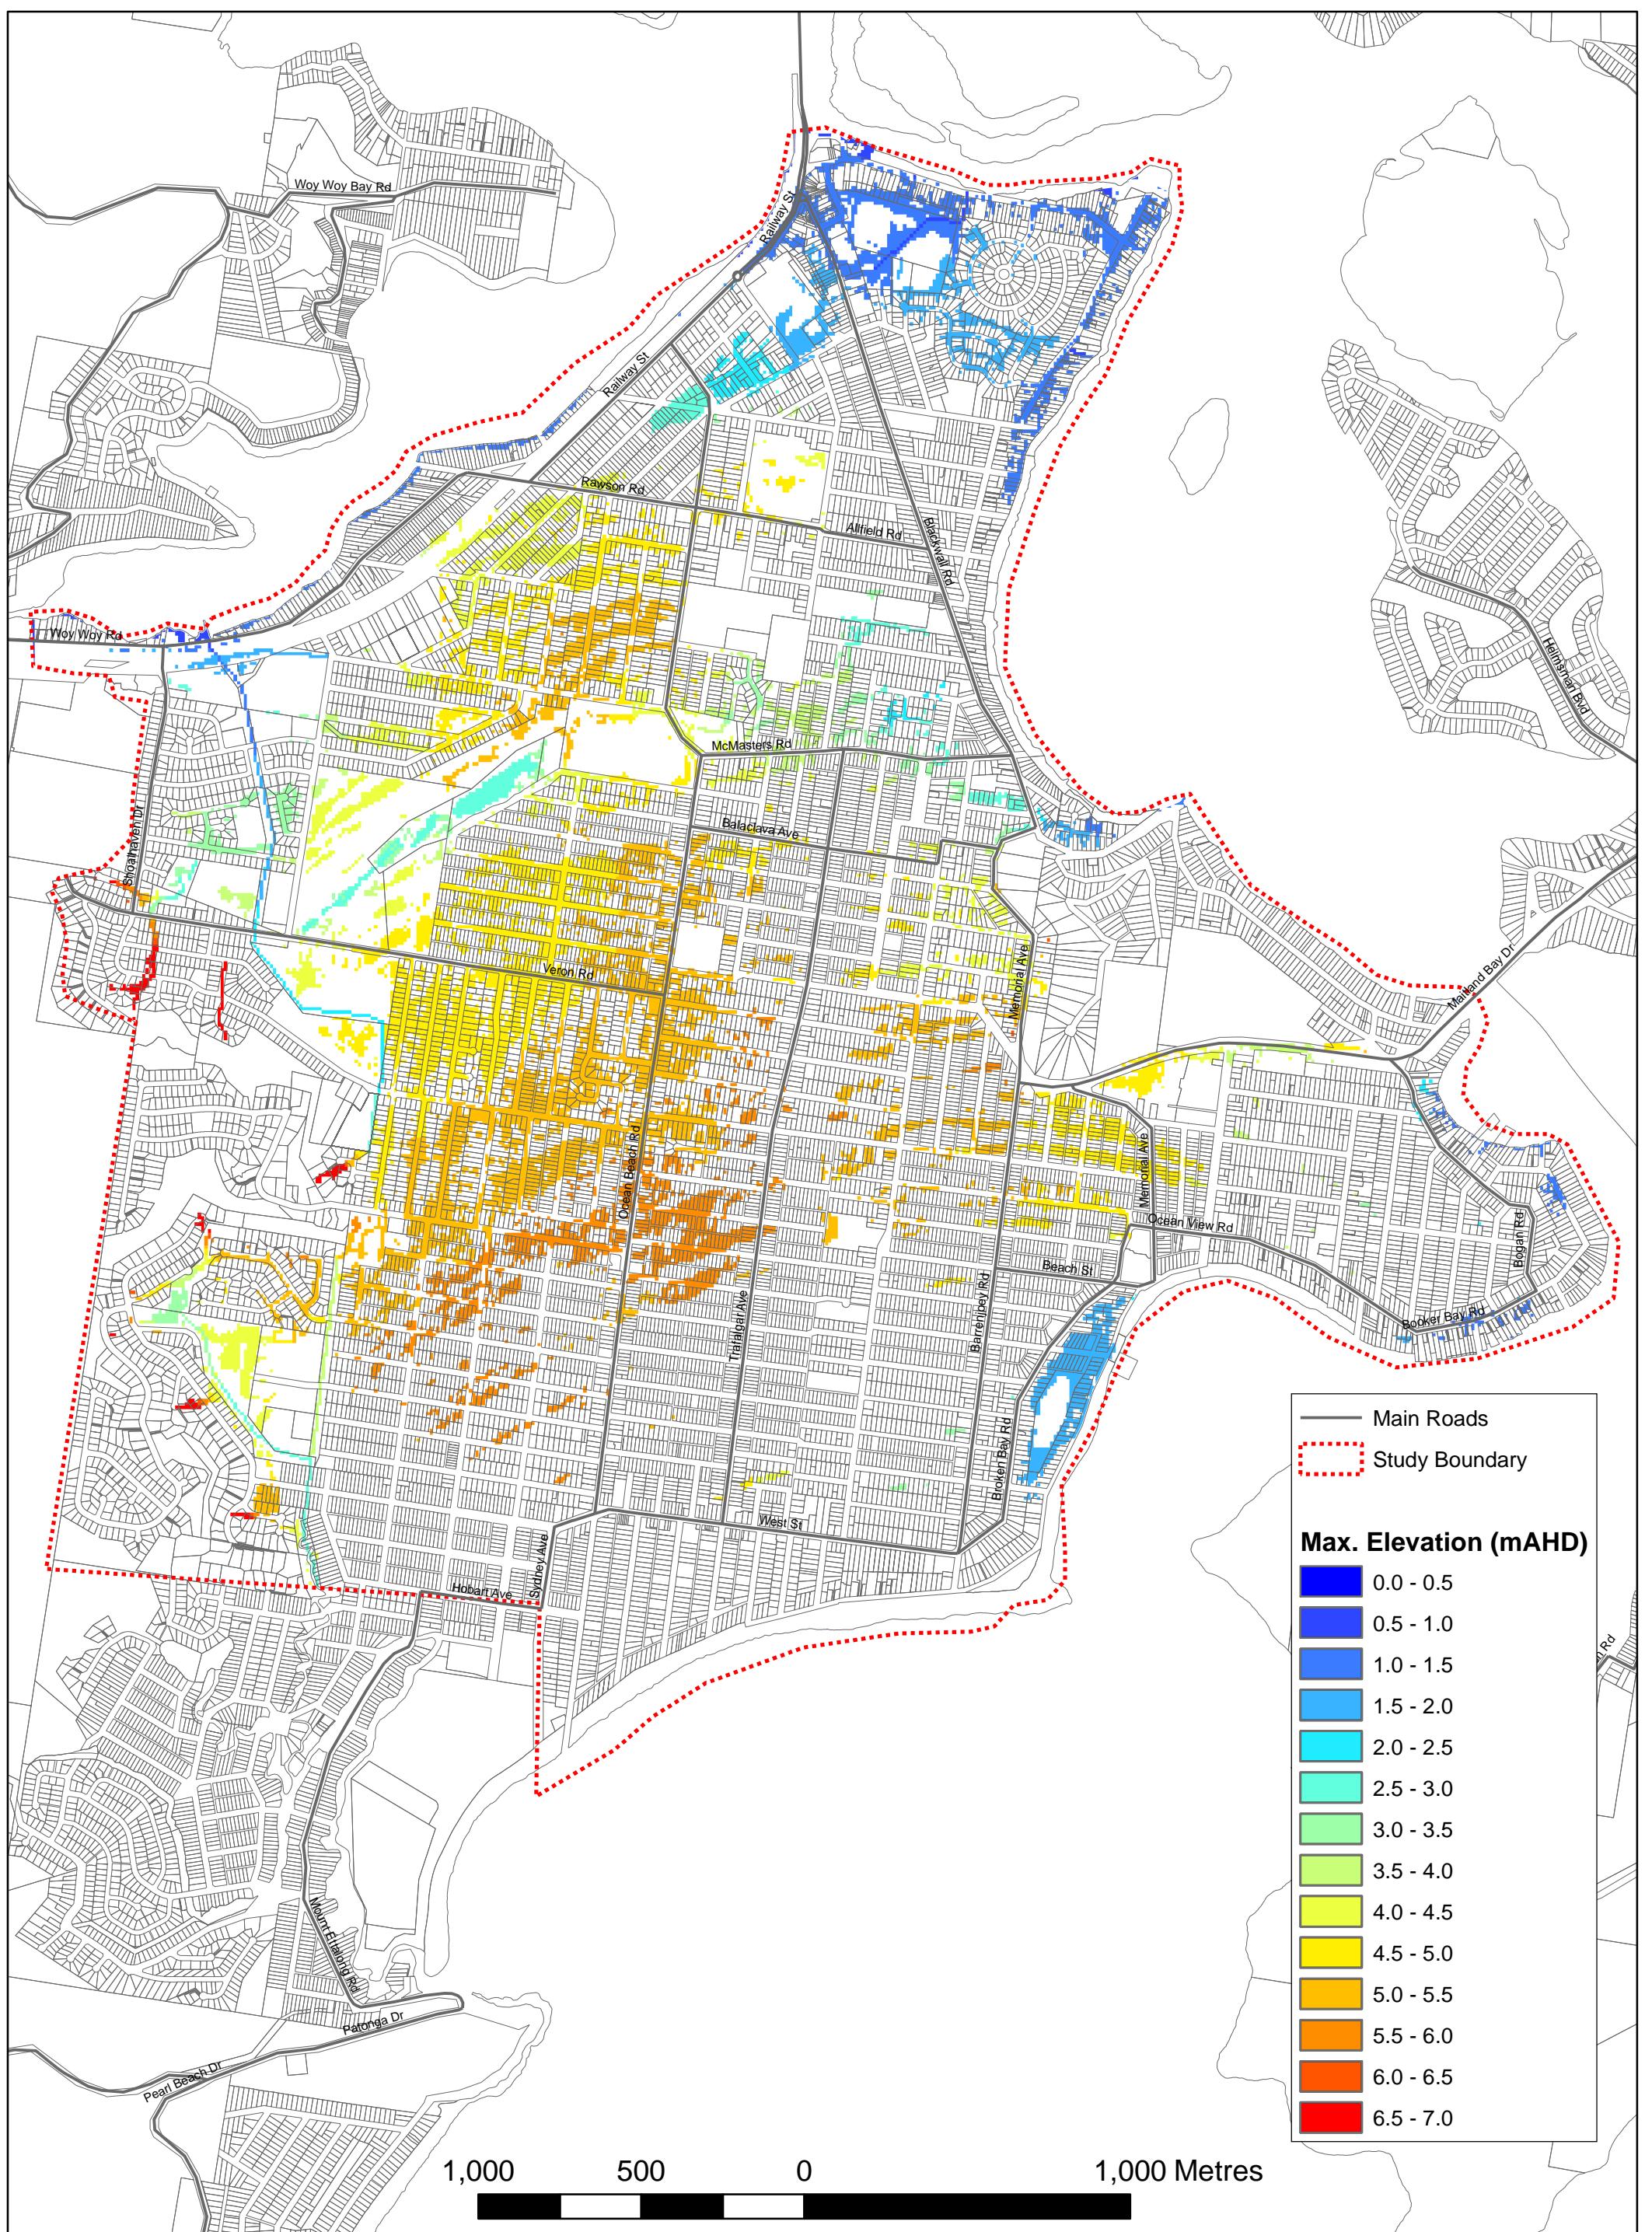

Figure 20 – Modelled Flood Elevation for 10yr ARI (10% AEP) with Existing Development.

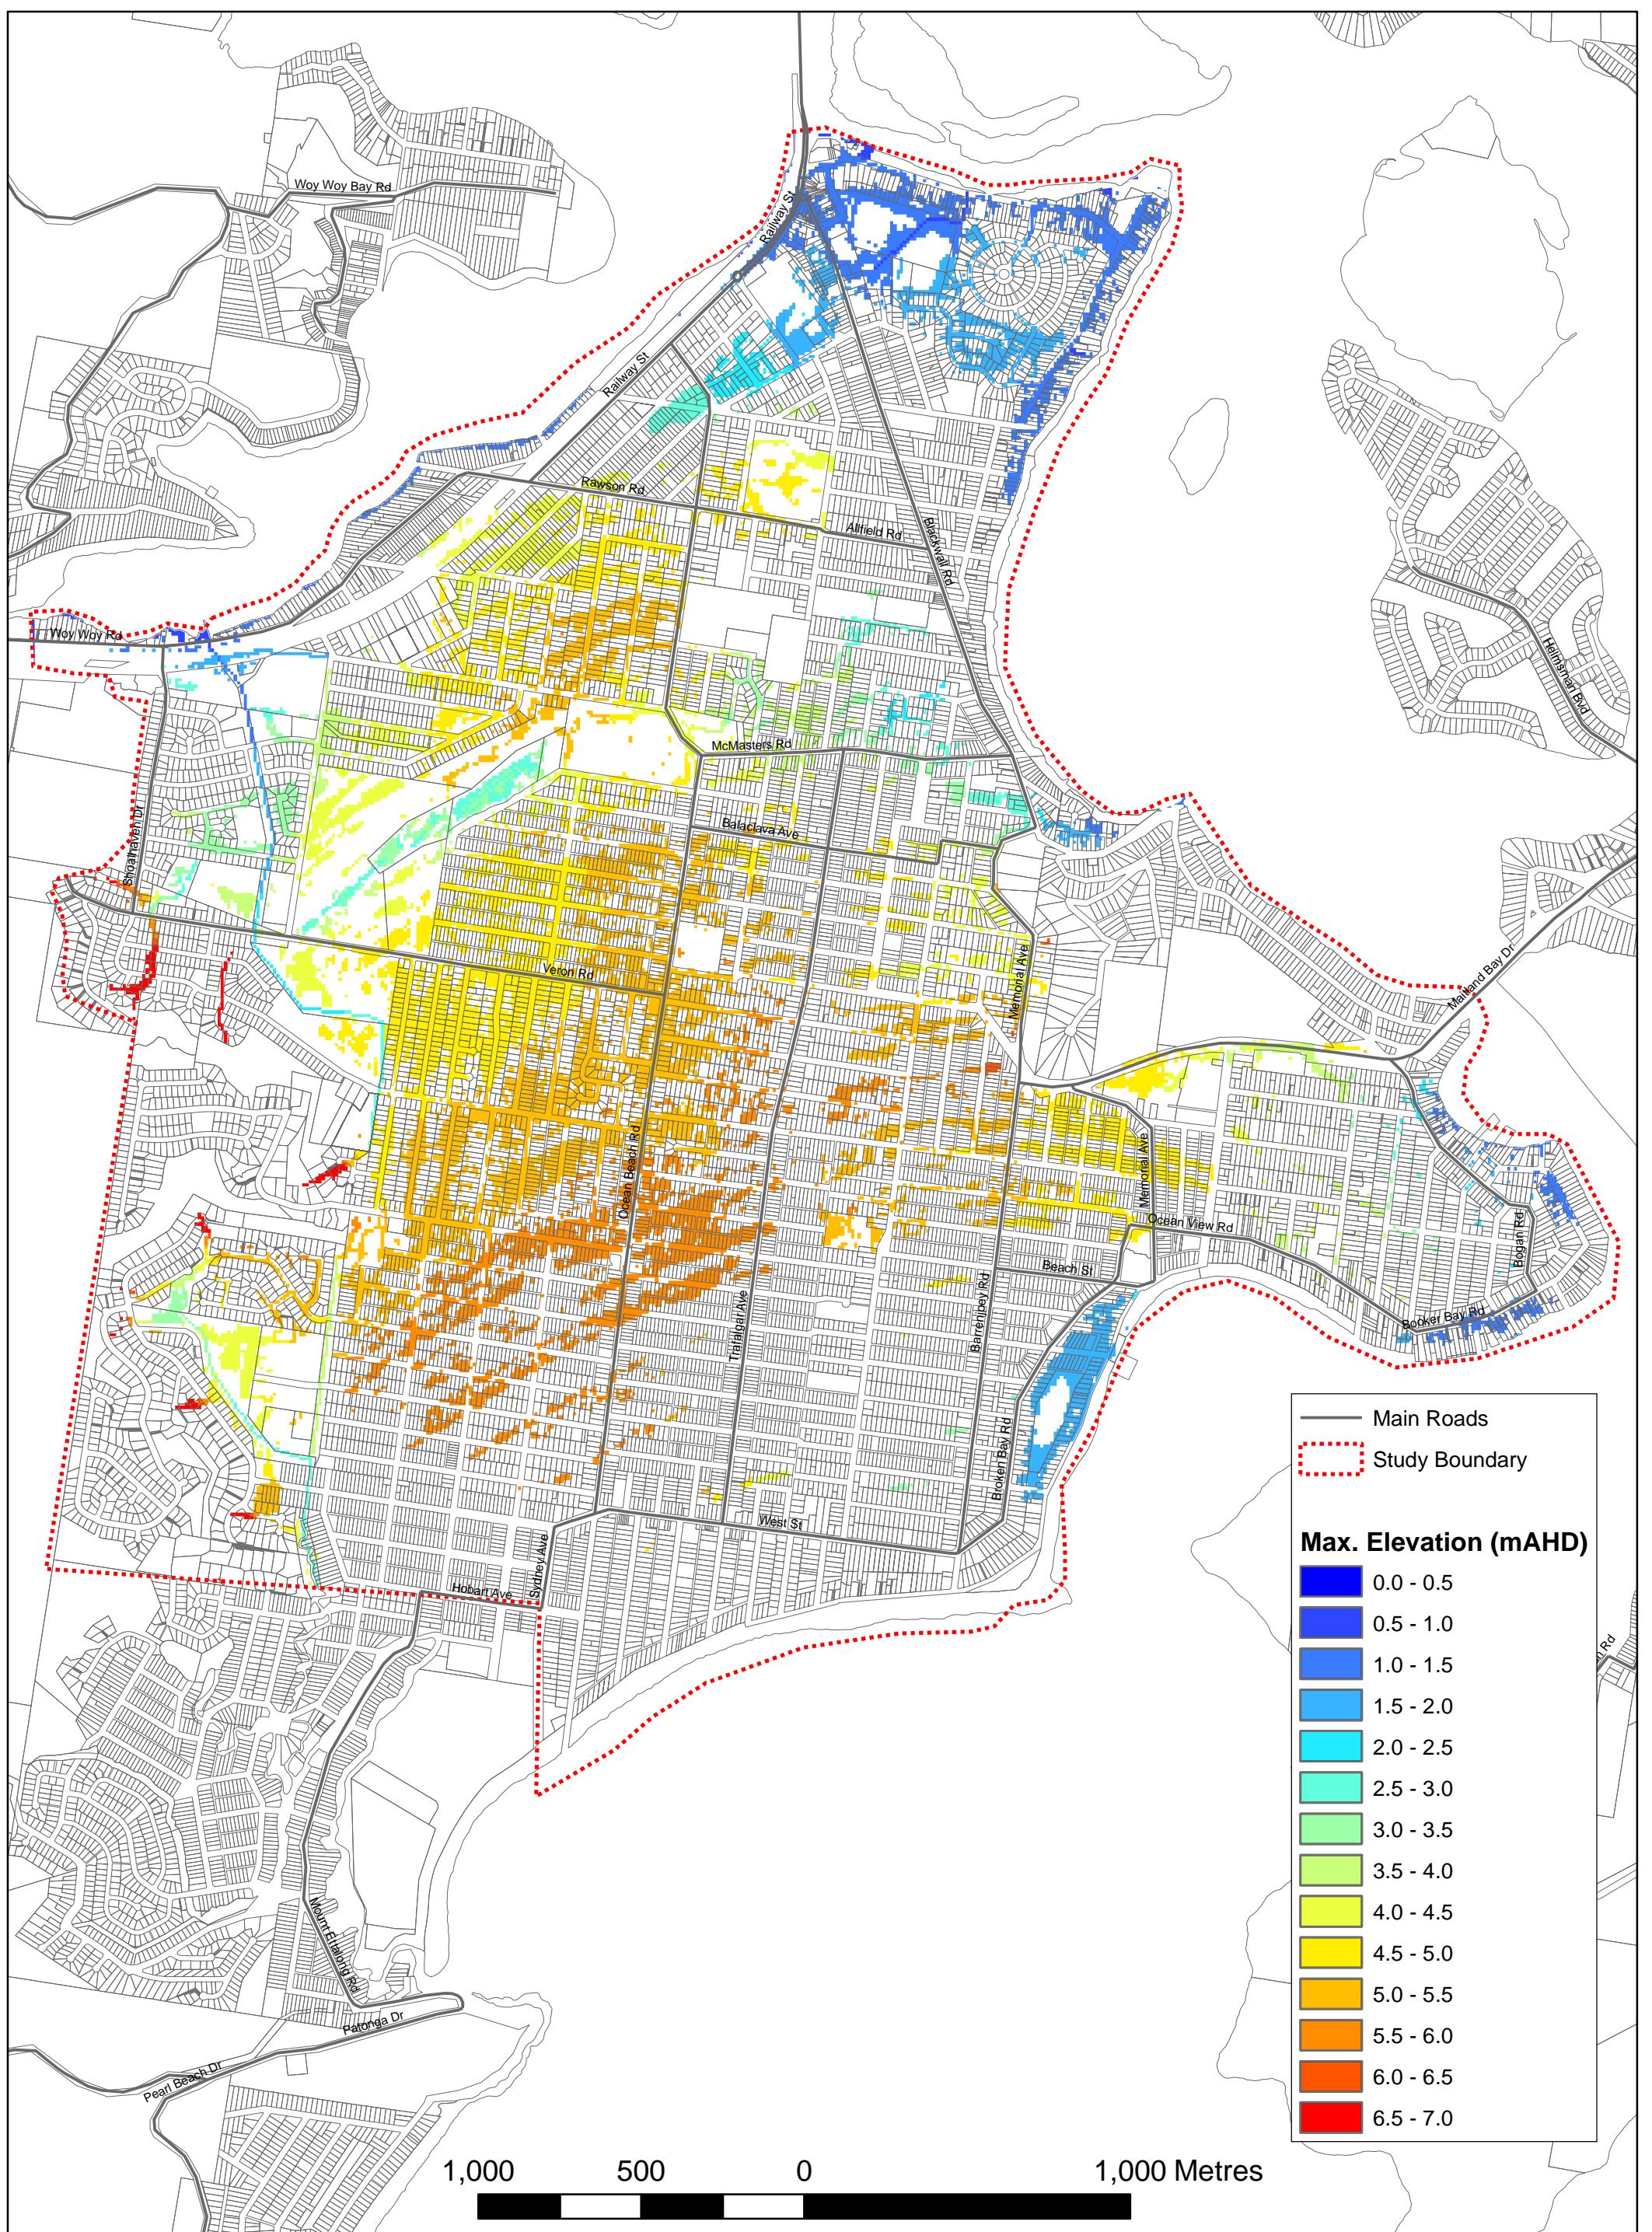

Figure 21 – Modelled Flood Elevation for 20yr ARI (5% AEP) with Existing Development.

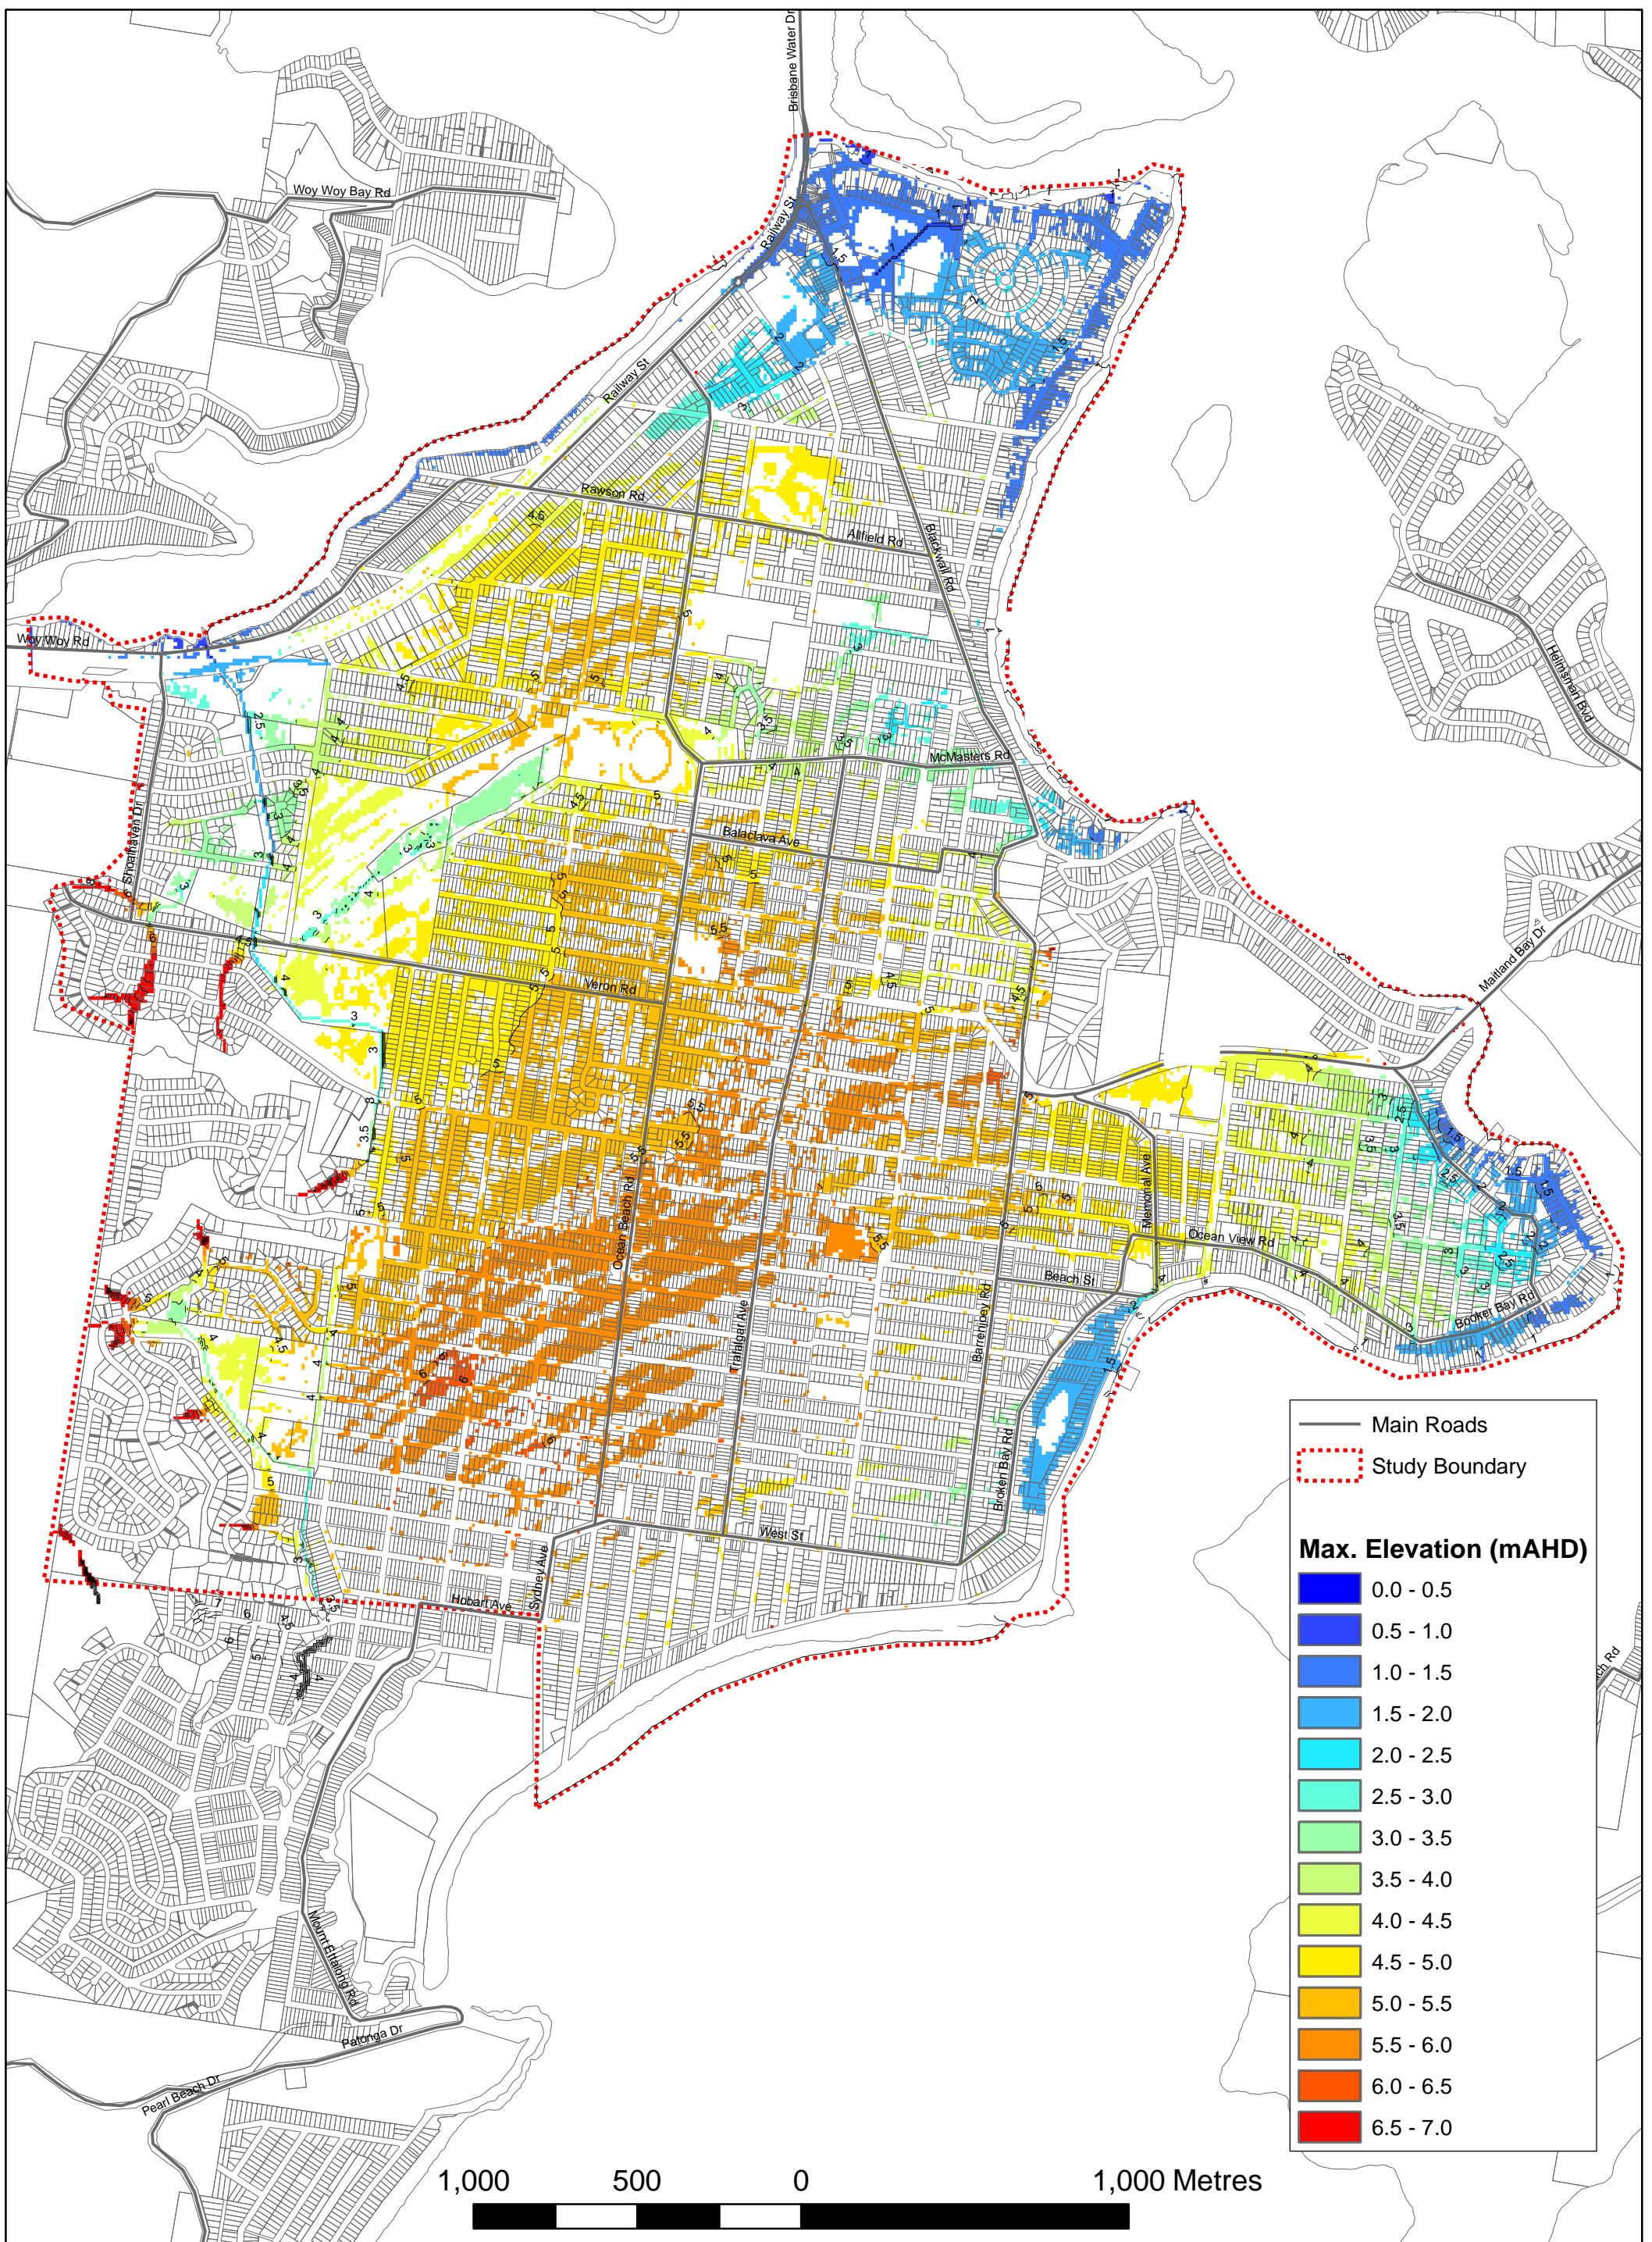

Figure 22 – Modelled Flood Elevation for 100yr ARI (1% AEP) with Existing Development.

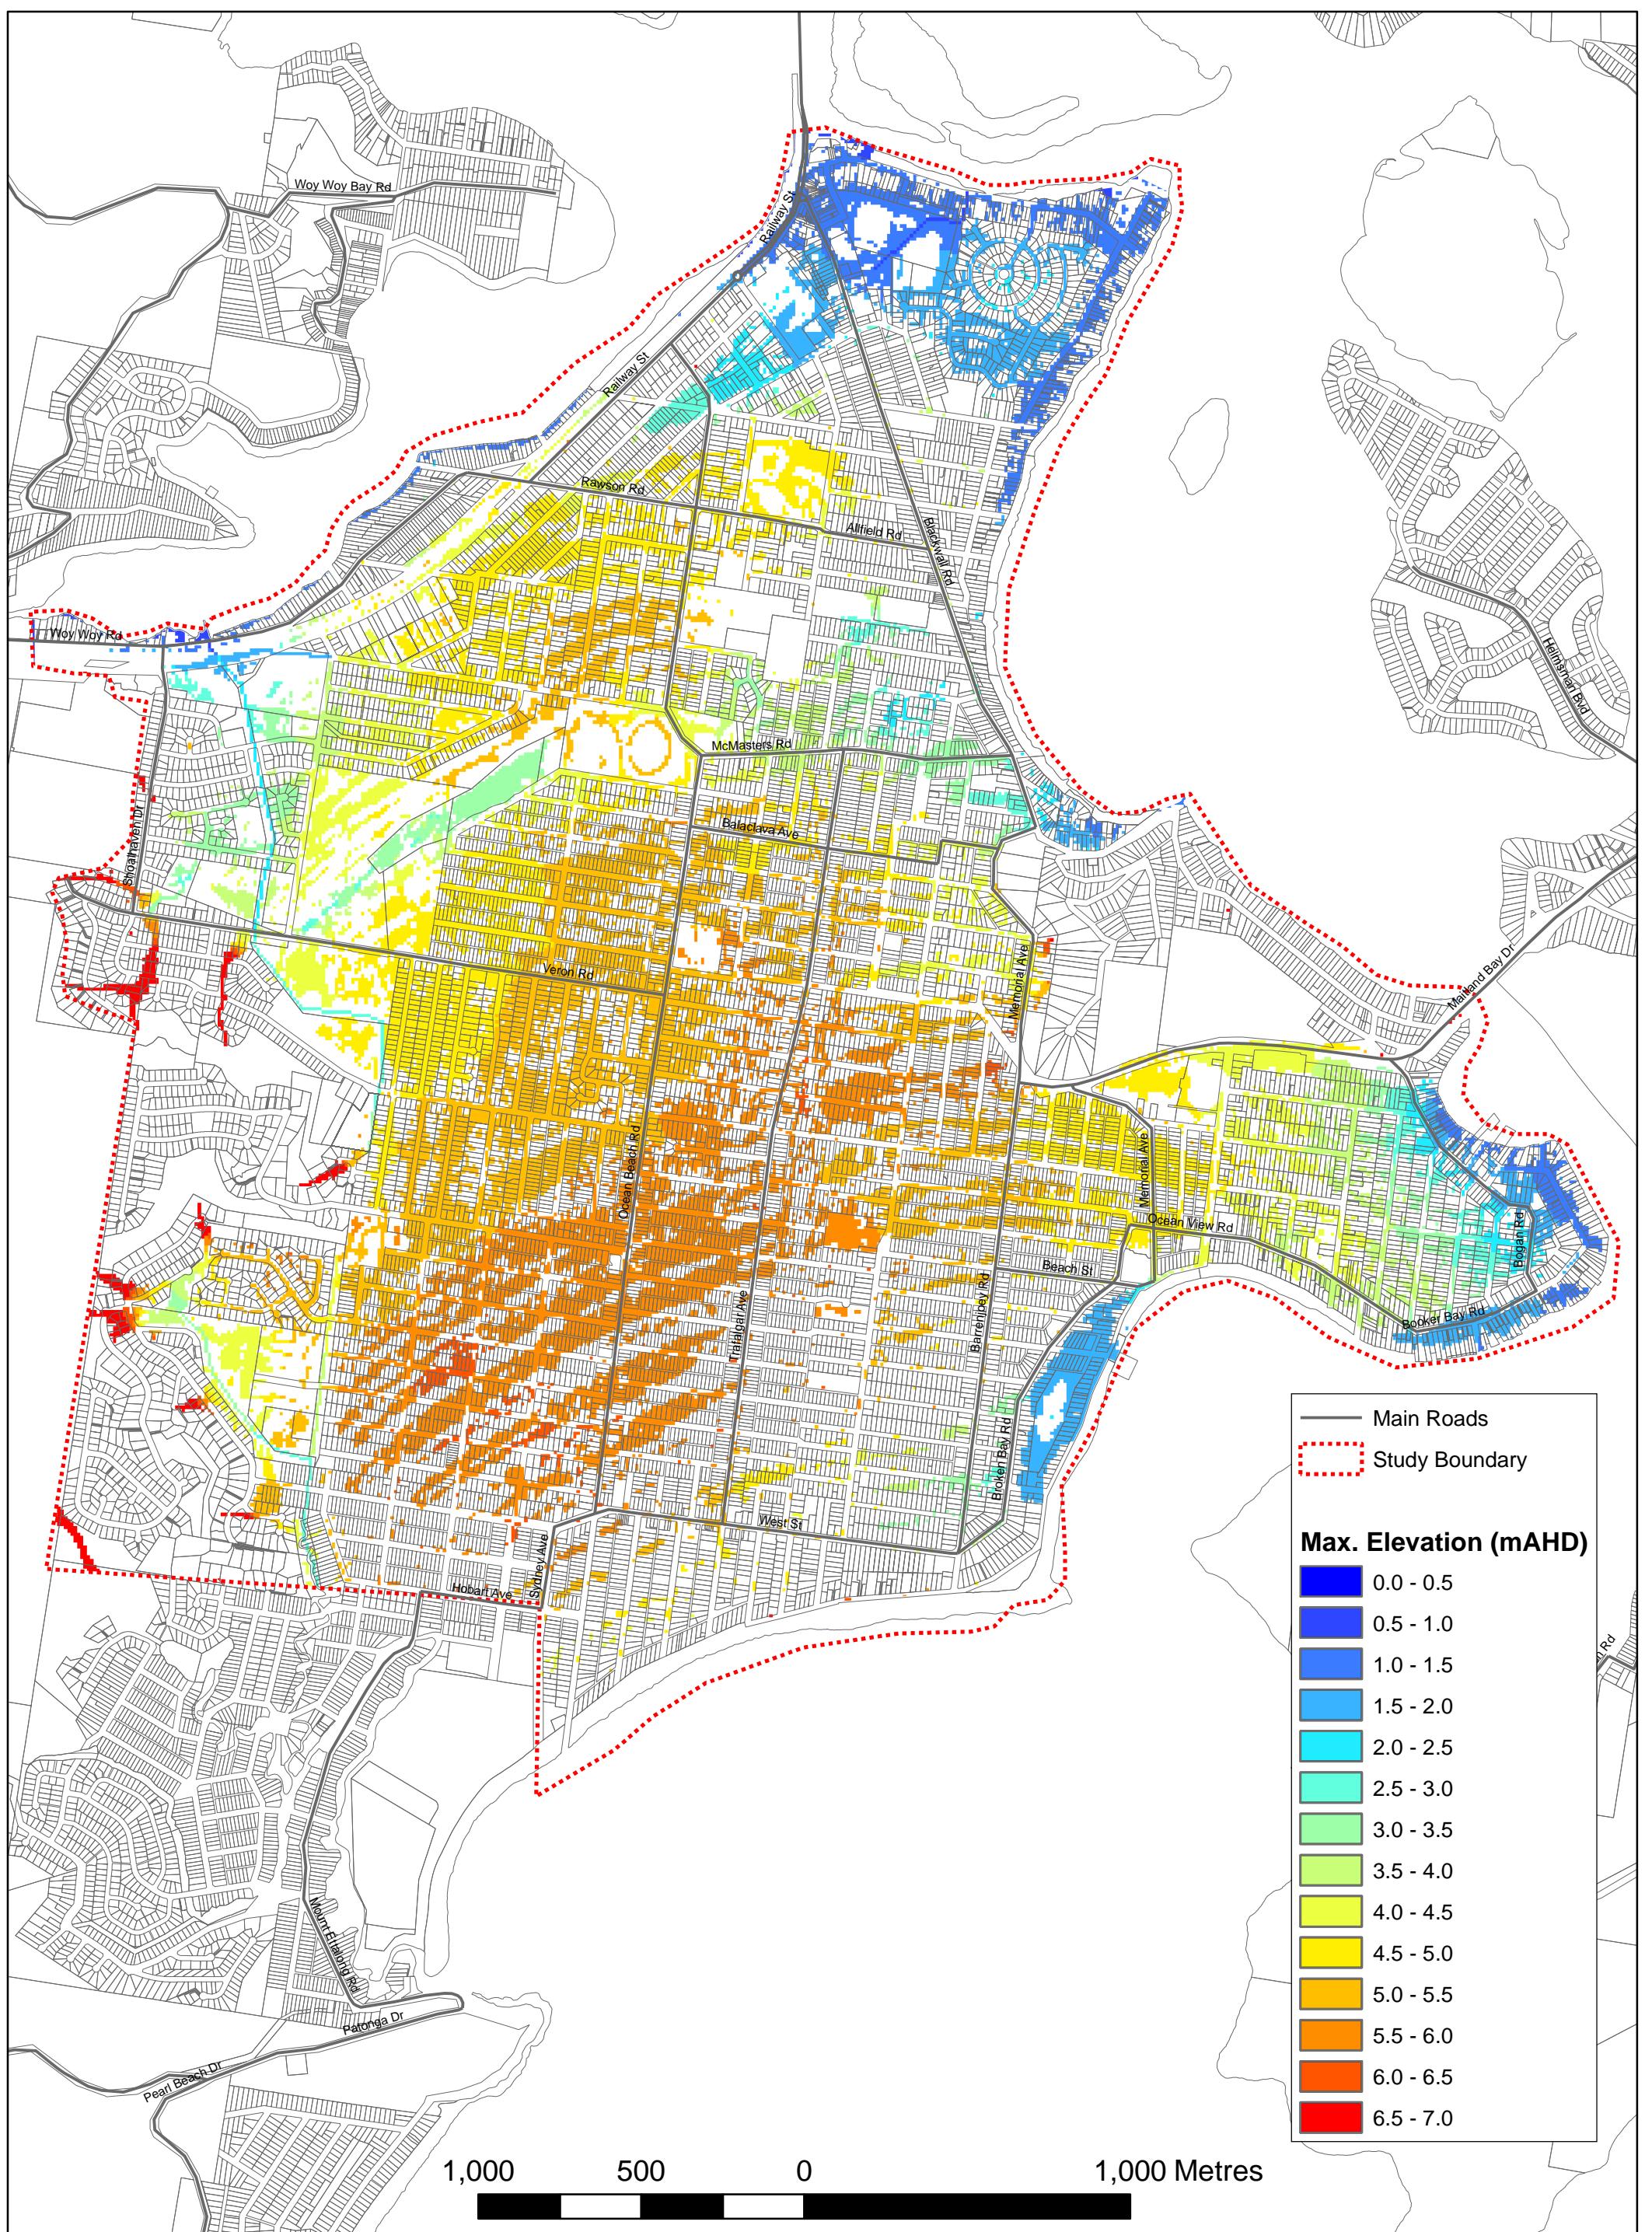

Figure 23 – Modelled Flood Elevation for 200yr ARI (0.5% AEP) with Existing Development.

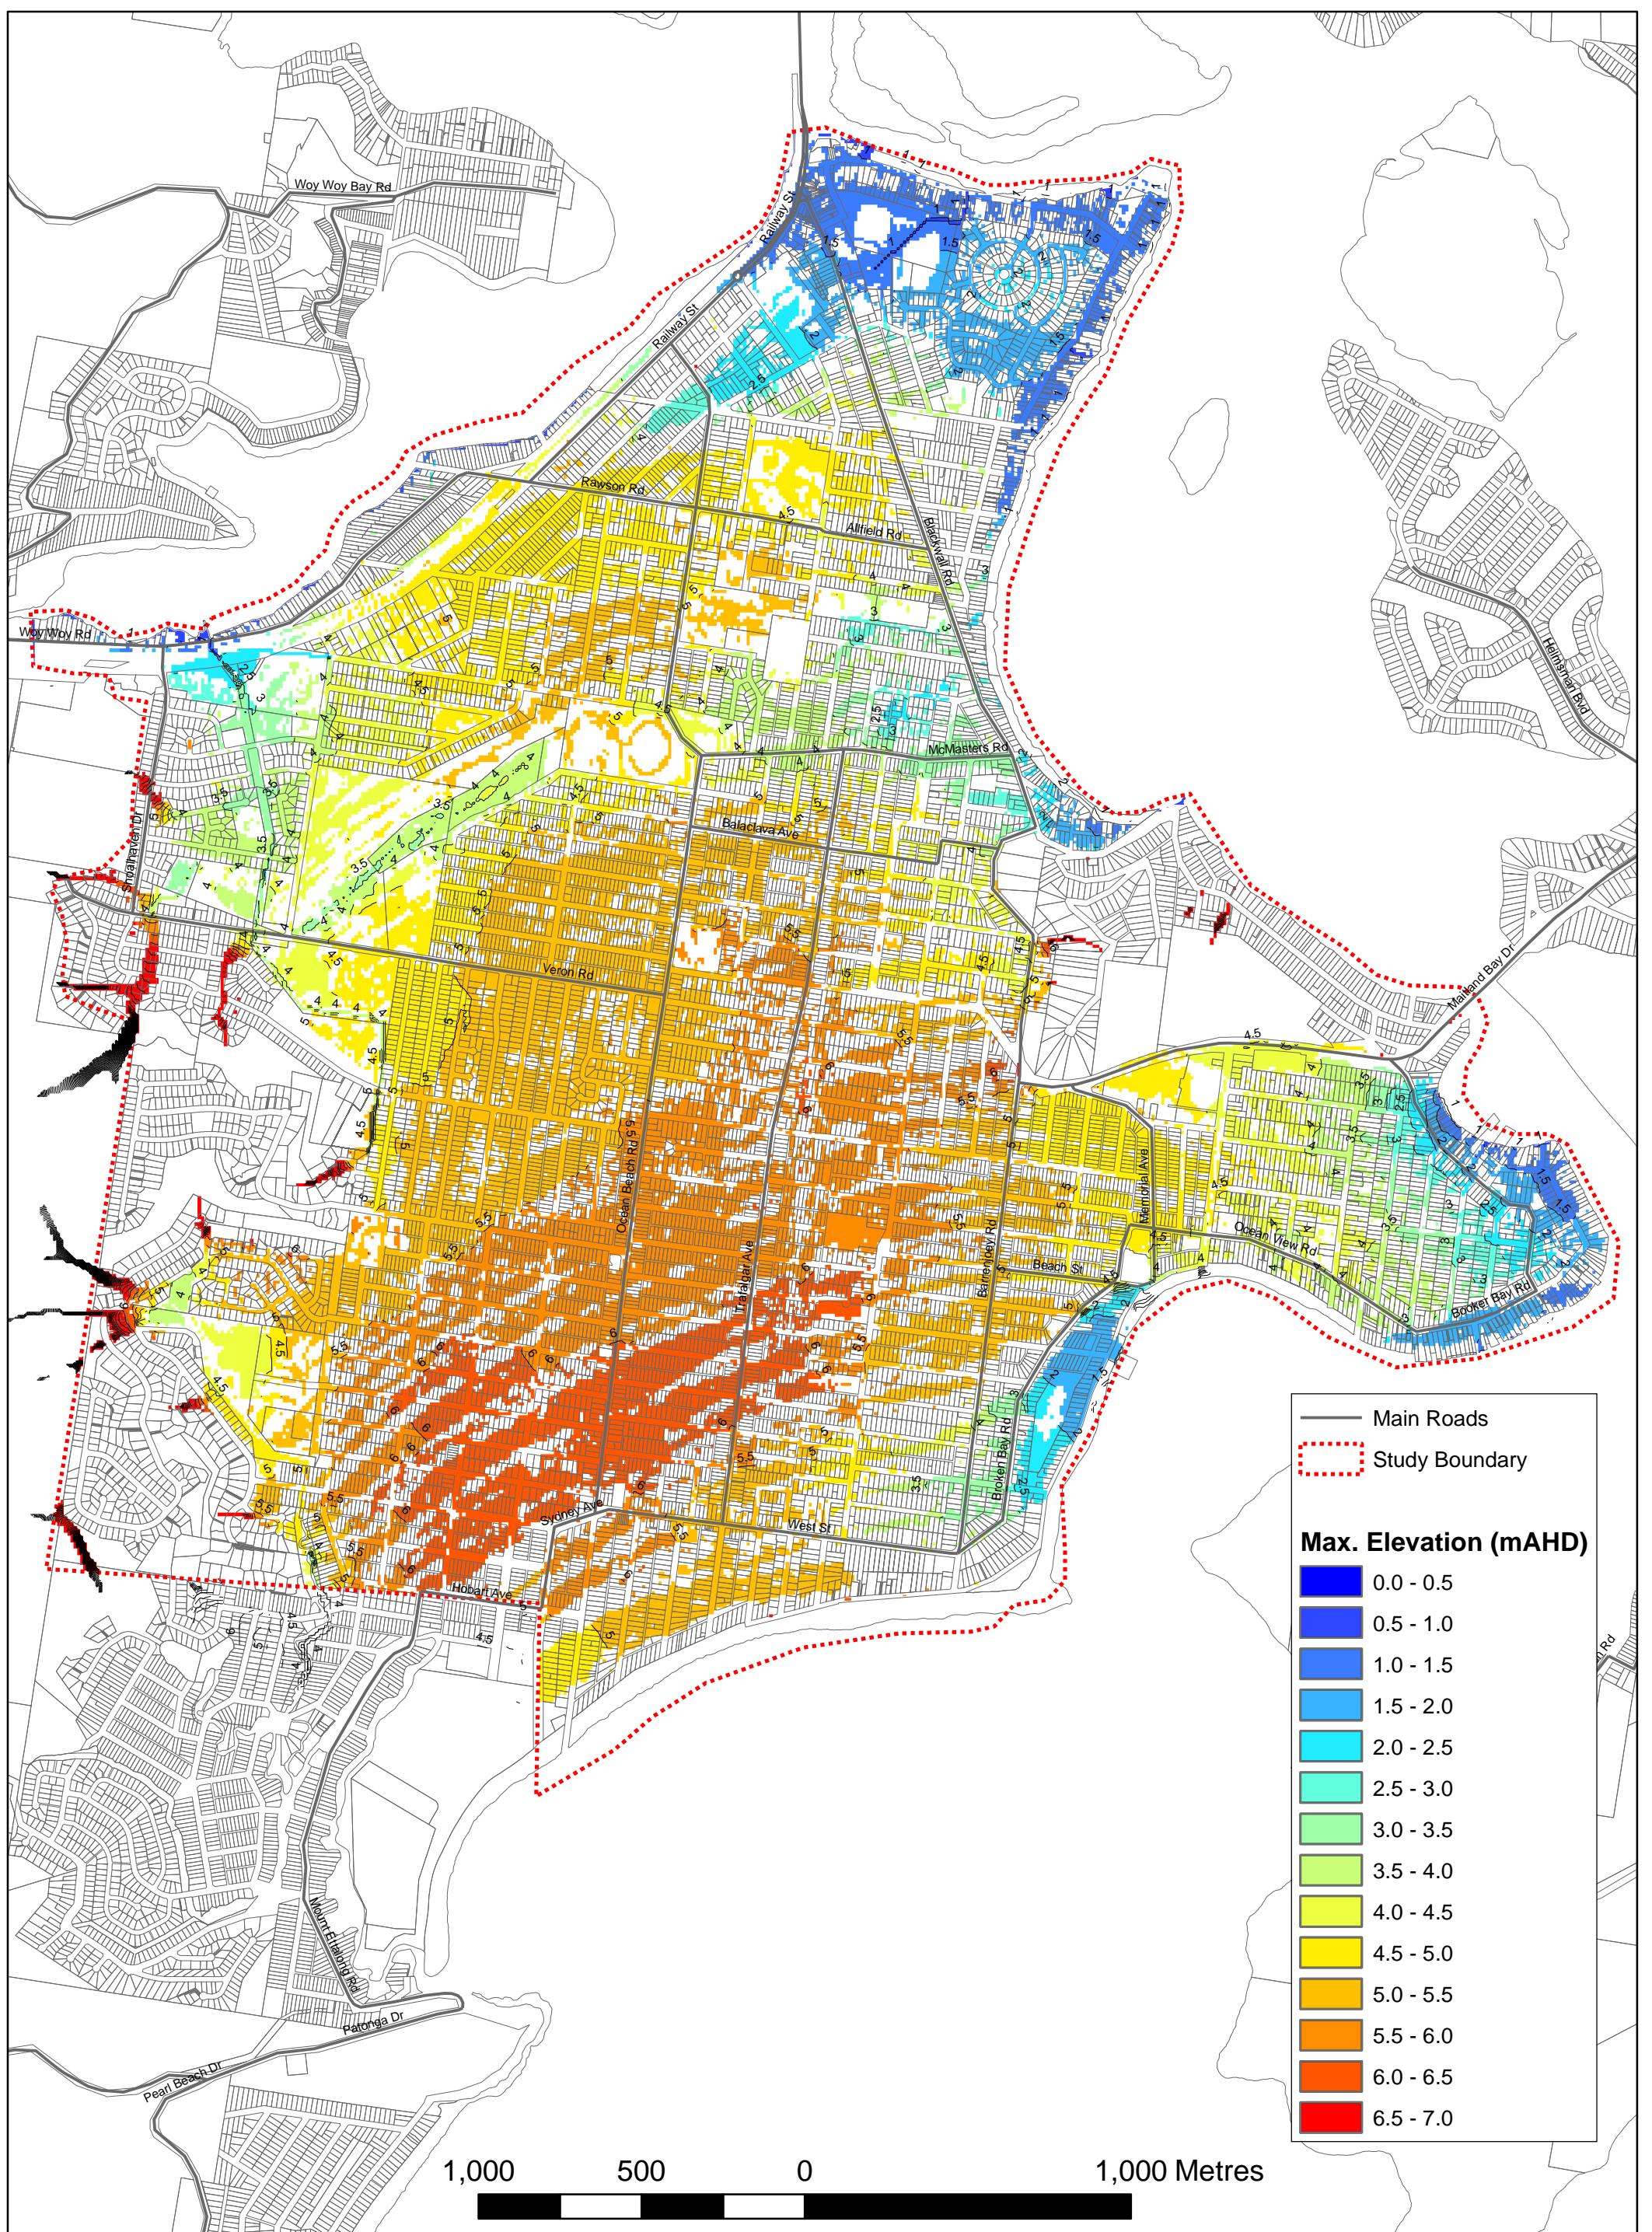

Figure 24 – Modelled Flood Elevation for PMP Event with Existing Development.

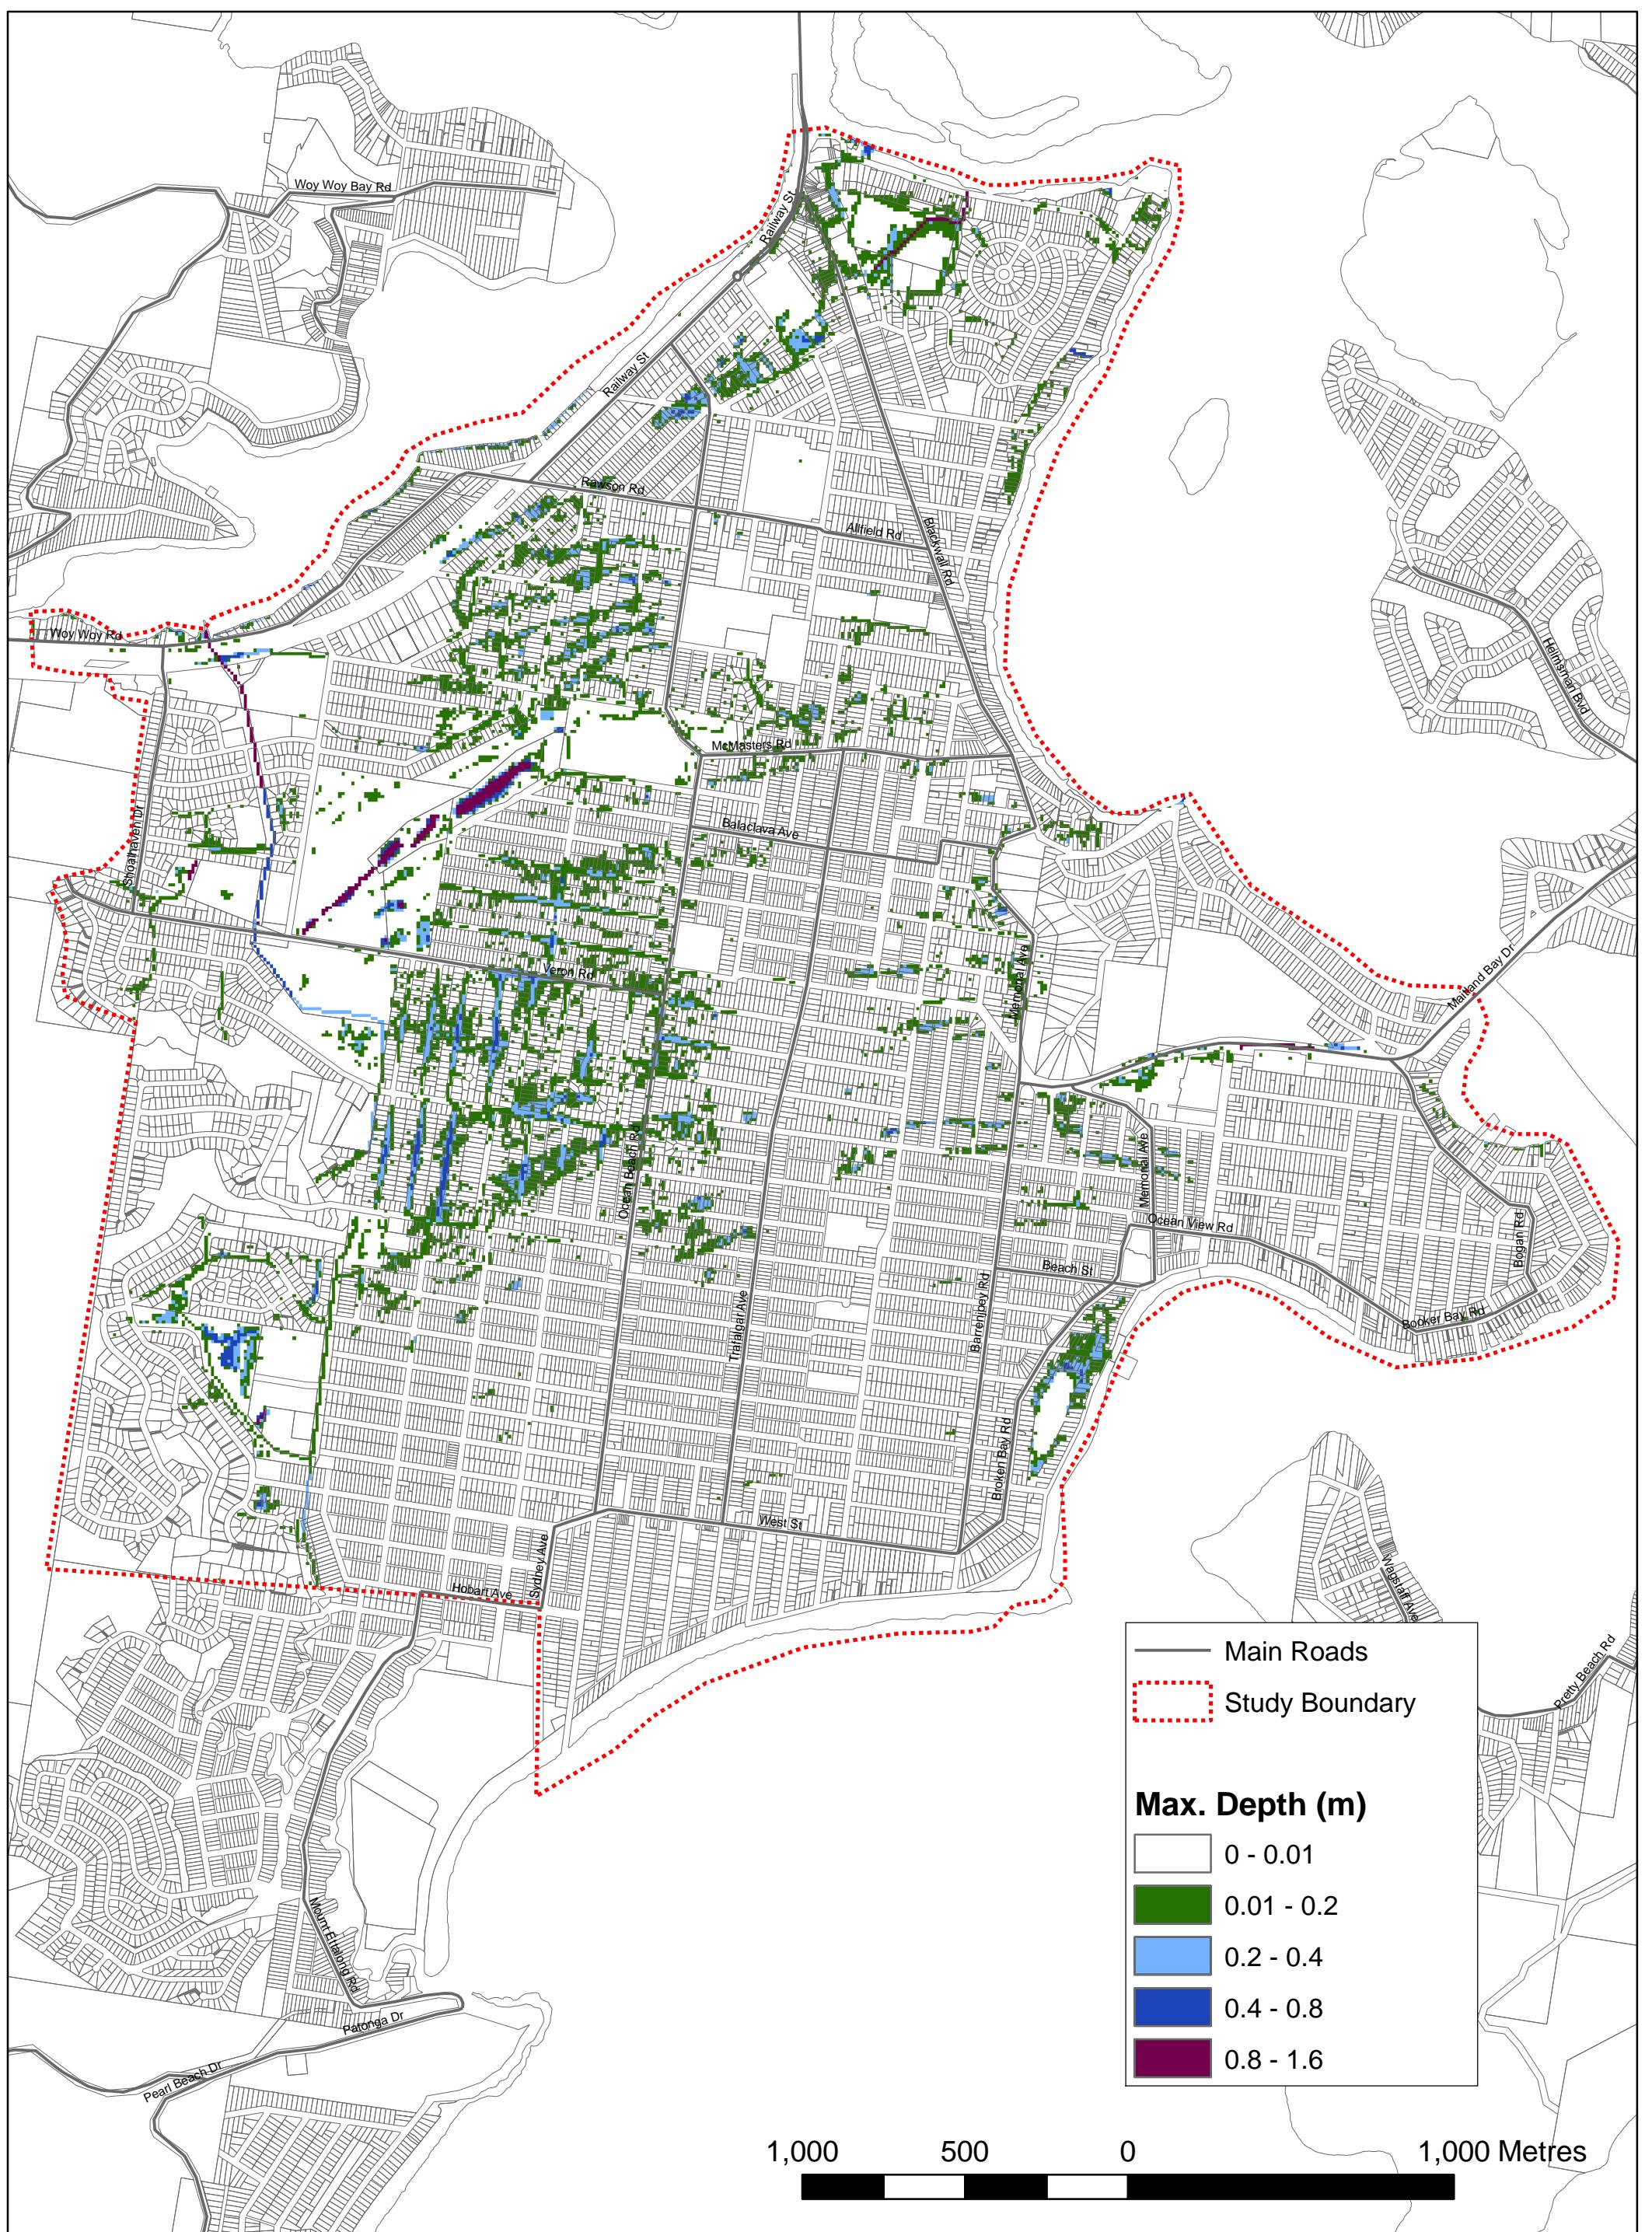

Figure 25 – Modelled Flood Depth for 2yr ARI (50% AEP) with Future Development.

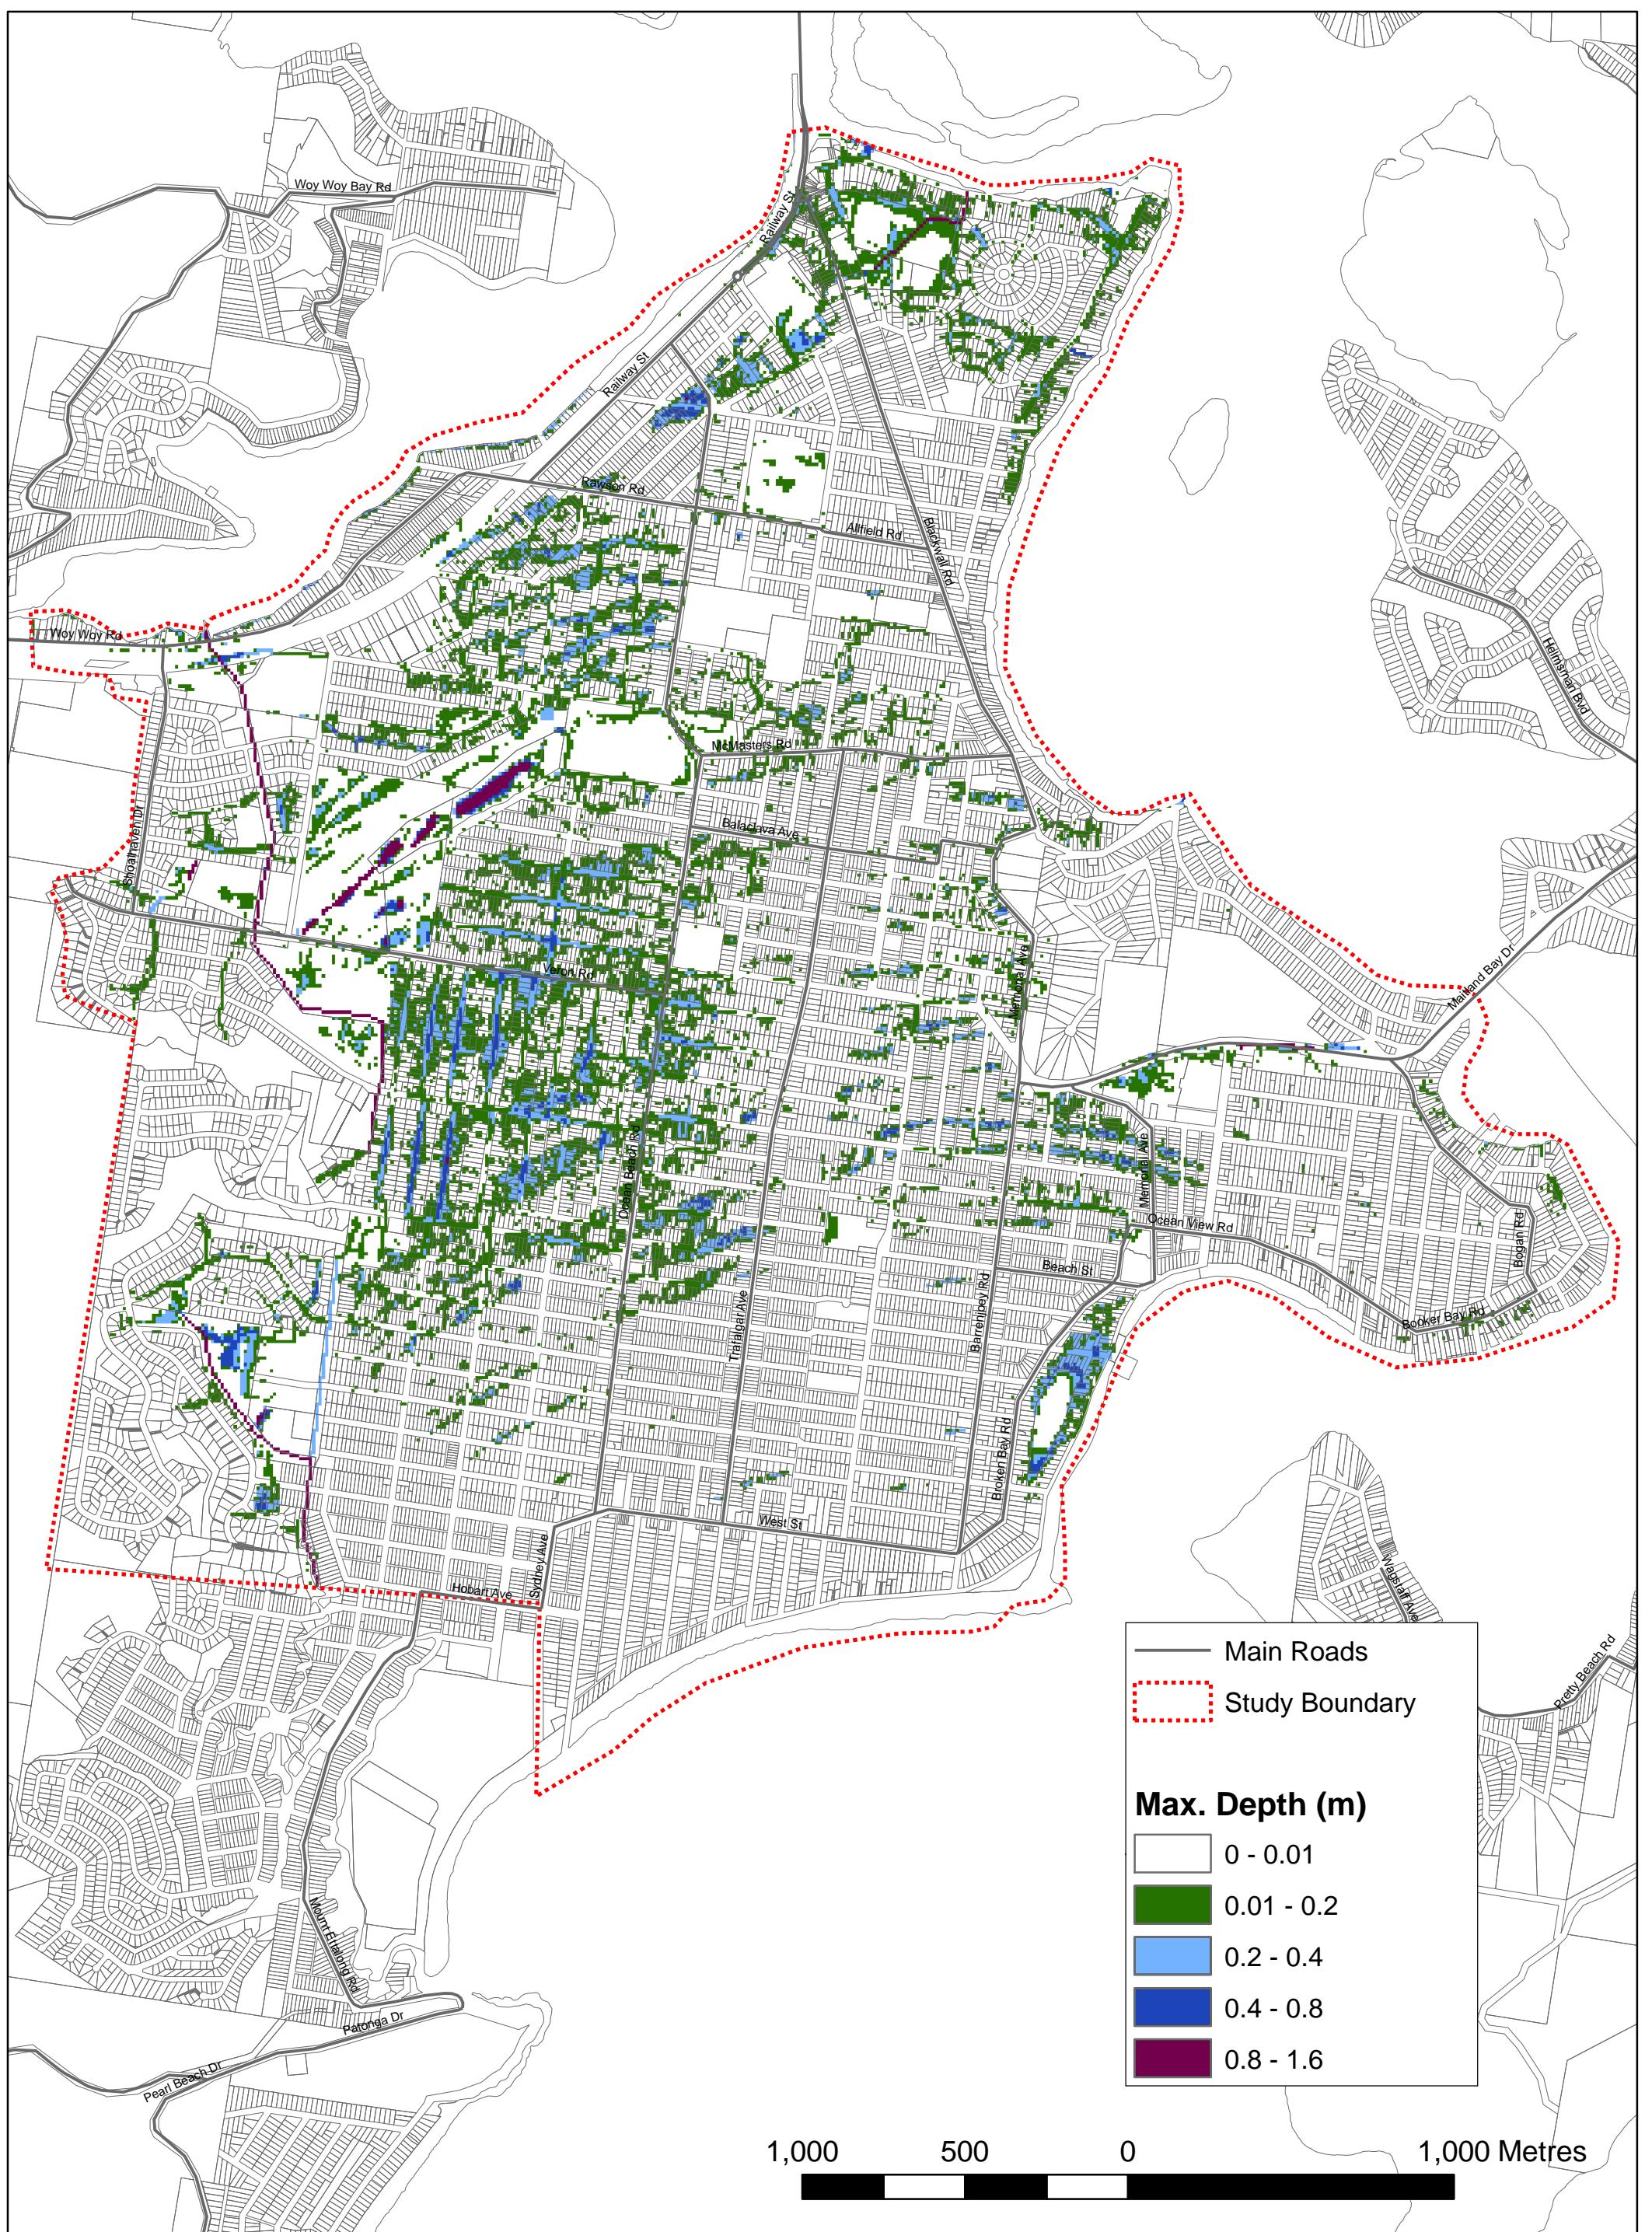

Figure 26 – Modelled Flood Depth for 10yr ARI (10% AEP) with Future Development.

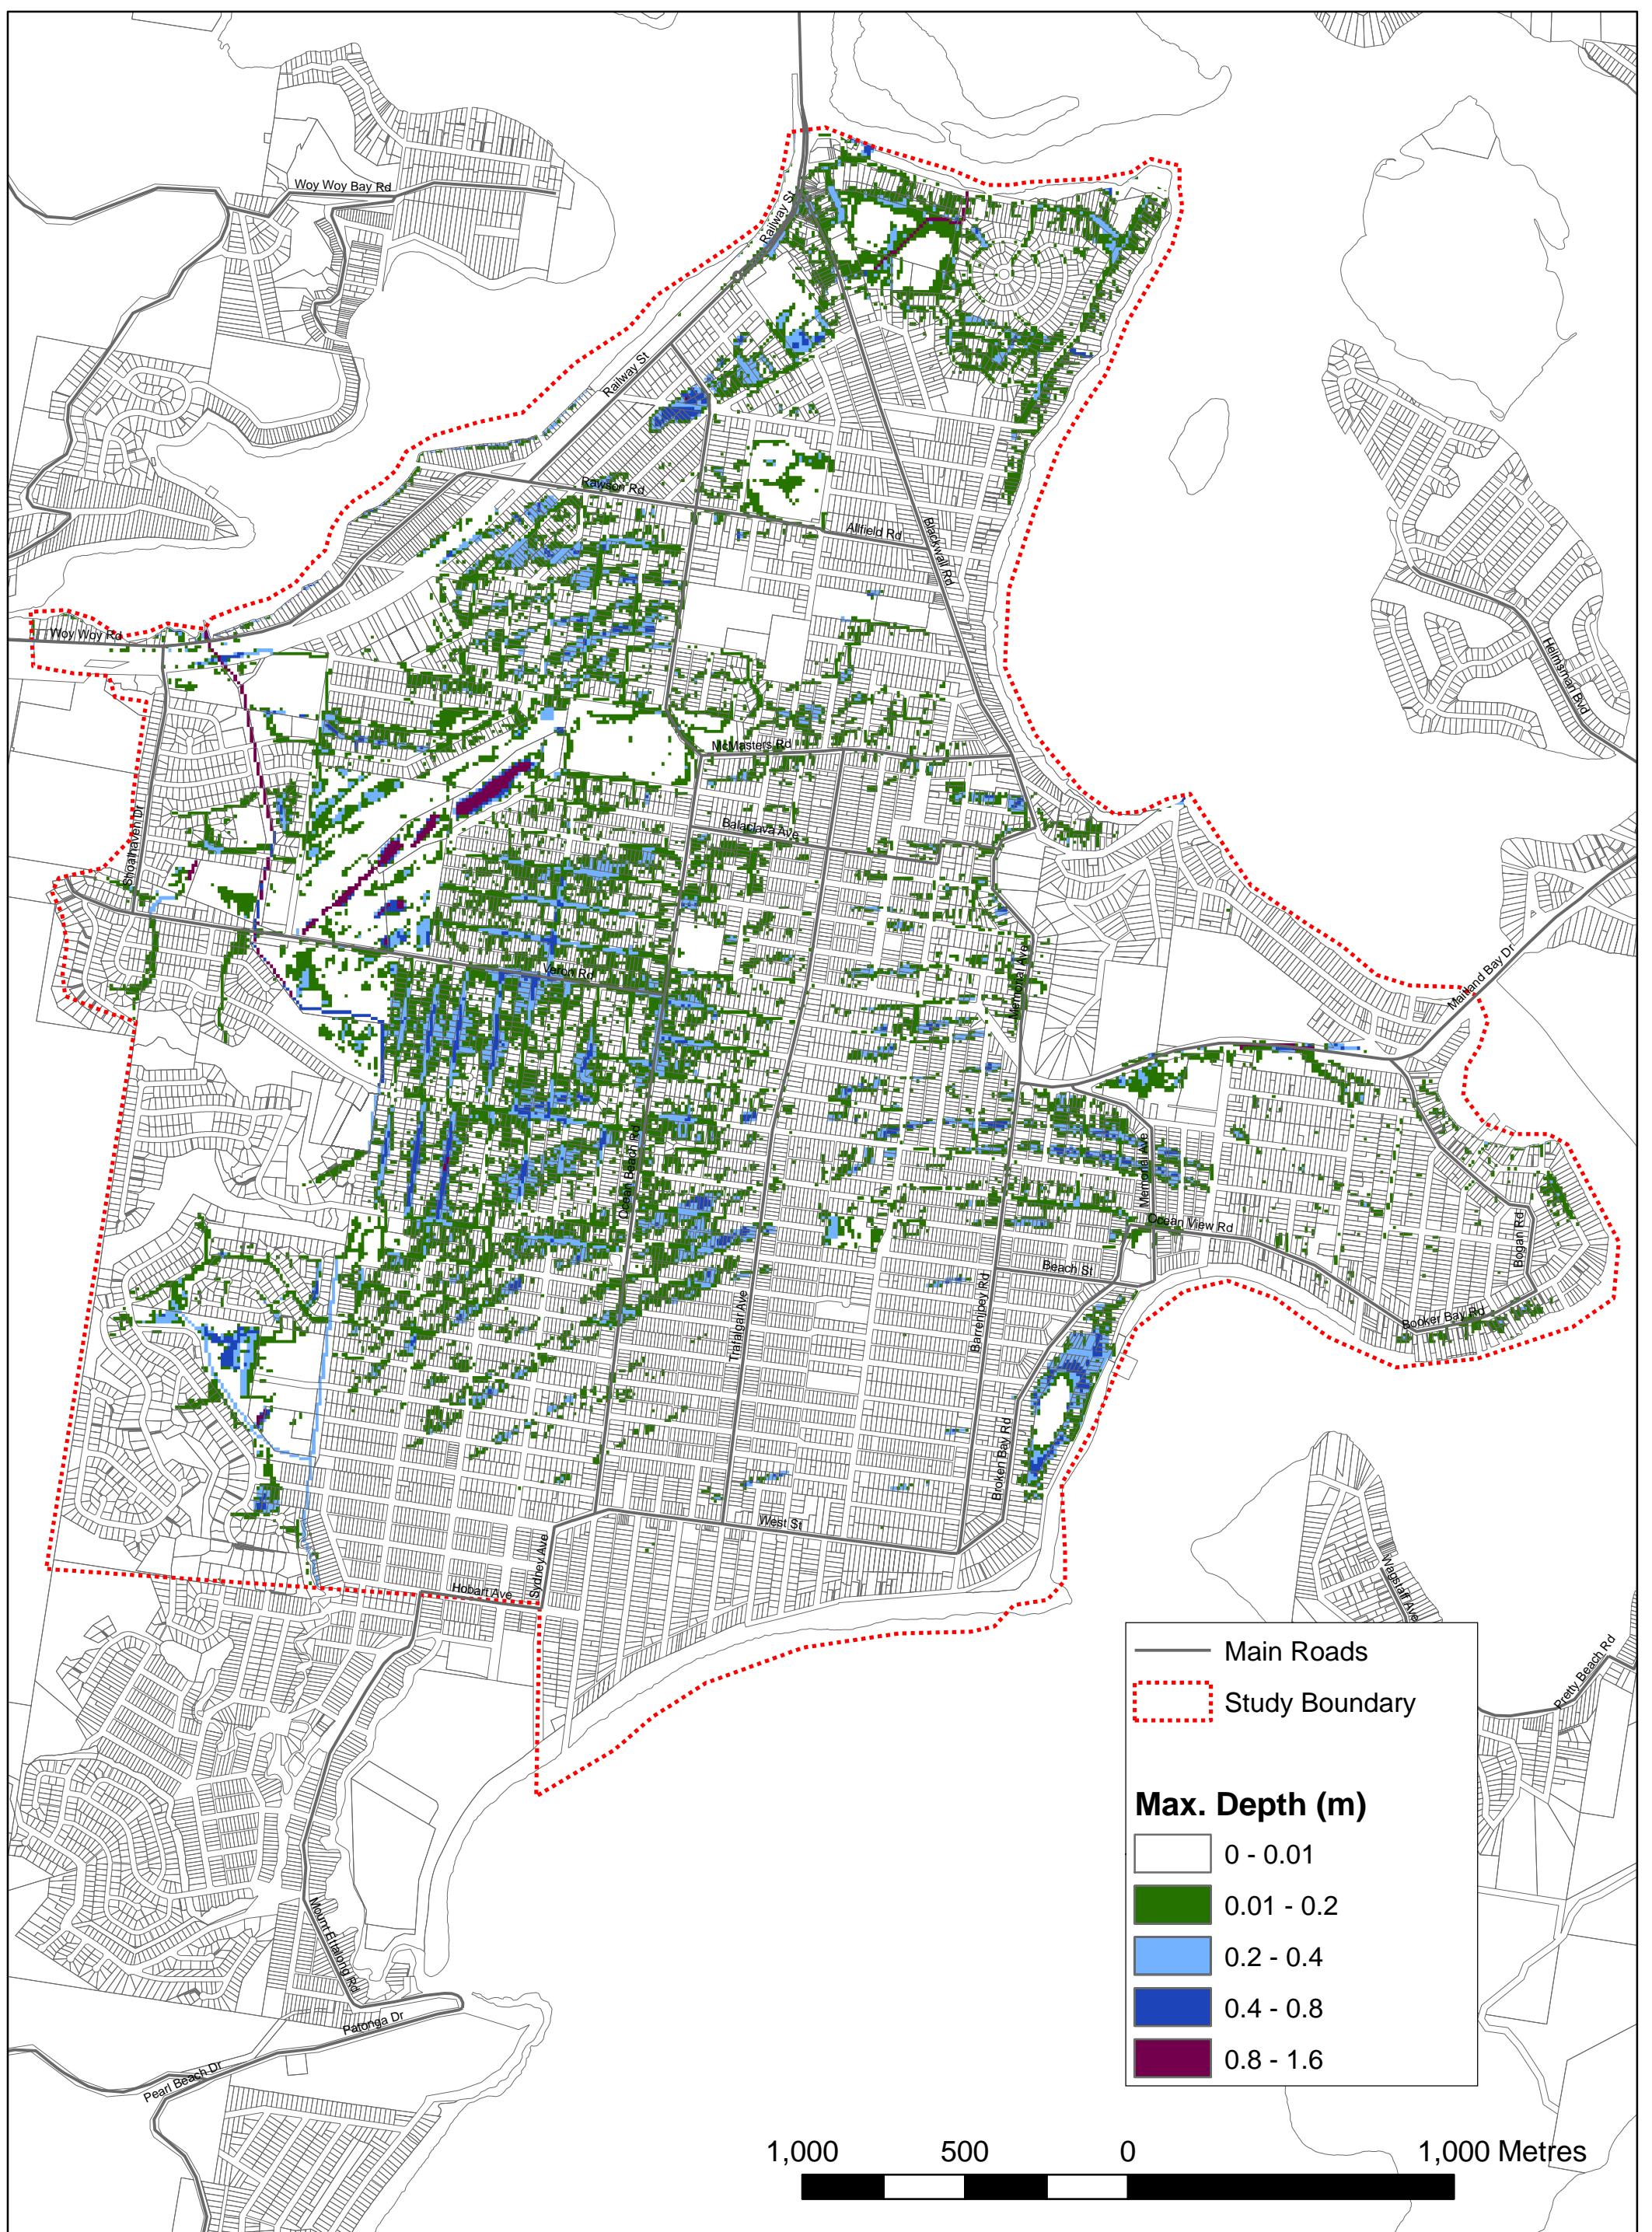

Figure 27 – Modelled Flood Depth for 20yr ARI (5% AEP) with Future Development.

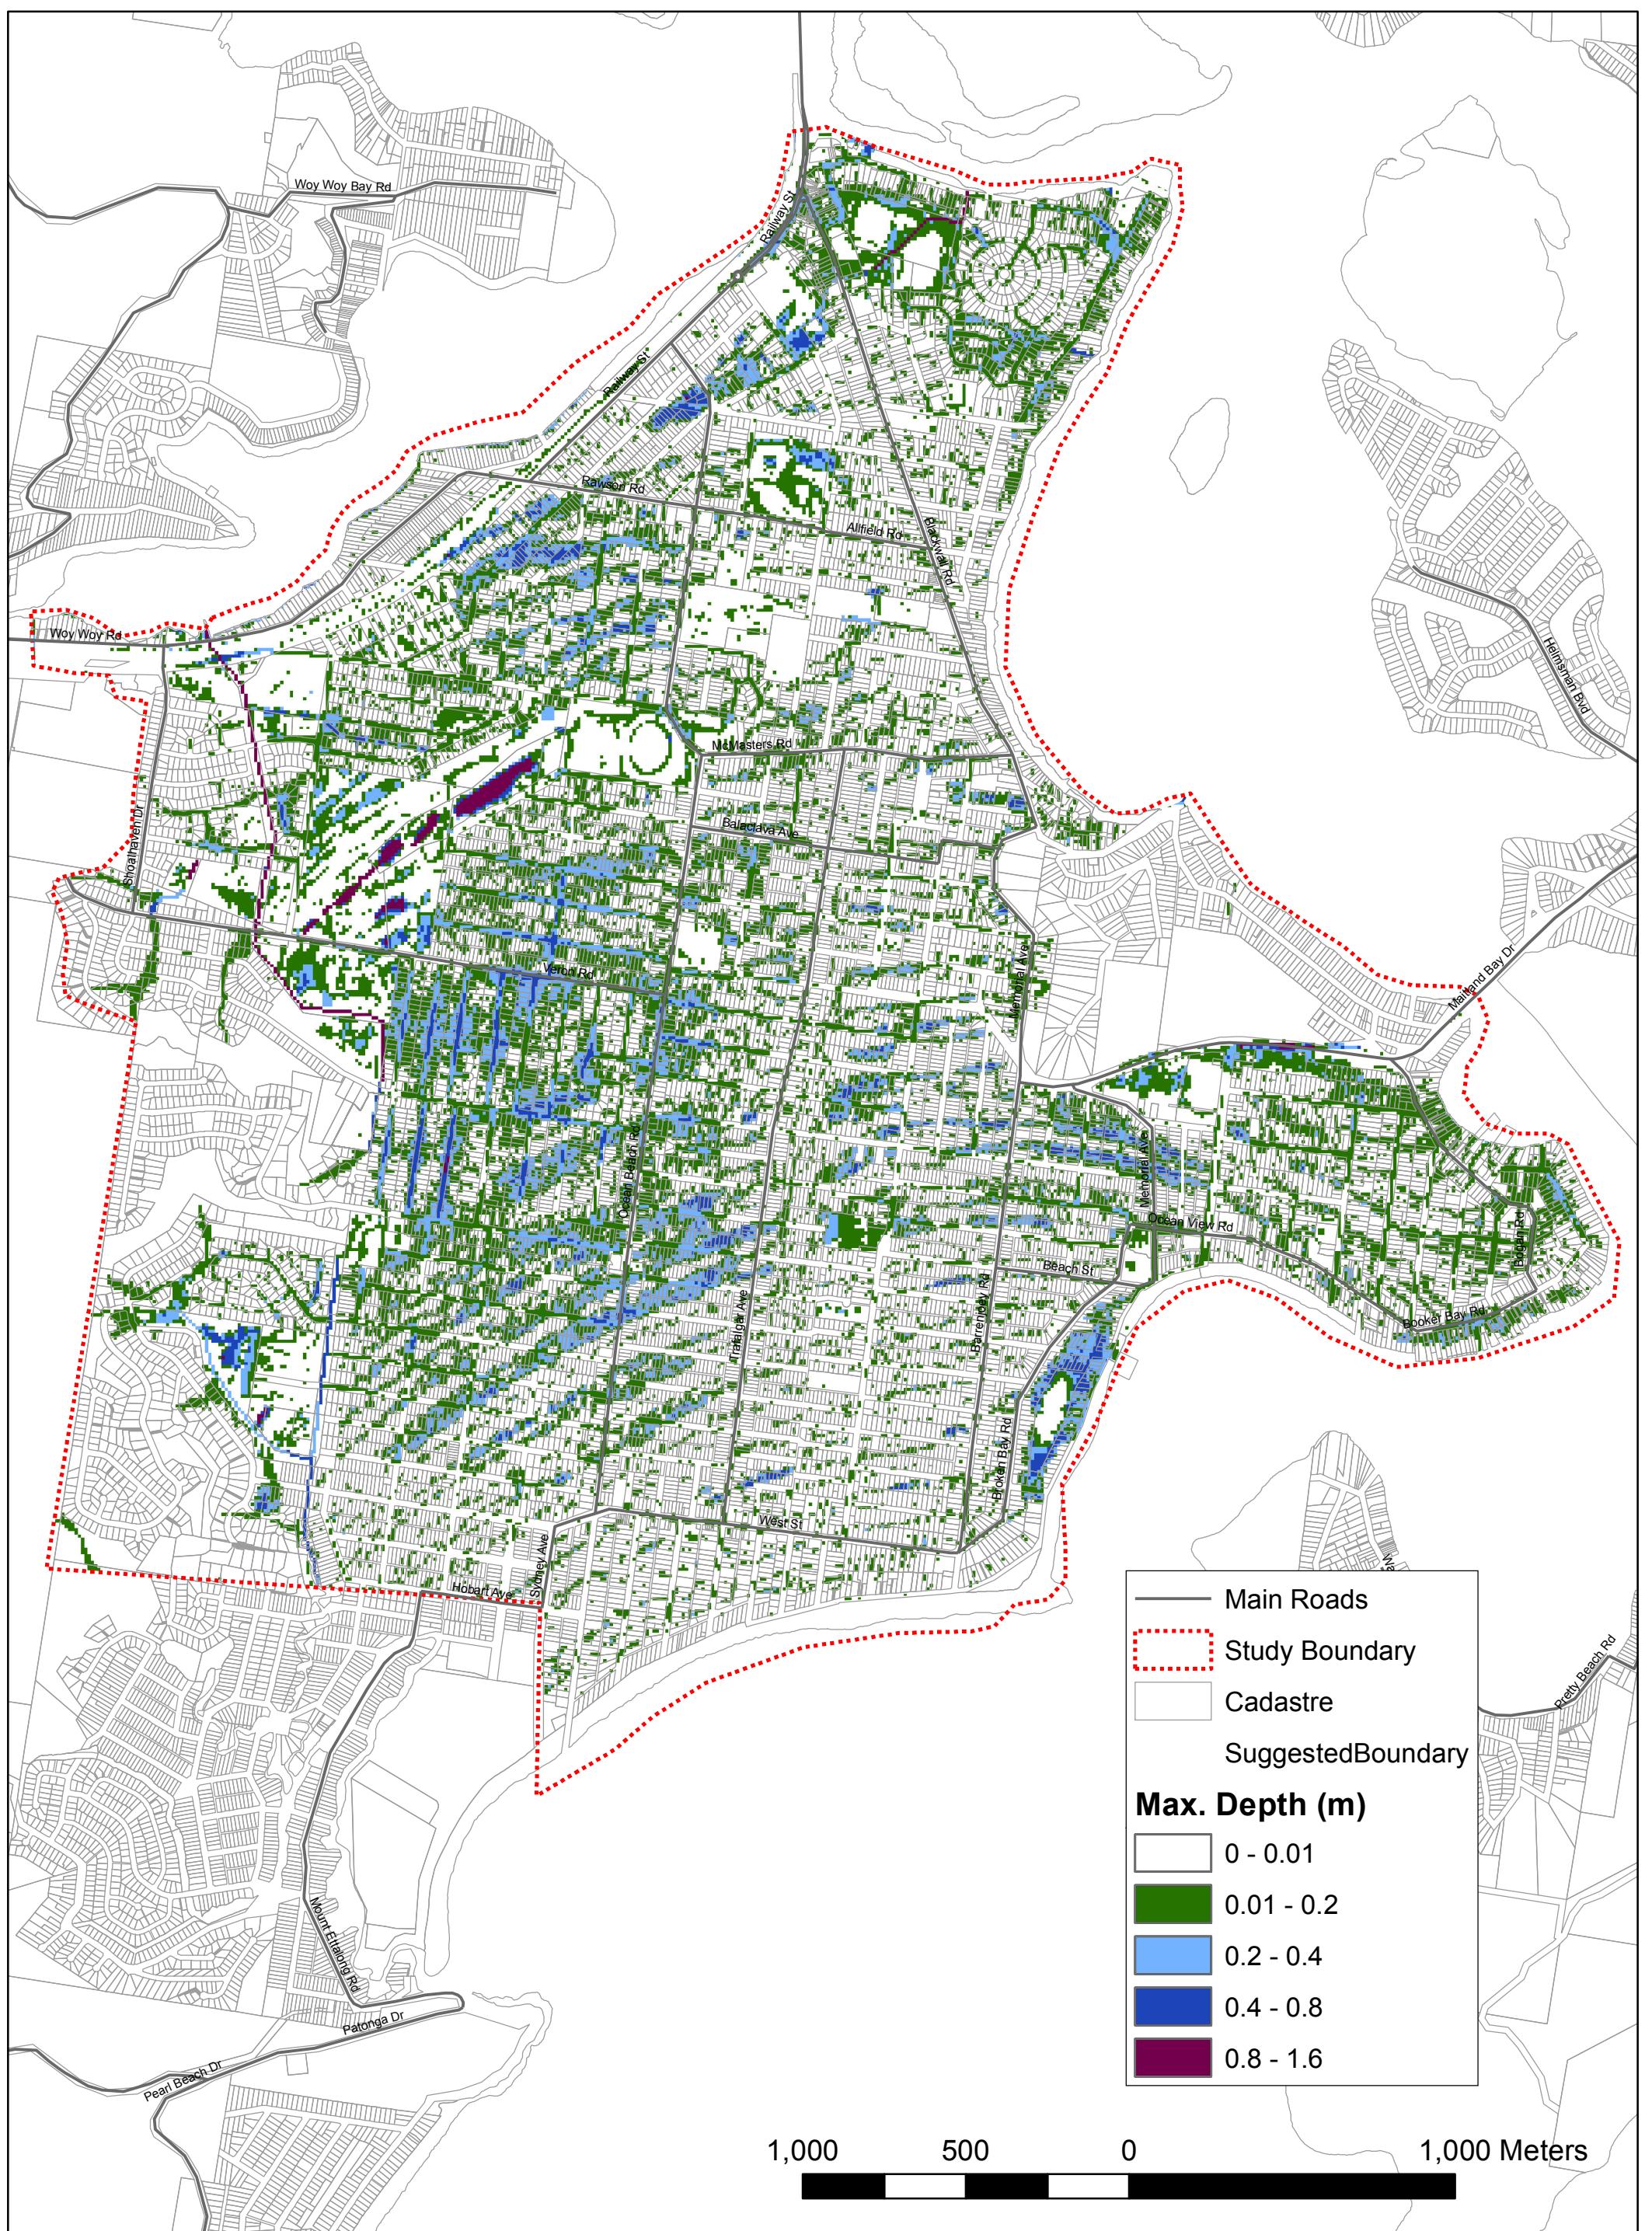

Figure 28 – Modelled Flood Depth for 100yr ARI (1% AEP) with Future Development.

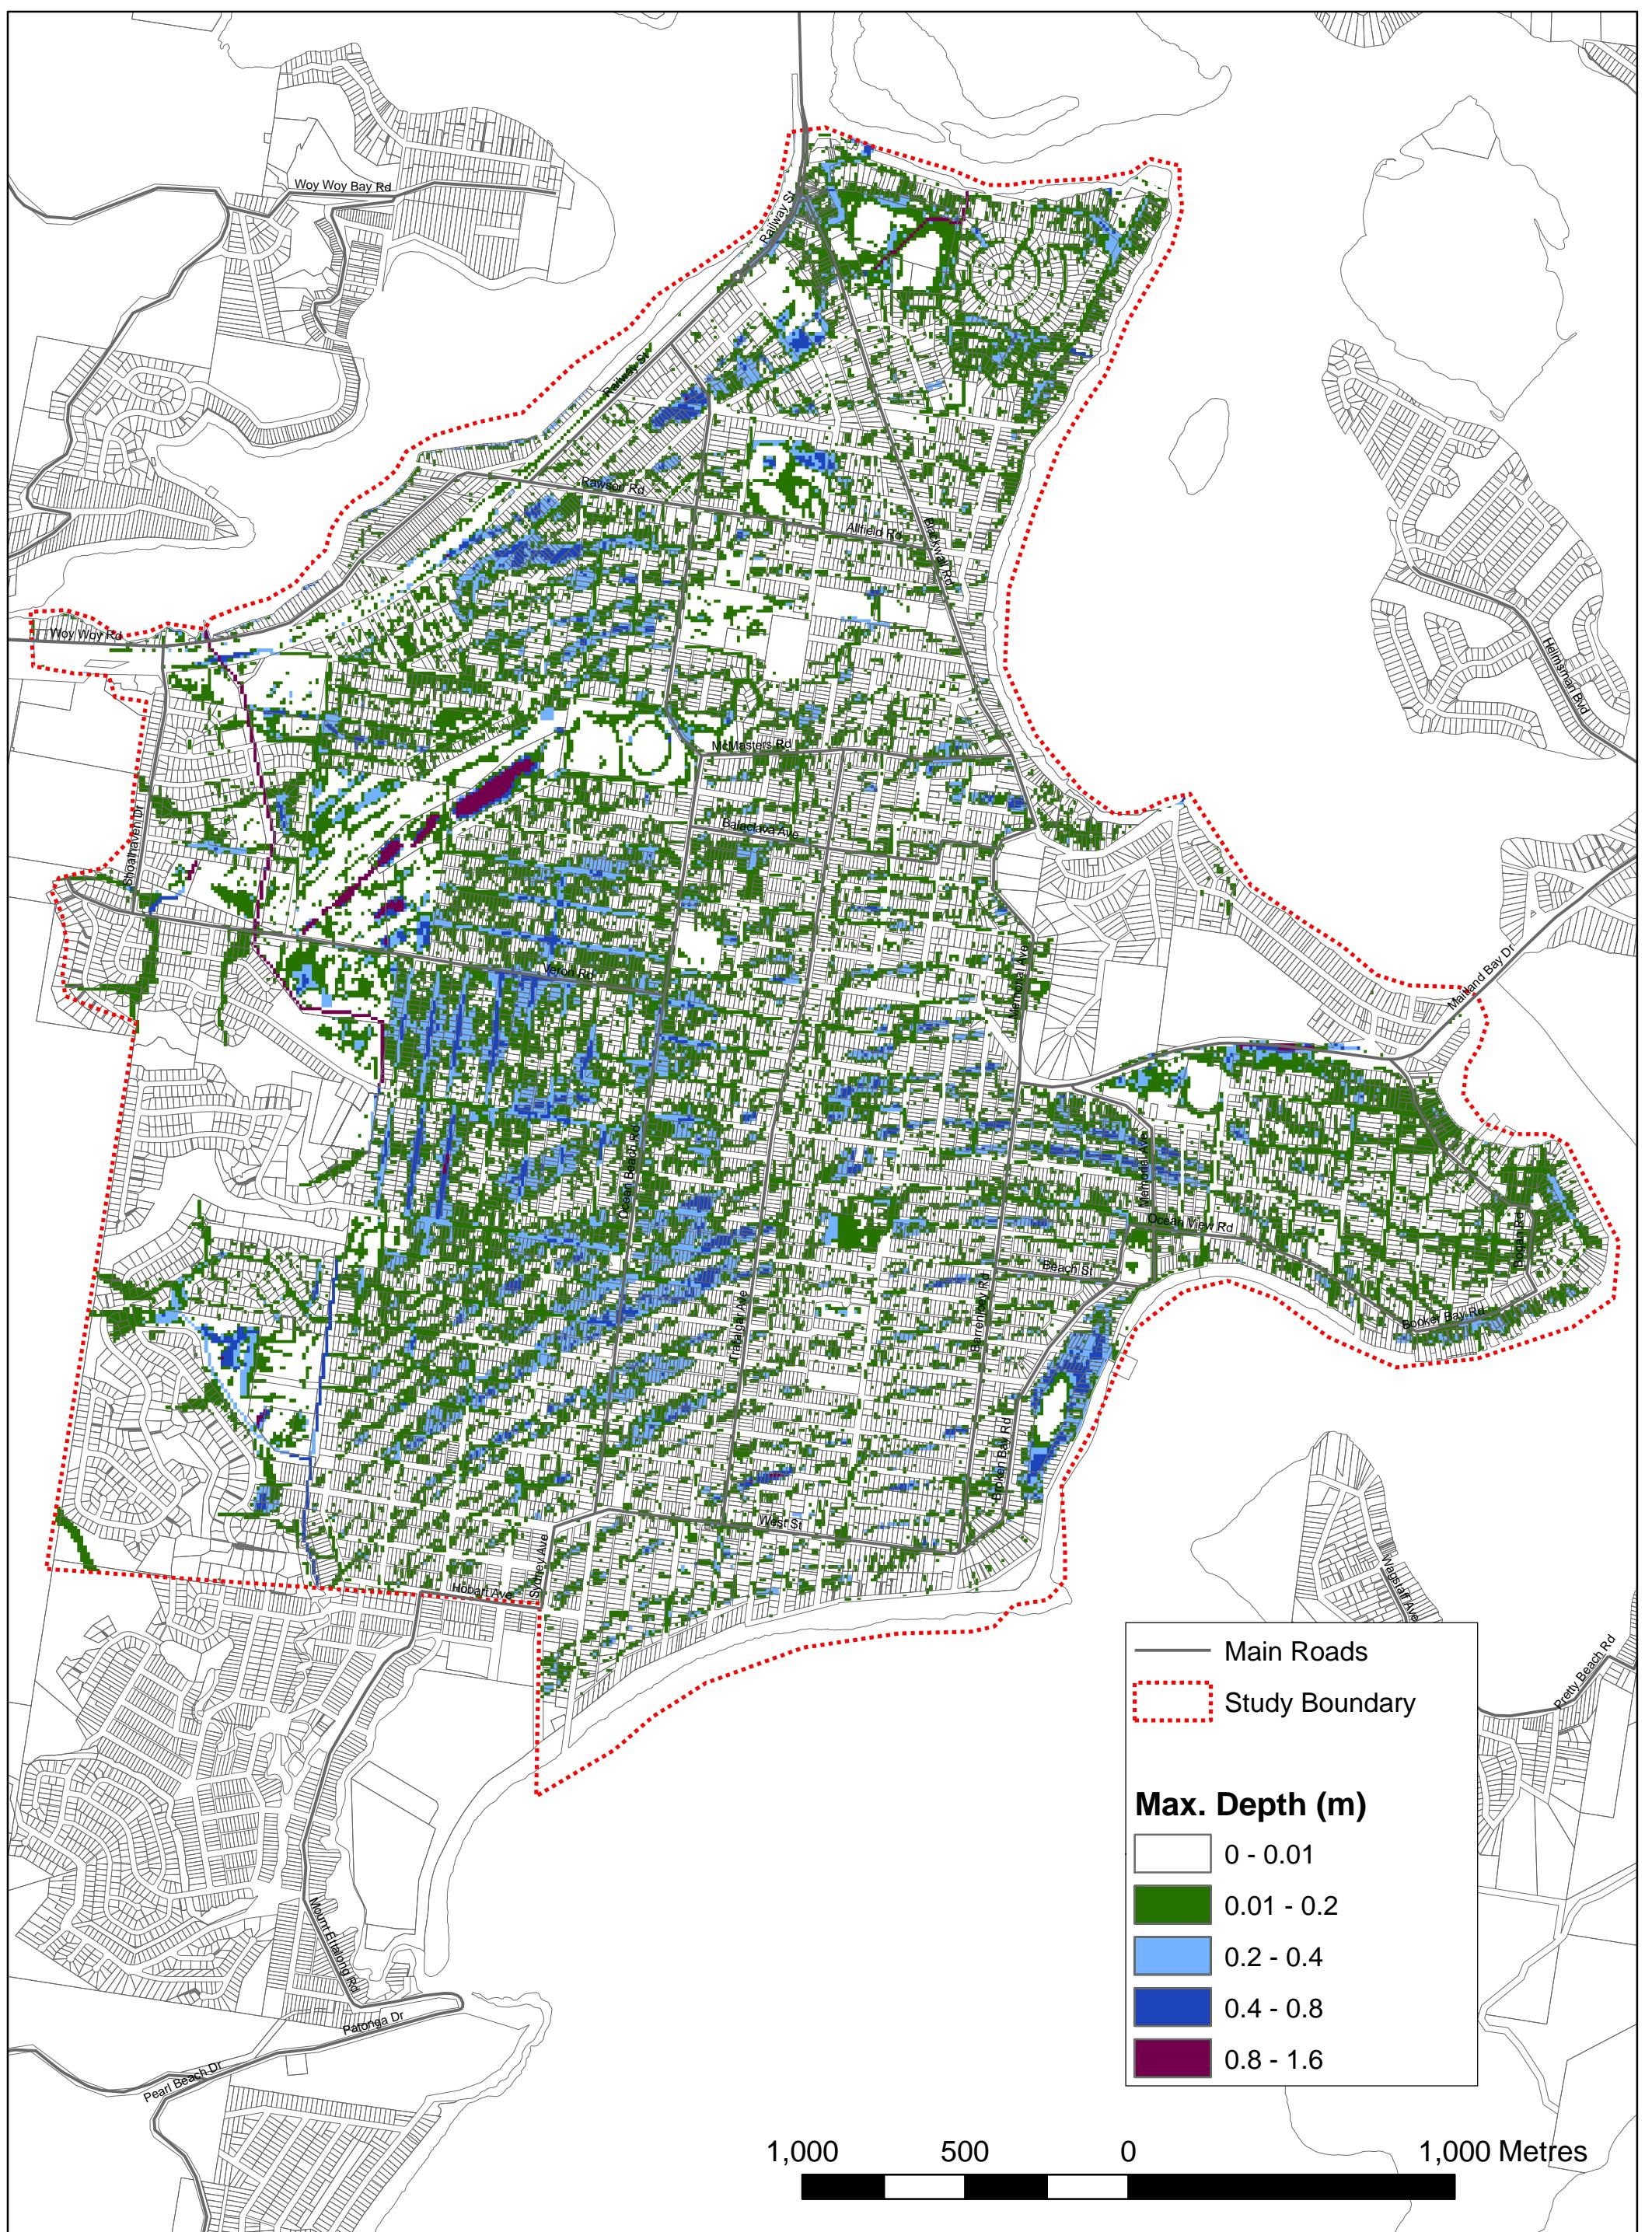

Figure 29 – Modelled Flood Depth for 200yr ARI (0.5% AEP) with Future Development.

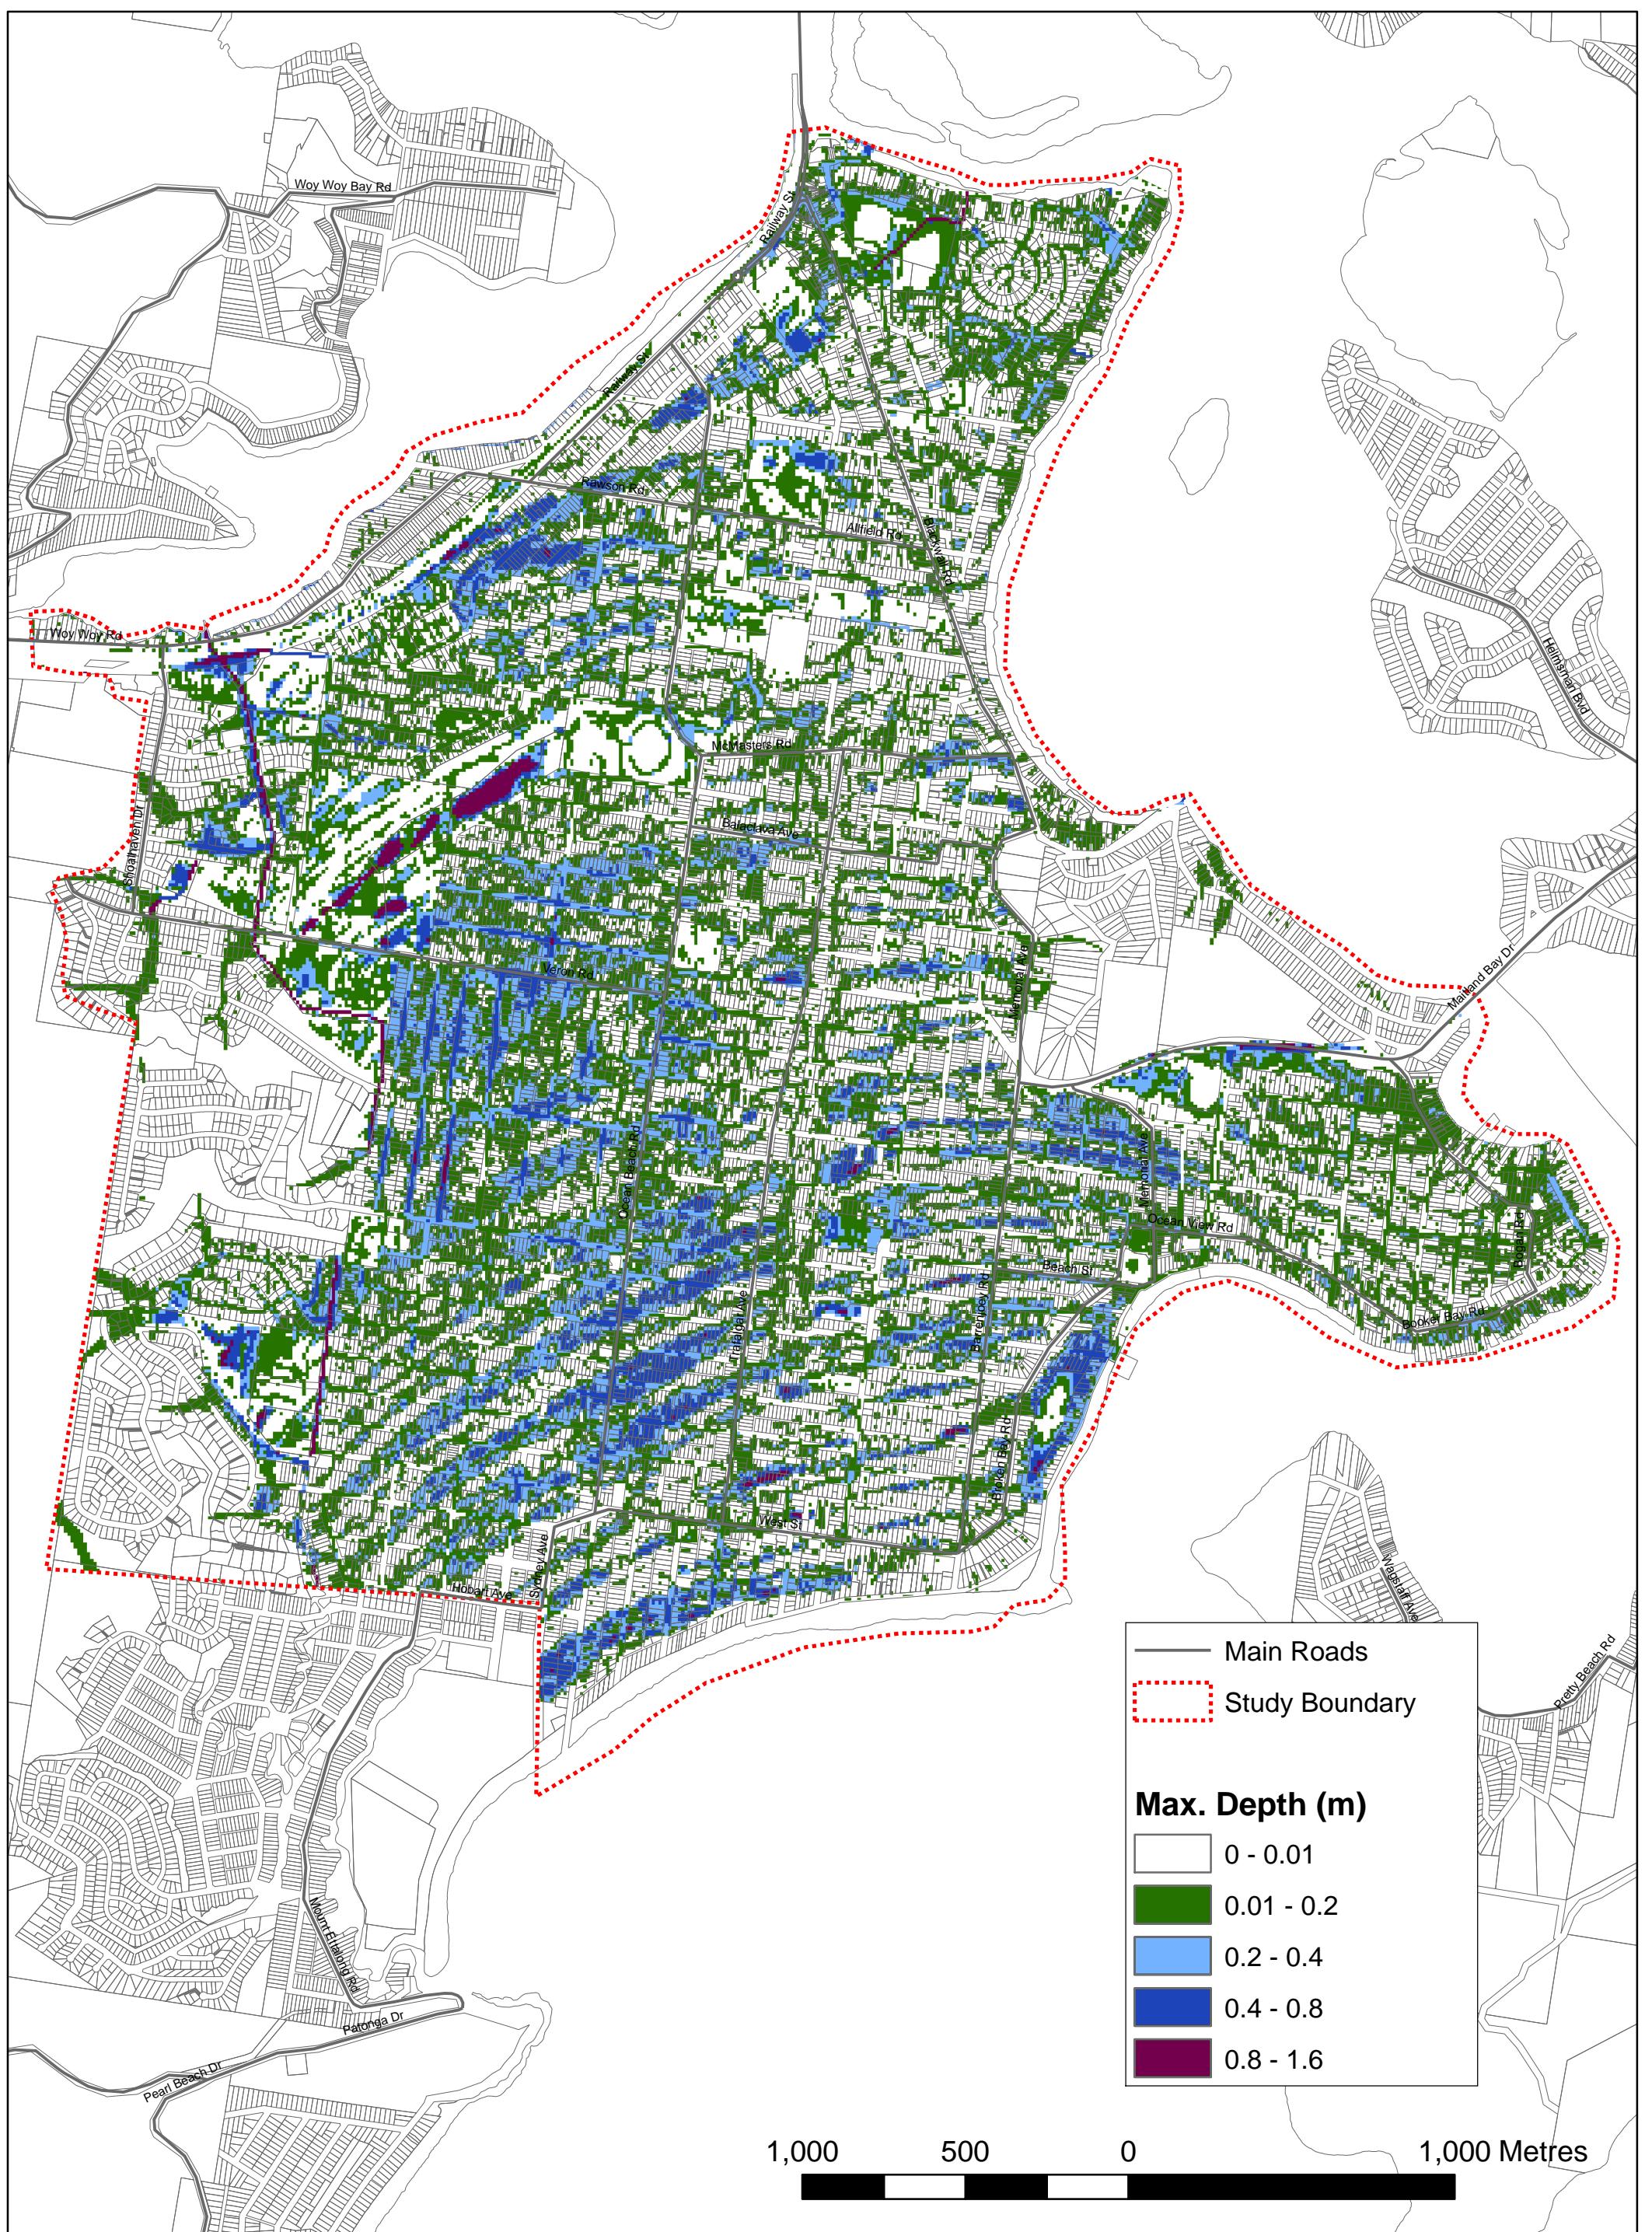

Figure 30 – Modelled Flood Depth for PMP Event with Future Development.

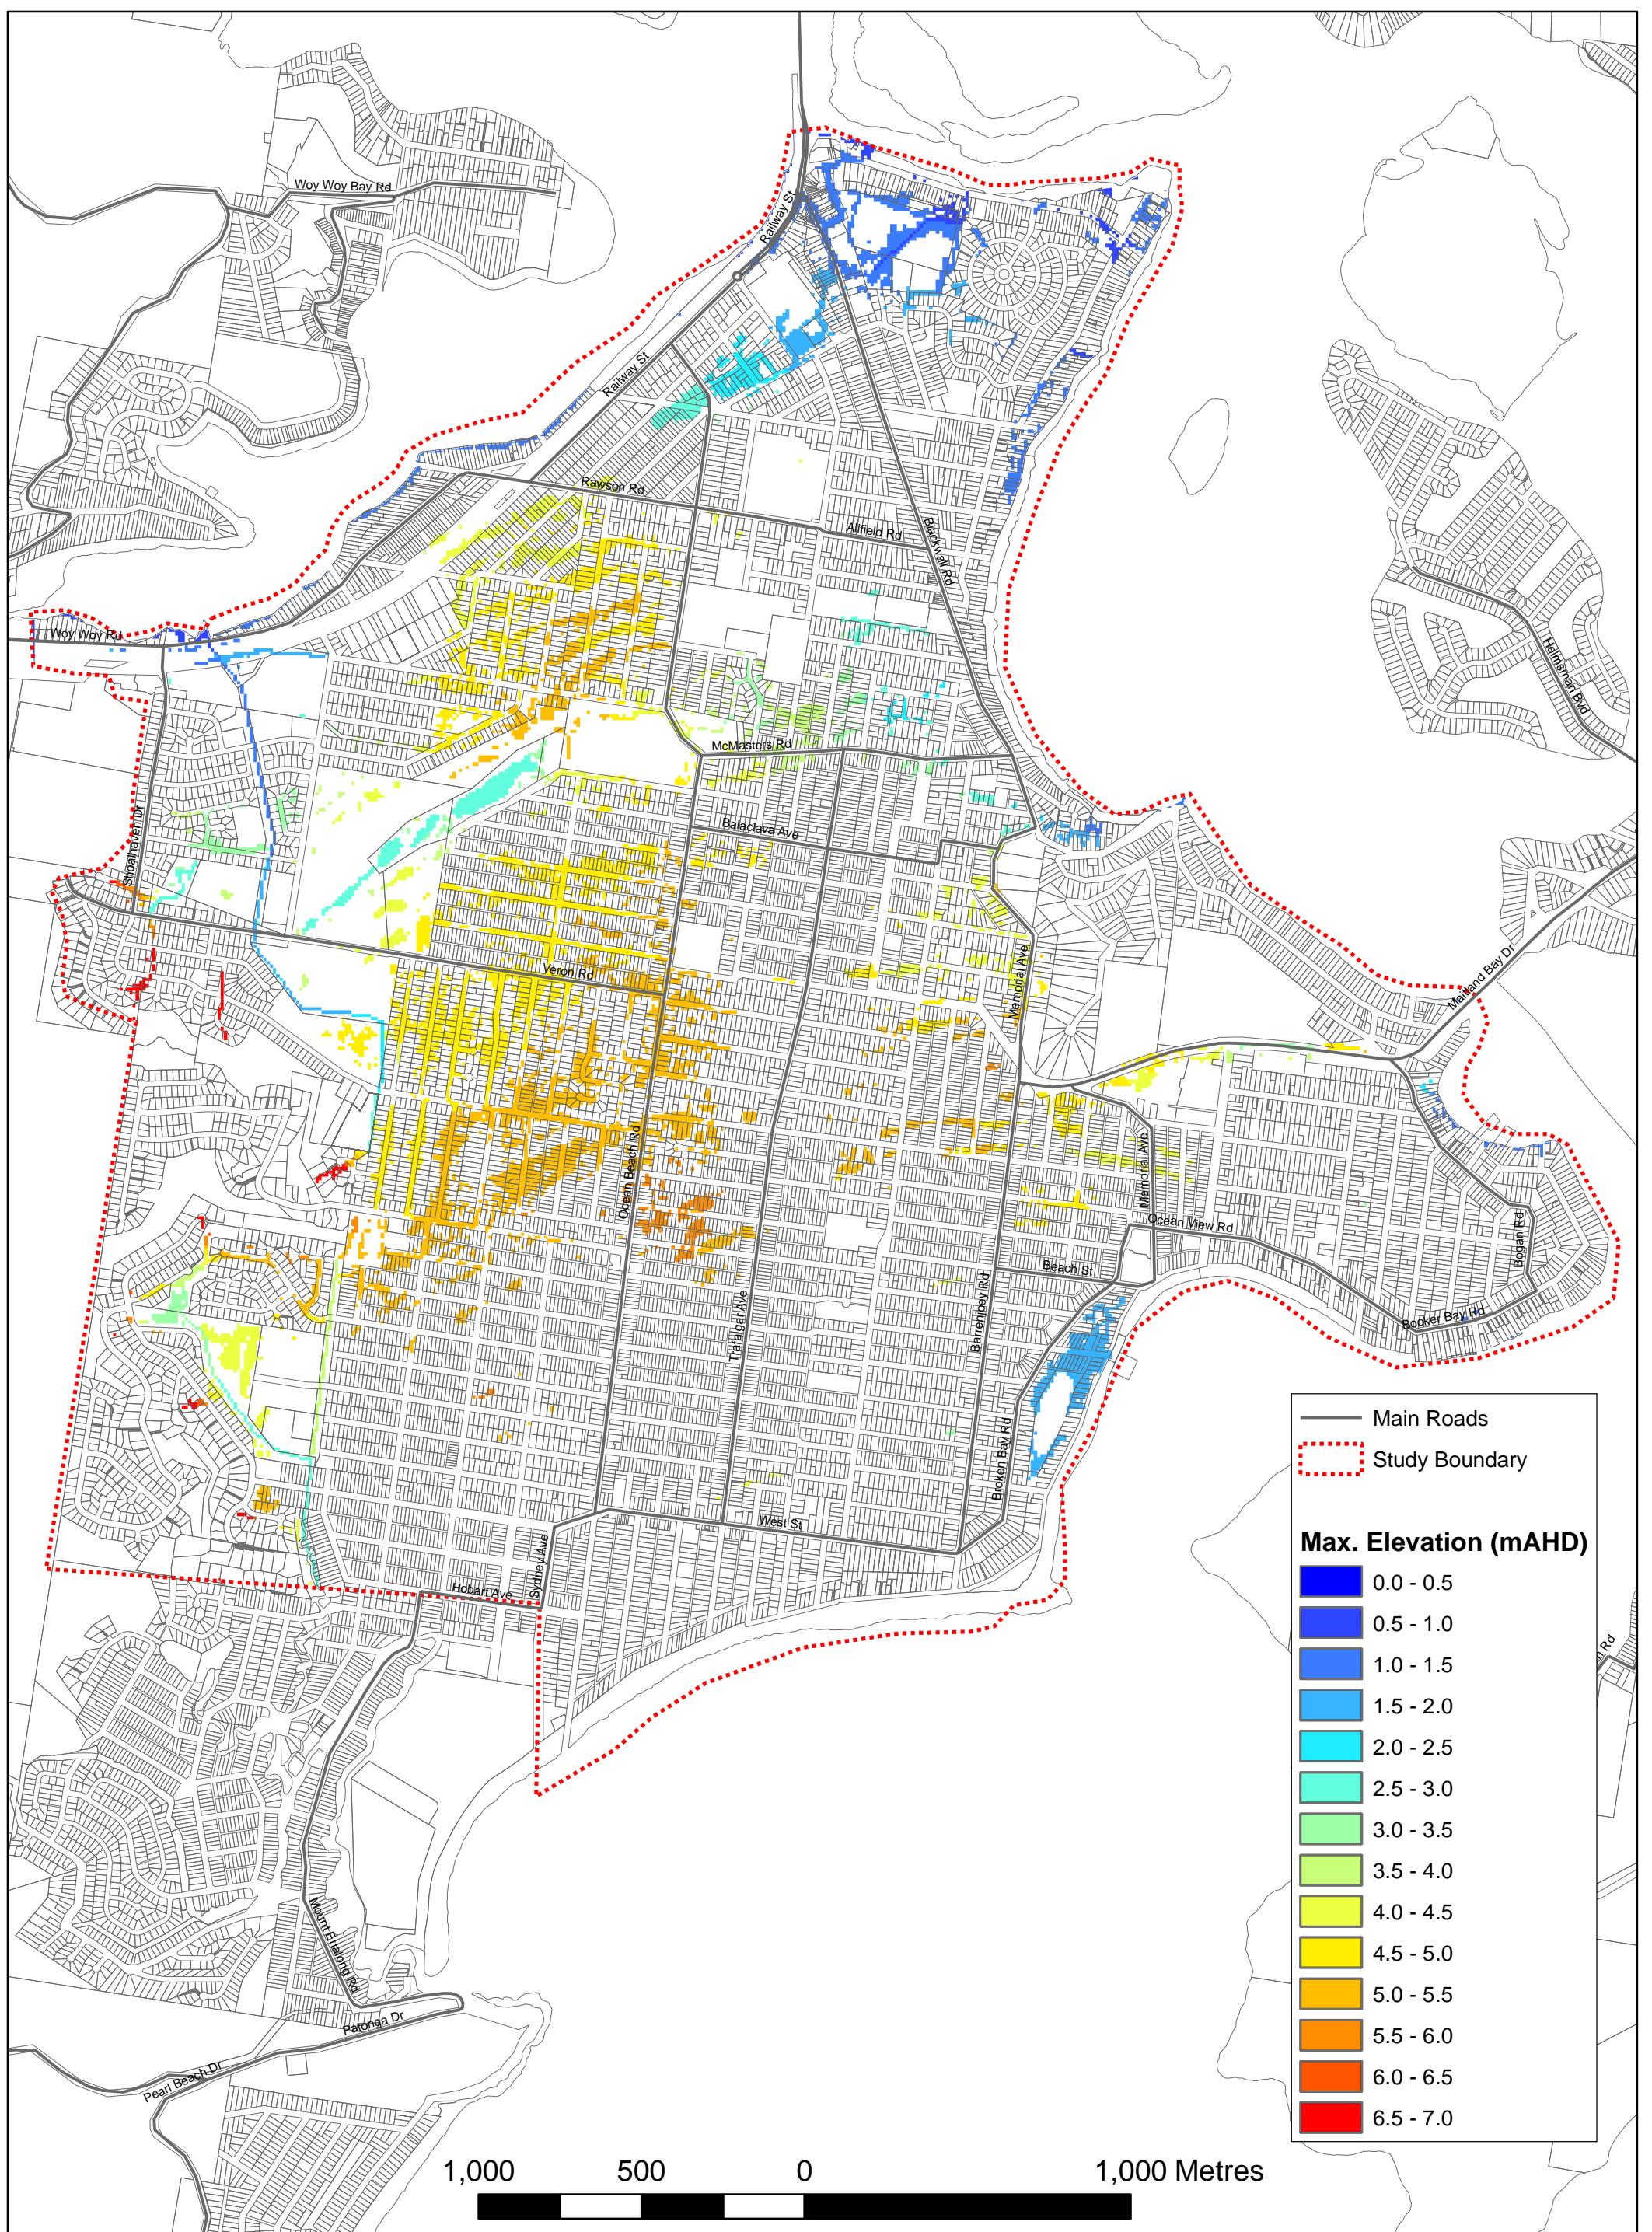

Figure 31 – Modelled Flood Elevation for 2yr ARI (50% AEP) with Future Development.

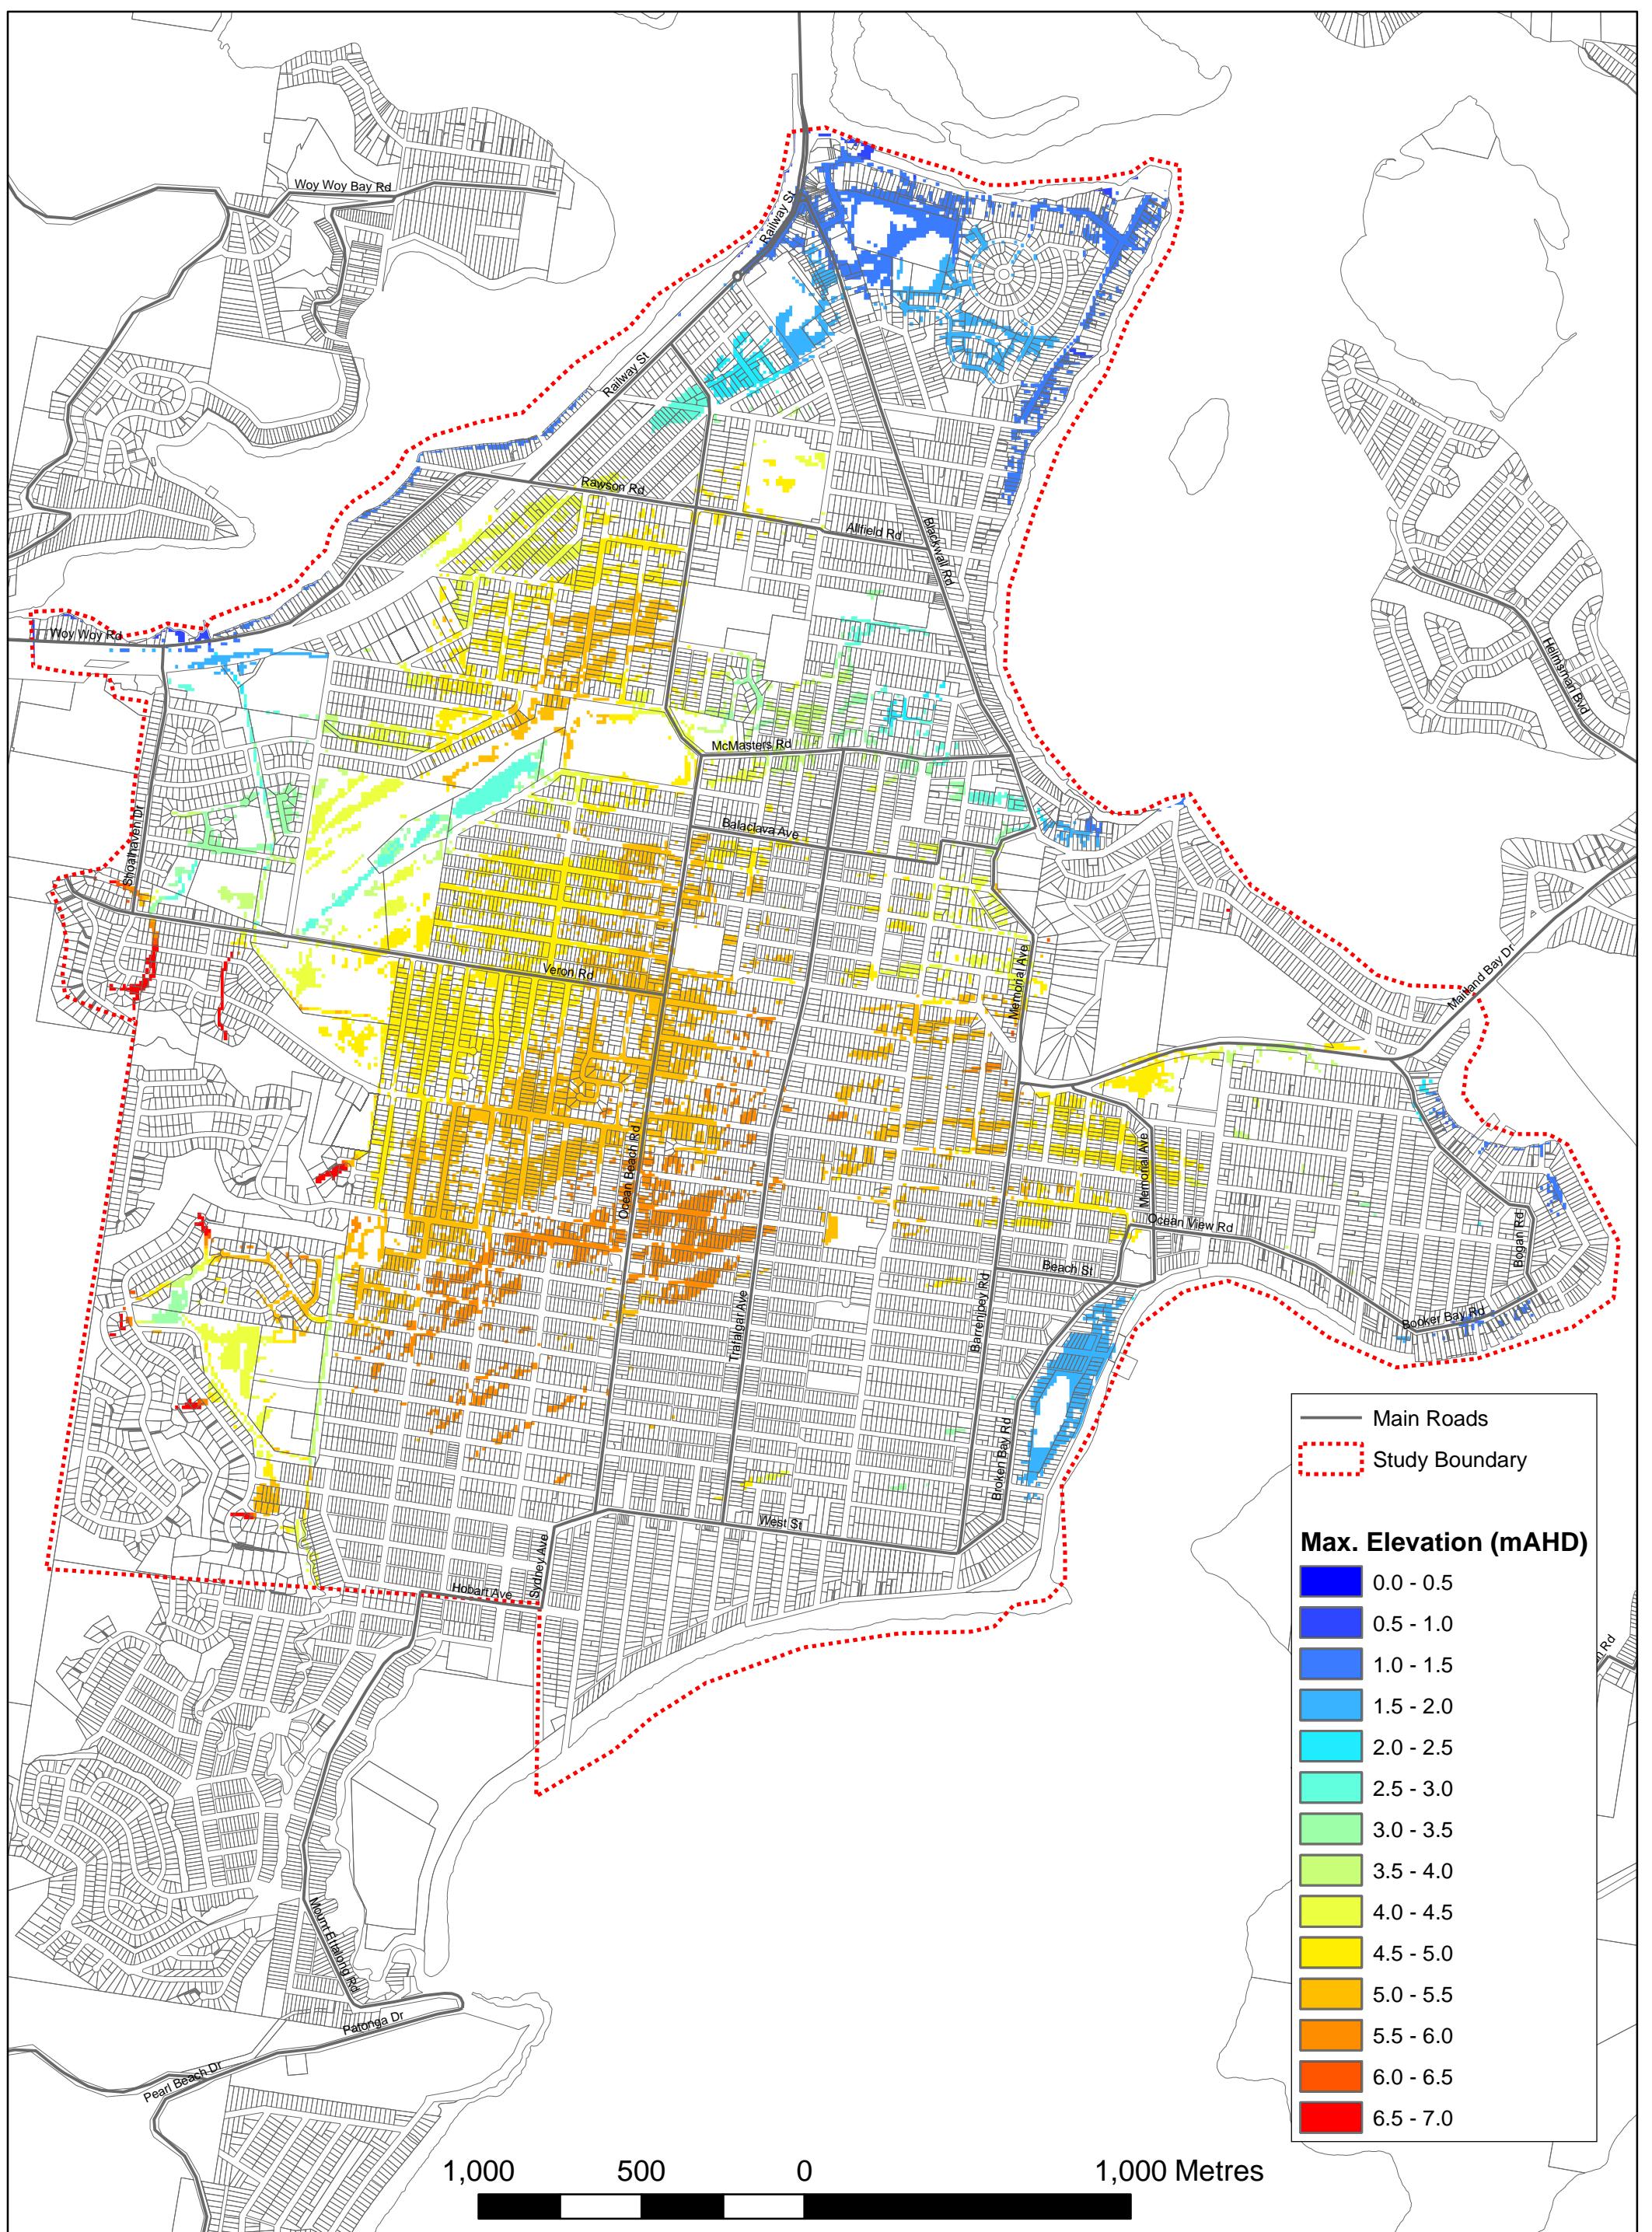

Figure 32 – Modelled Flood Elevation for 10yr ARI (10% AEP) with Future Development.

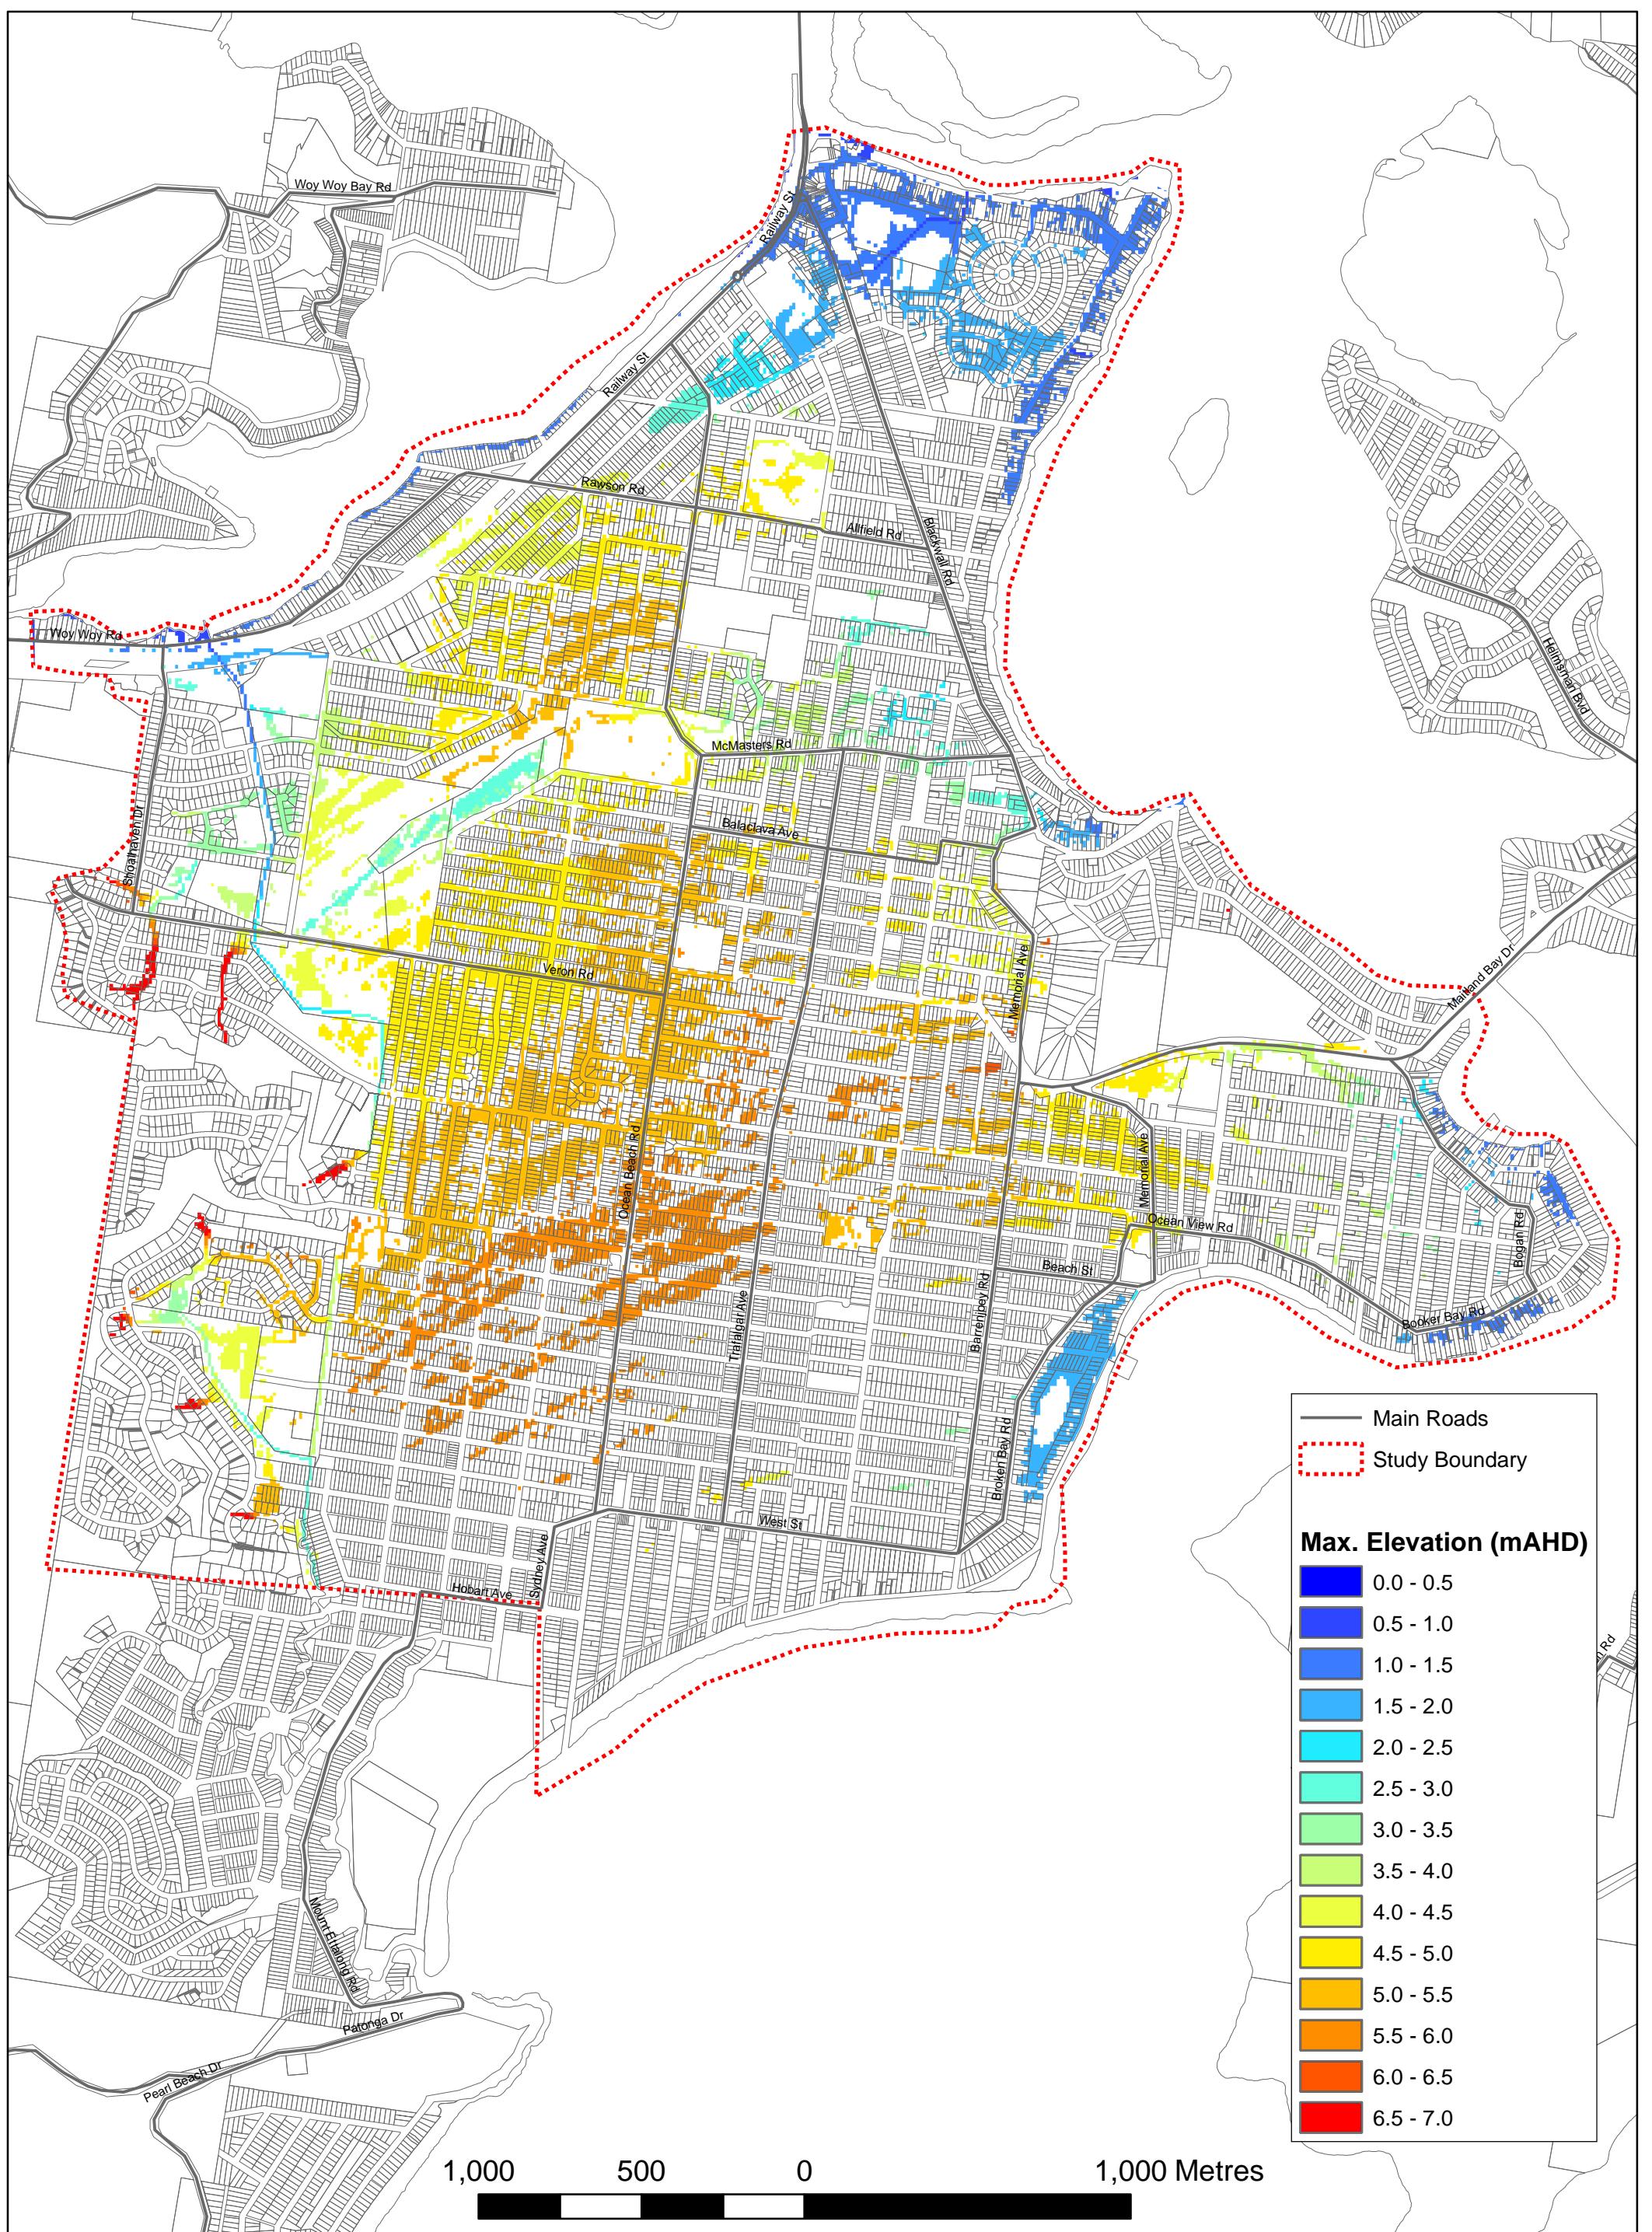

Figure 33 – Modelled Flood Elevation for 20yr ARI (5% AEP) with Future Development.

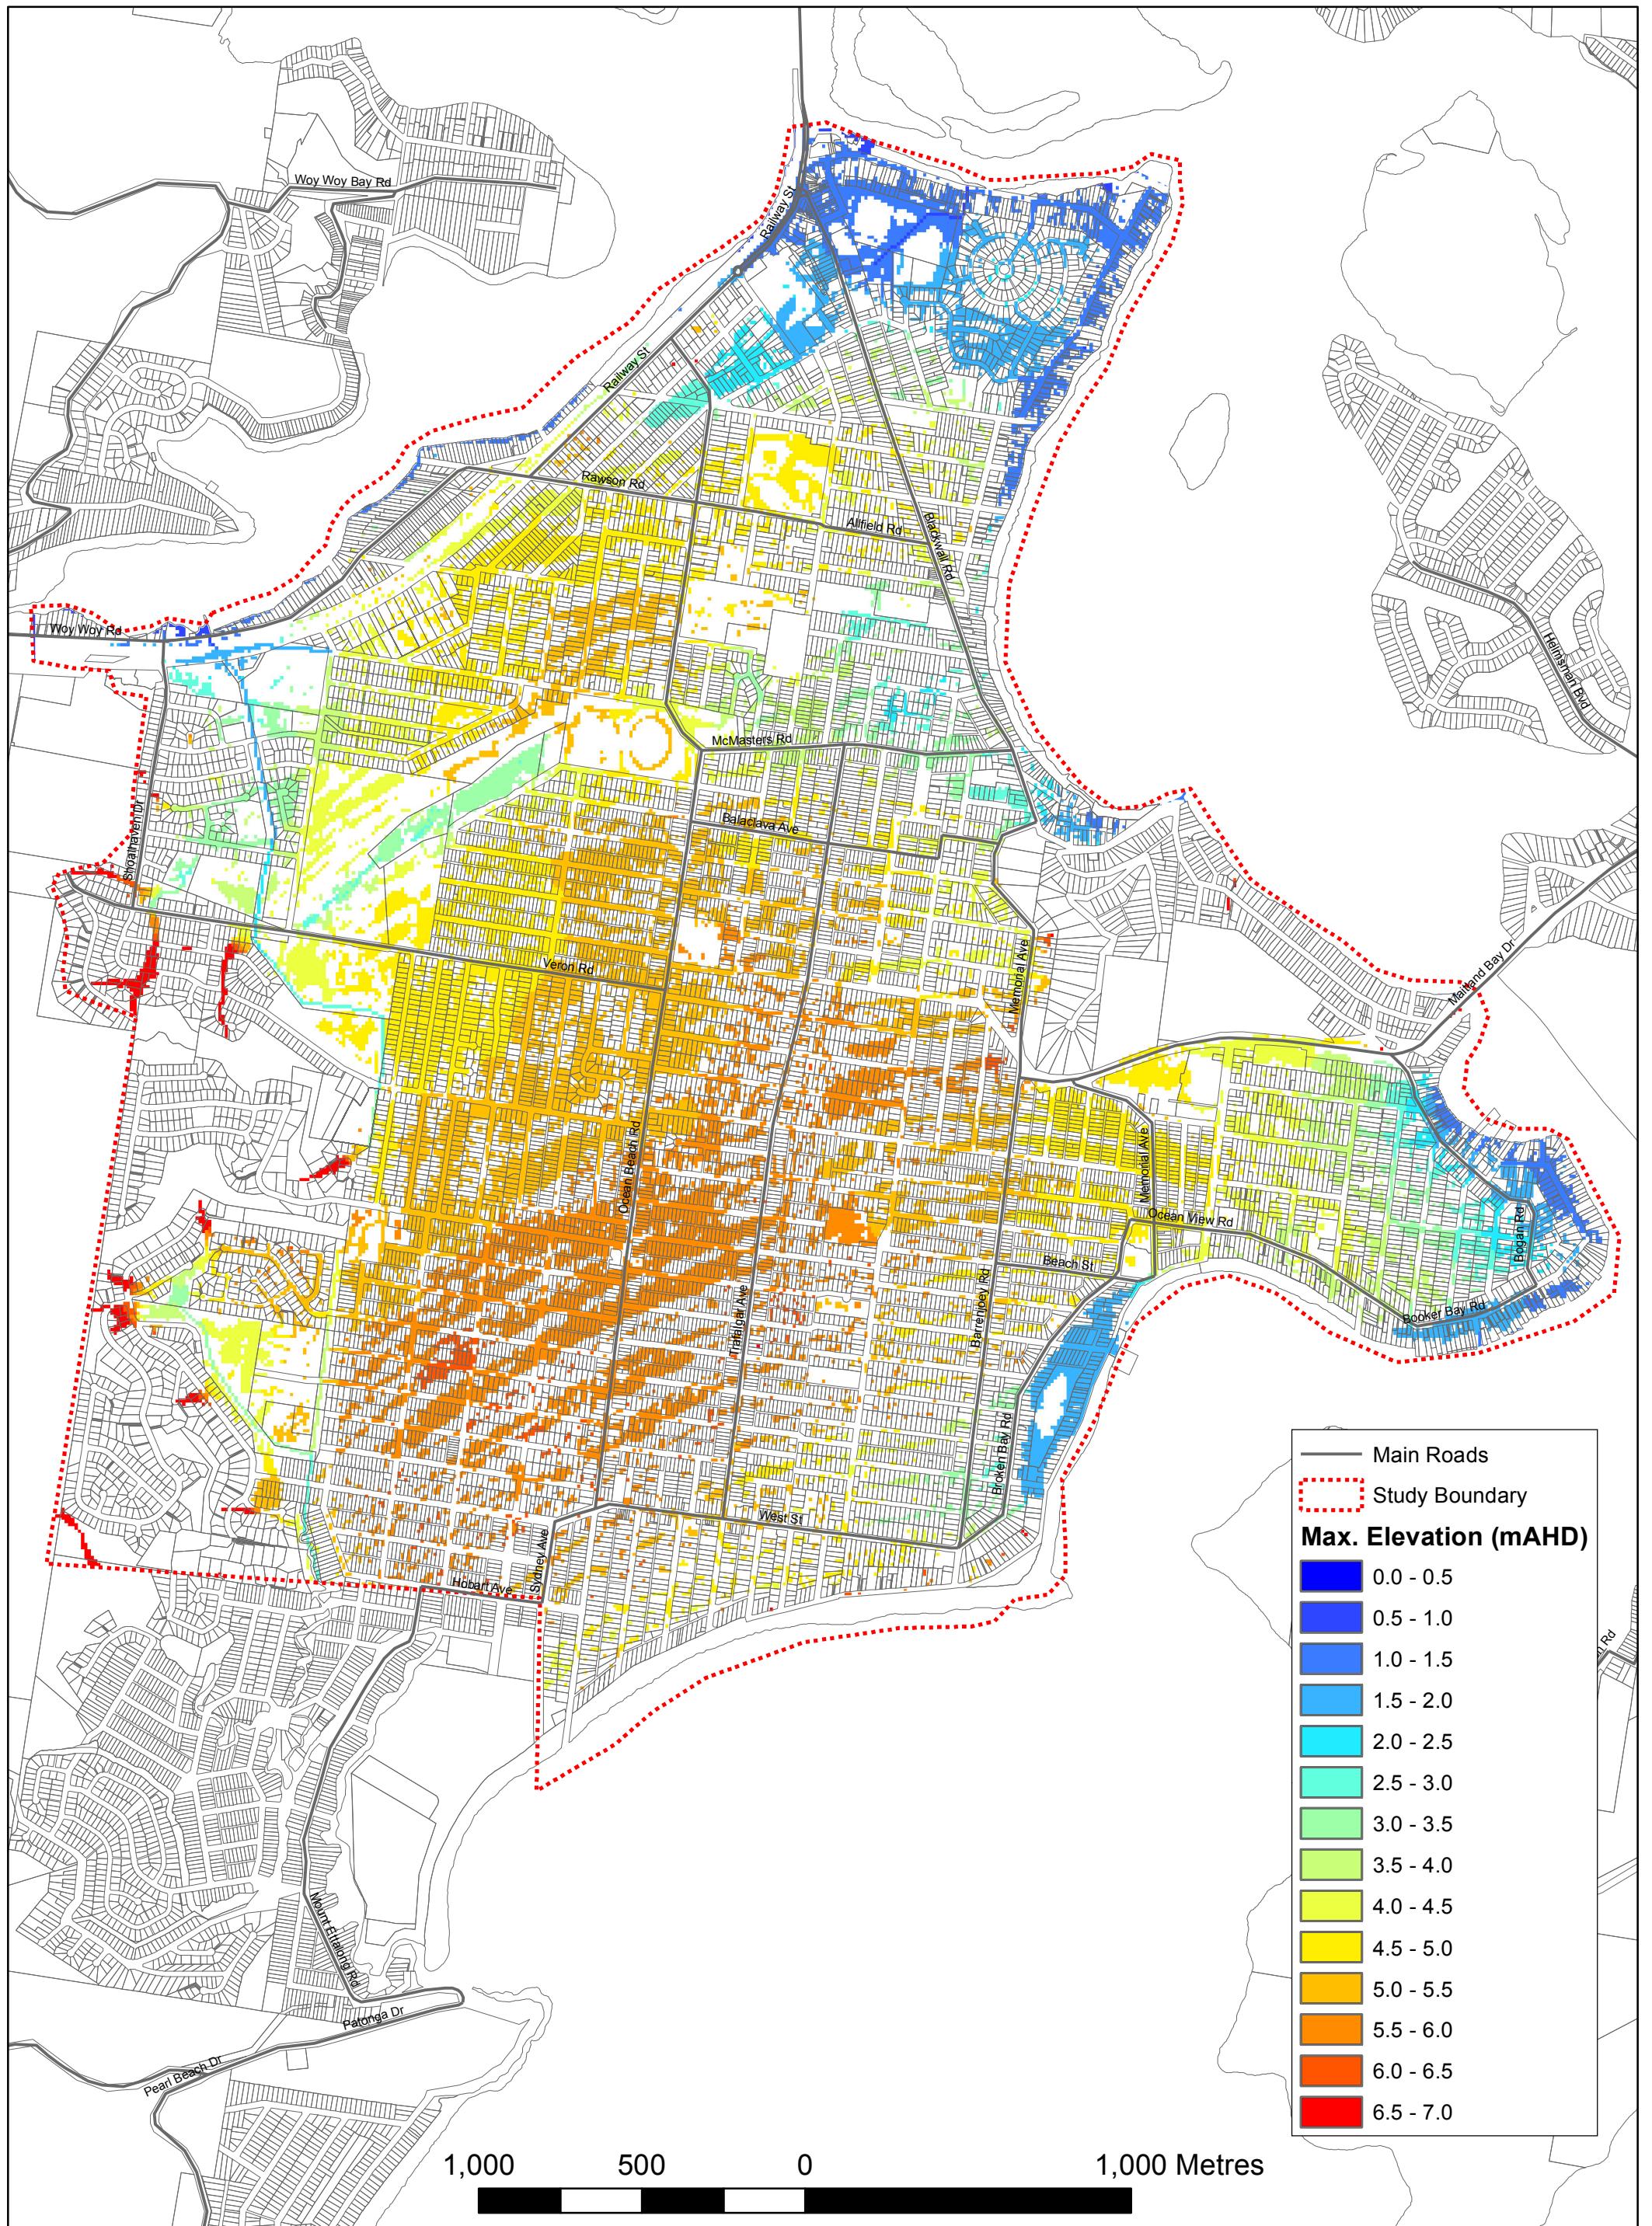

Figure 34 – Modelled Flood Elevation for 100yr ARI (1% AEP) with Future Development.

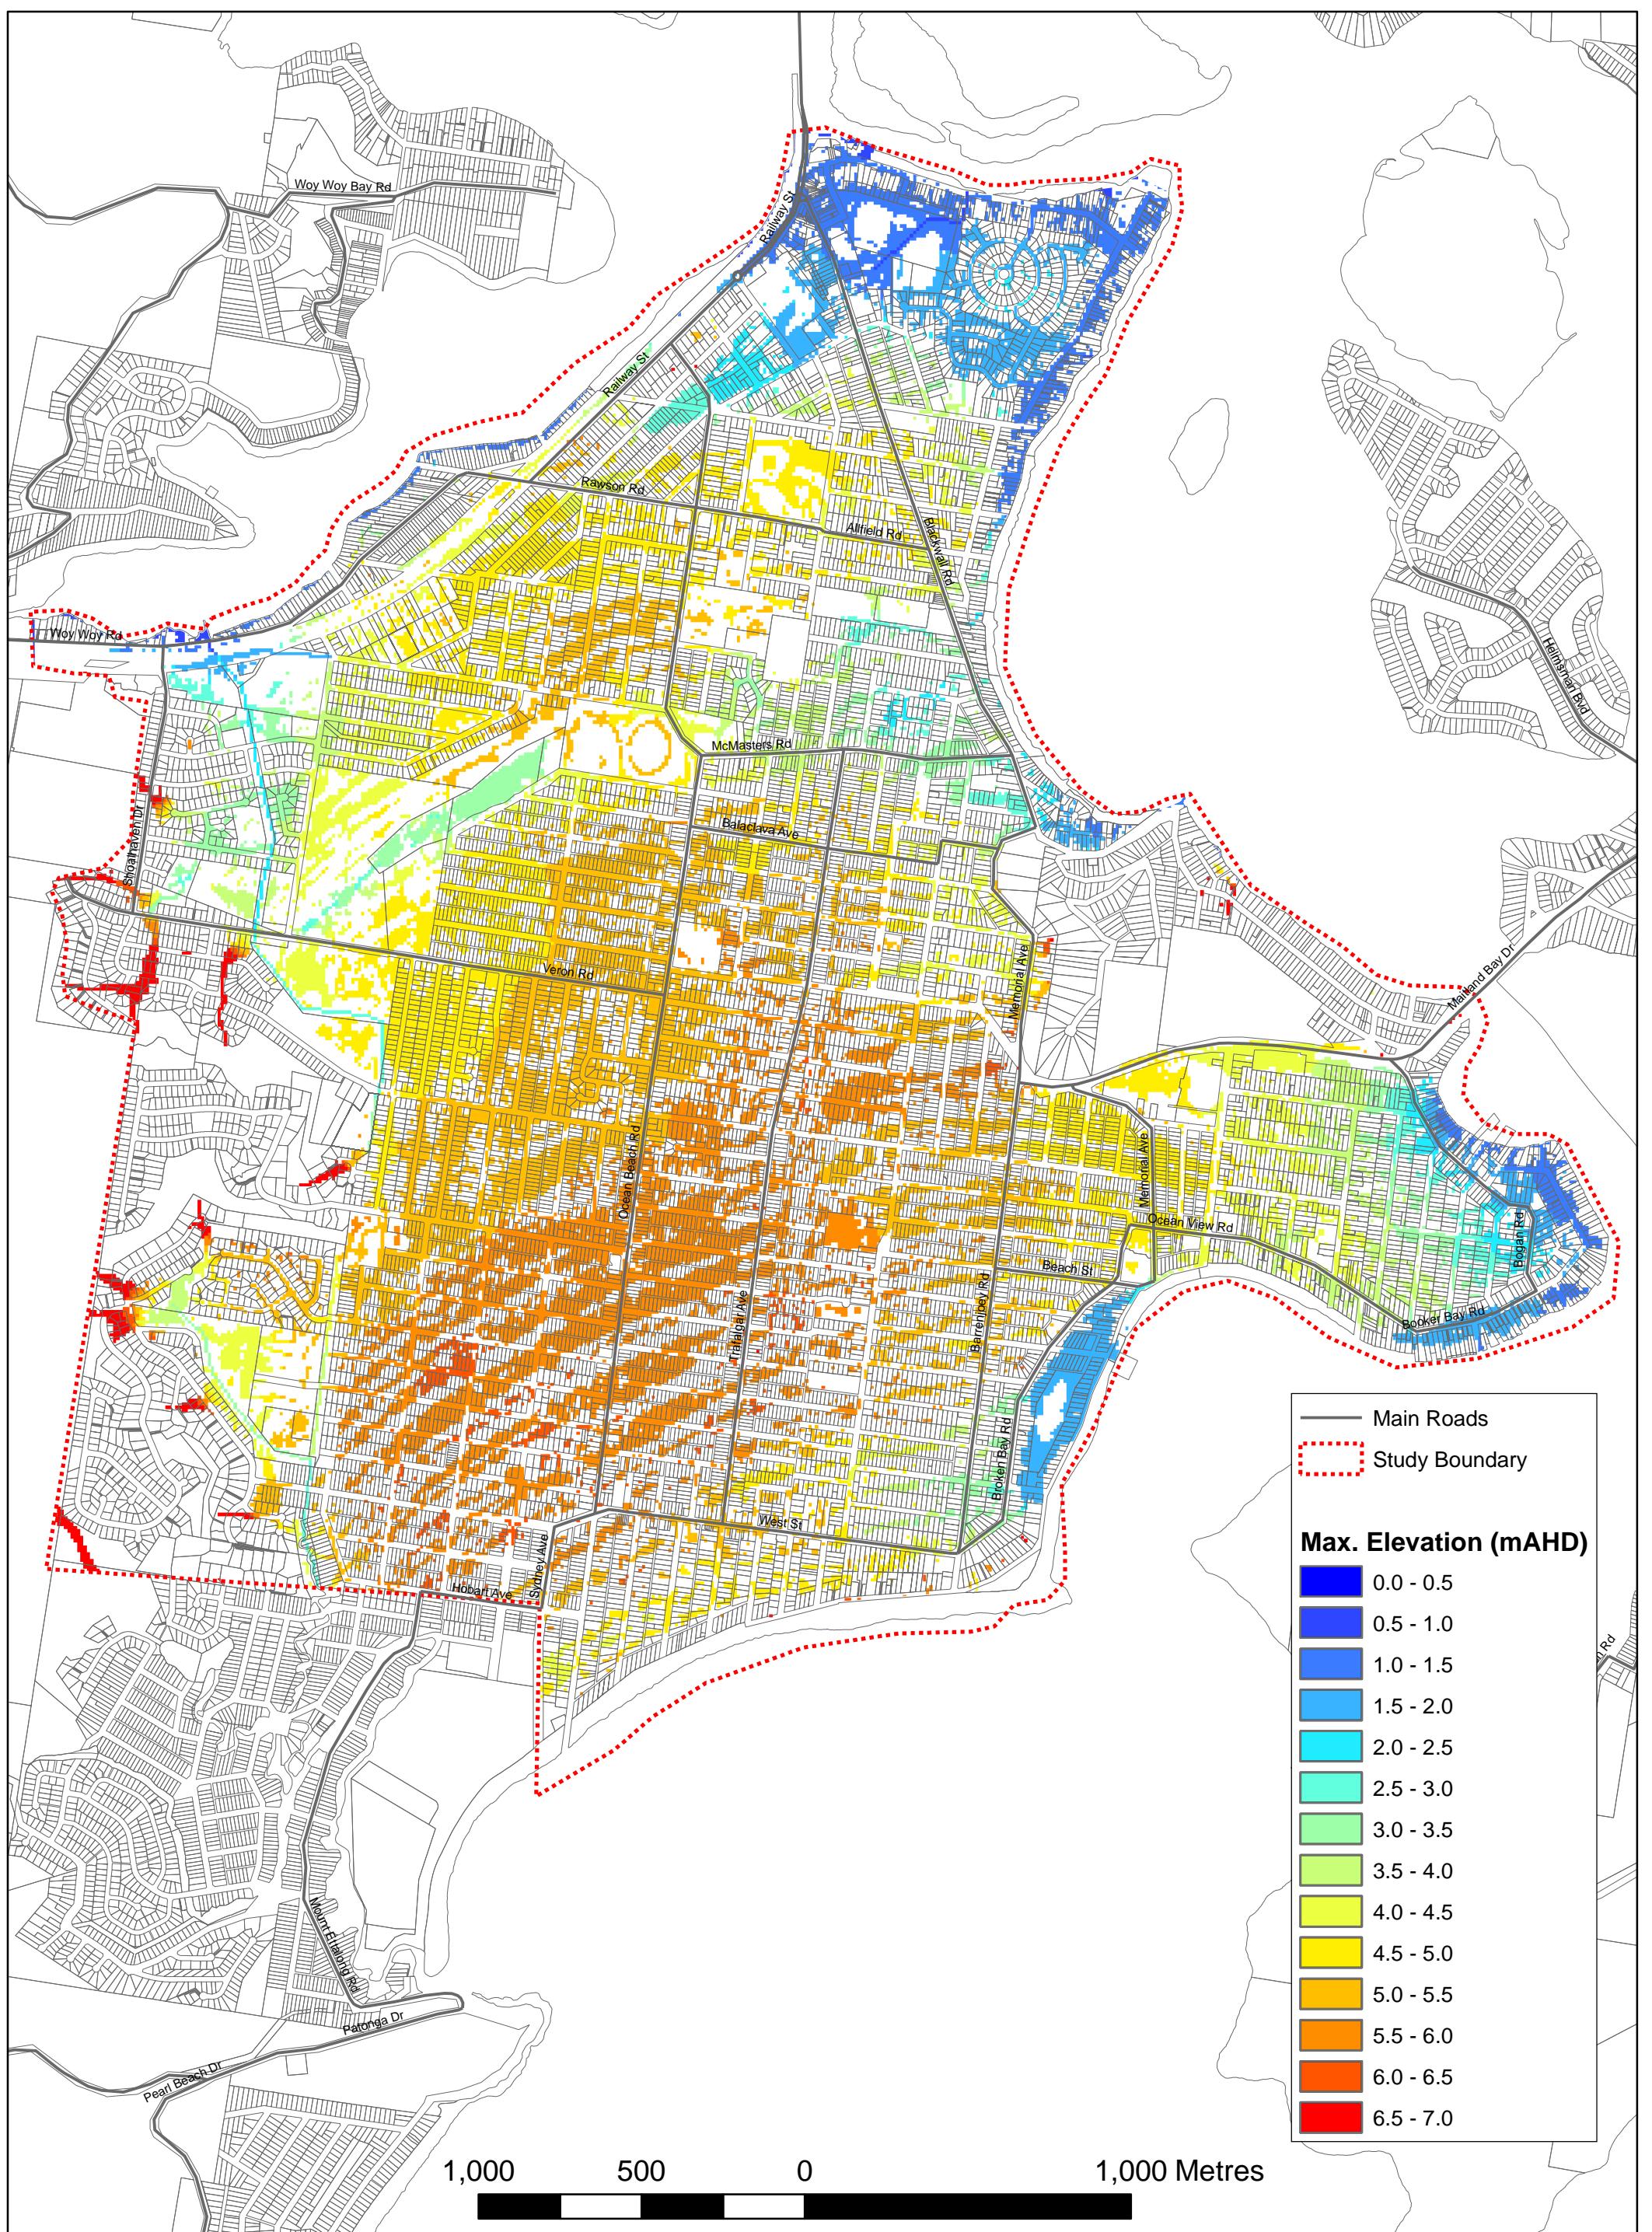

Figure 35 – Modelled Flood Elevation for 200yr ARI (0.5% AEP) with Future Development.

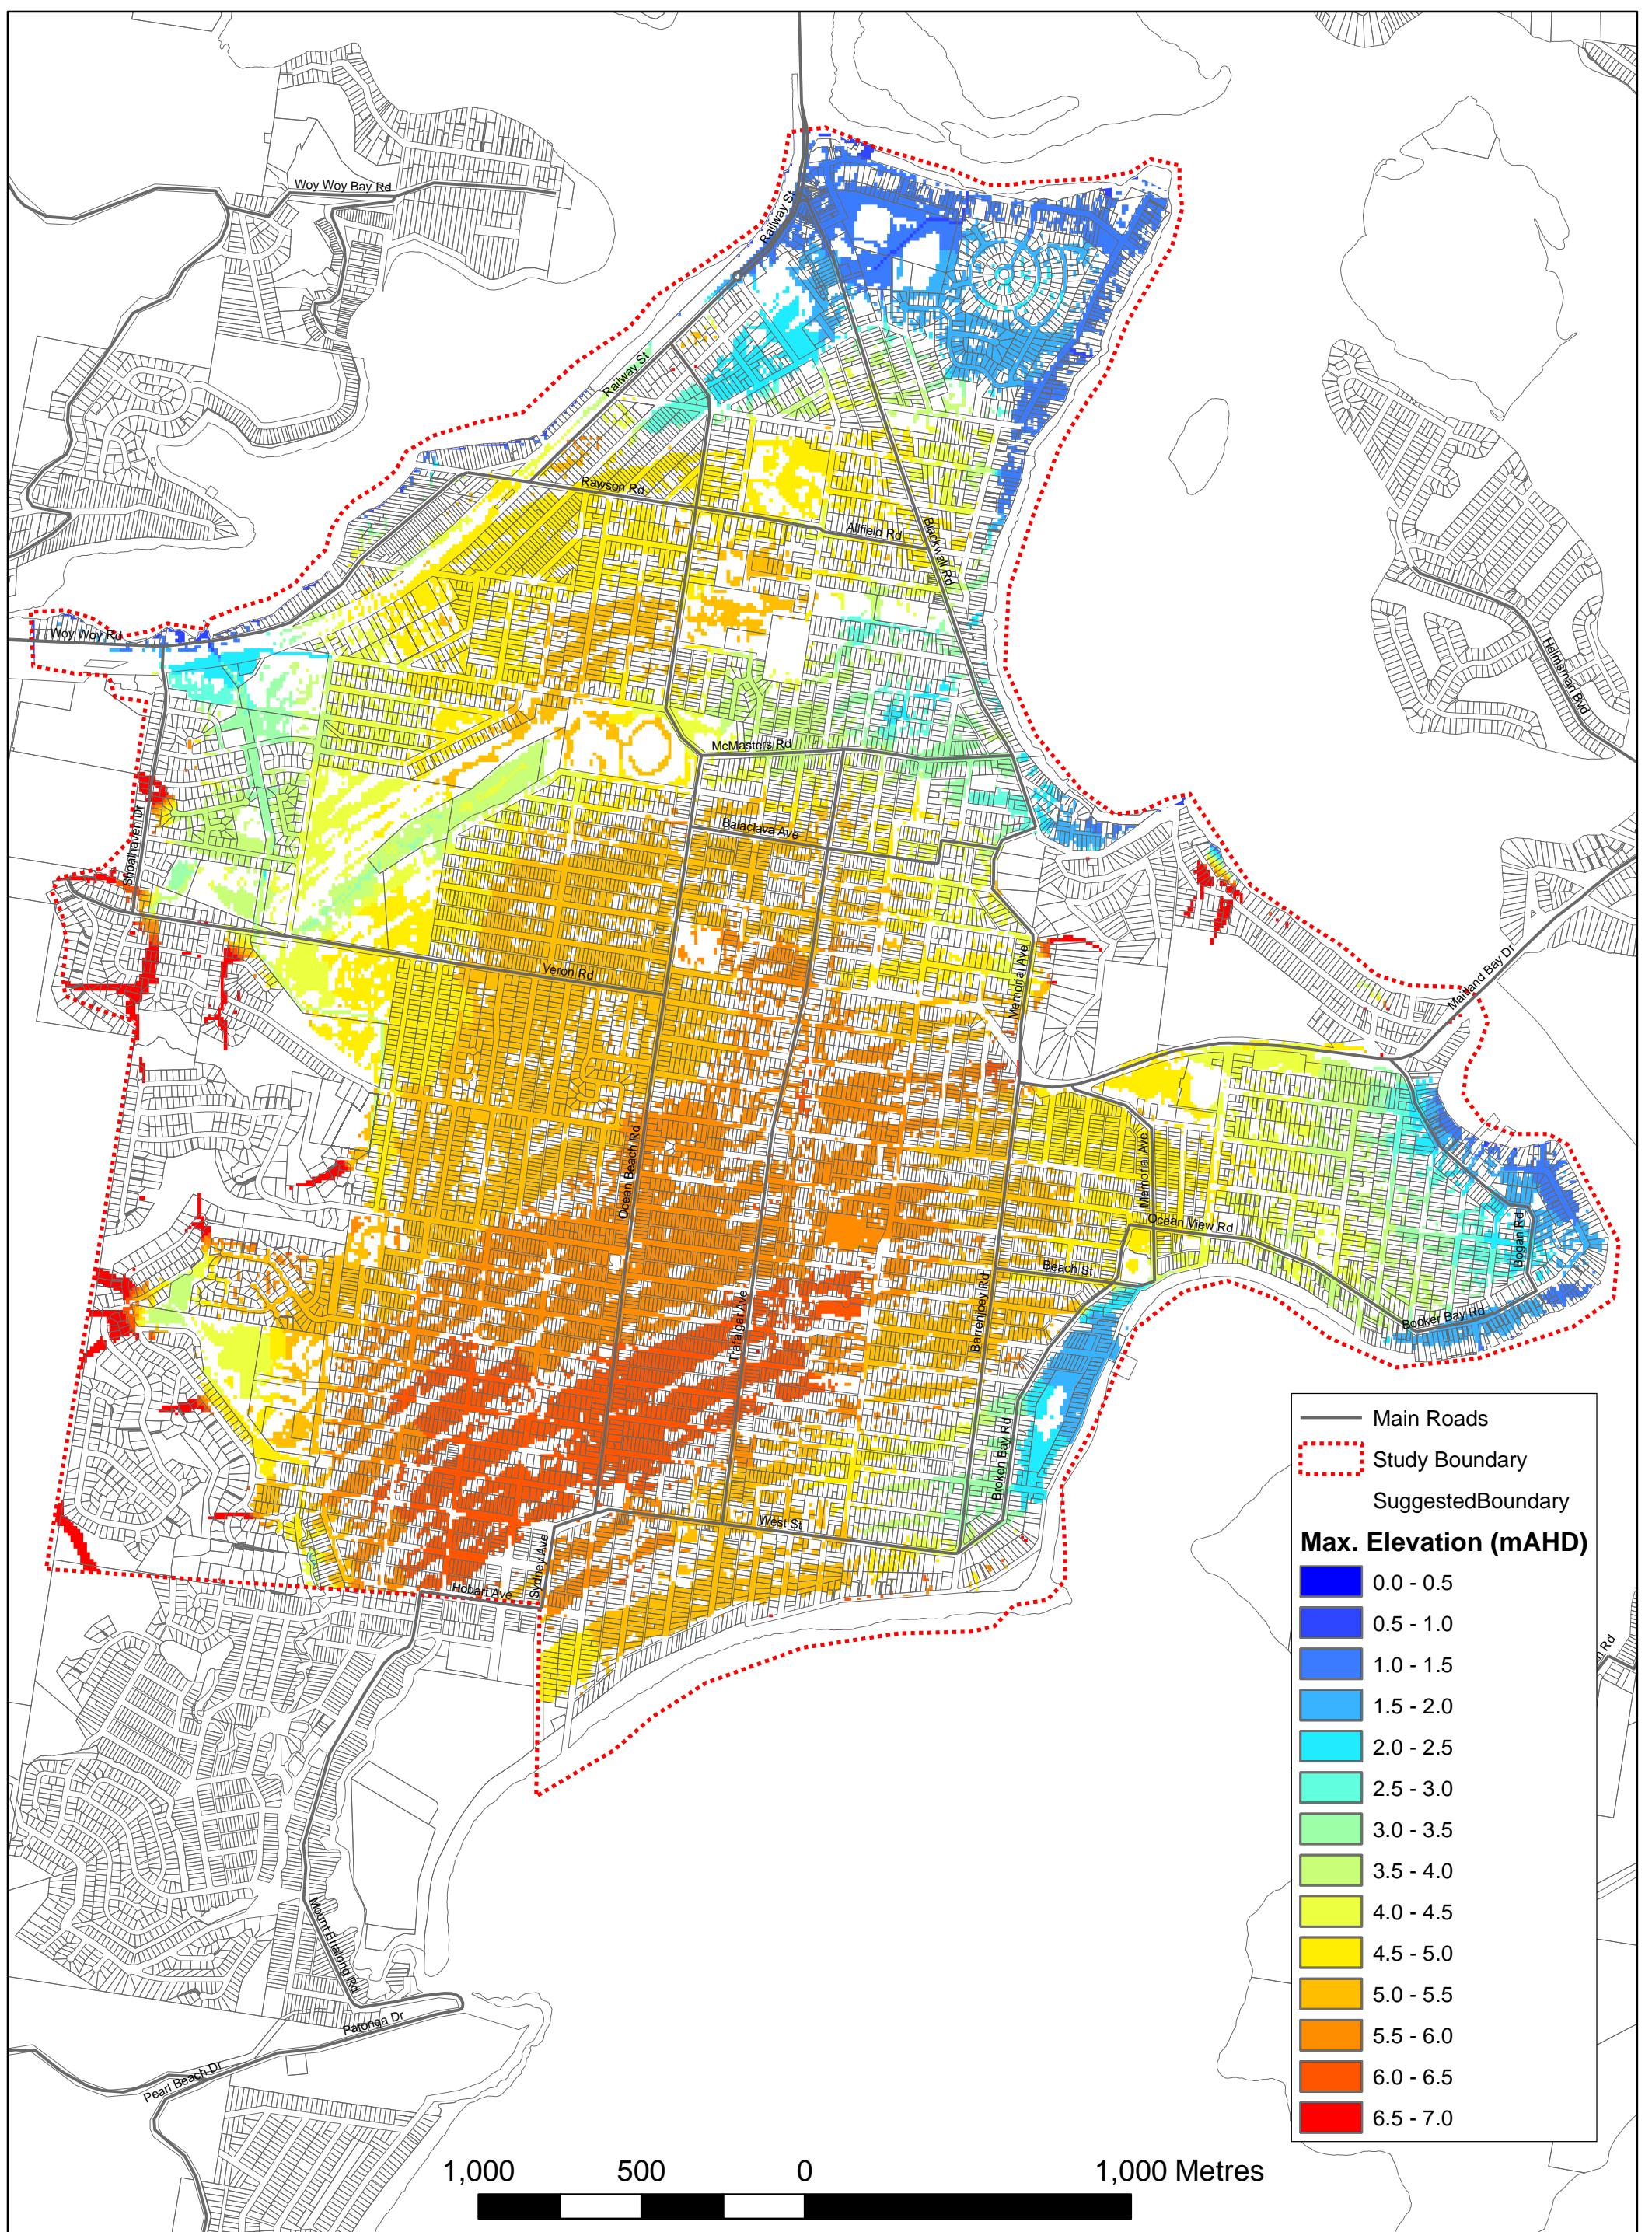

Figure 36 – Modelled Flood Elevation for PMP Event with Future Development.

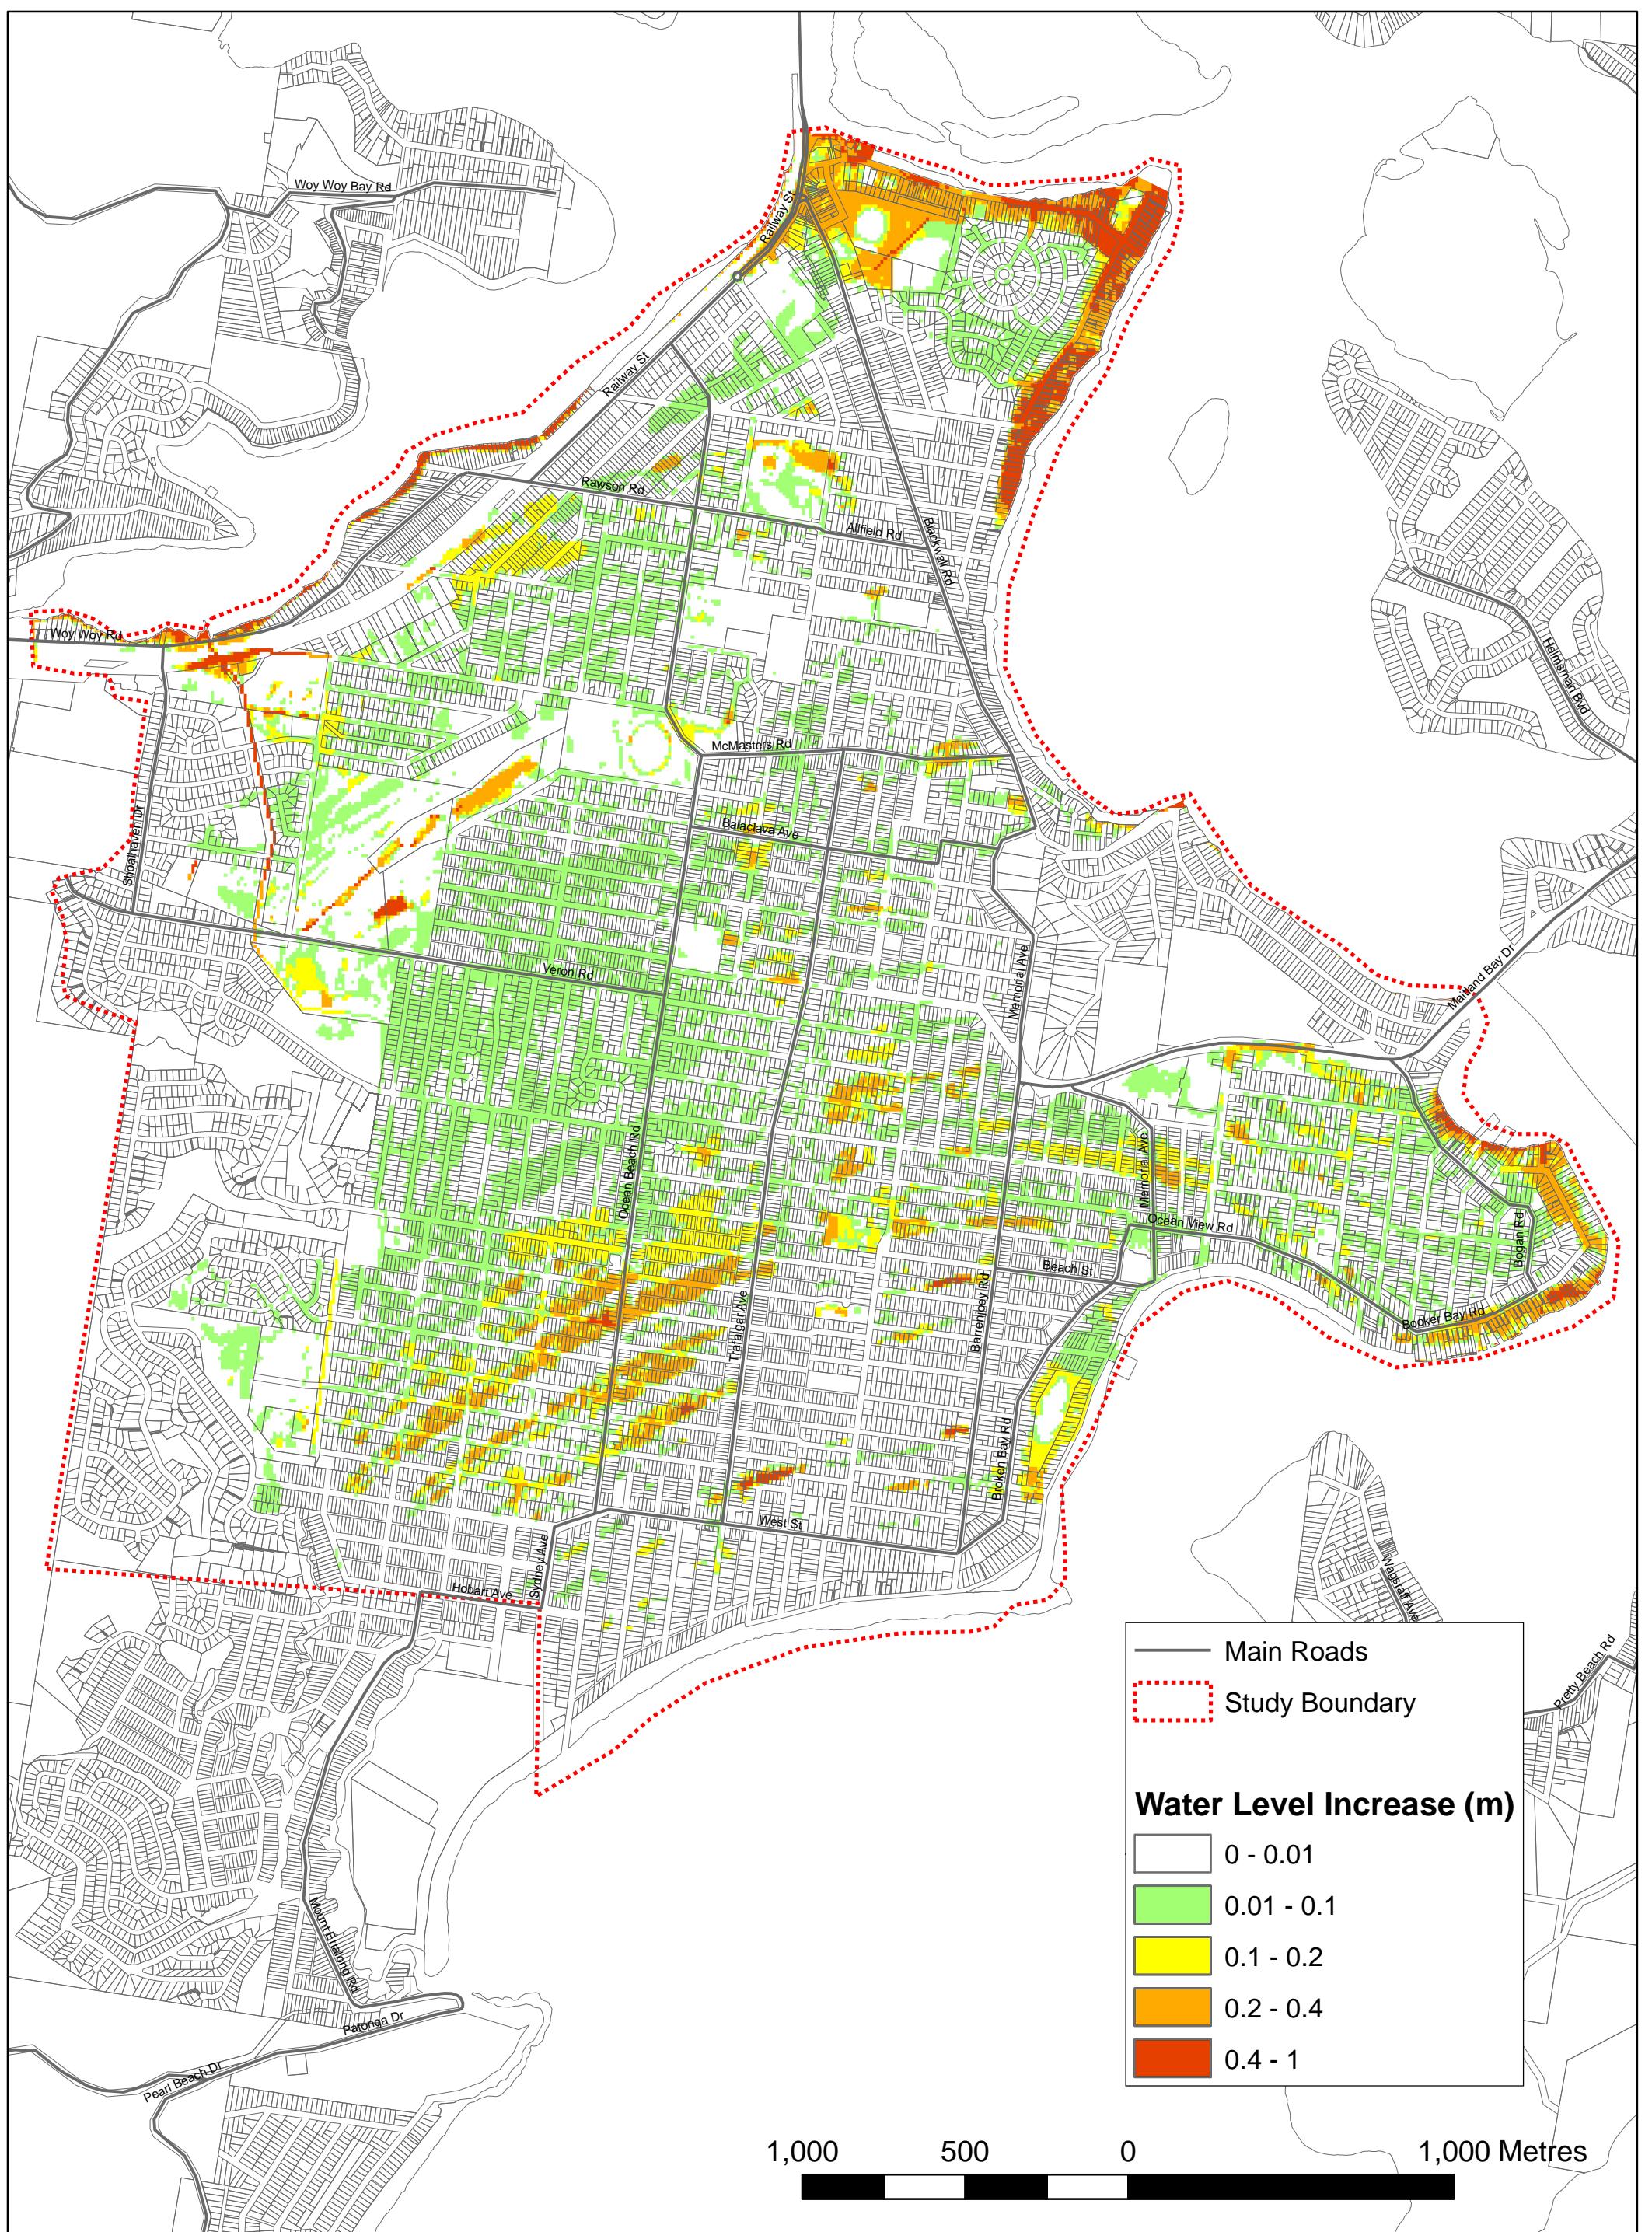

Figure 37 – Modelled Water Depth Change for Low Sea Level Rise for 100yr ARI (1% AEP) with Future Development.

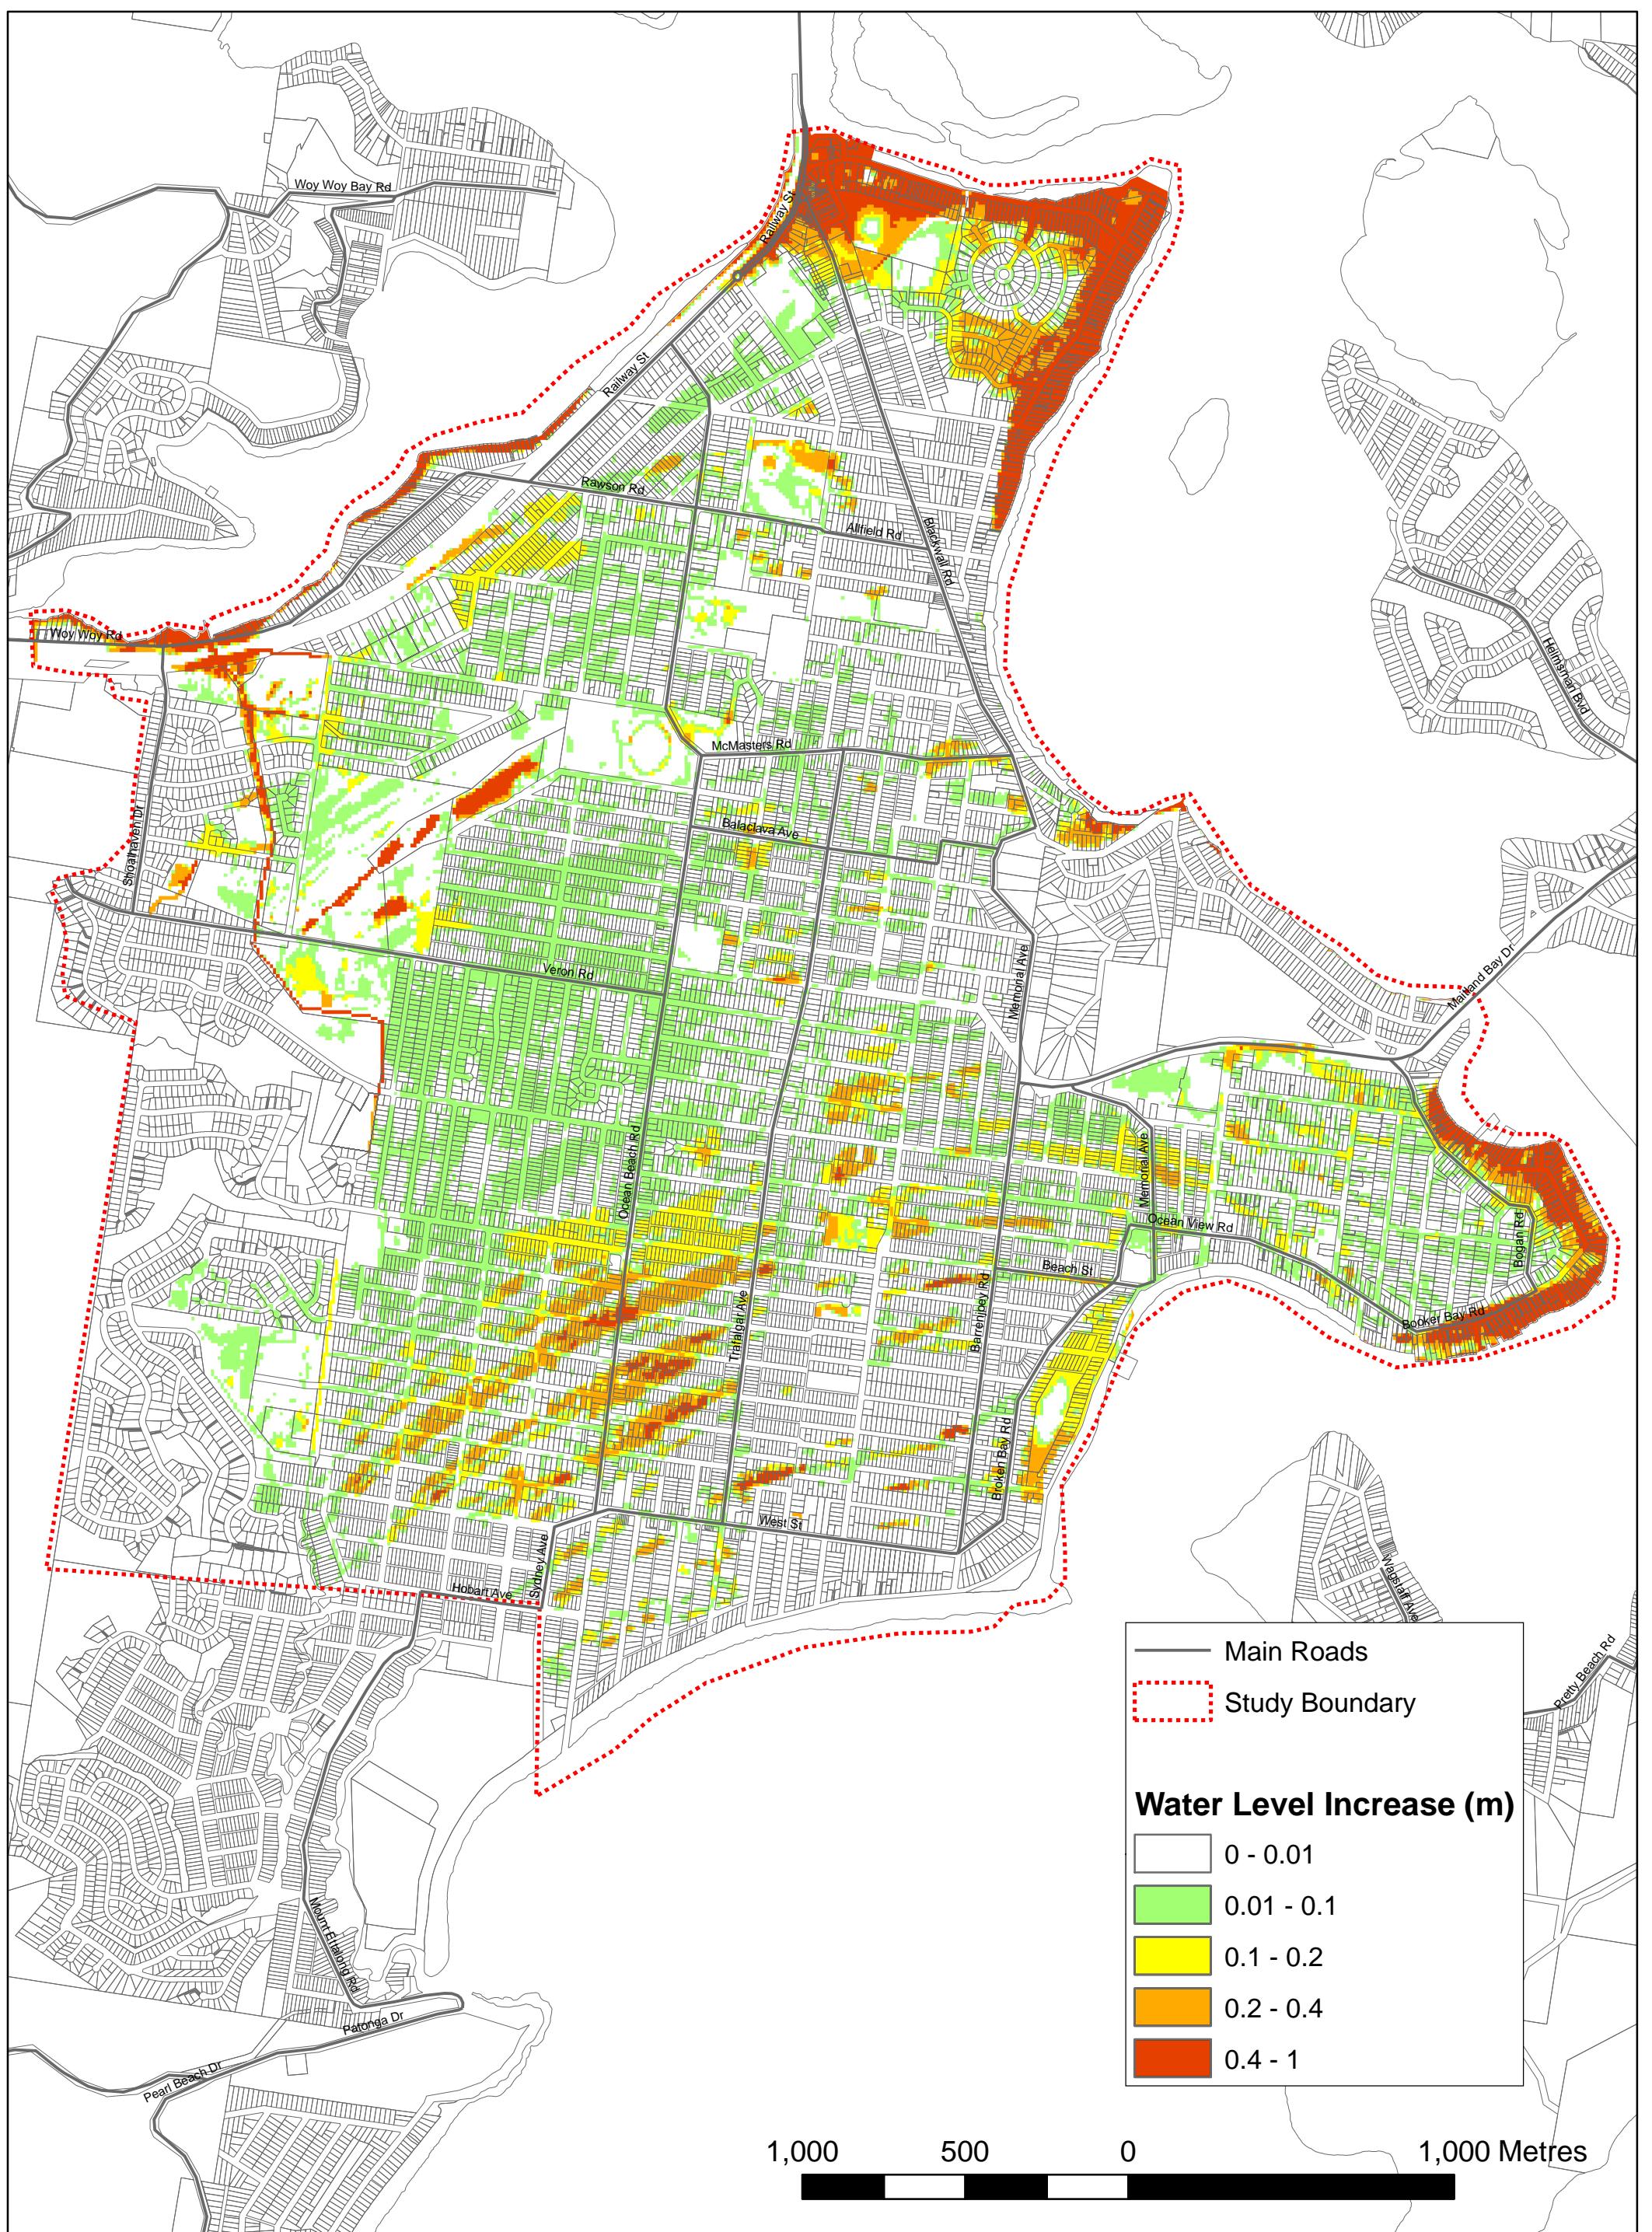

Figure 38 – Modelled Water Depth Change for High Sea Level Rise for 100yr ARI (1% AEP) with Future Development.

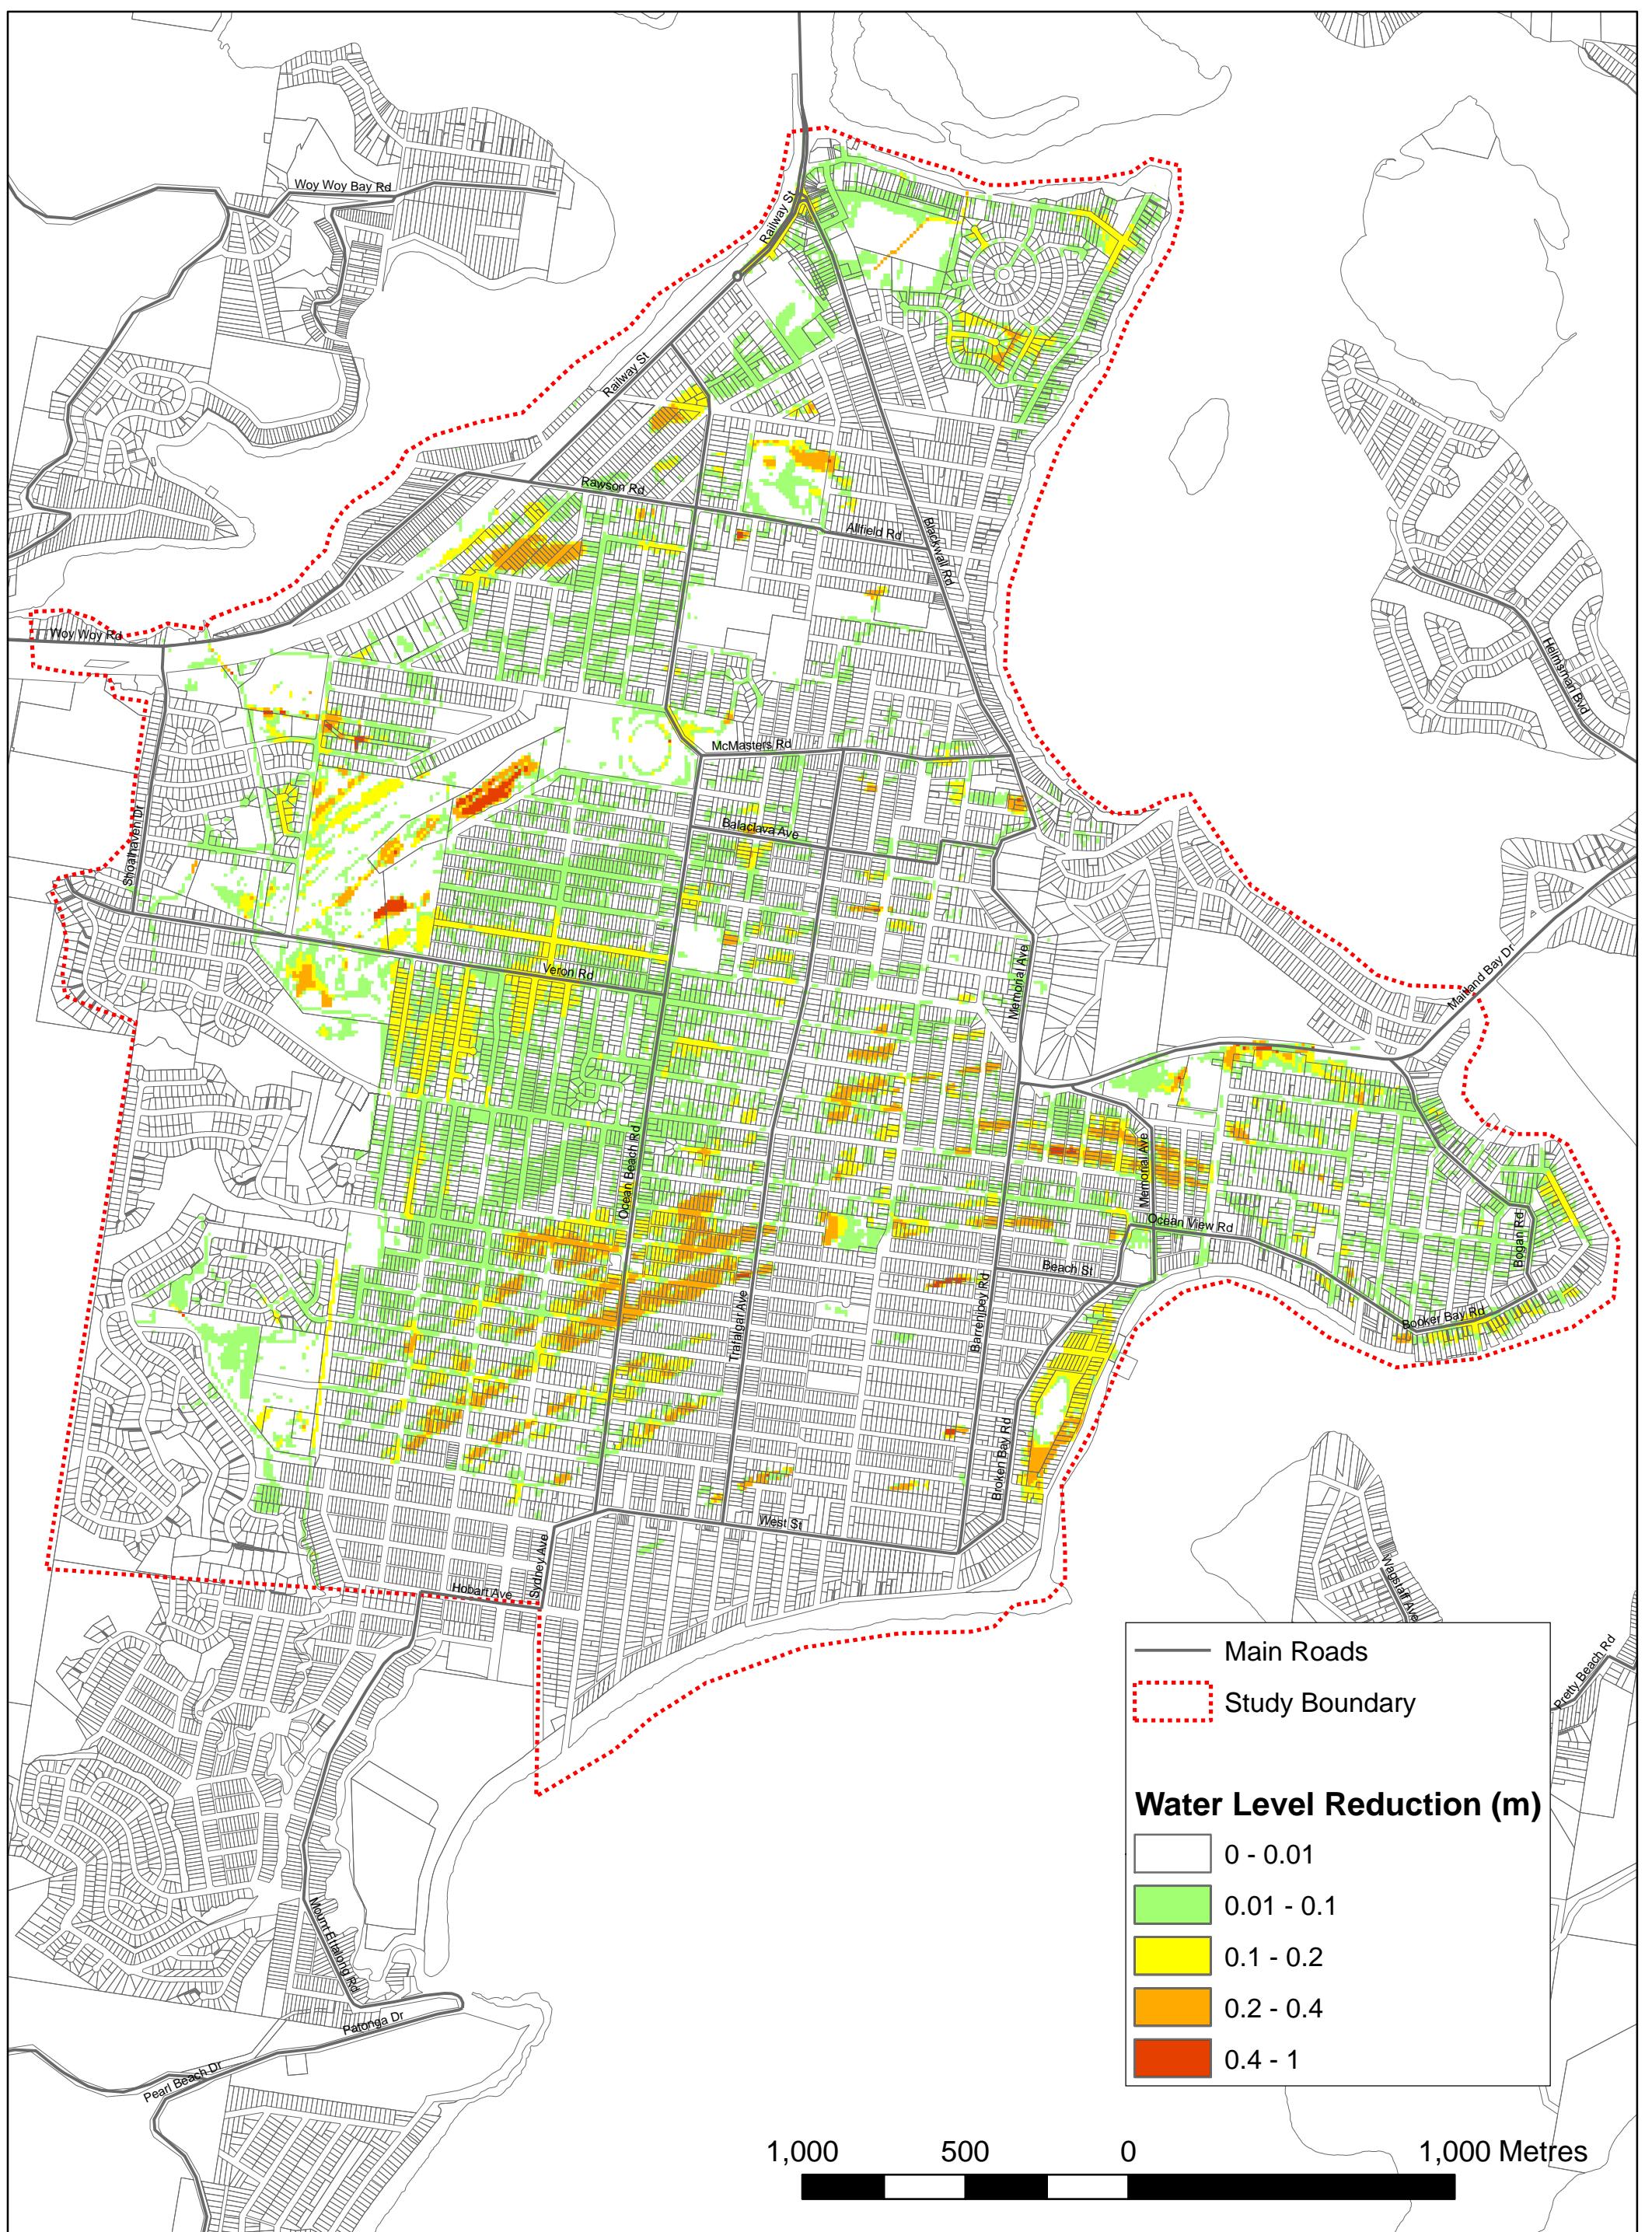

Figure 39 – Modelled Water Depth Change for Low Antecedent Groundwater Levels for 100yr ARI (1% AEP) with Future Development.

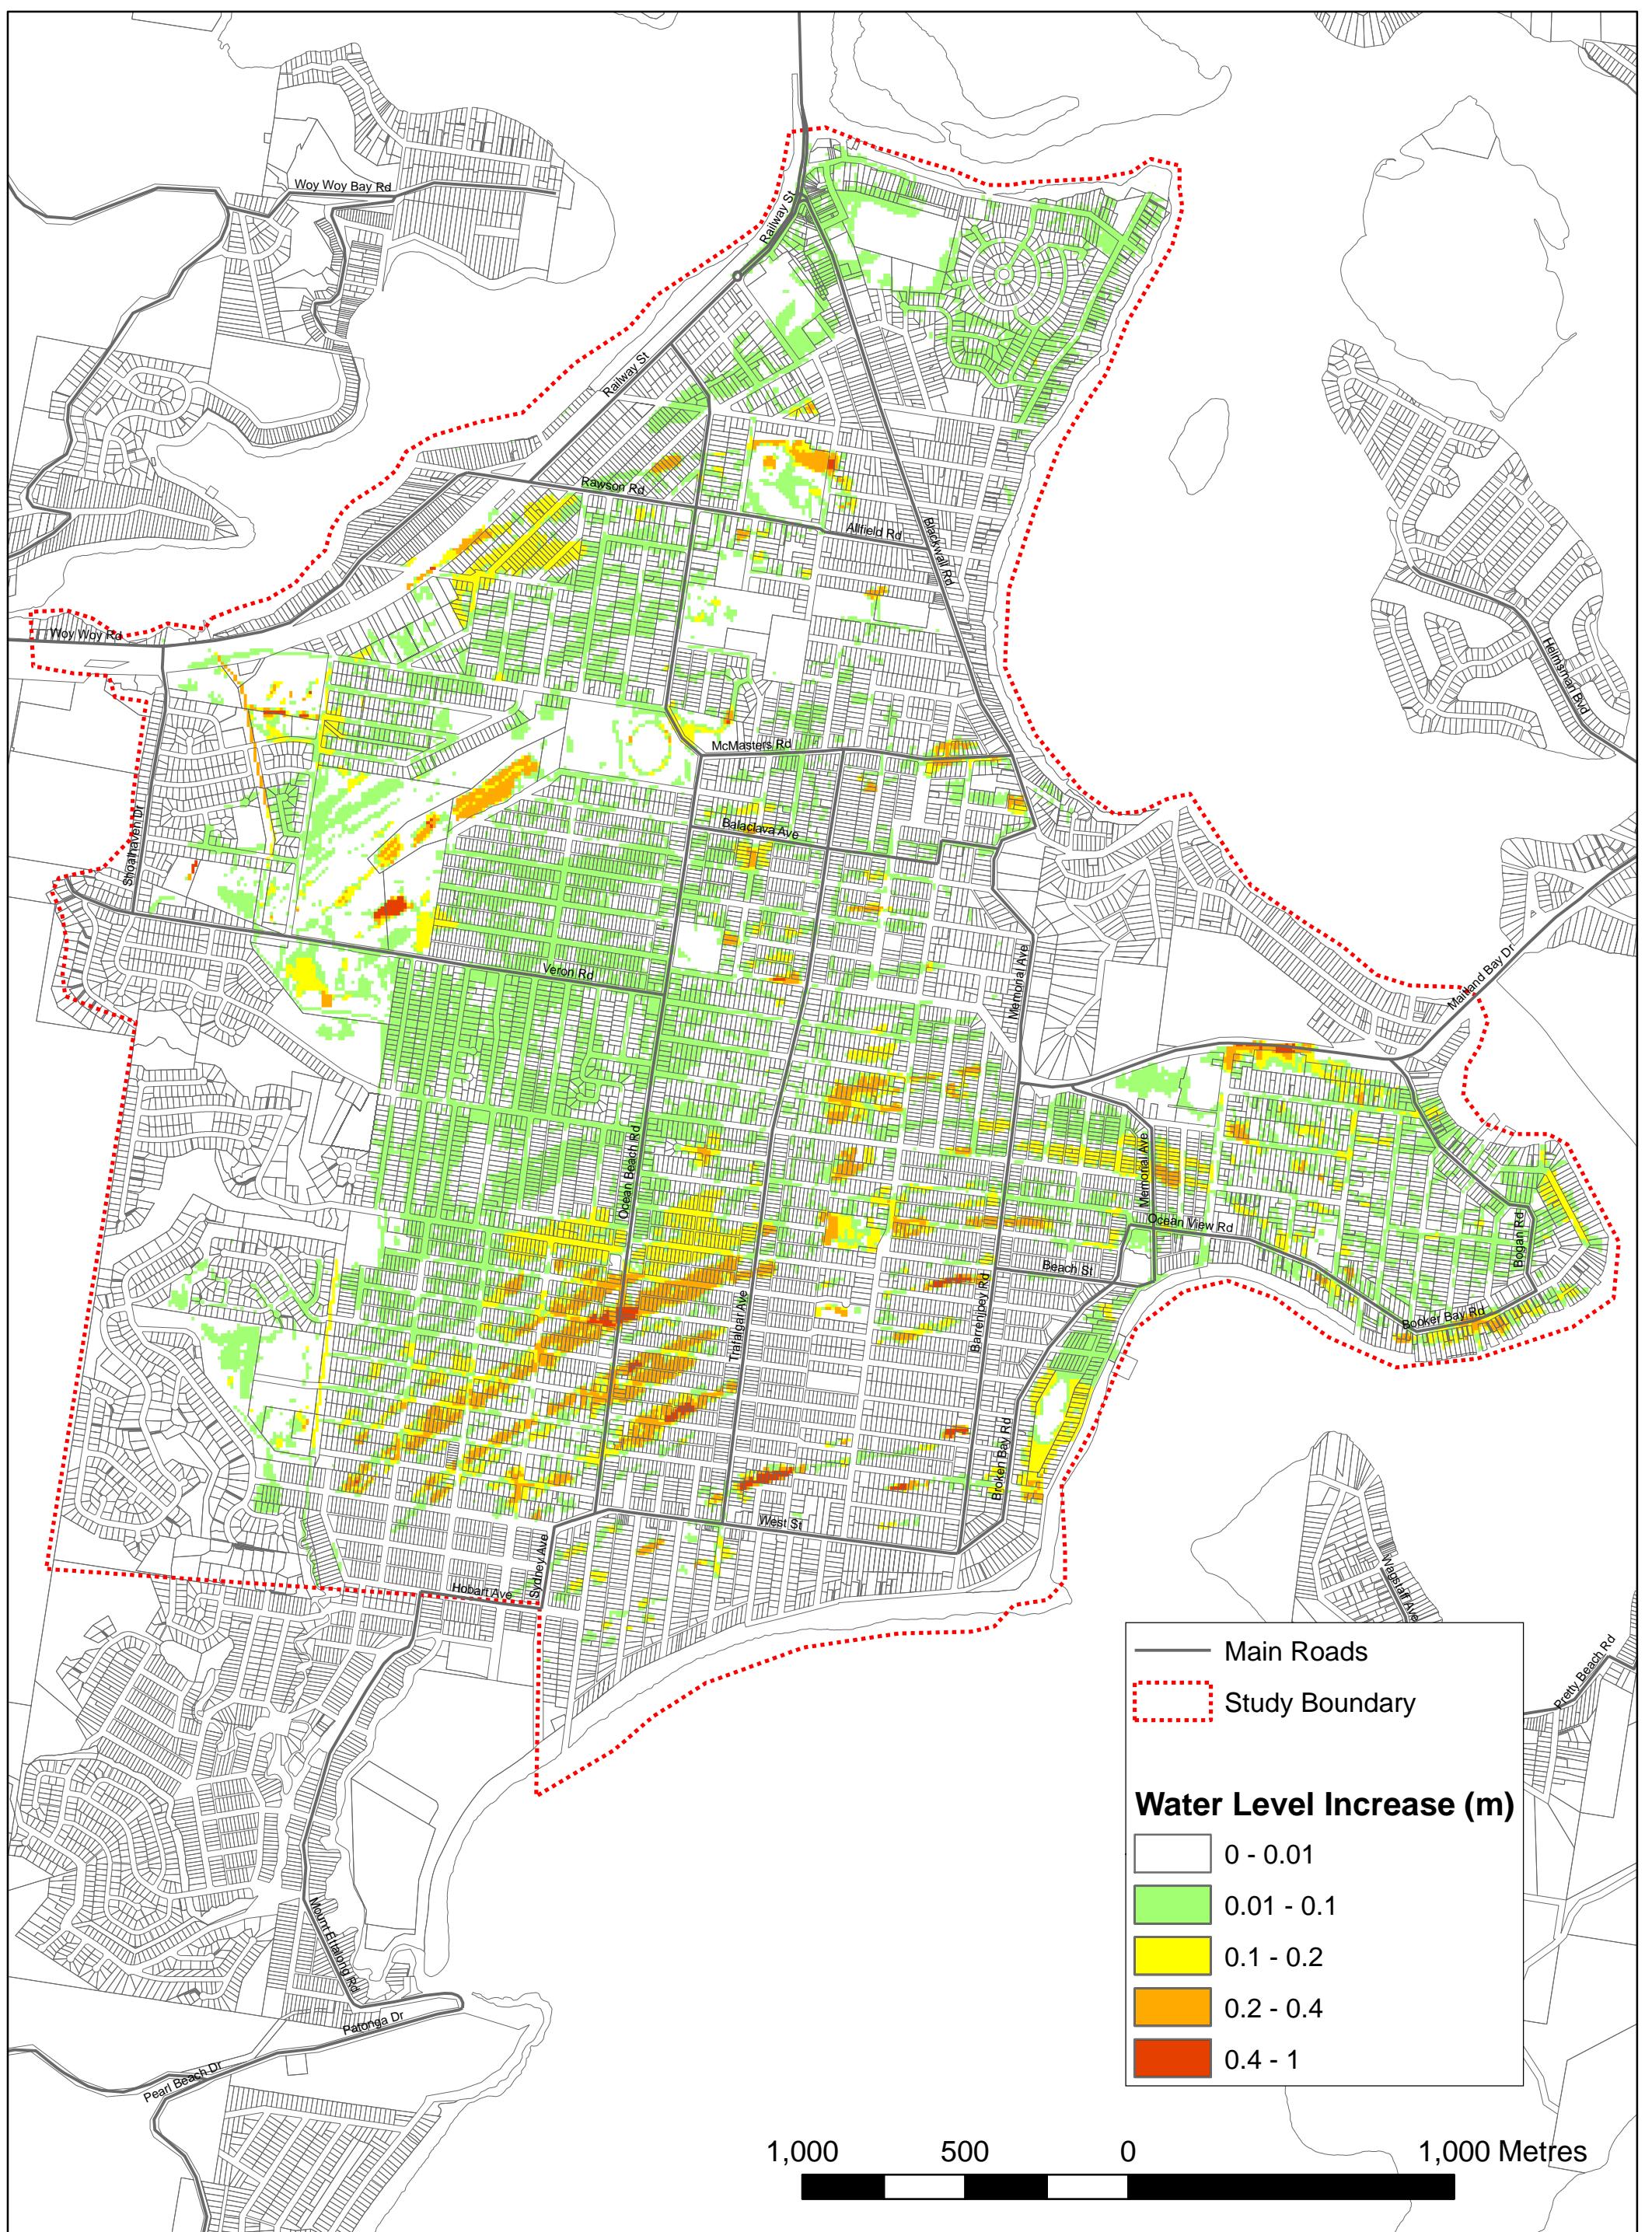

Figure 40 – Modelled Water Depth Change for High Antecedent Groundwater Levels for 100yr ARI (1% AEP) with Future Development.

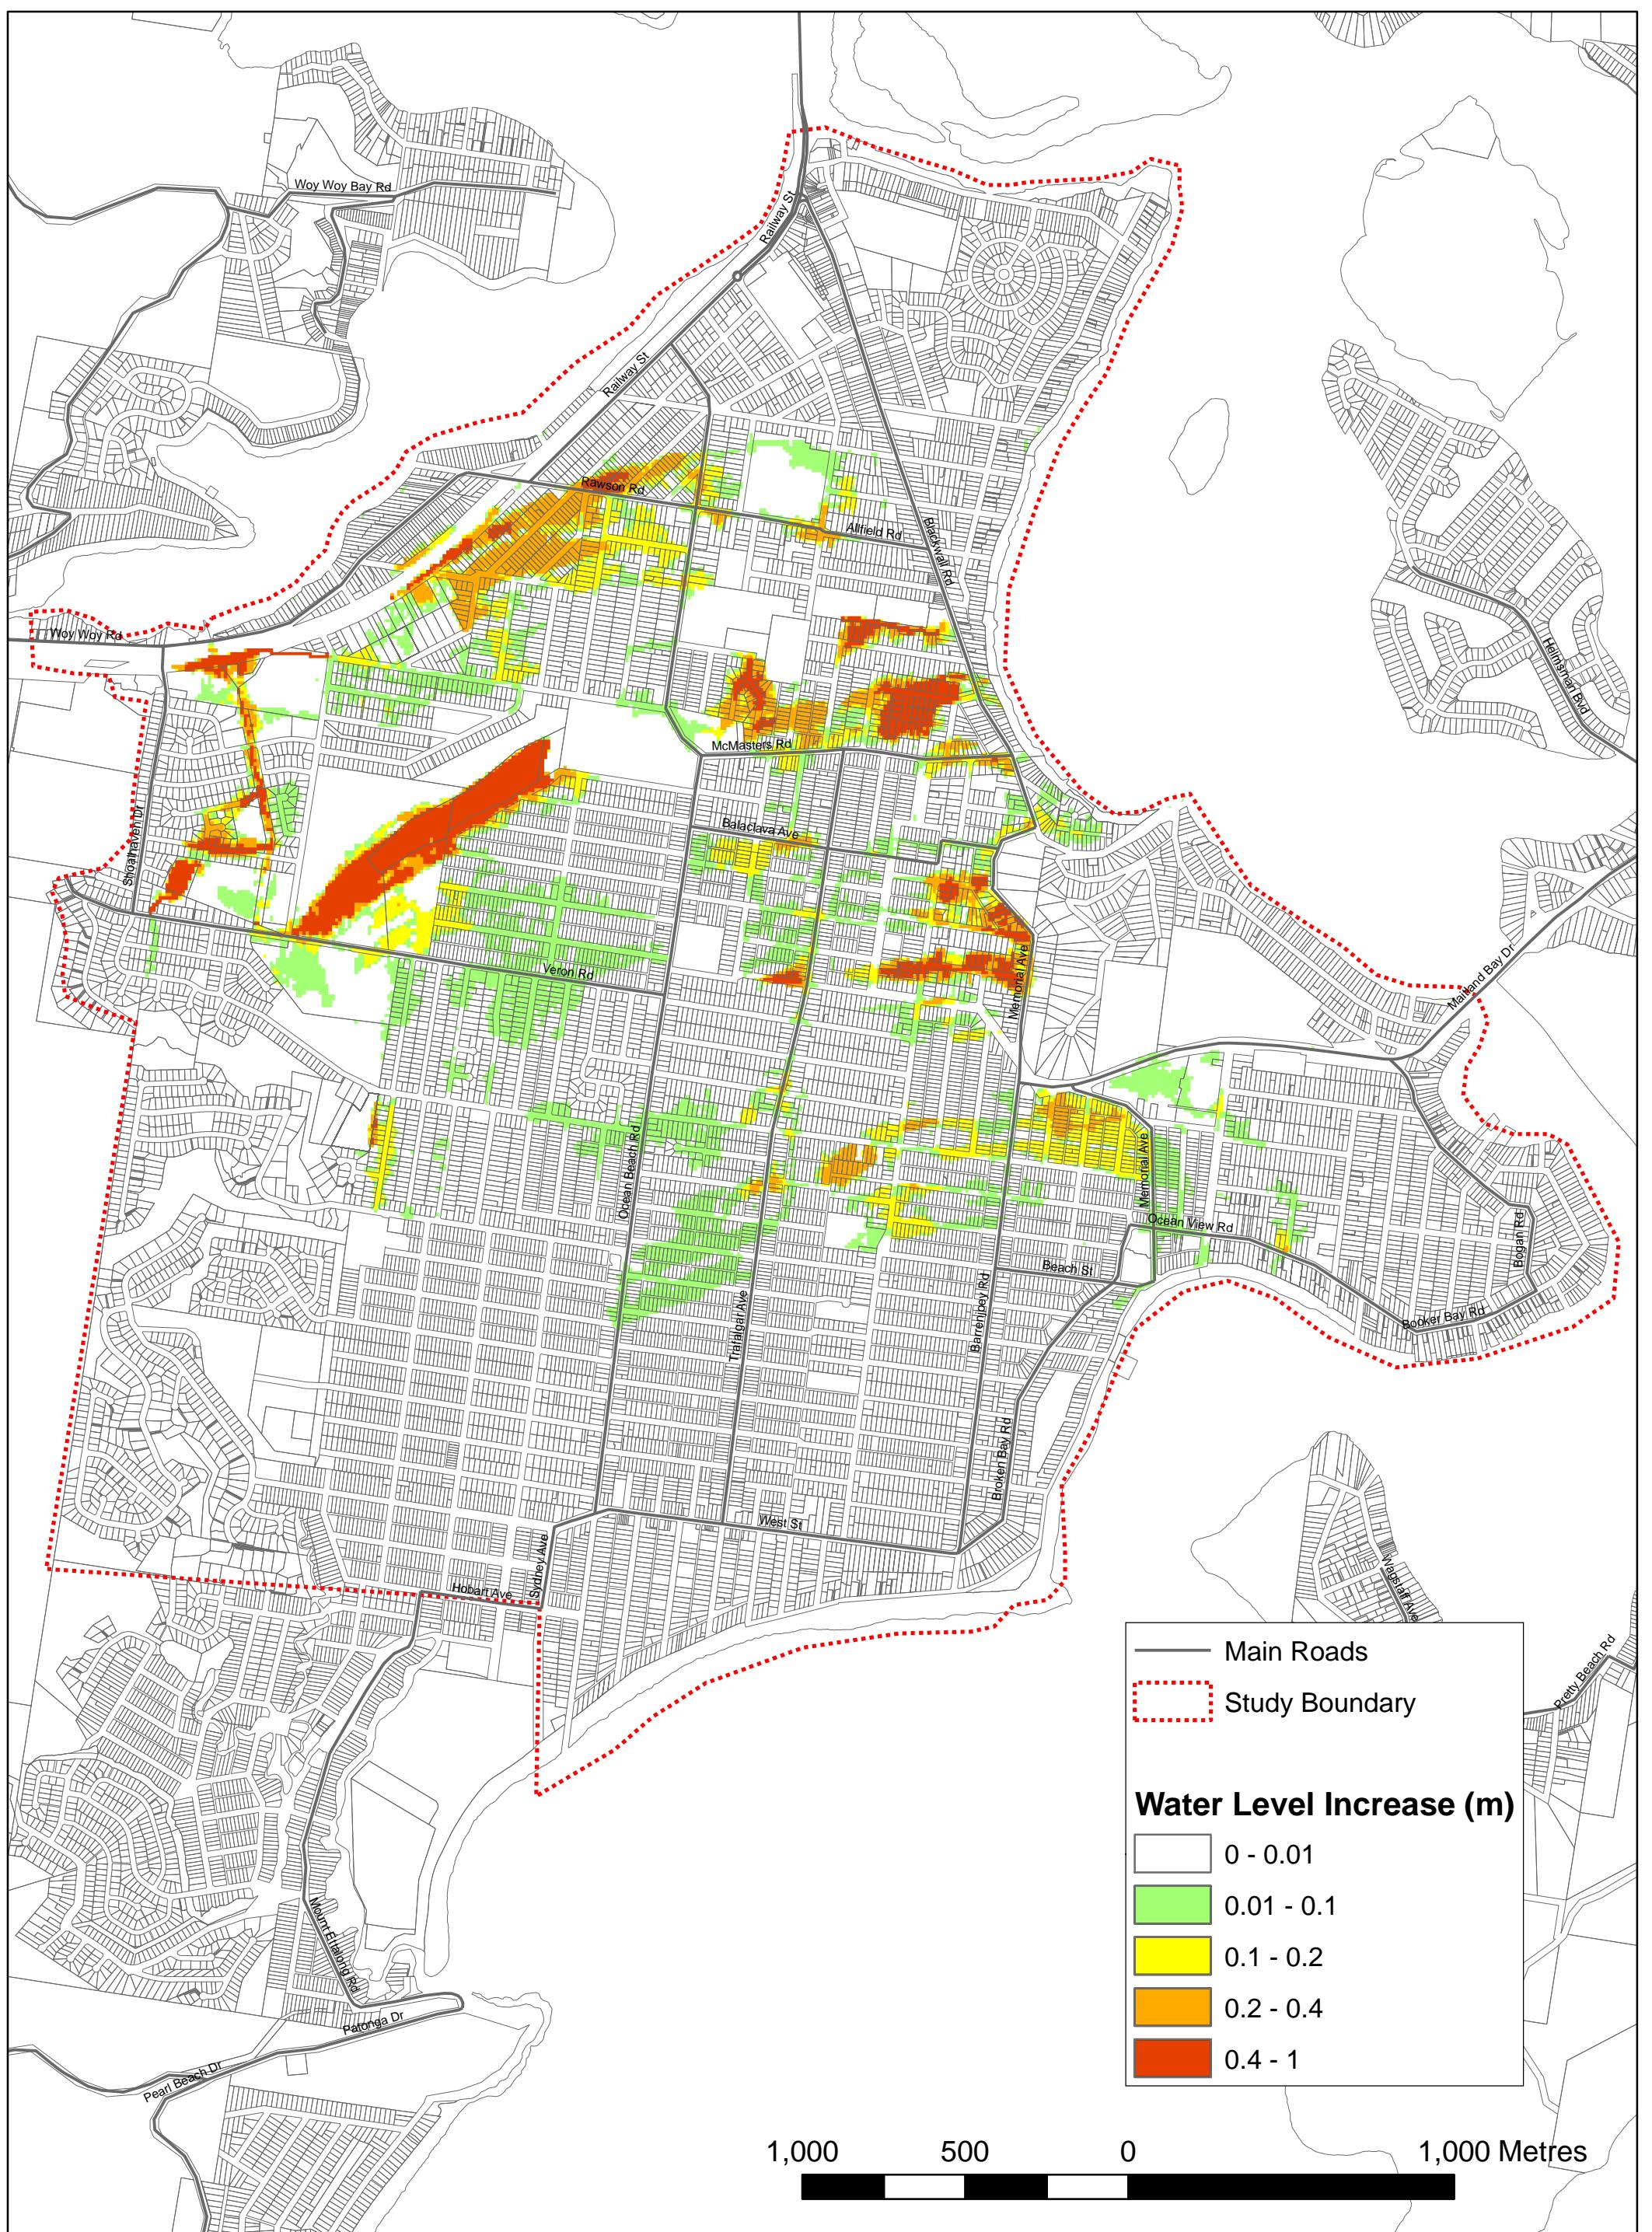

Figure 41 – Modelled Water Depth Change for Blocked Stormwater Network for 100yr ARI (1% AEP) with Future Development.

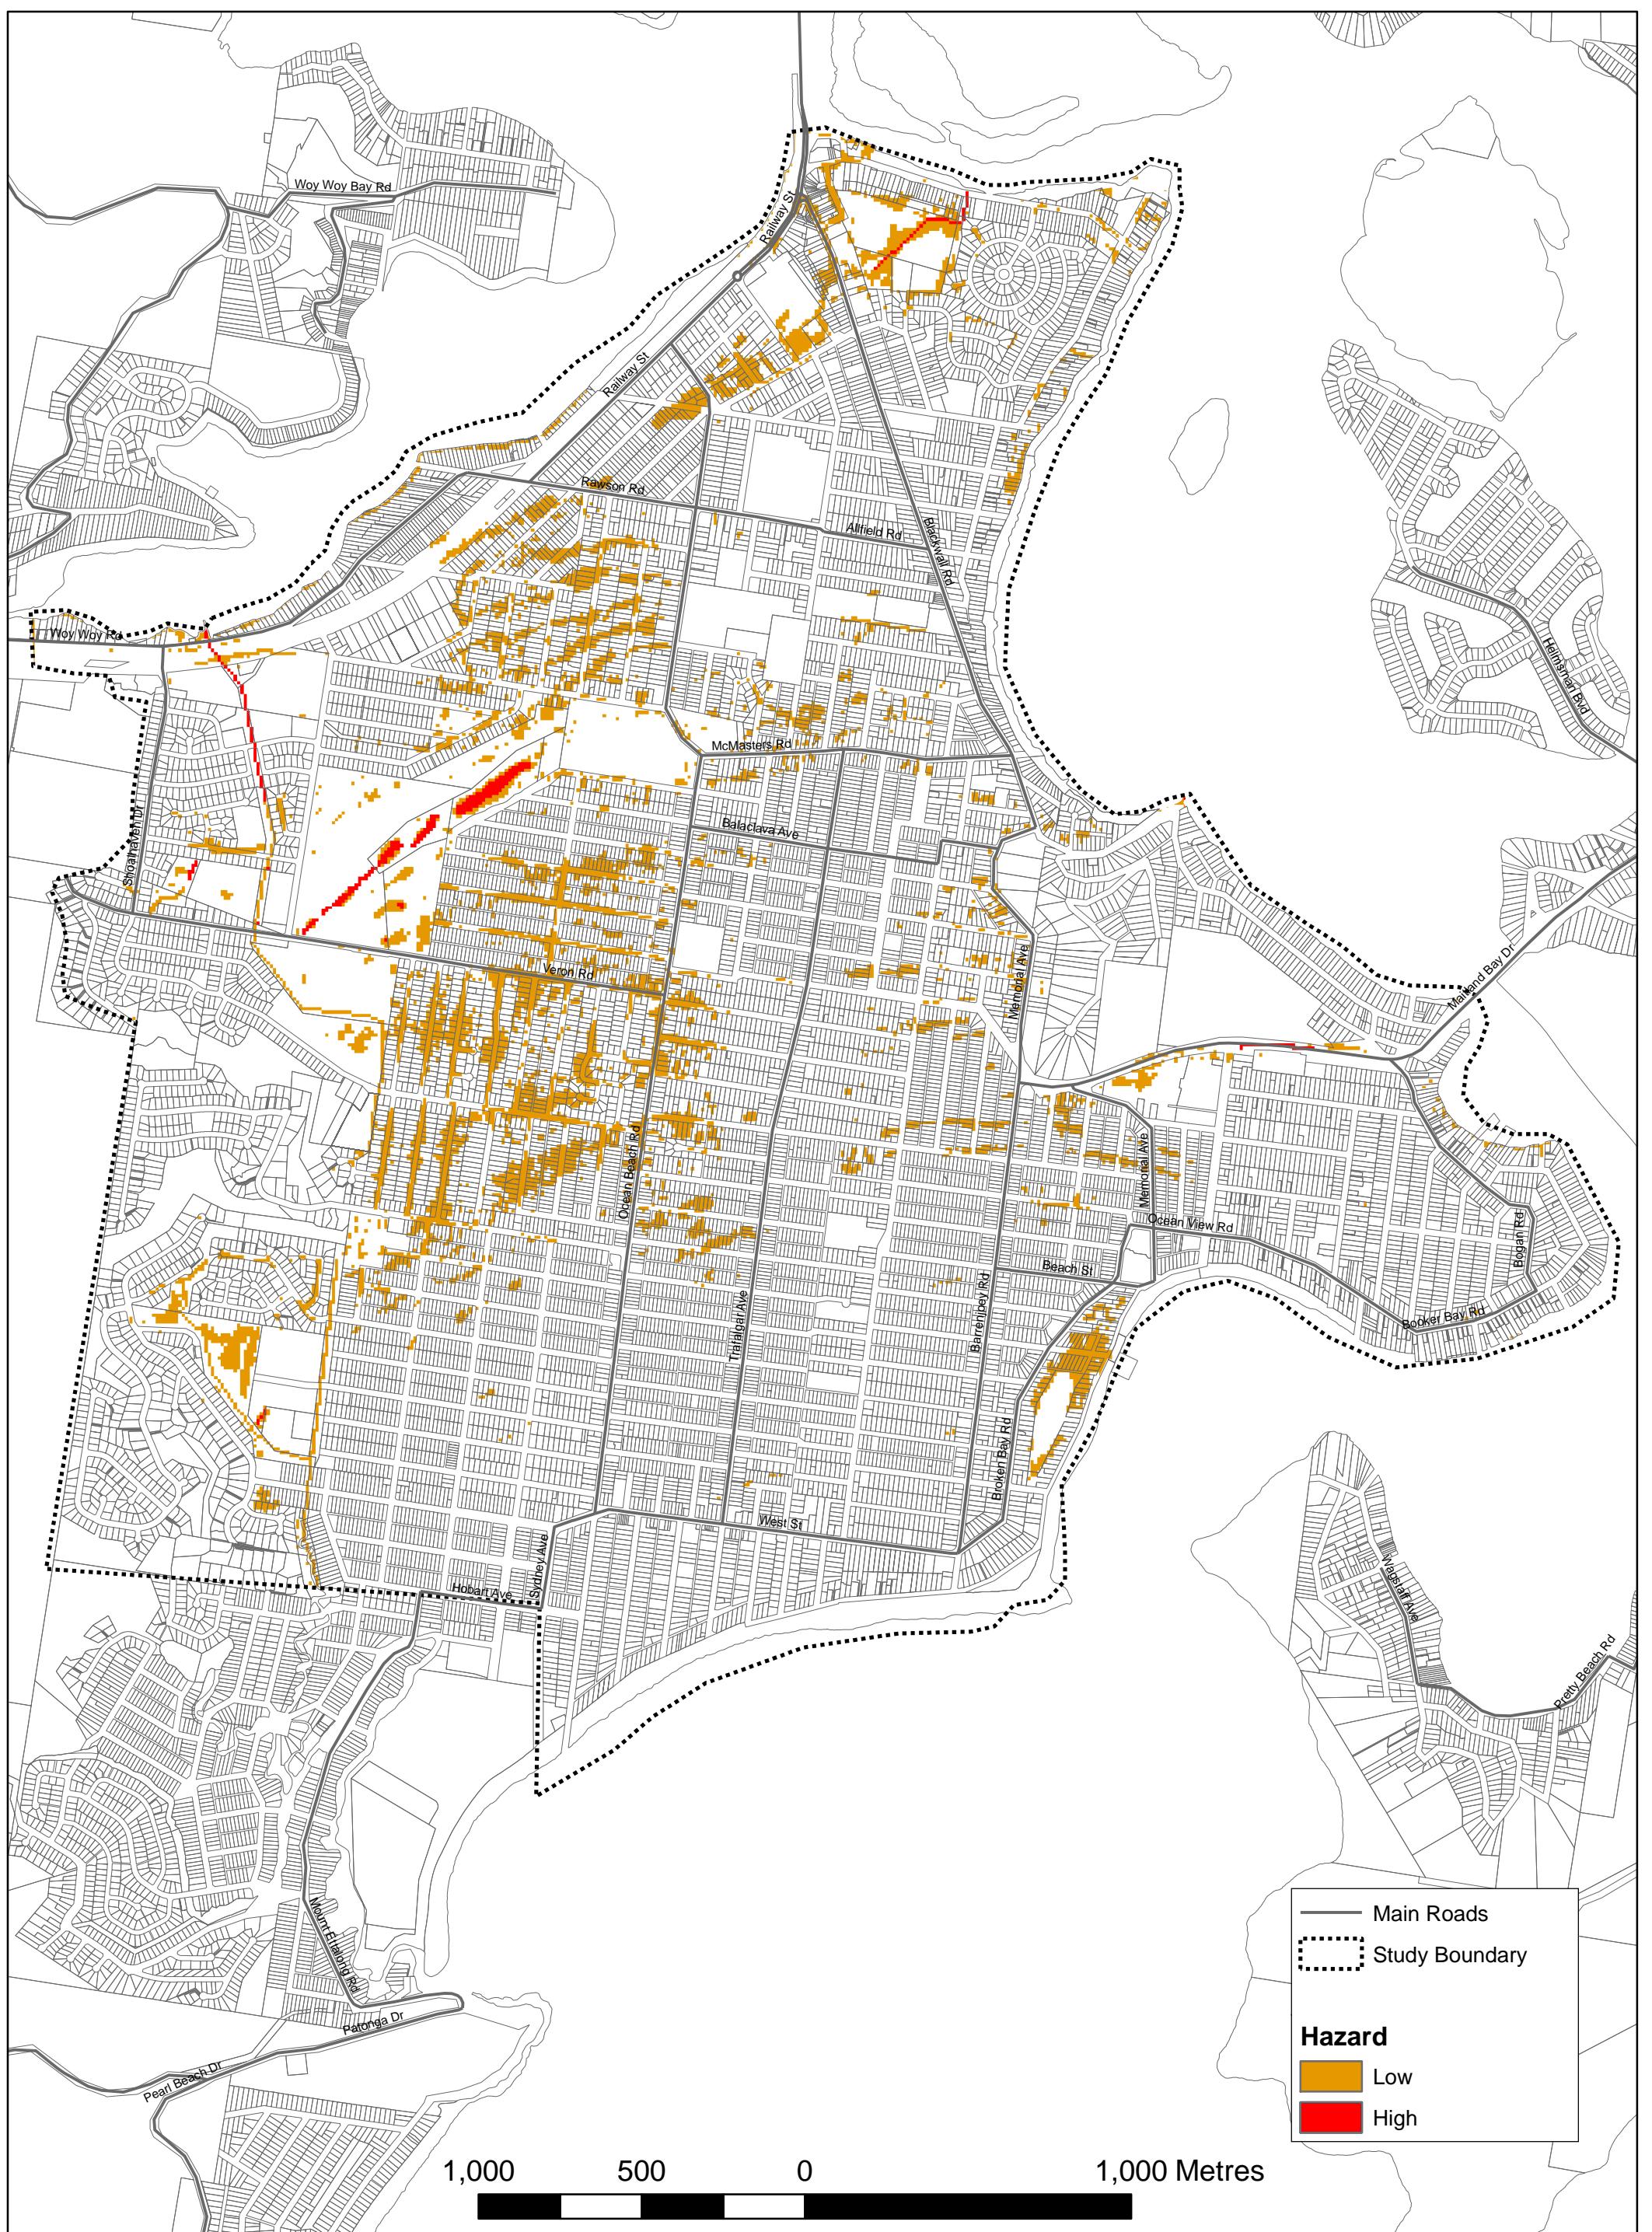

Figure 42 – Modelled Flood Hazard for 2yr ARI (50% AEP) with Future Development.

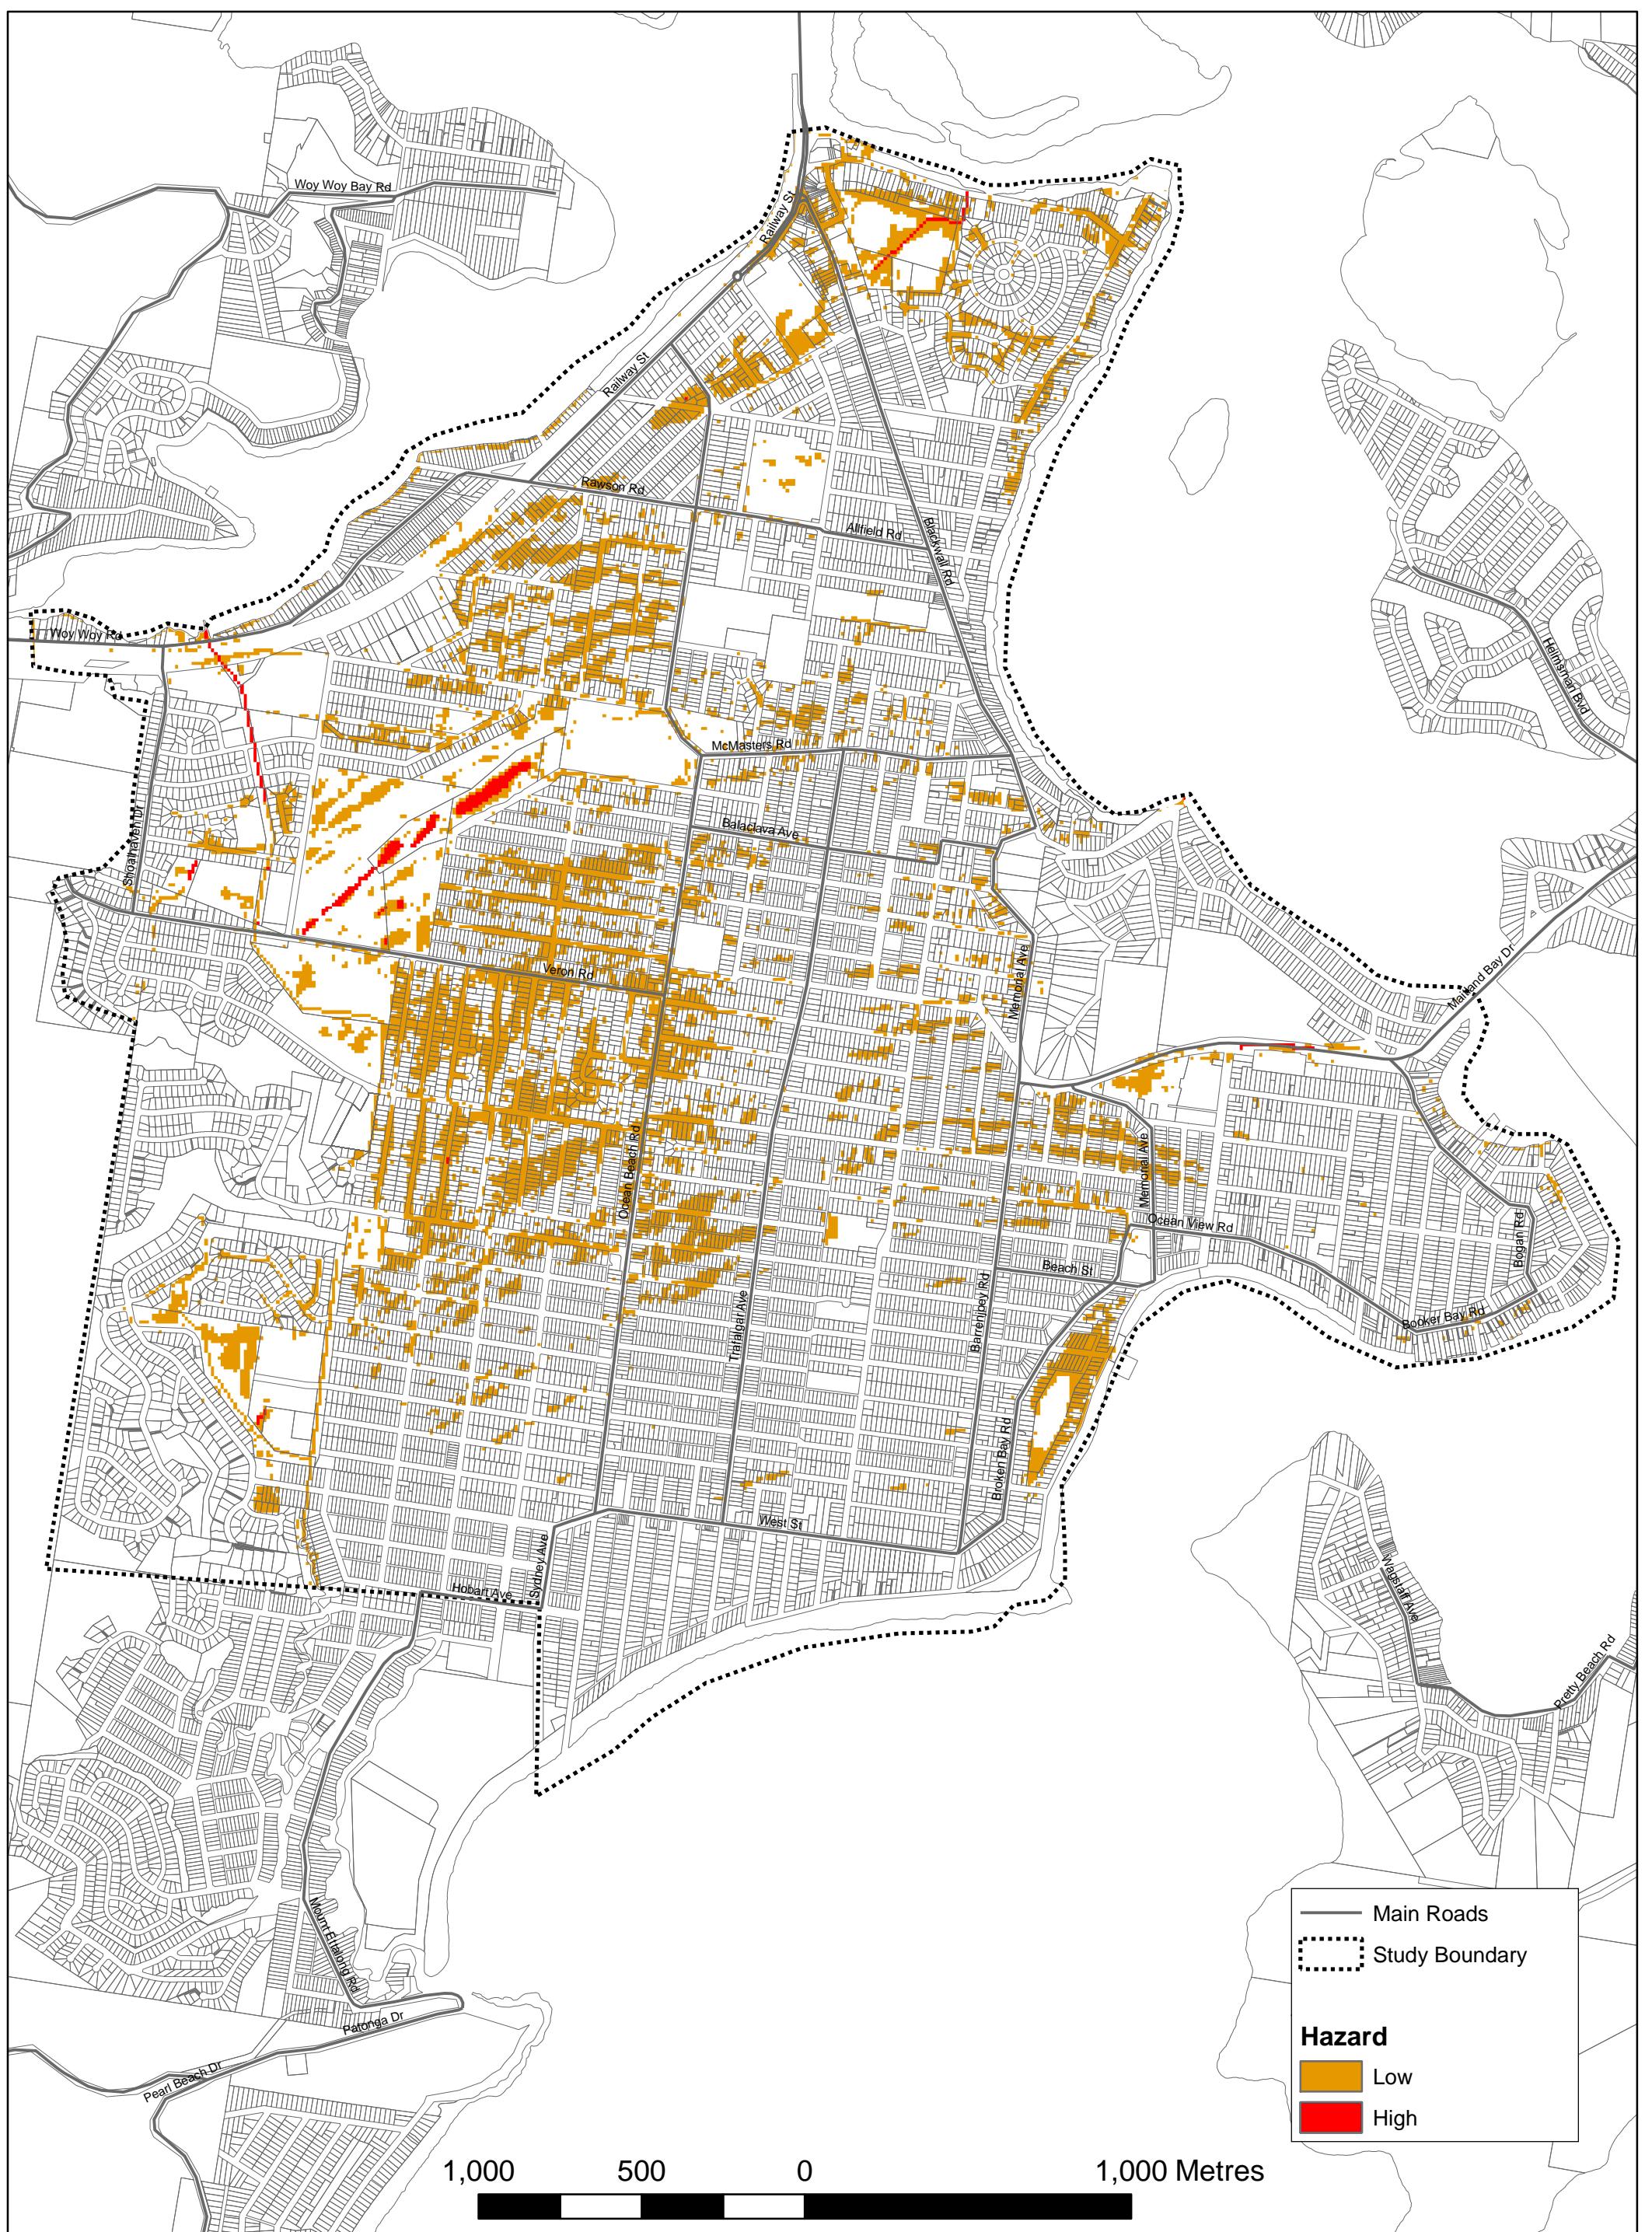

Figure 43 – Modelled Flood Hazard for 10yr ARI (10% AEP) with Future Development.

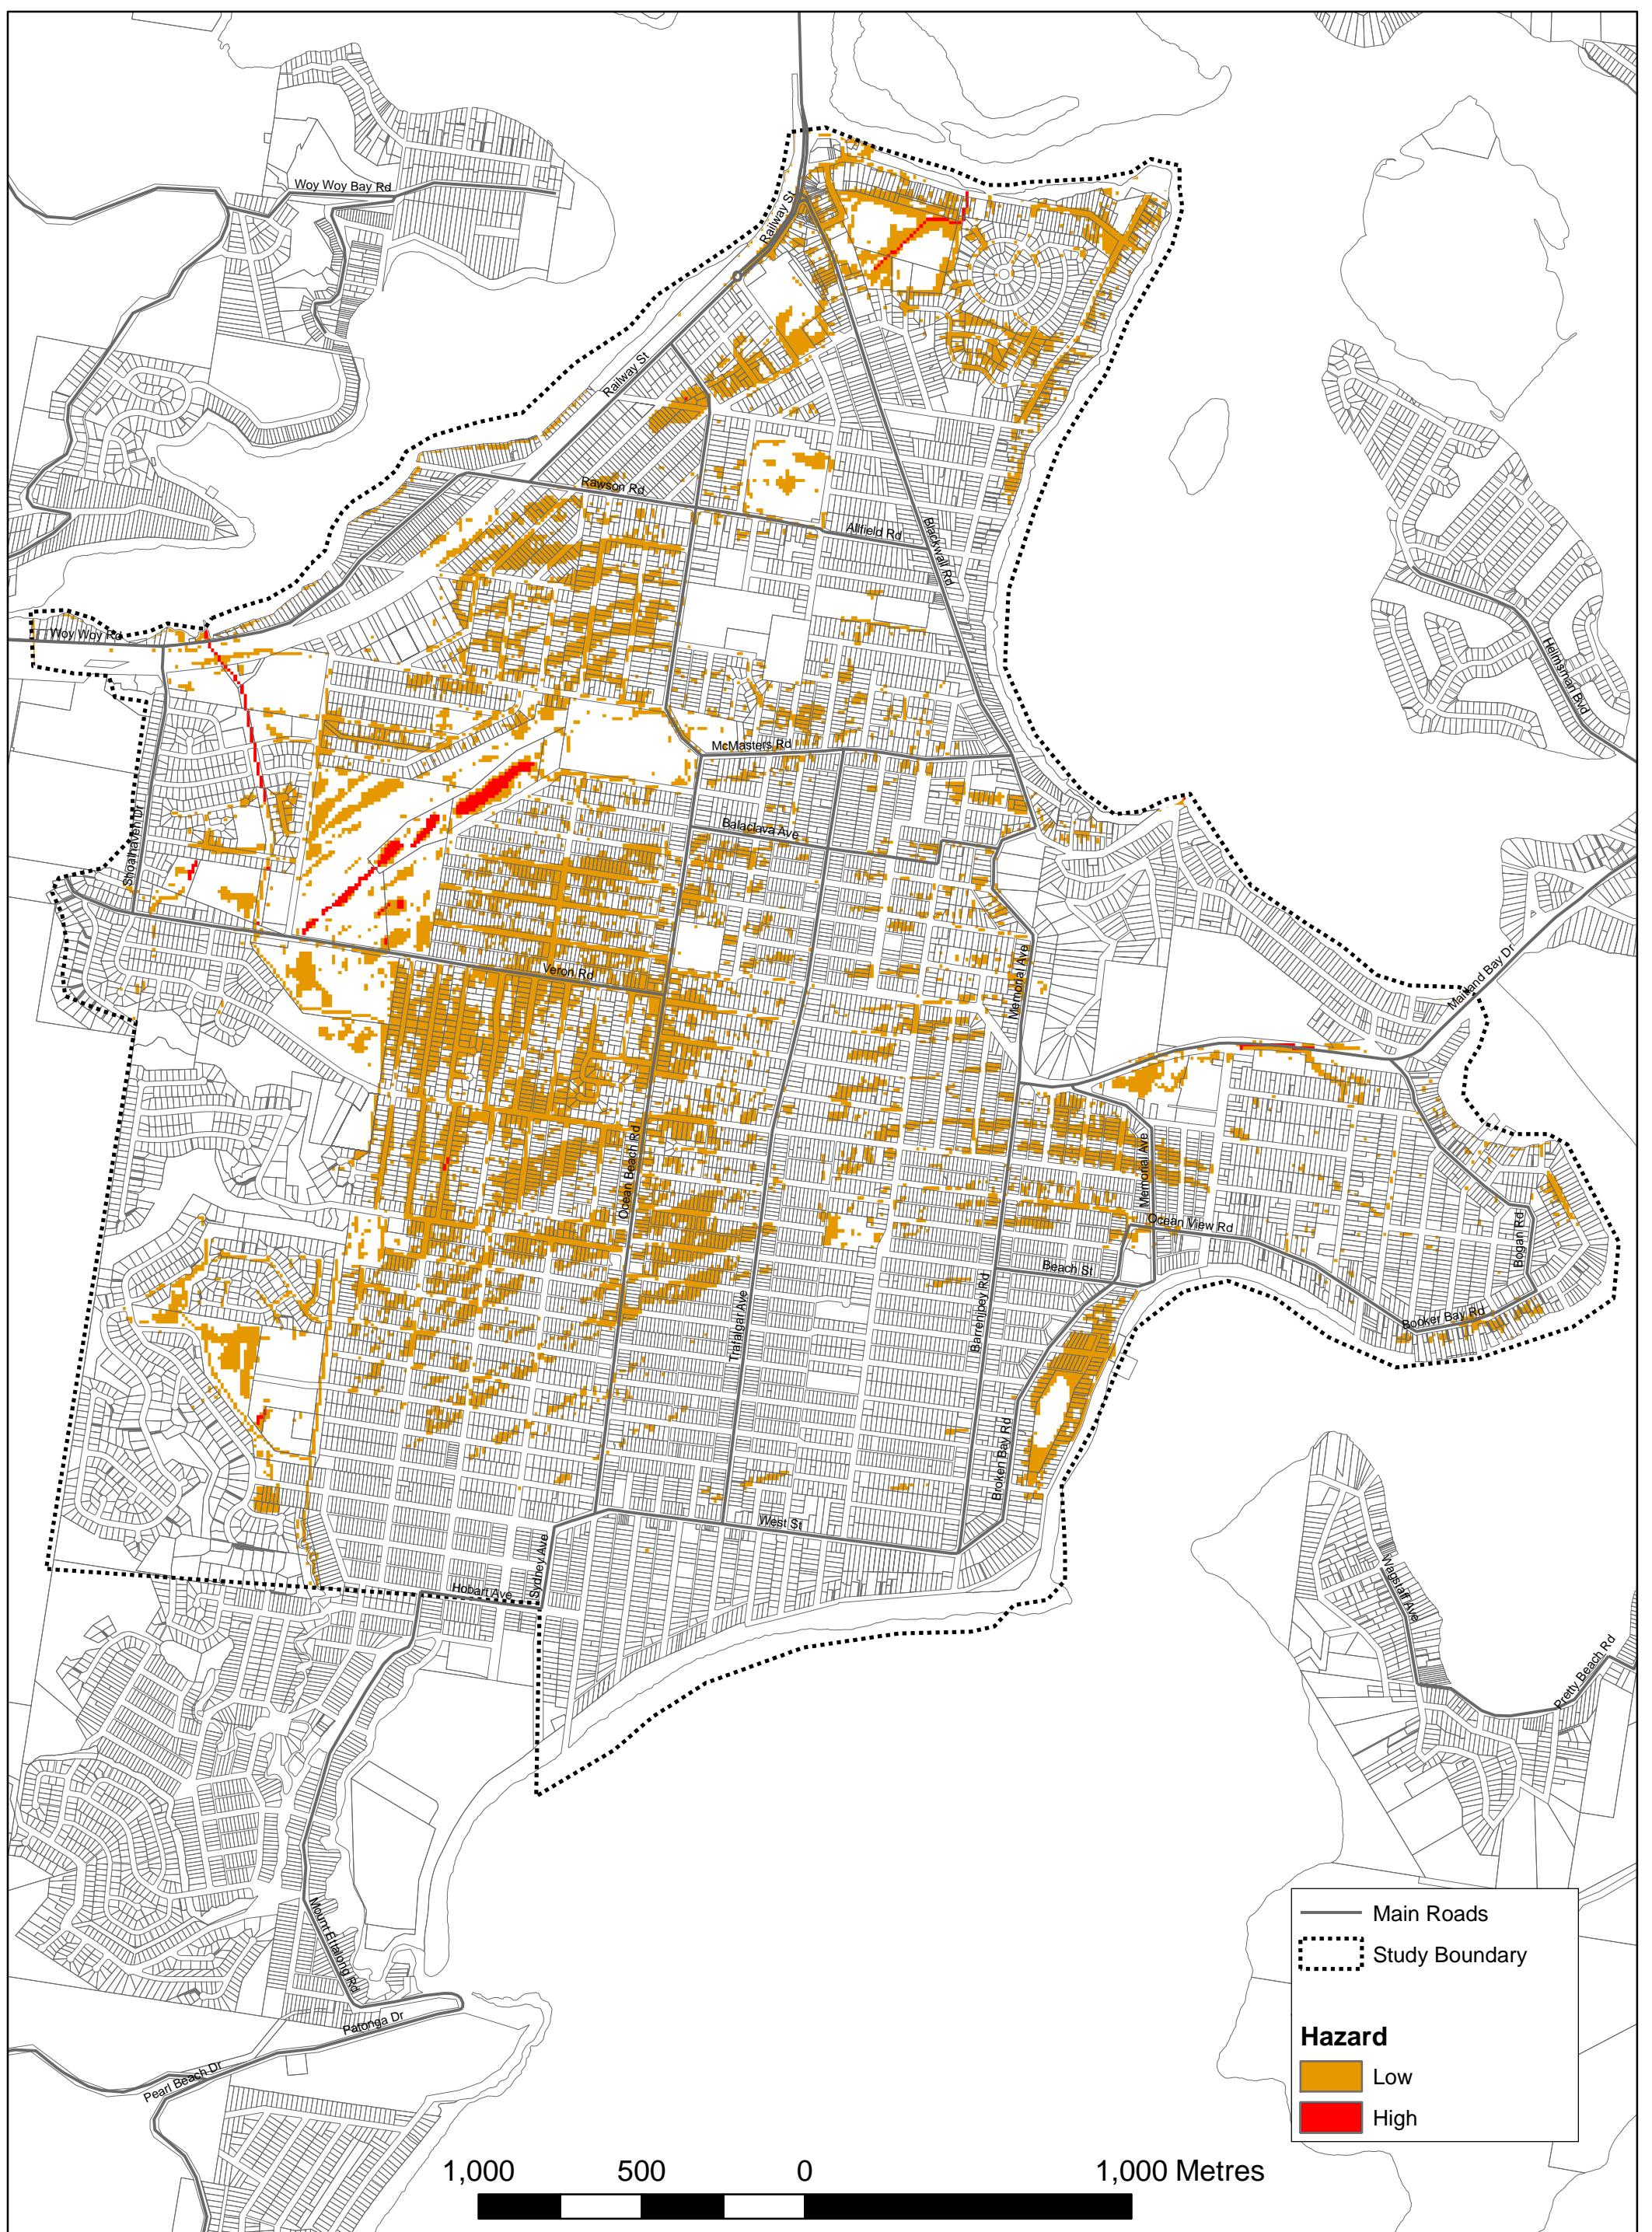

Figure 44 – Modelled Flood Hazard for 20yr ARI (5% AEP) with Future Development.

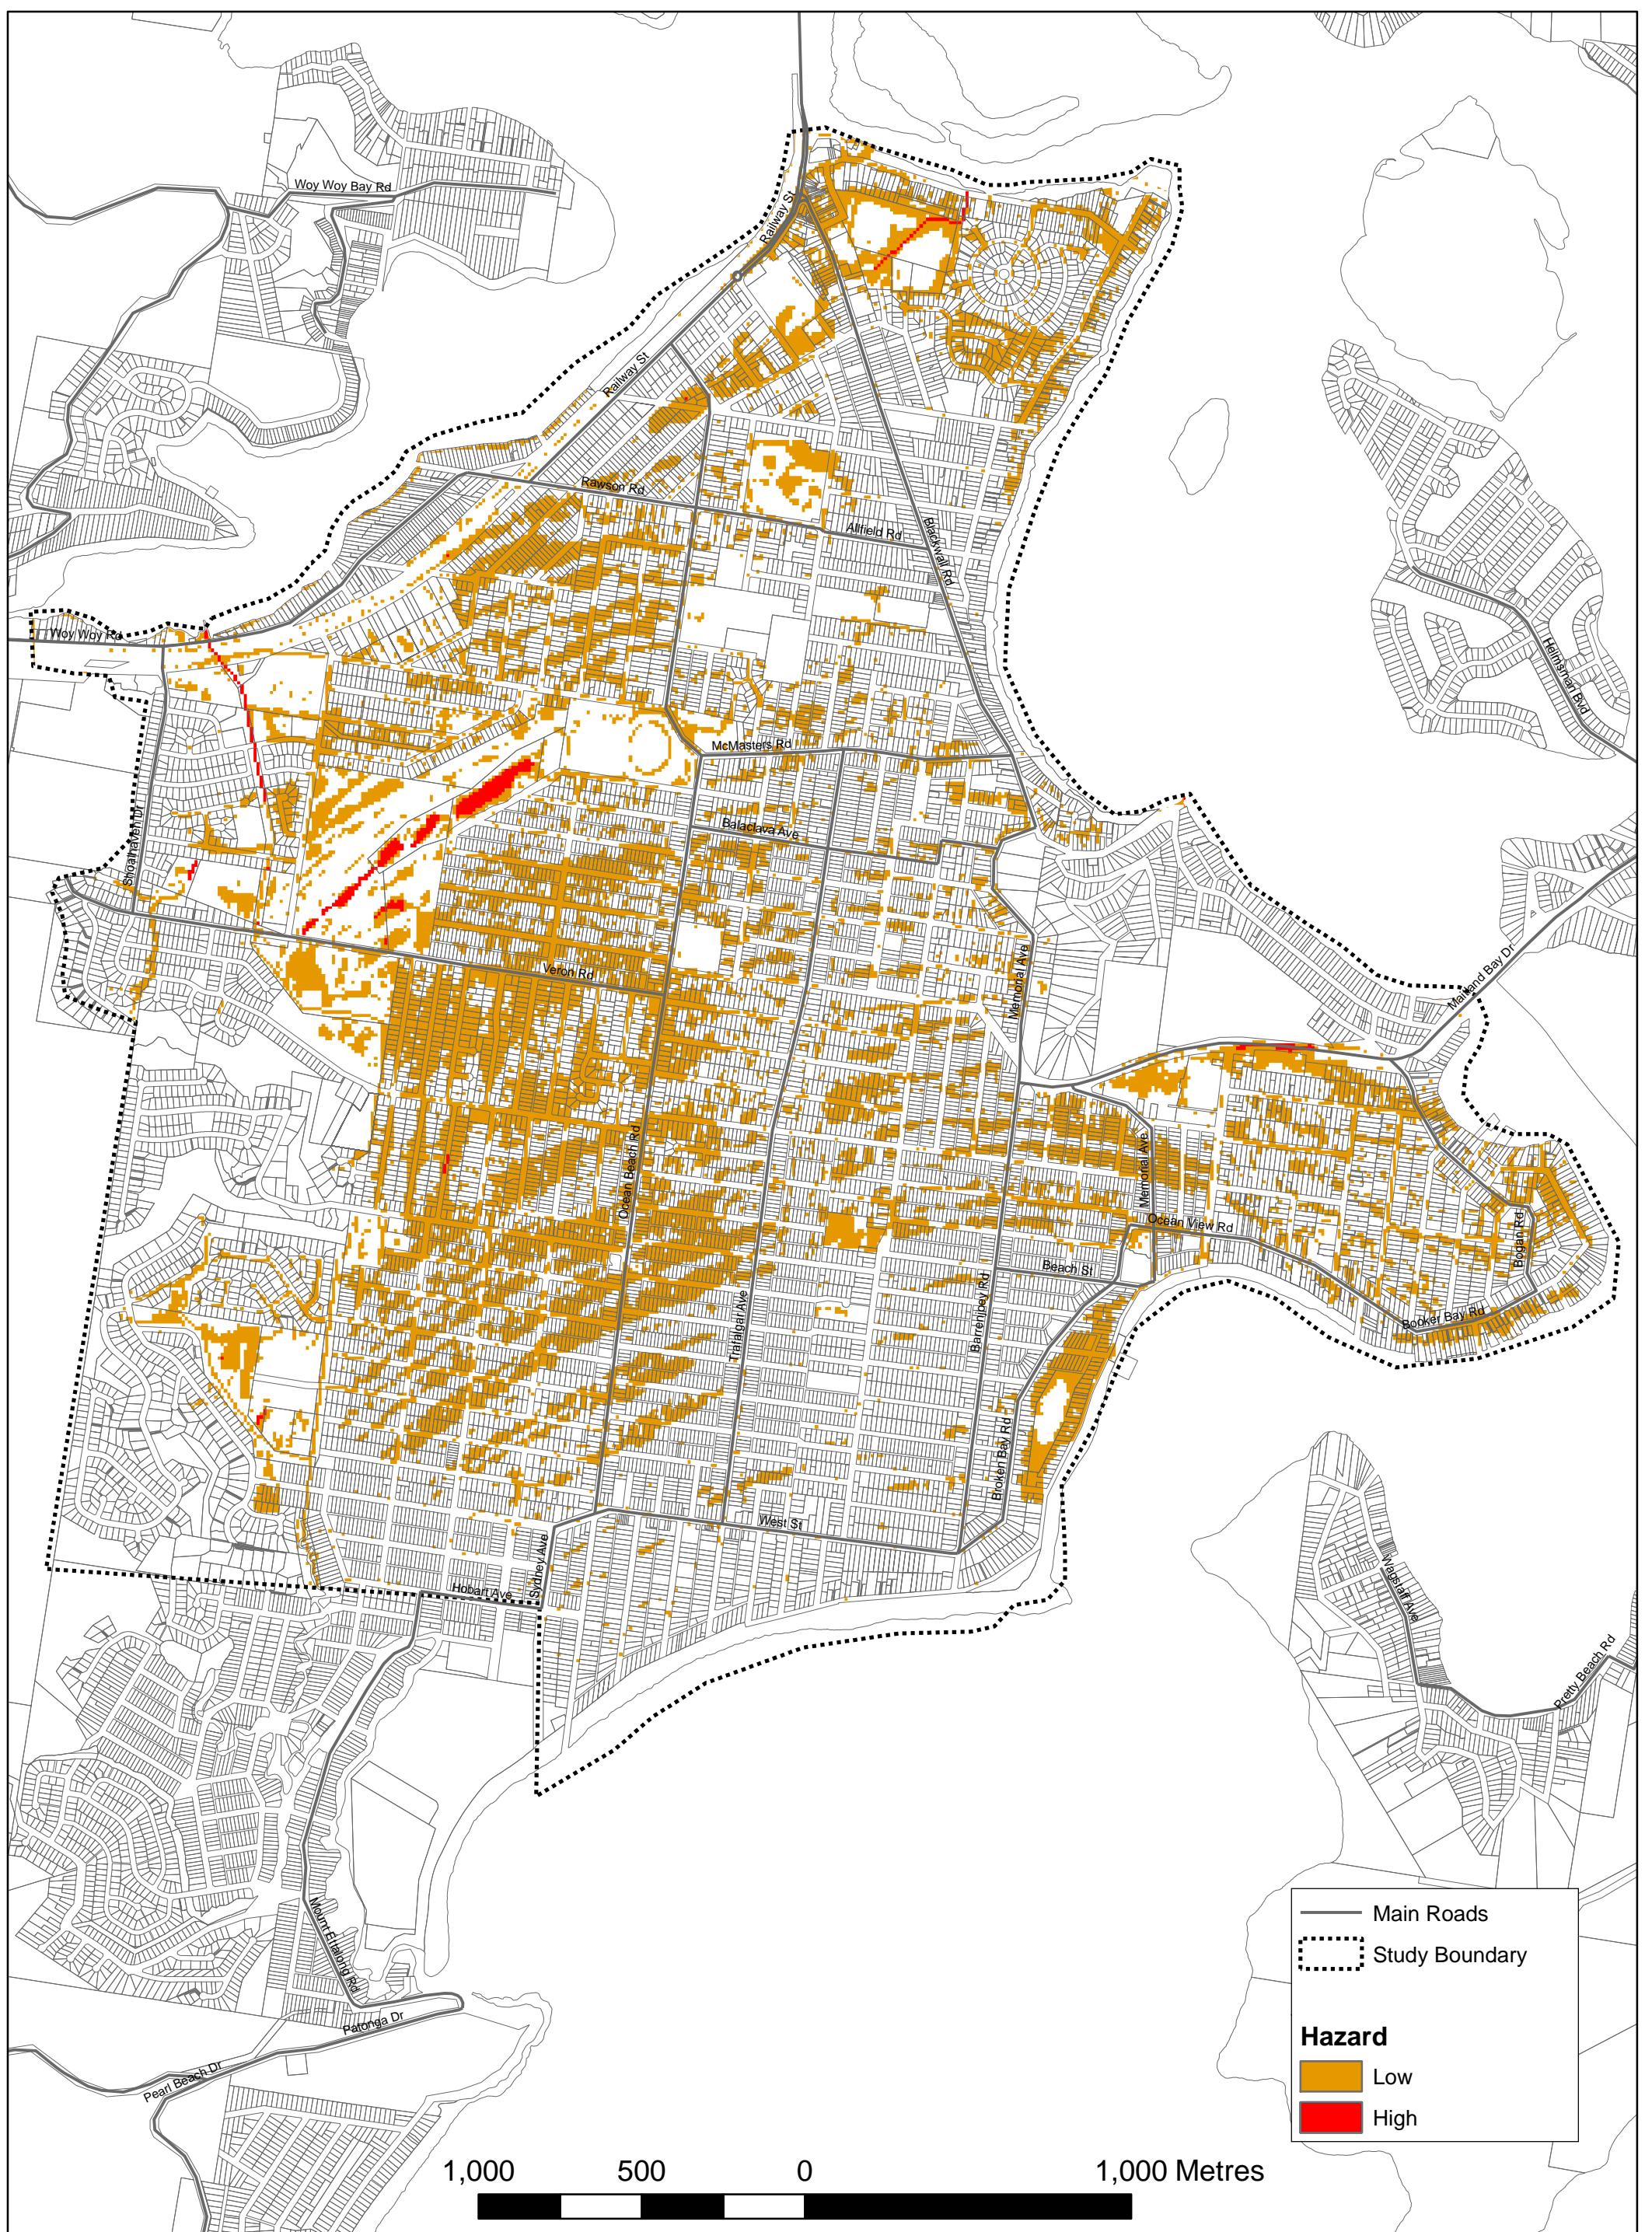

Figure 45 – Modelled Flood Hazard for 100yr ARI (1% AEP) with Future Development.

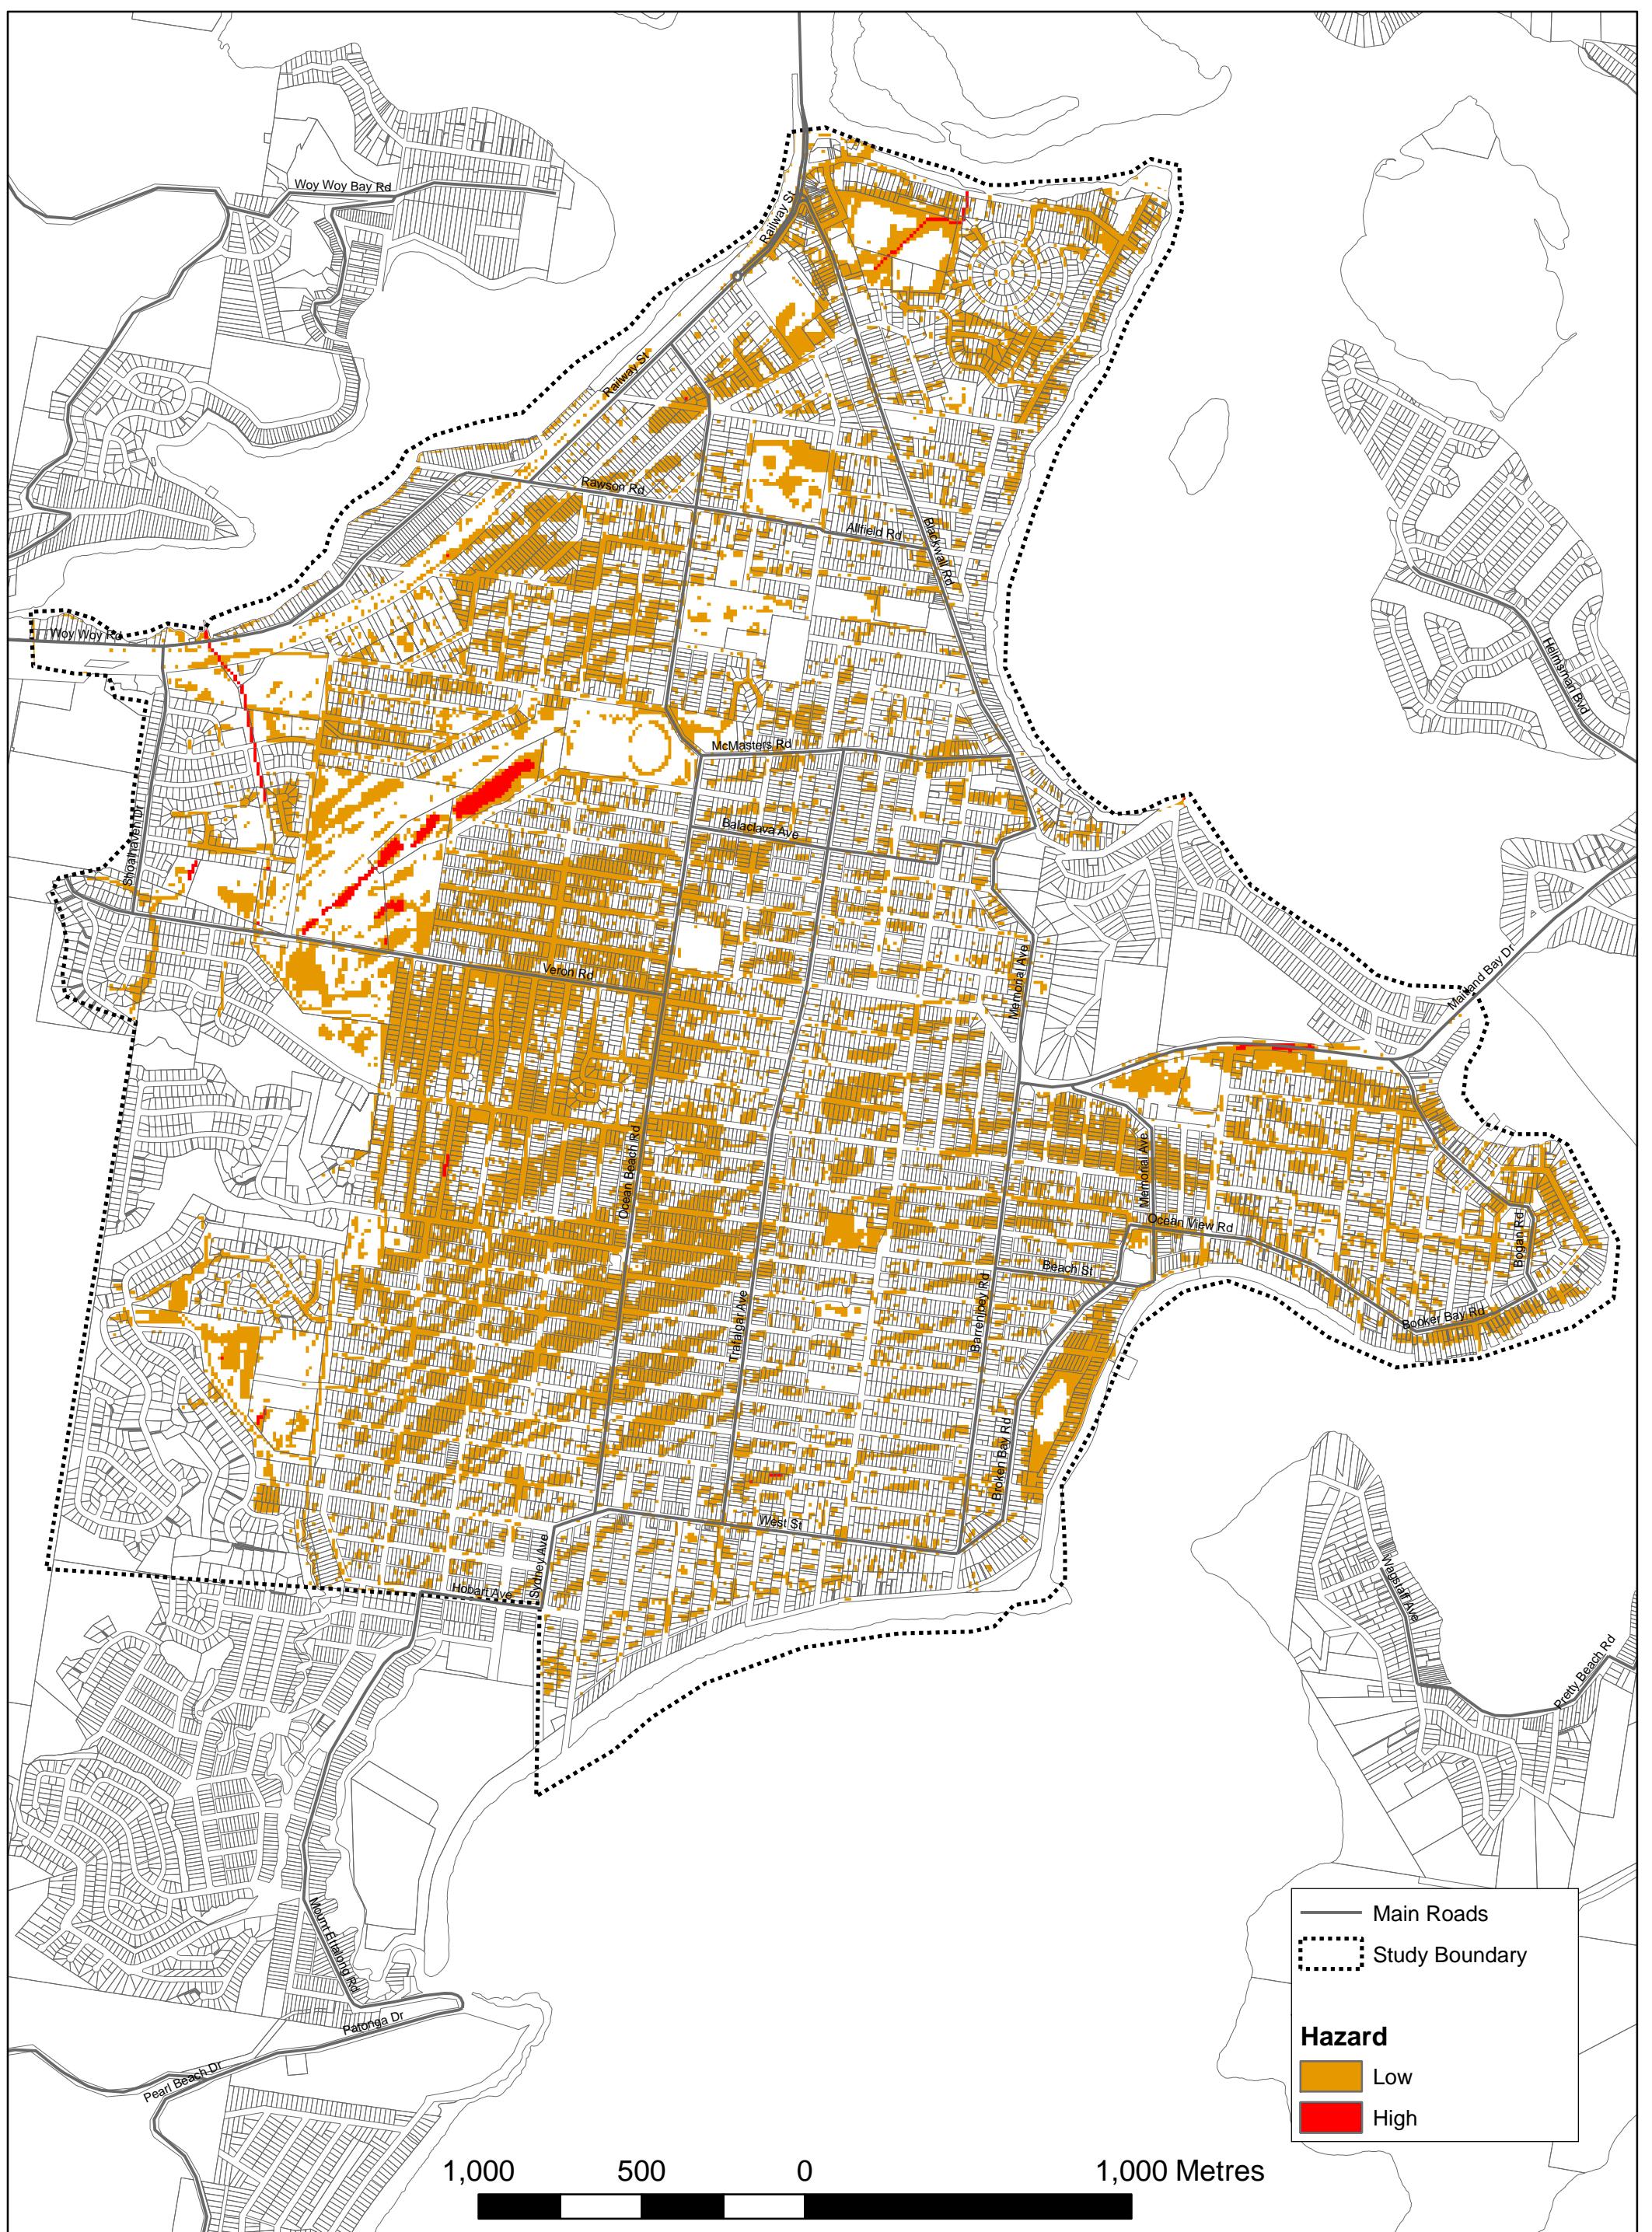

Figure 46 – Modelled Flood Hazard for 200yr ARI (0.5% AEP) with Future Development.

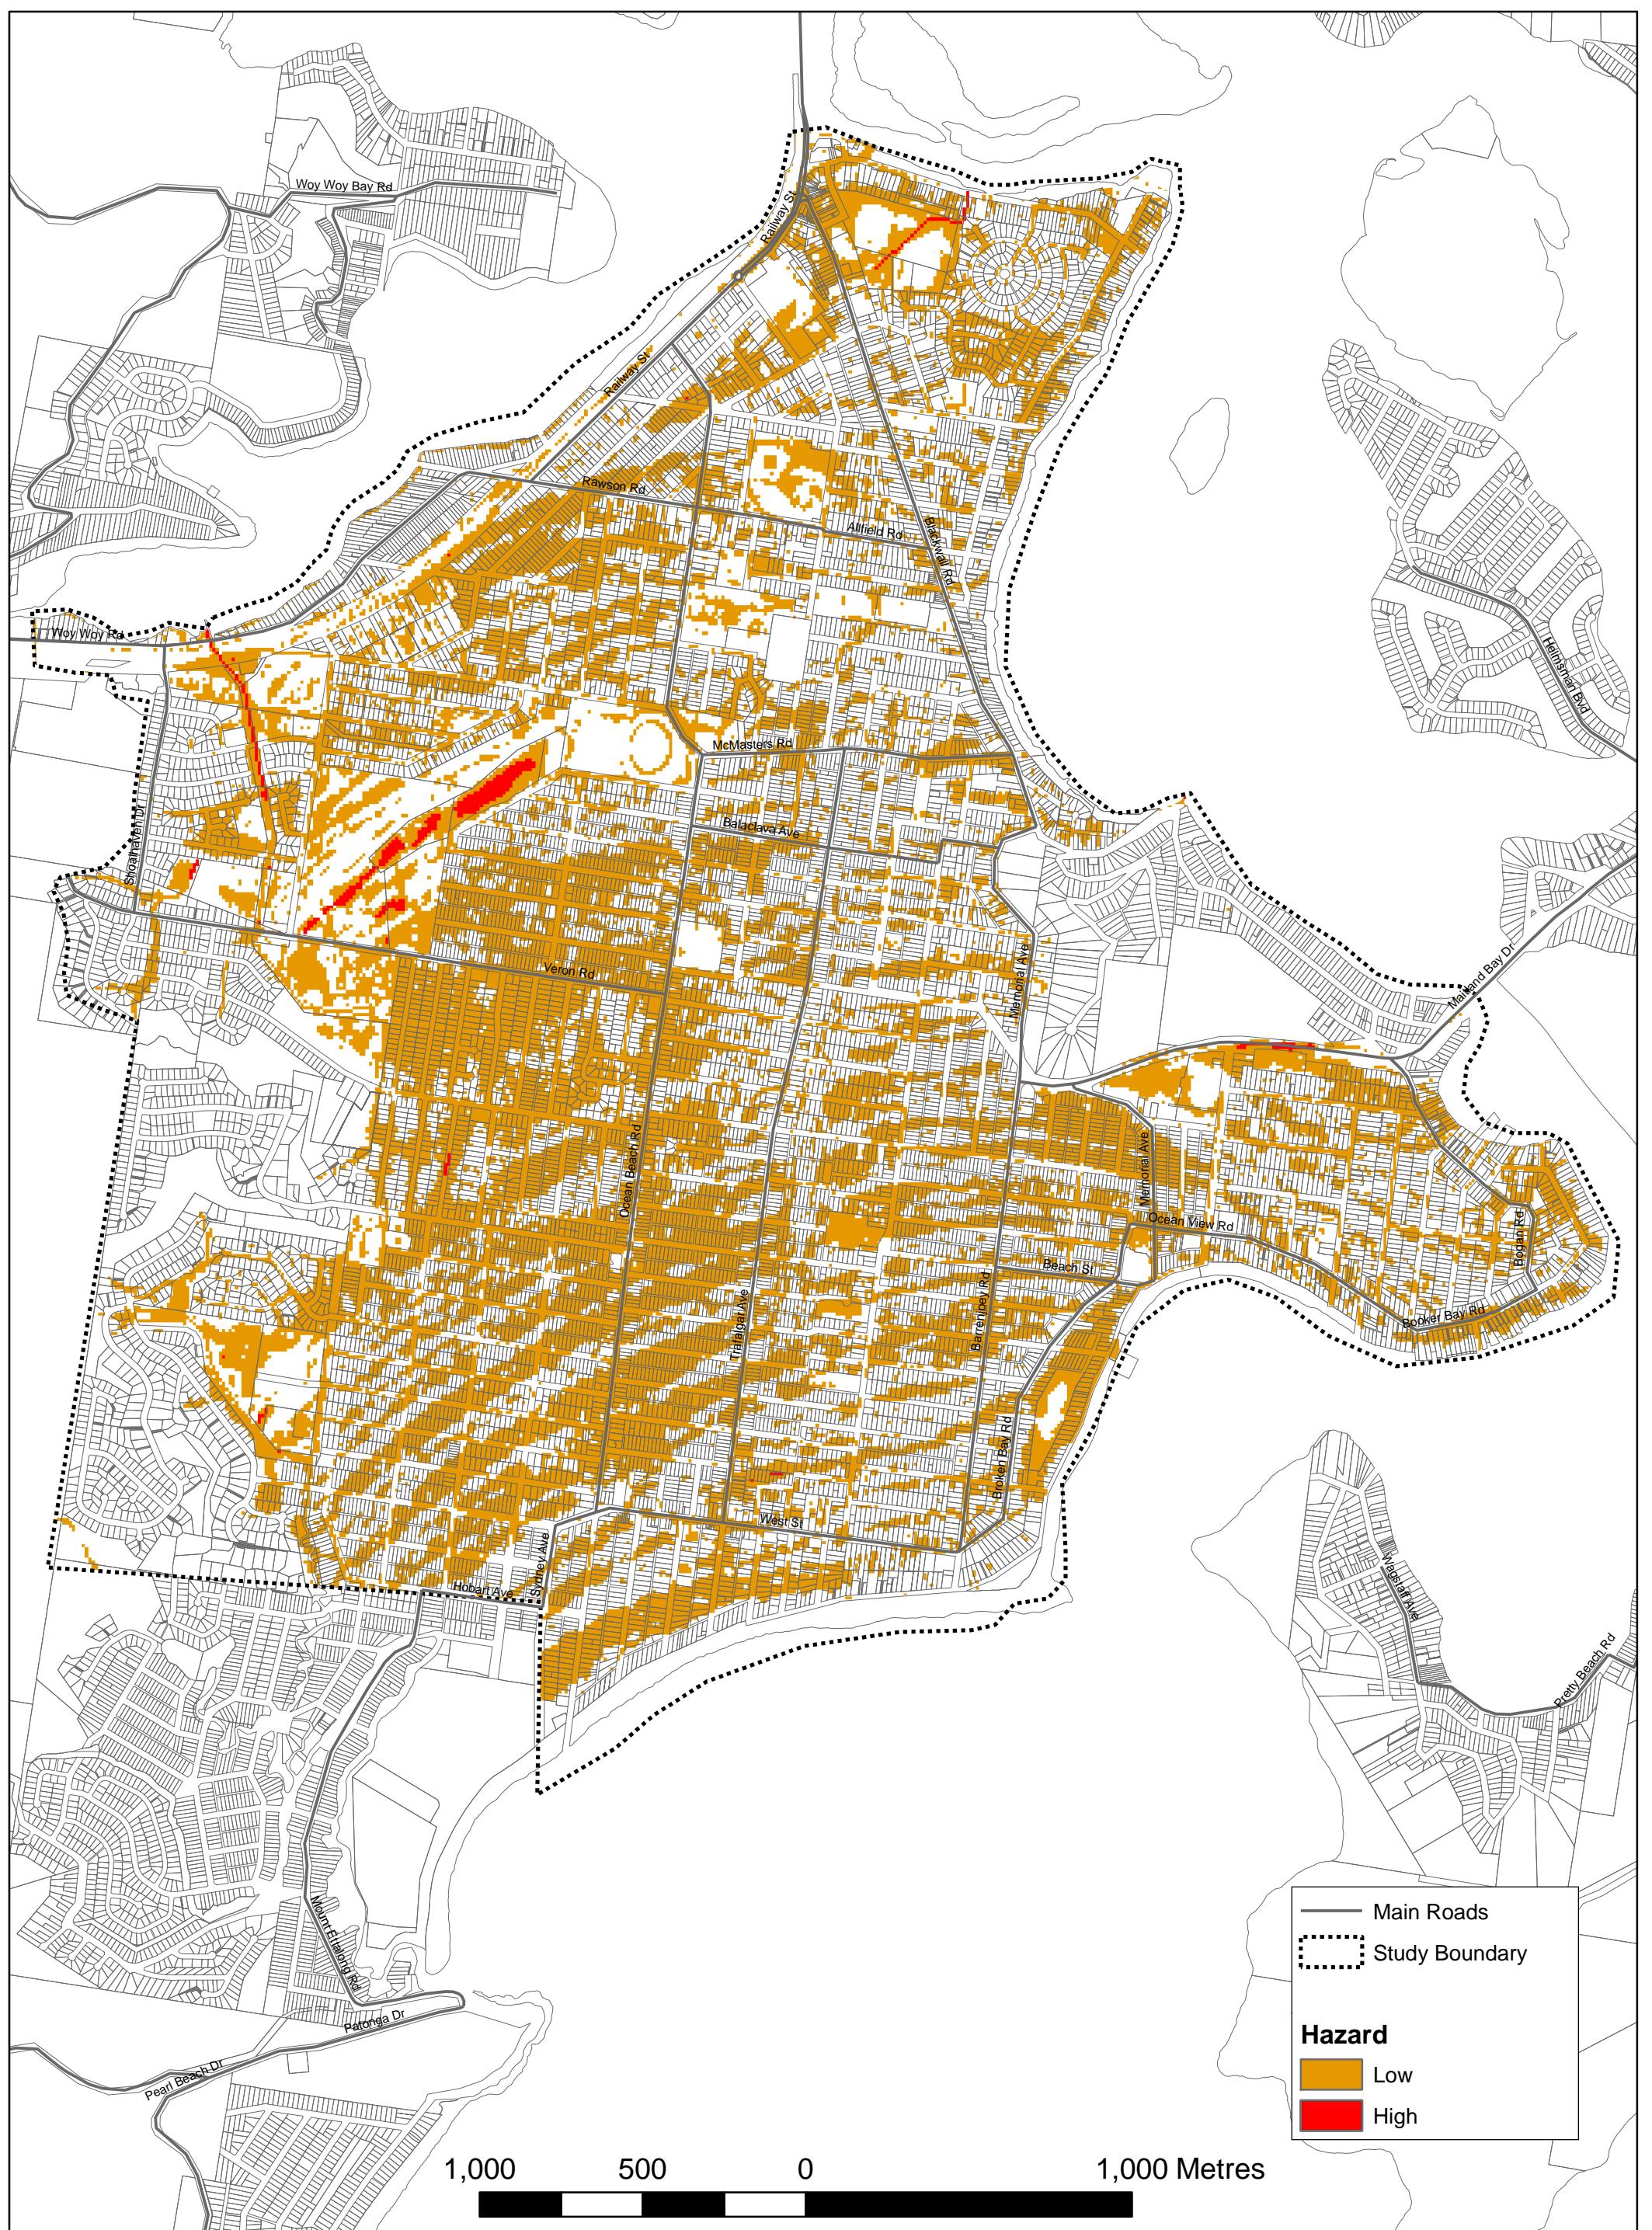

Figure 47 – Modelled Flood Hazard for PMF with Future Development.

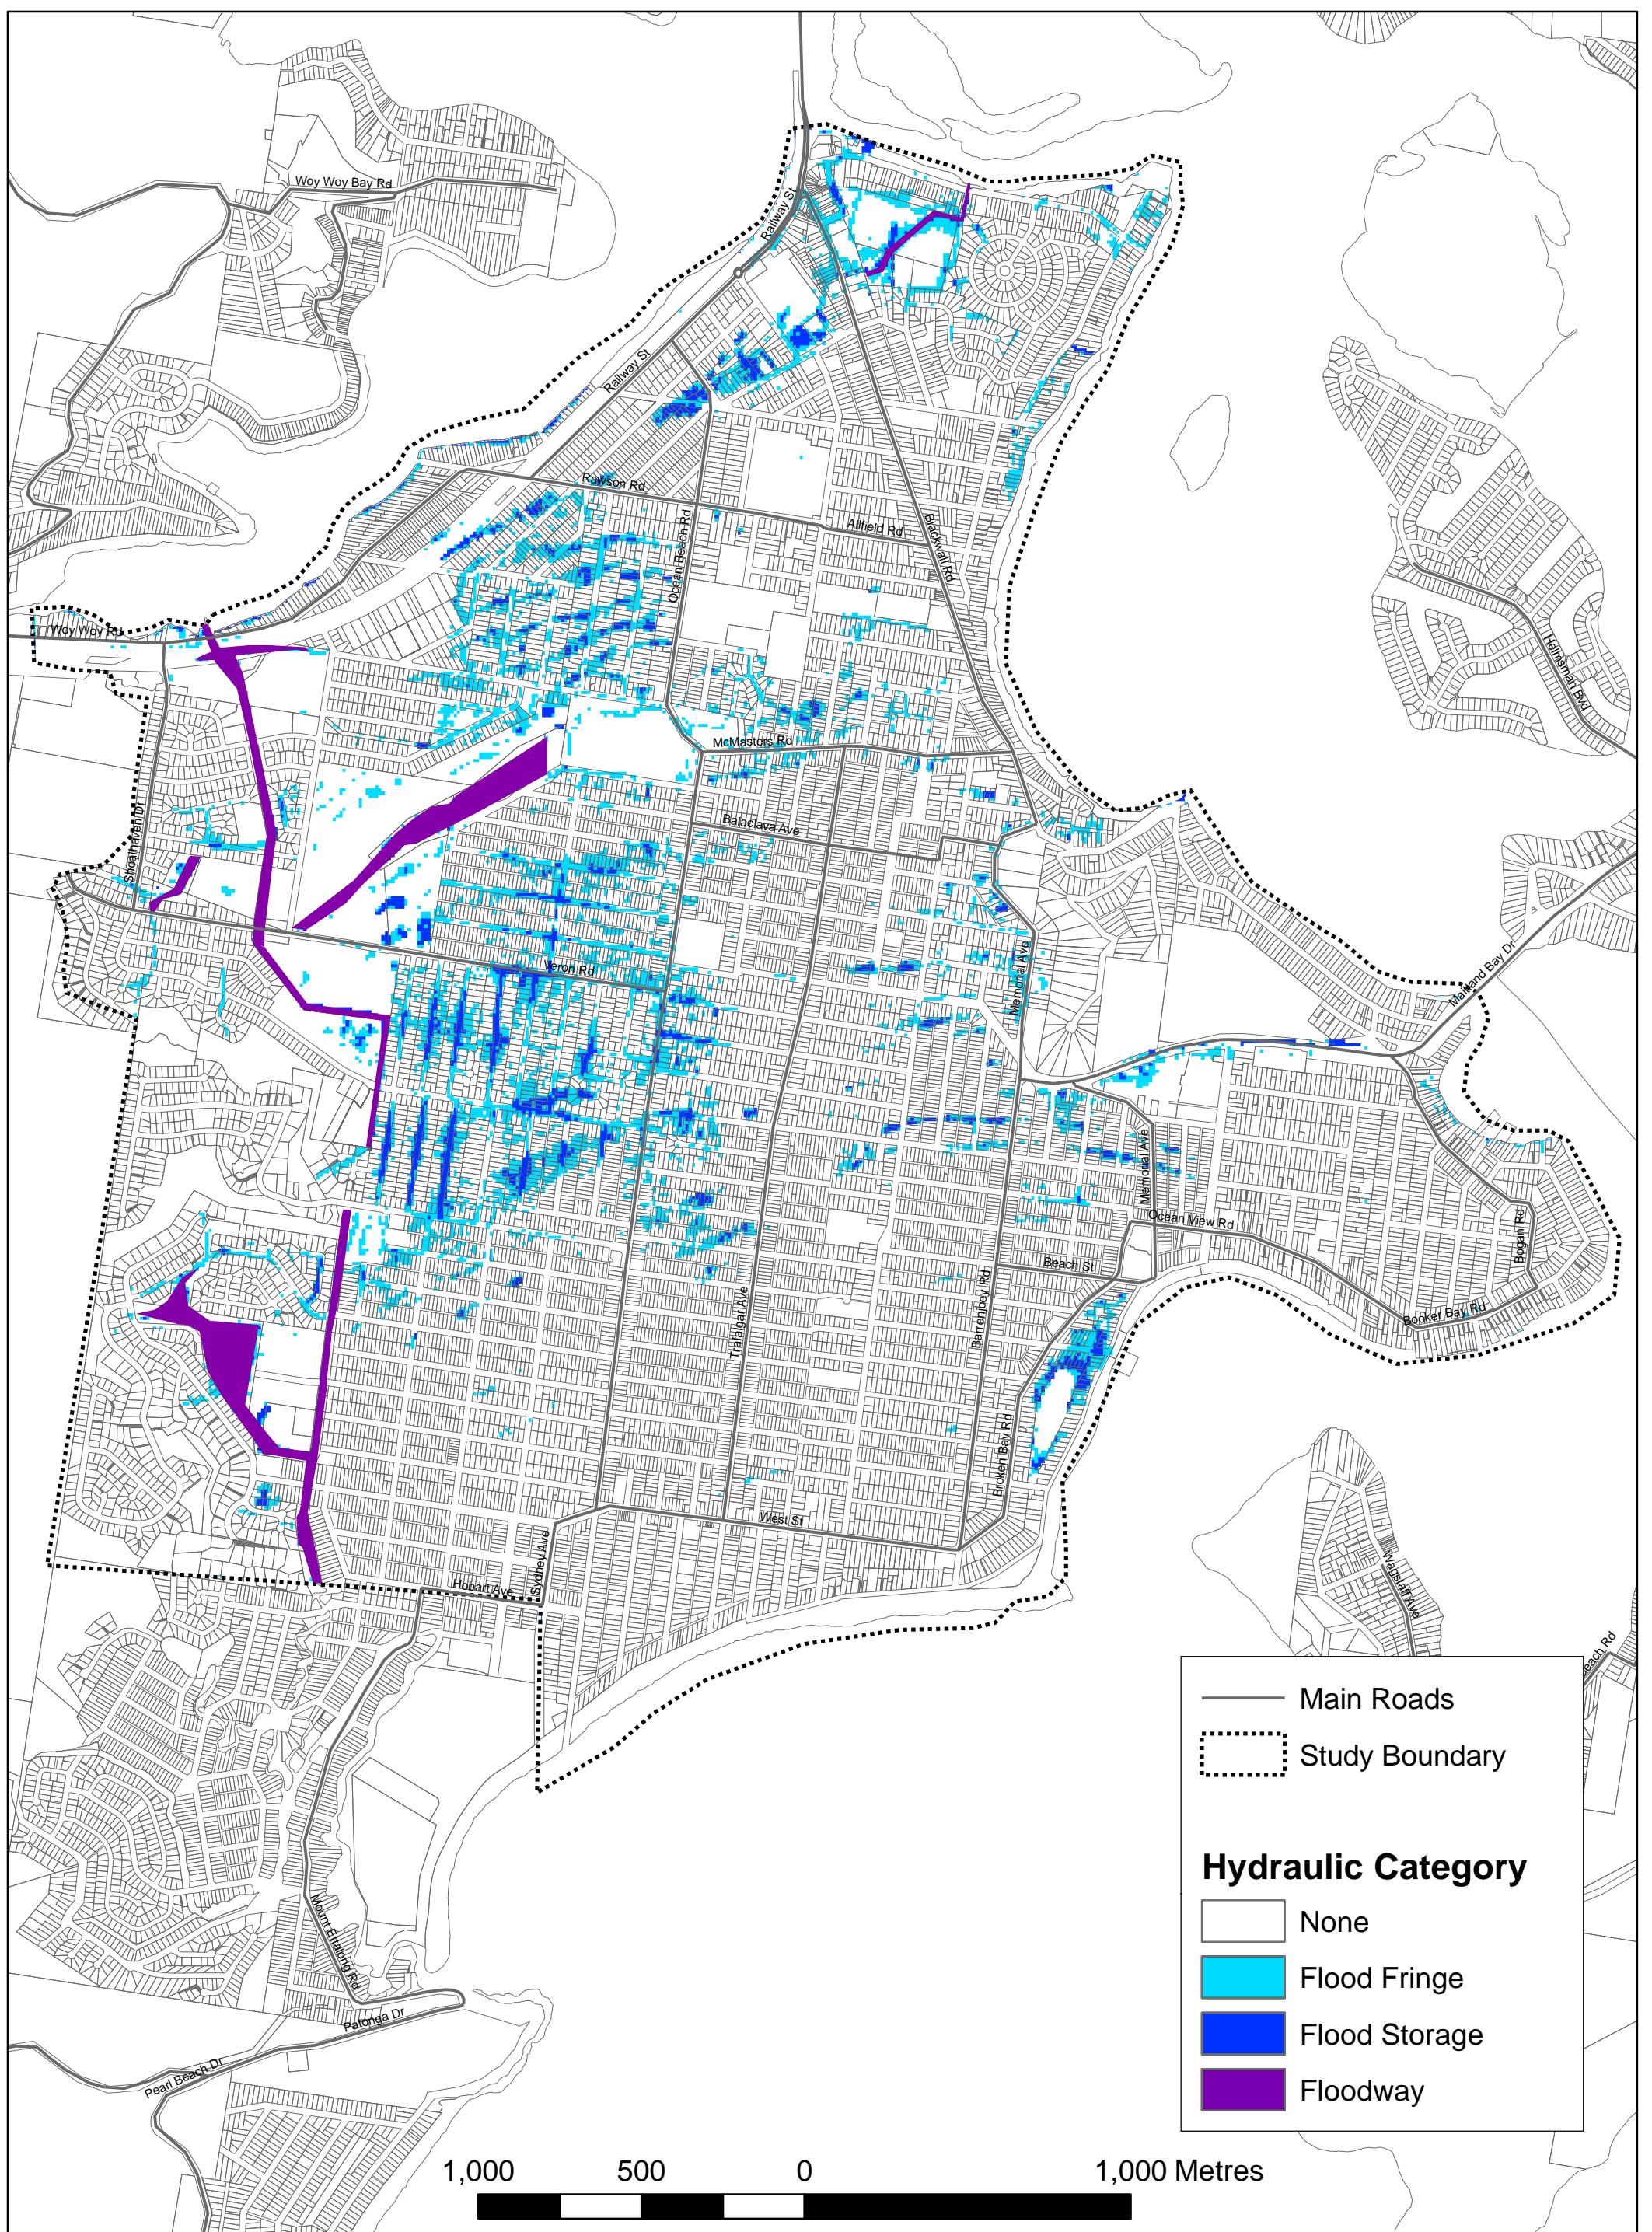

Figure 48 – Provisional Hydraulic Category Classification for 2yr ARI (50% AEP) with Future Development.

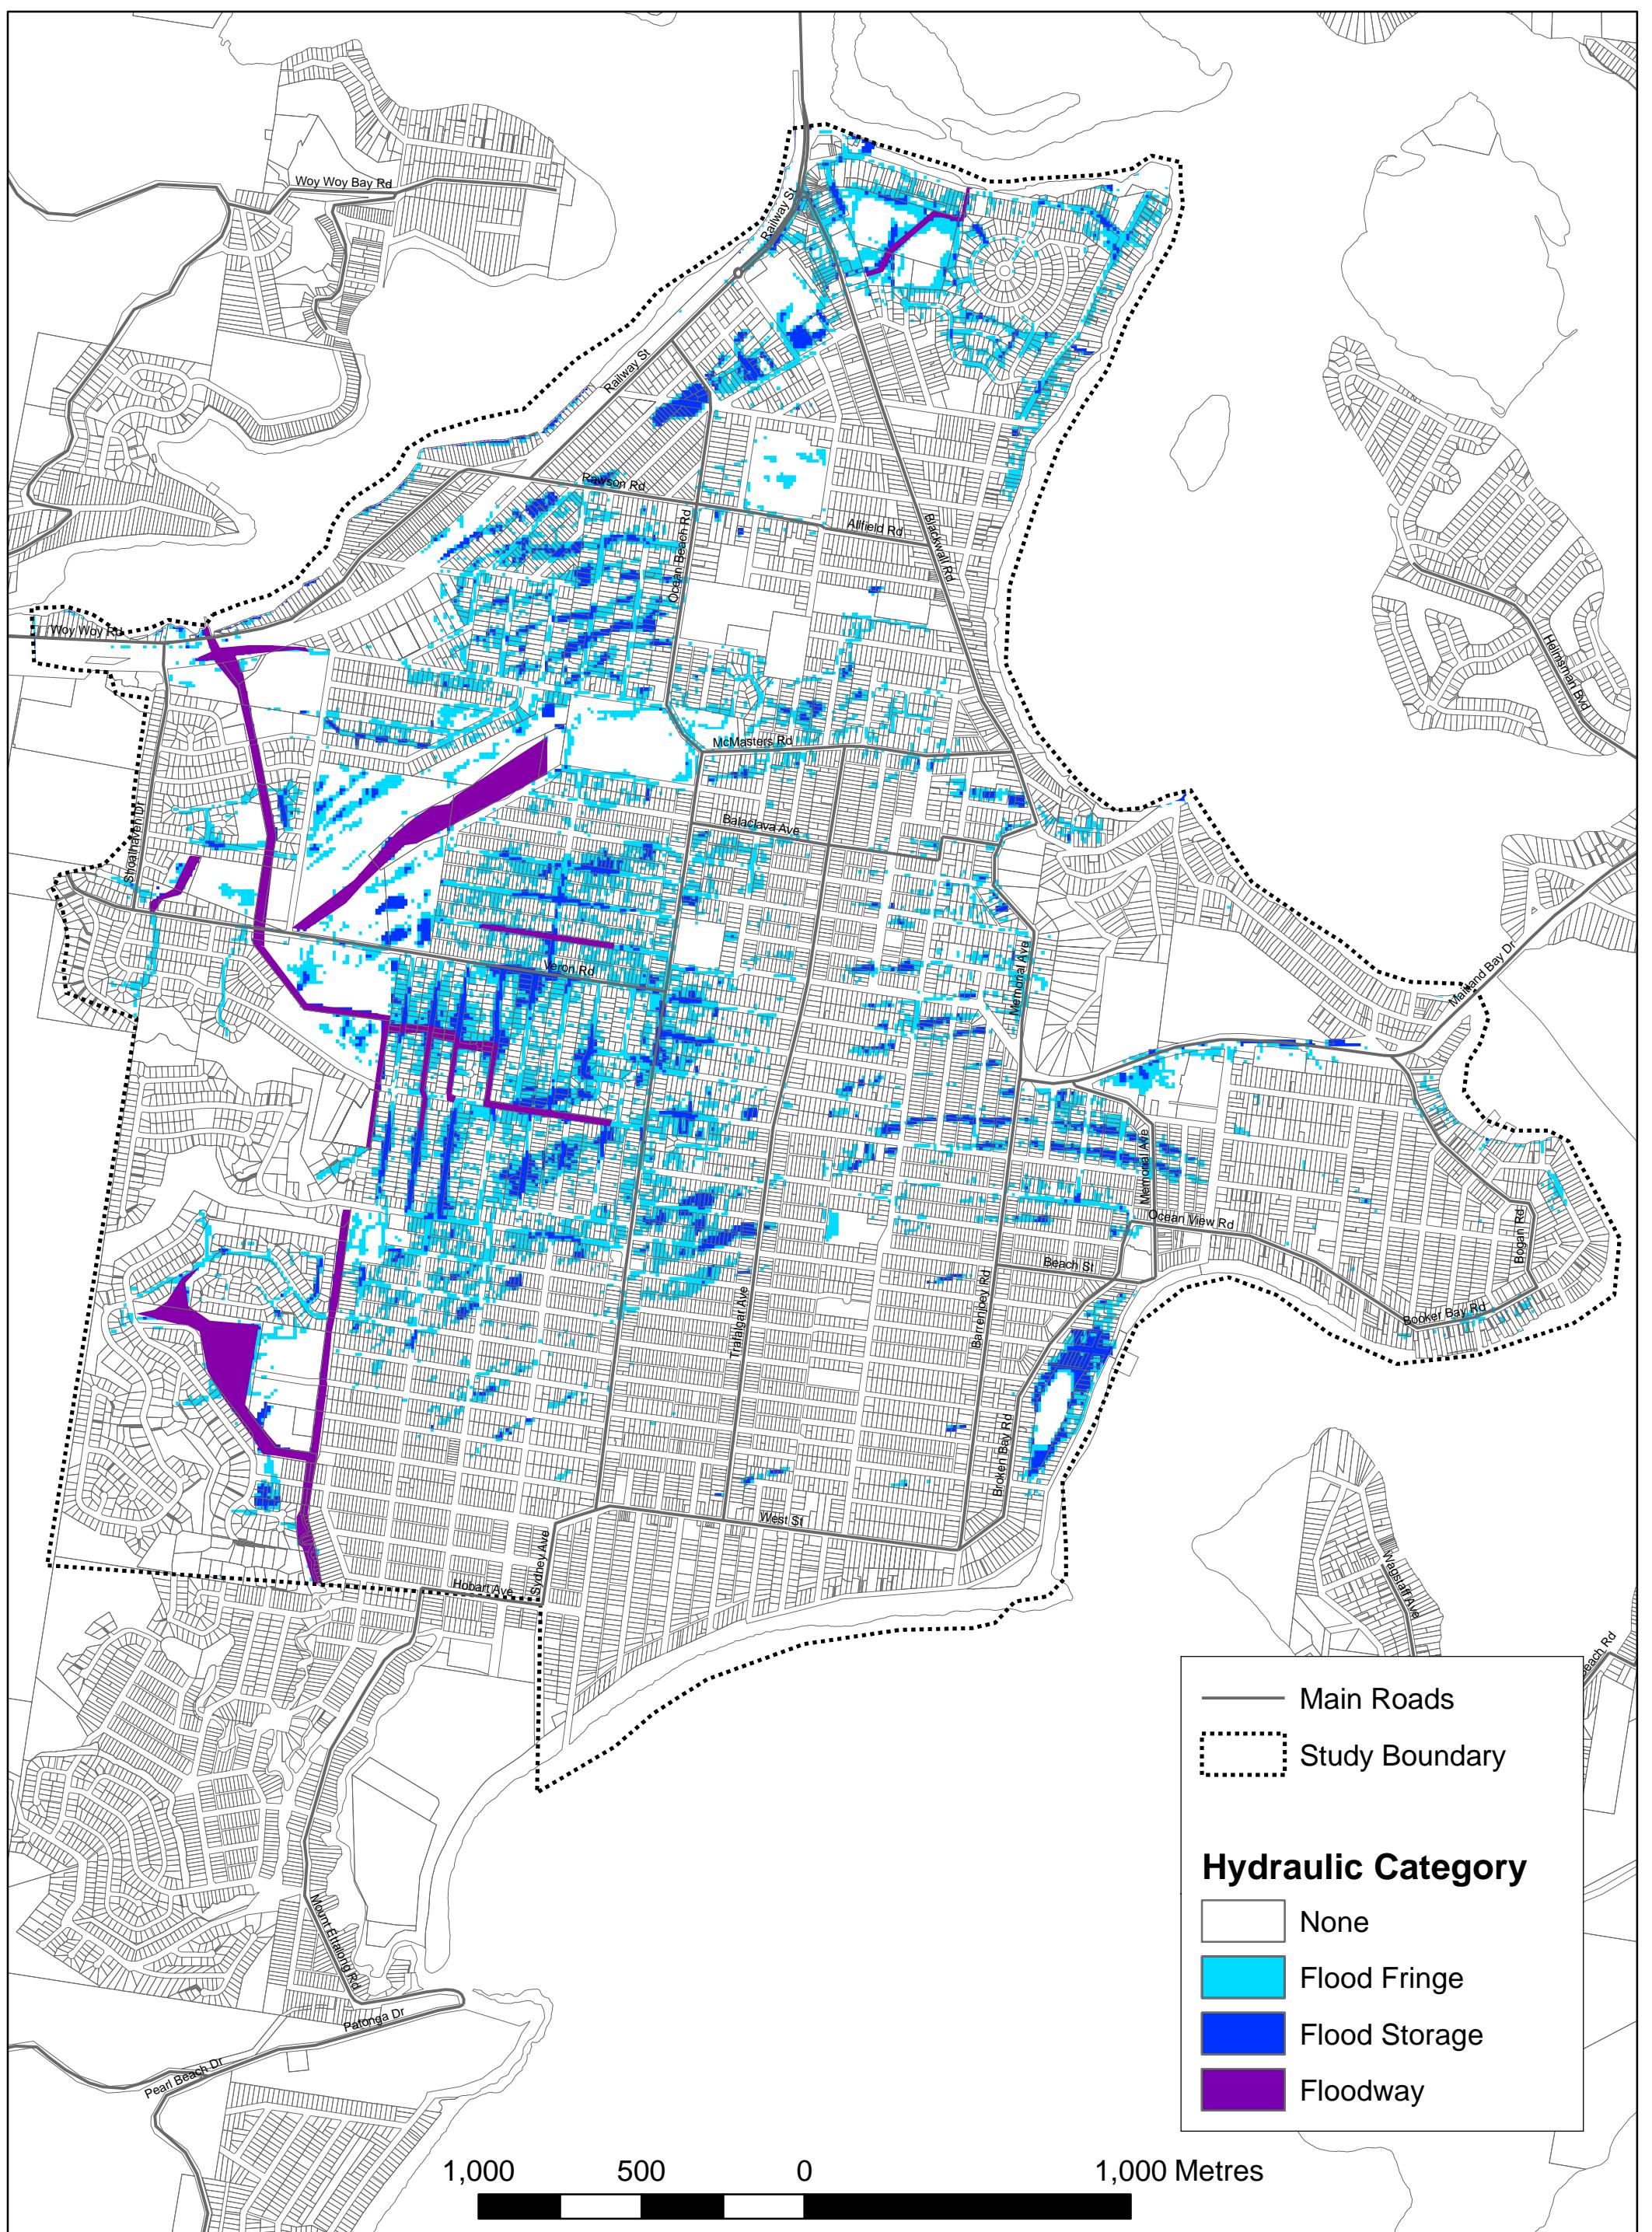

Figure 49 – Provisional Hydraulic Category Classification for 10yr ARI (10% AEP) with Future Development.

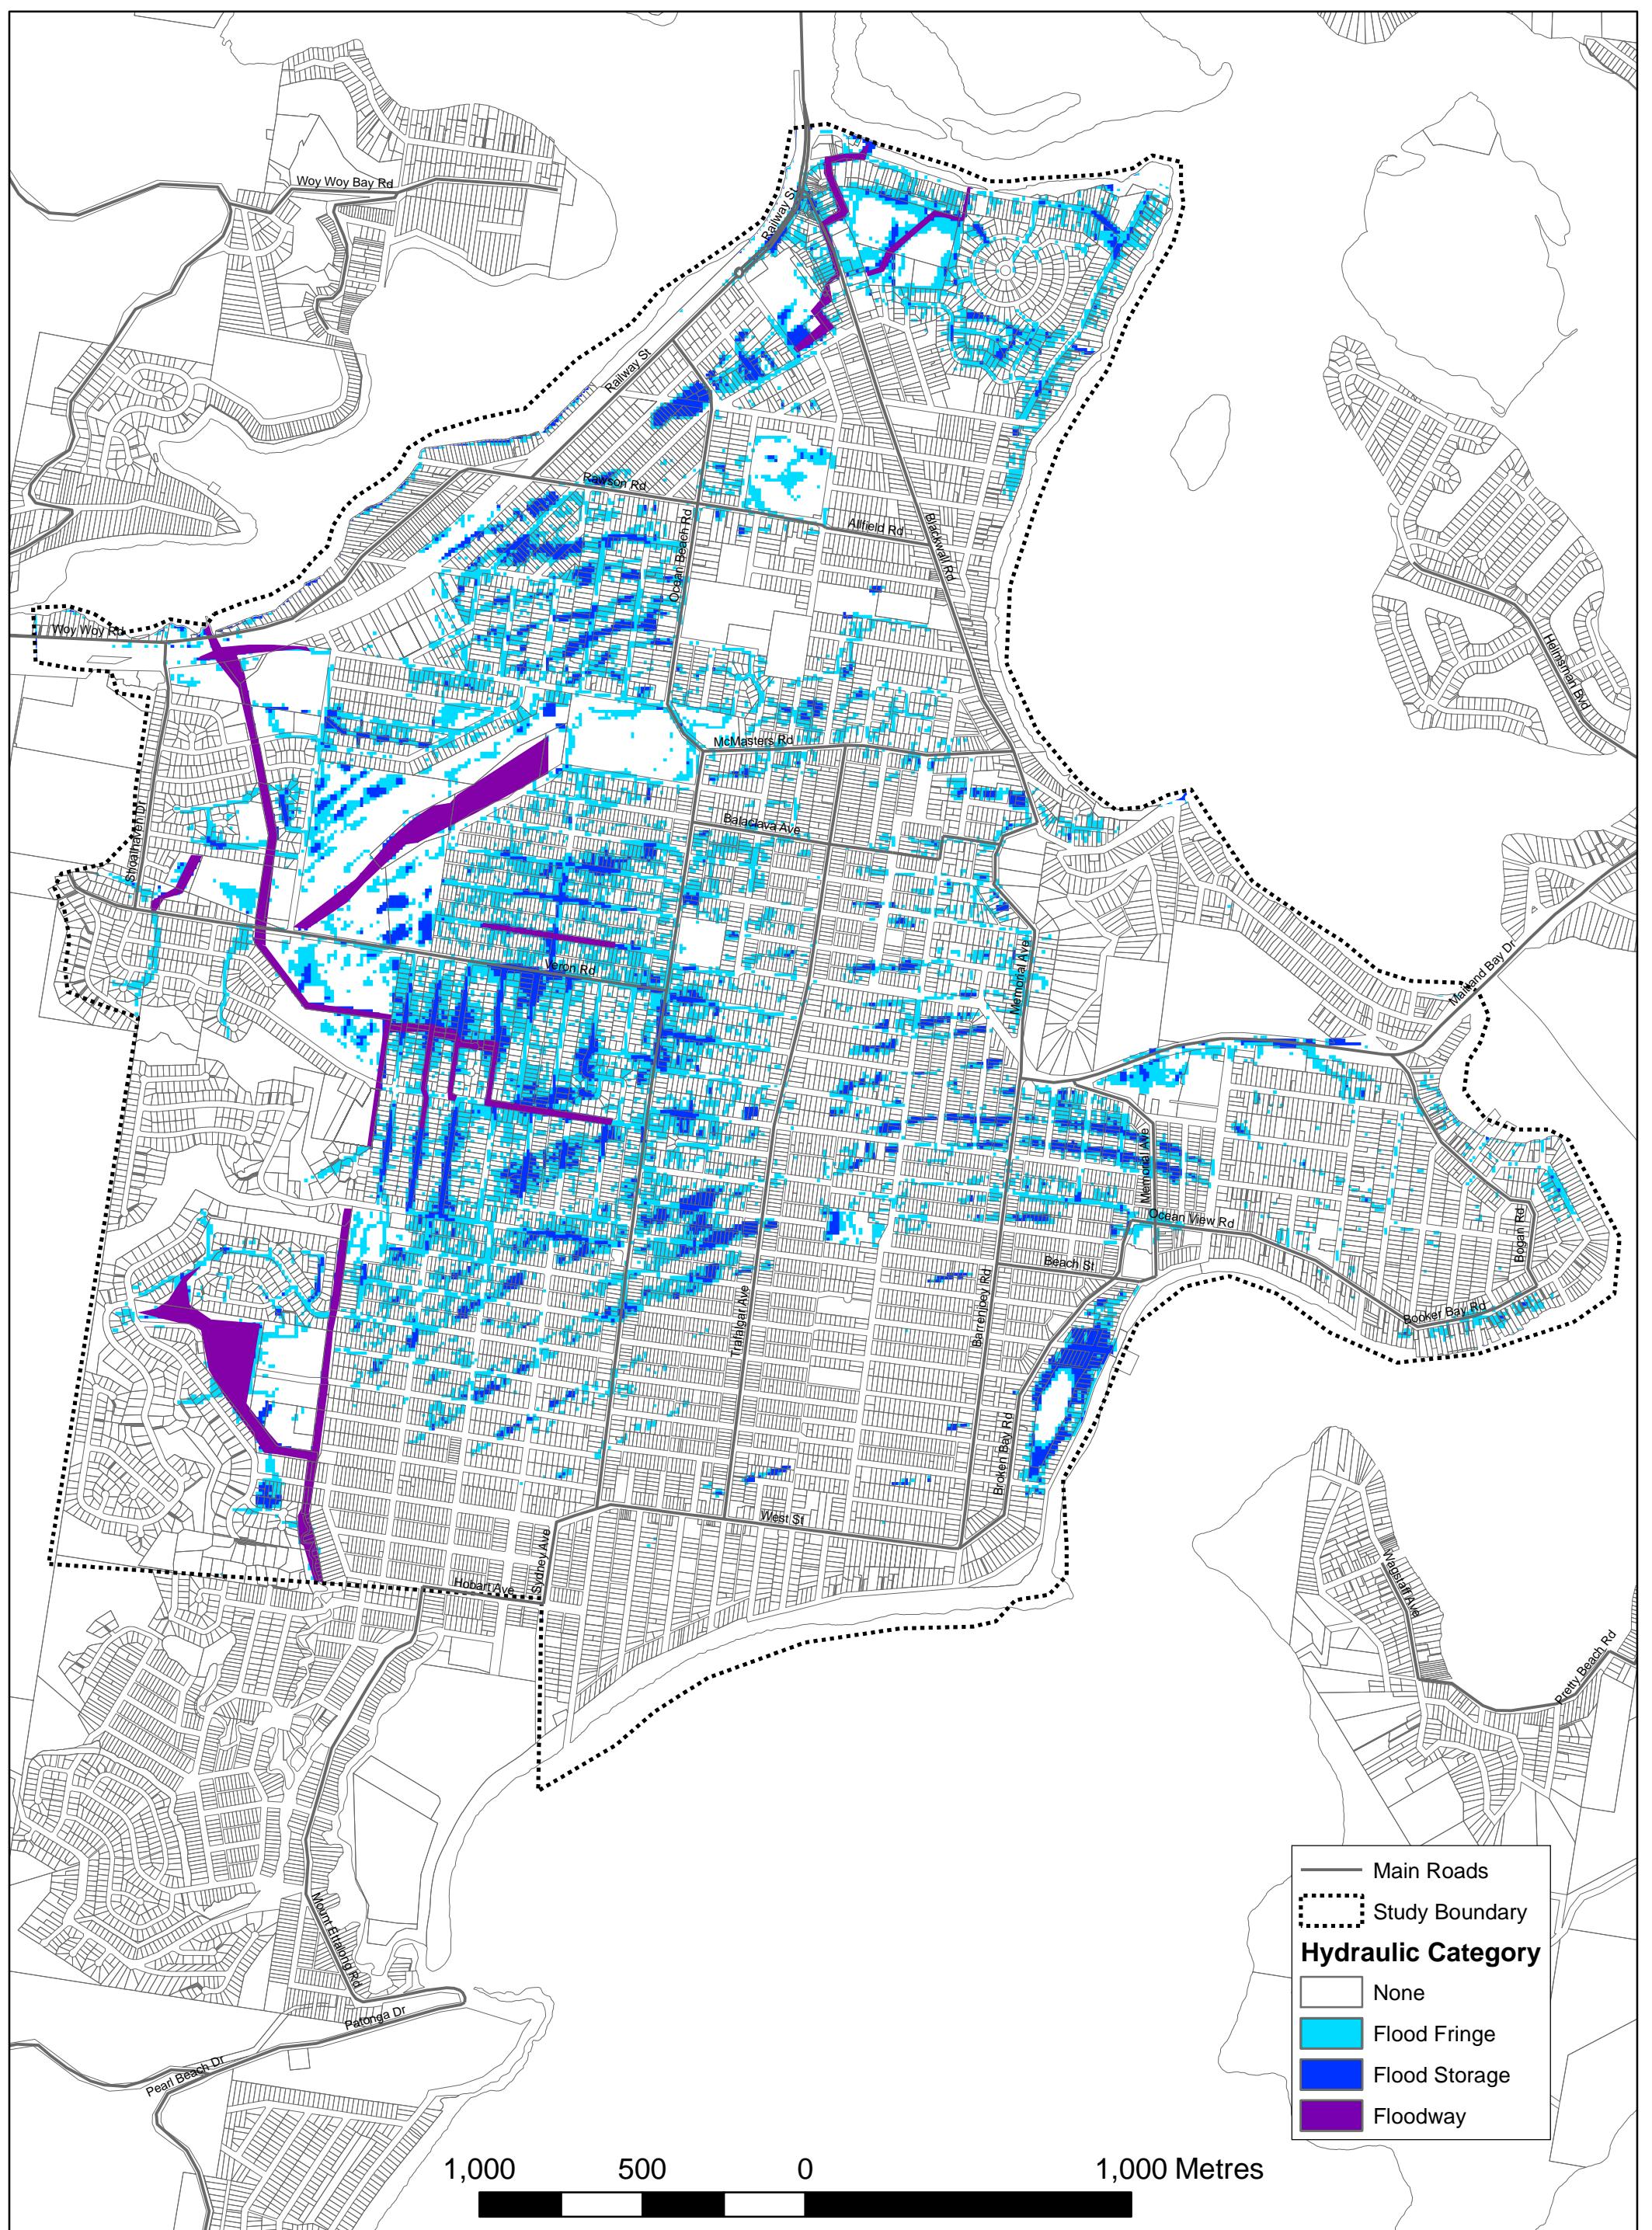

Figure 50 – Provisional Hydraulic Category Classification for 20yr ARI (5% AEP) with Future Development.

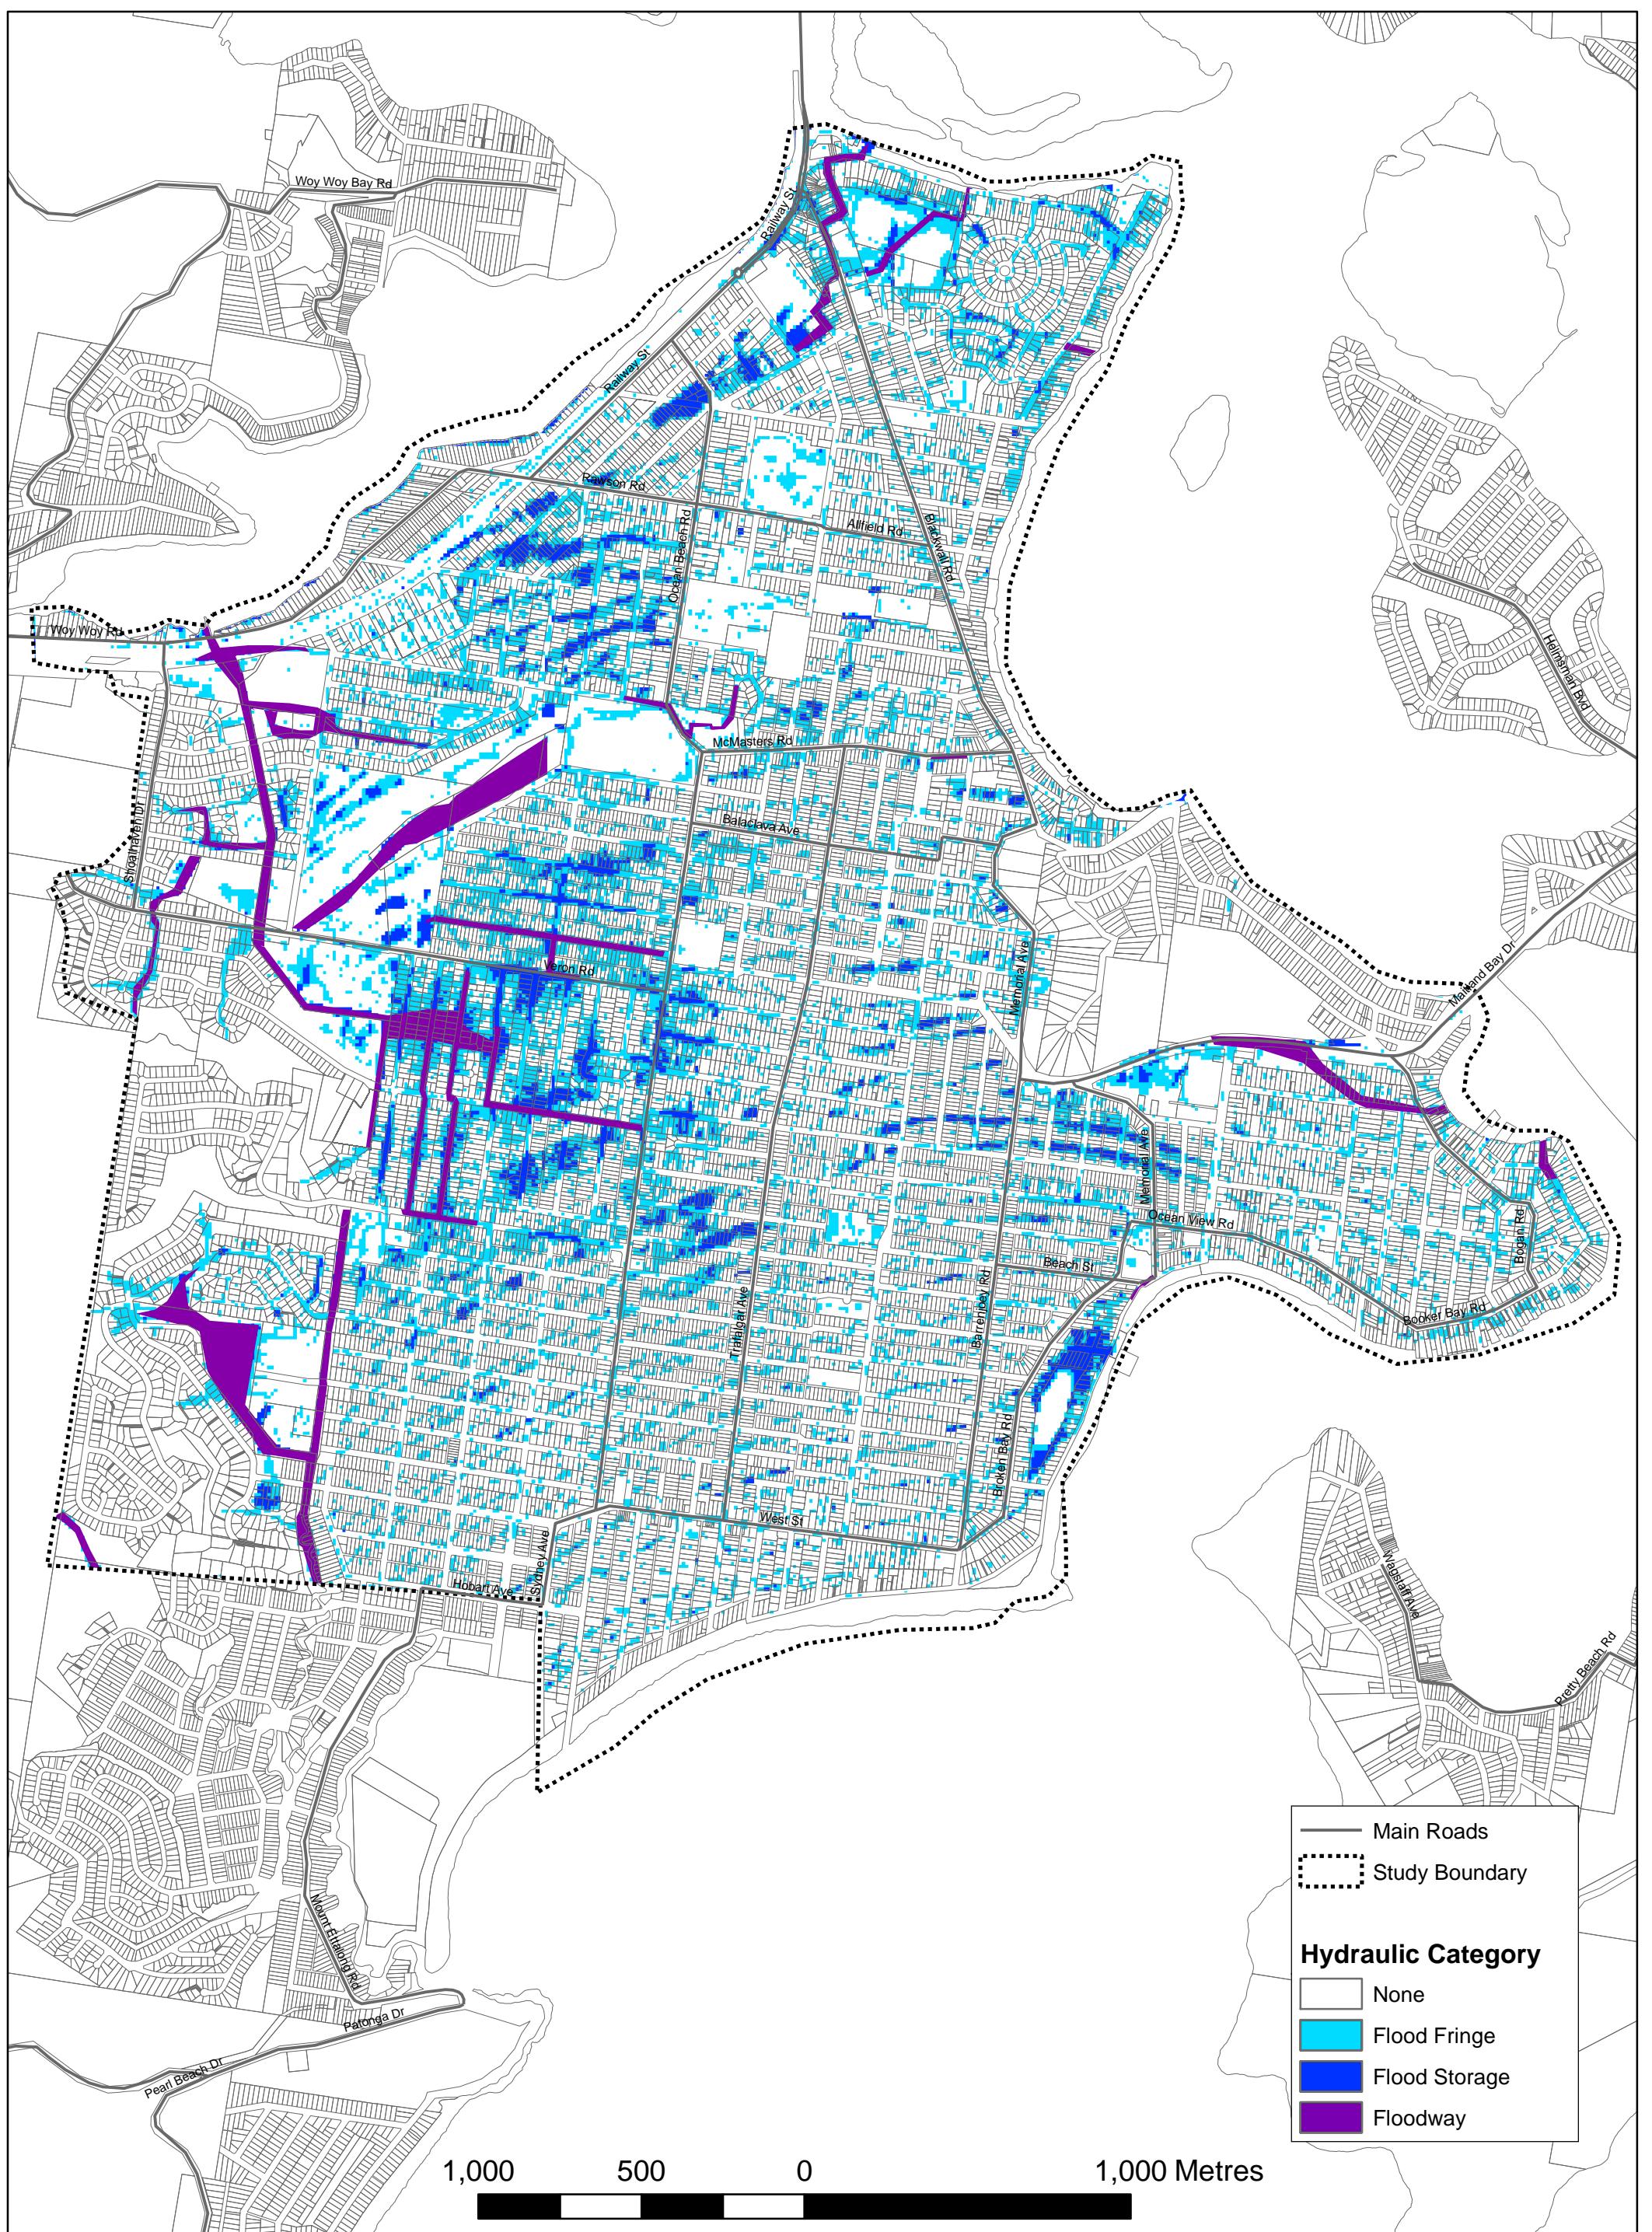

Figure 51 – Provisional Hydraulic Category Classification for 100yr ARI (1% AEP) with Future Development.

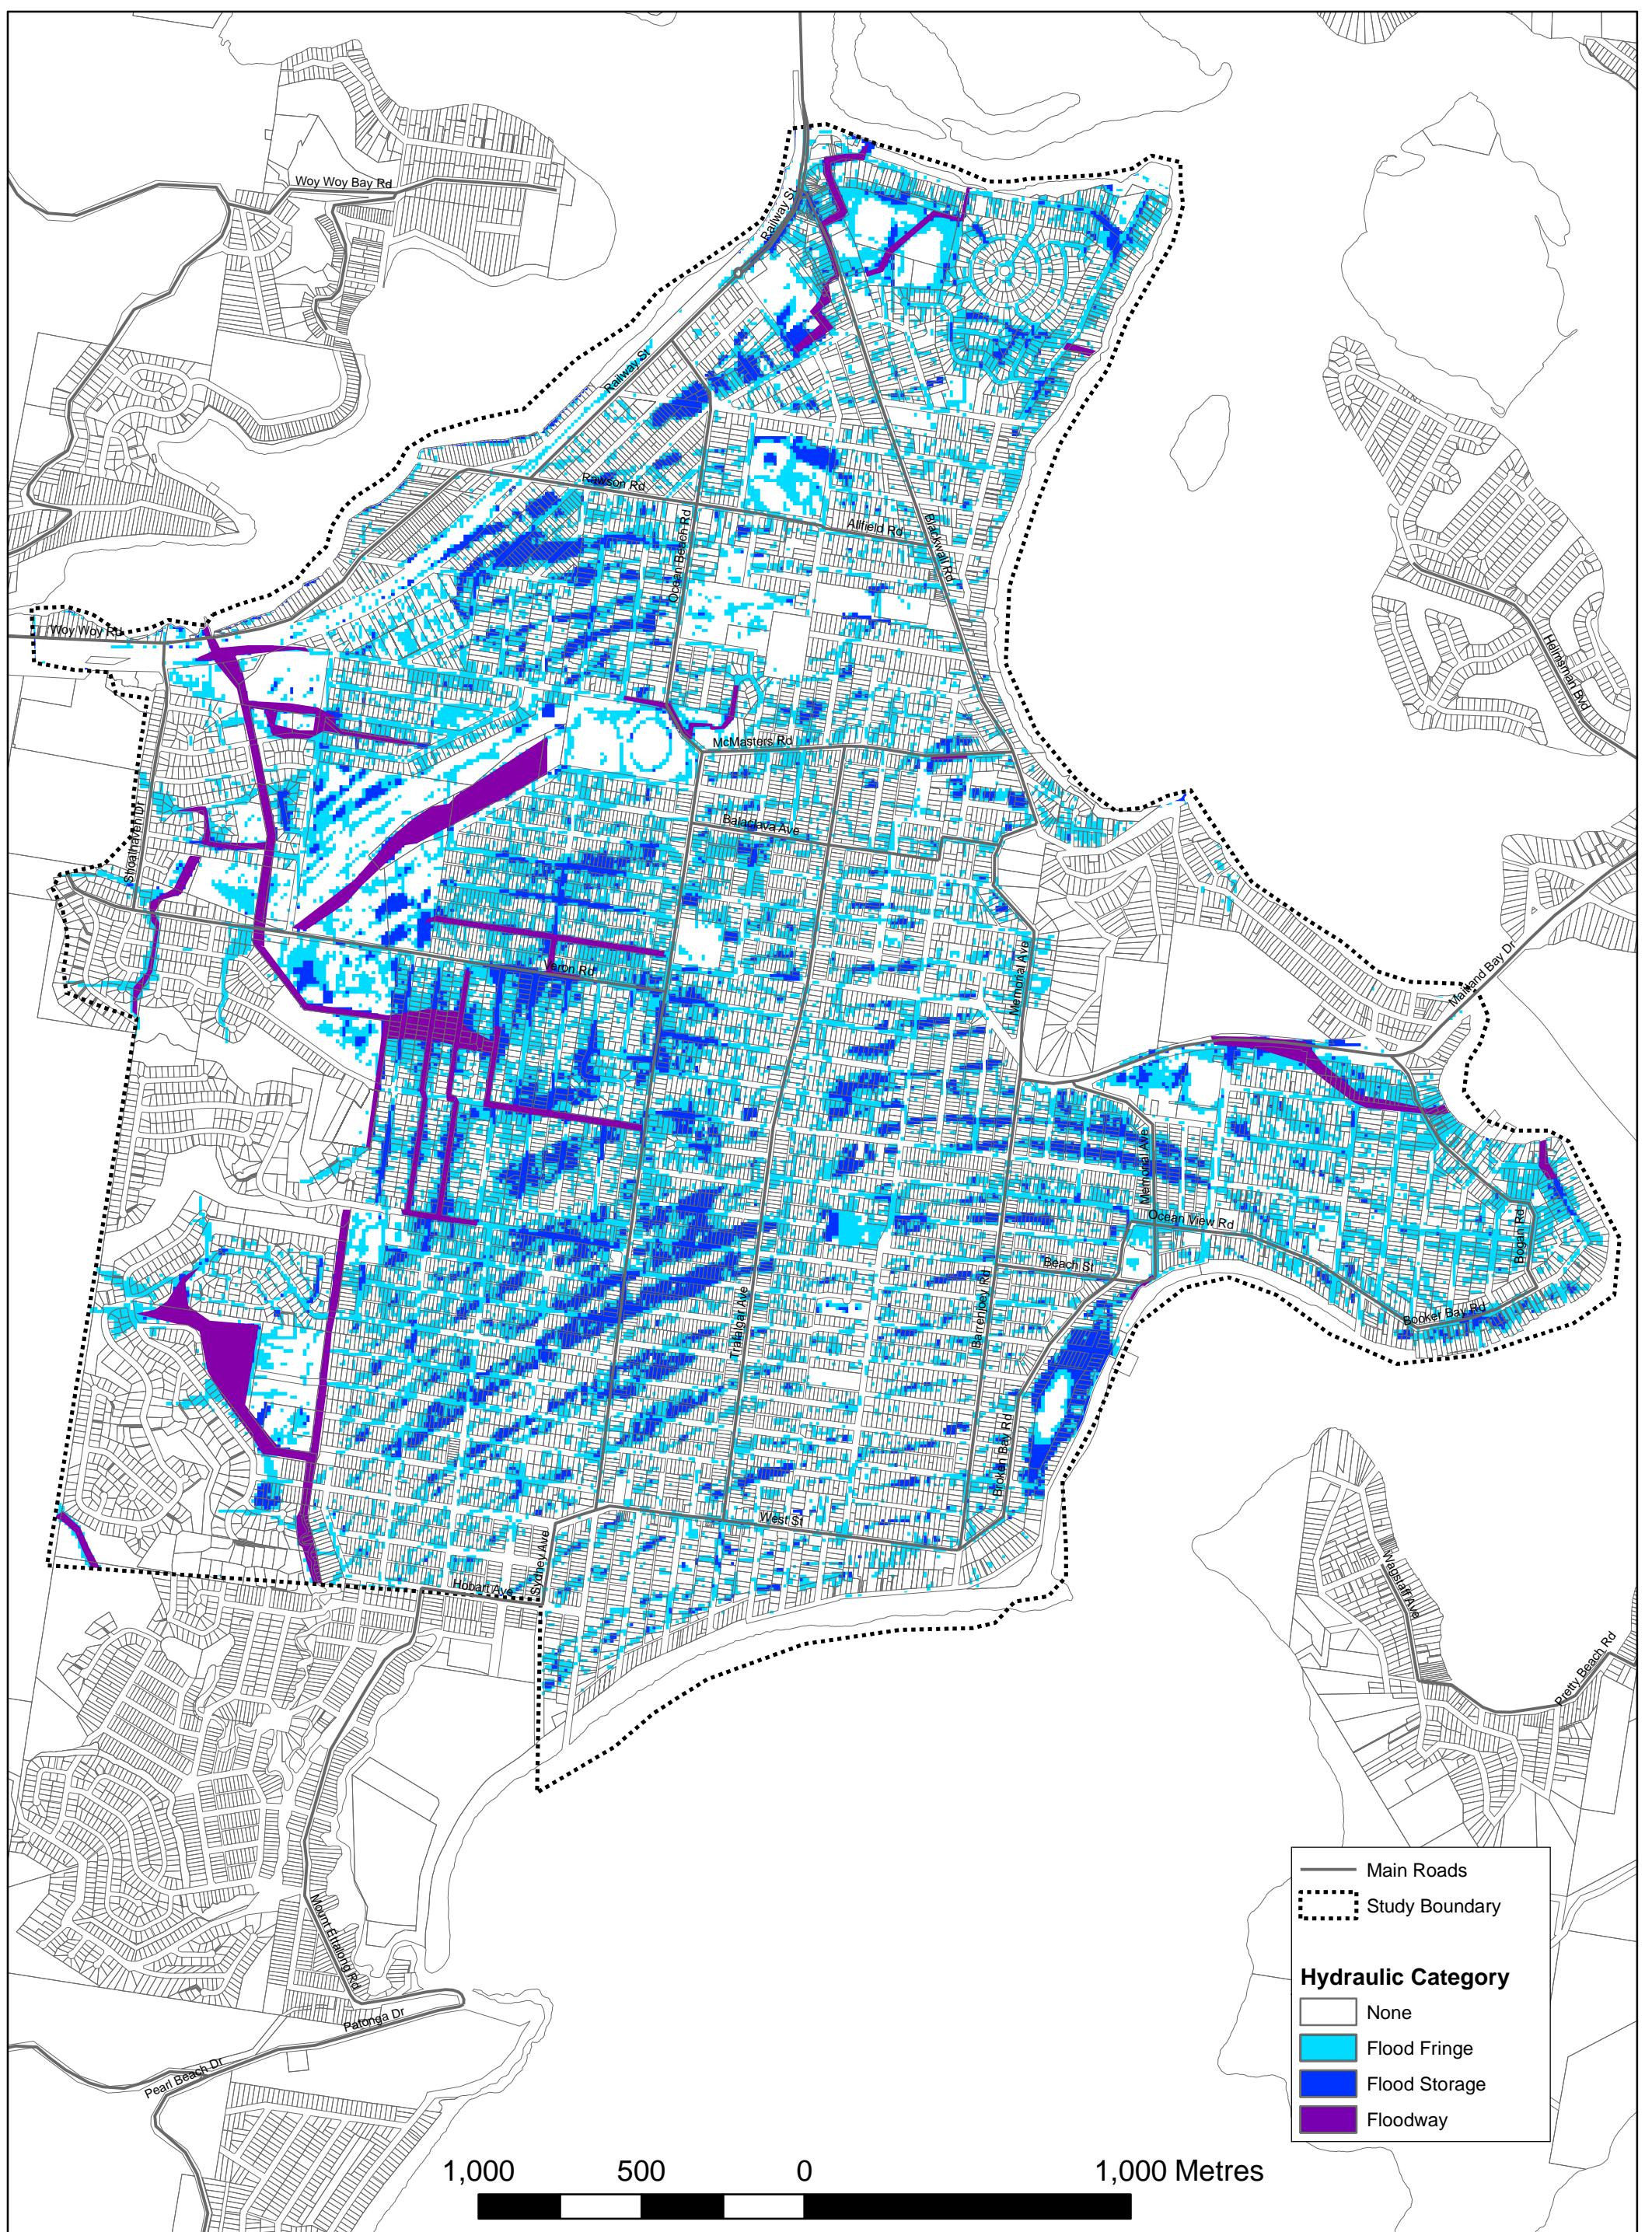

Figure 52 – Provisional Hydraulic Category Classification for 200yr ARI (0.5% AEP) with Future Development.

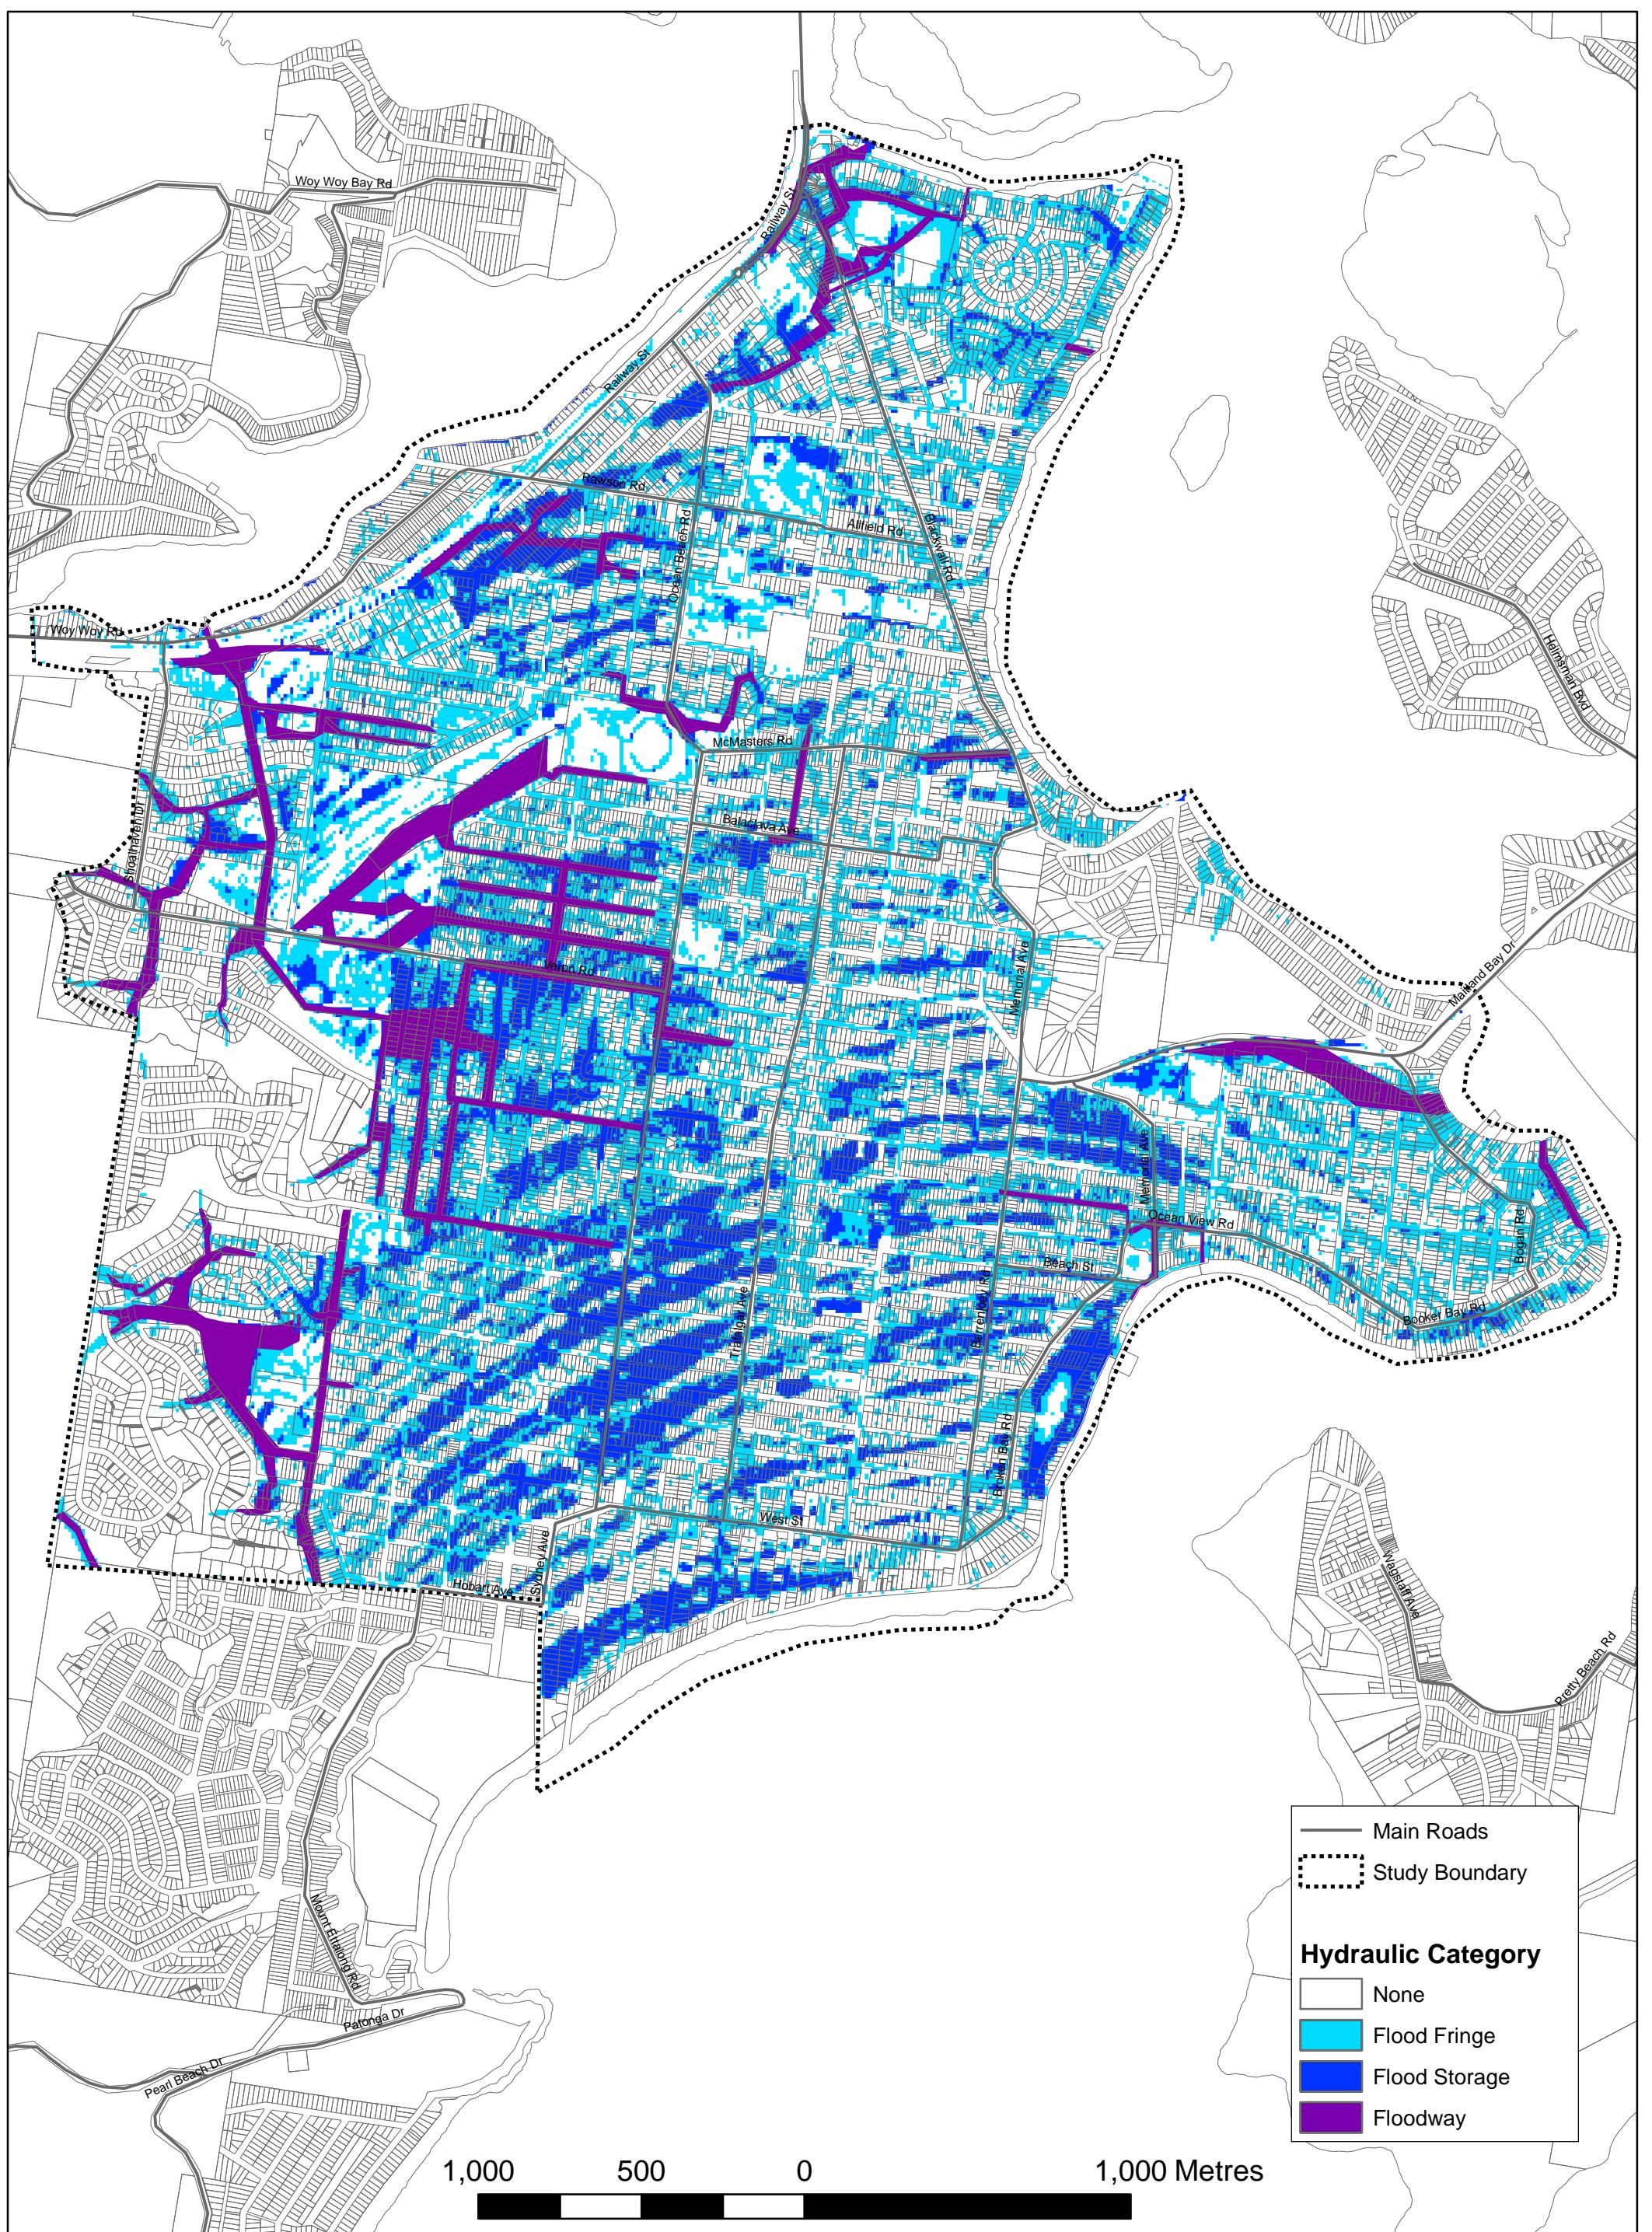

Figure 53 – Provisional Hydraulic Category Classification for PMF with Future Development.

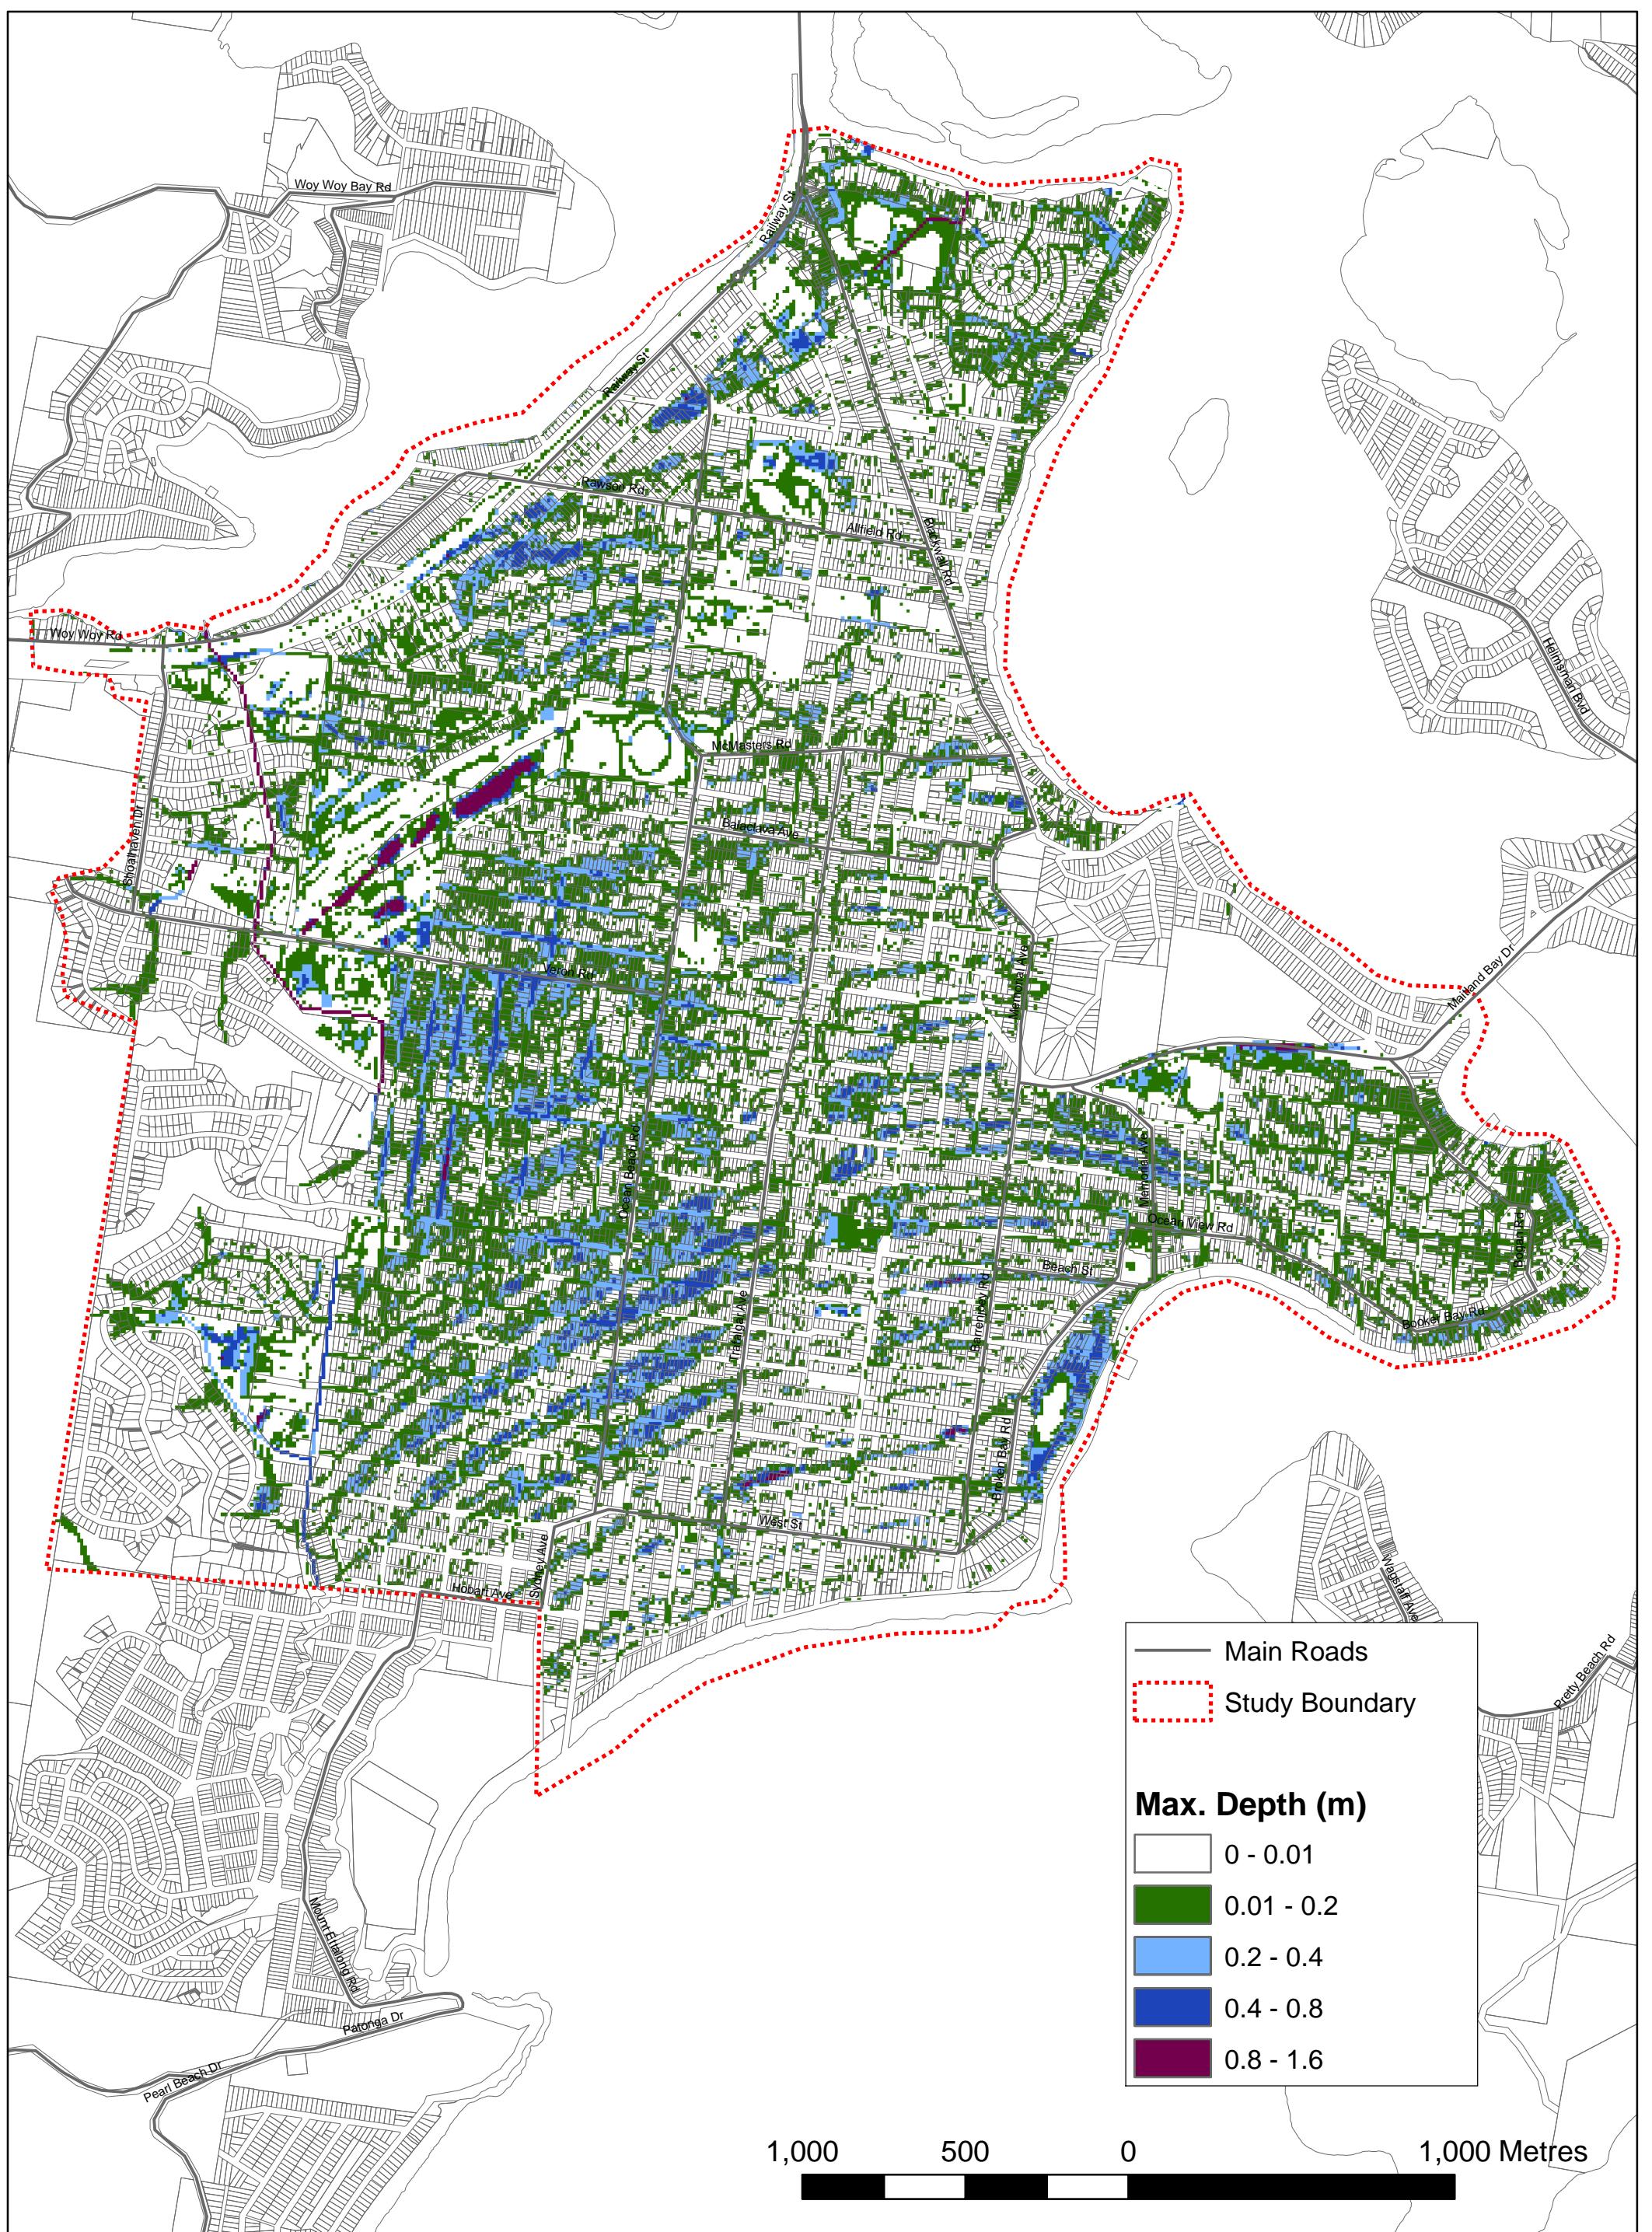

Figure 54 – Modelled Flood Depth for 100yr ARI (1% AEP) with Future Development, 0.91m Sea Level Rise and 50% Blocked Stormwater network.

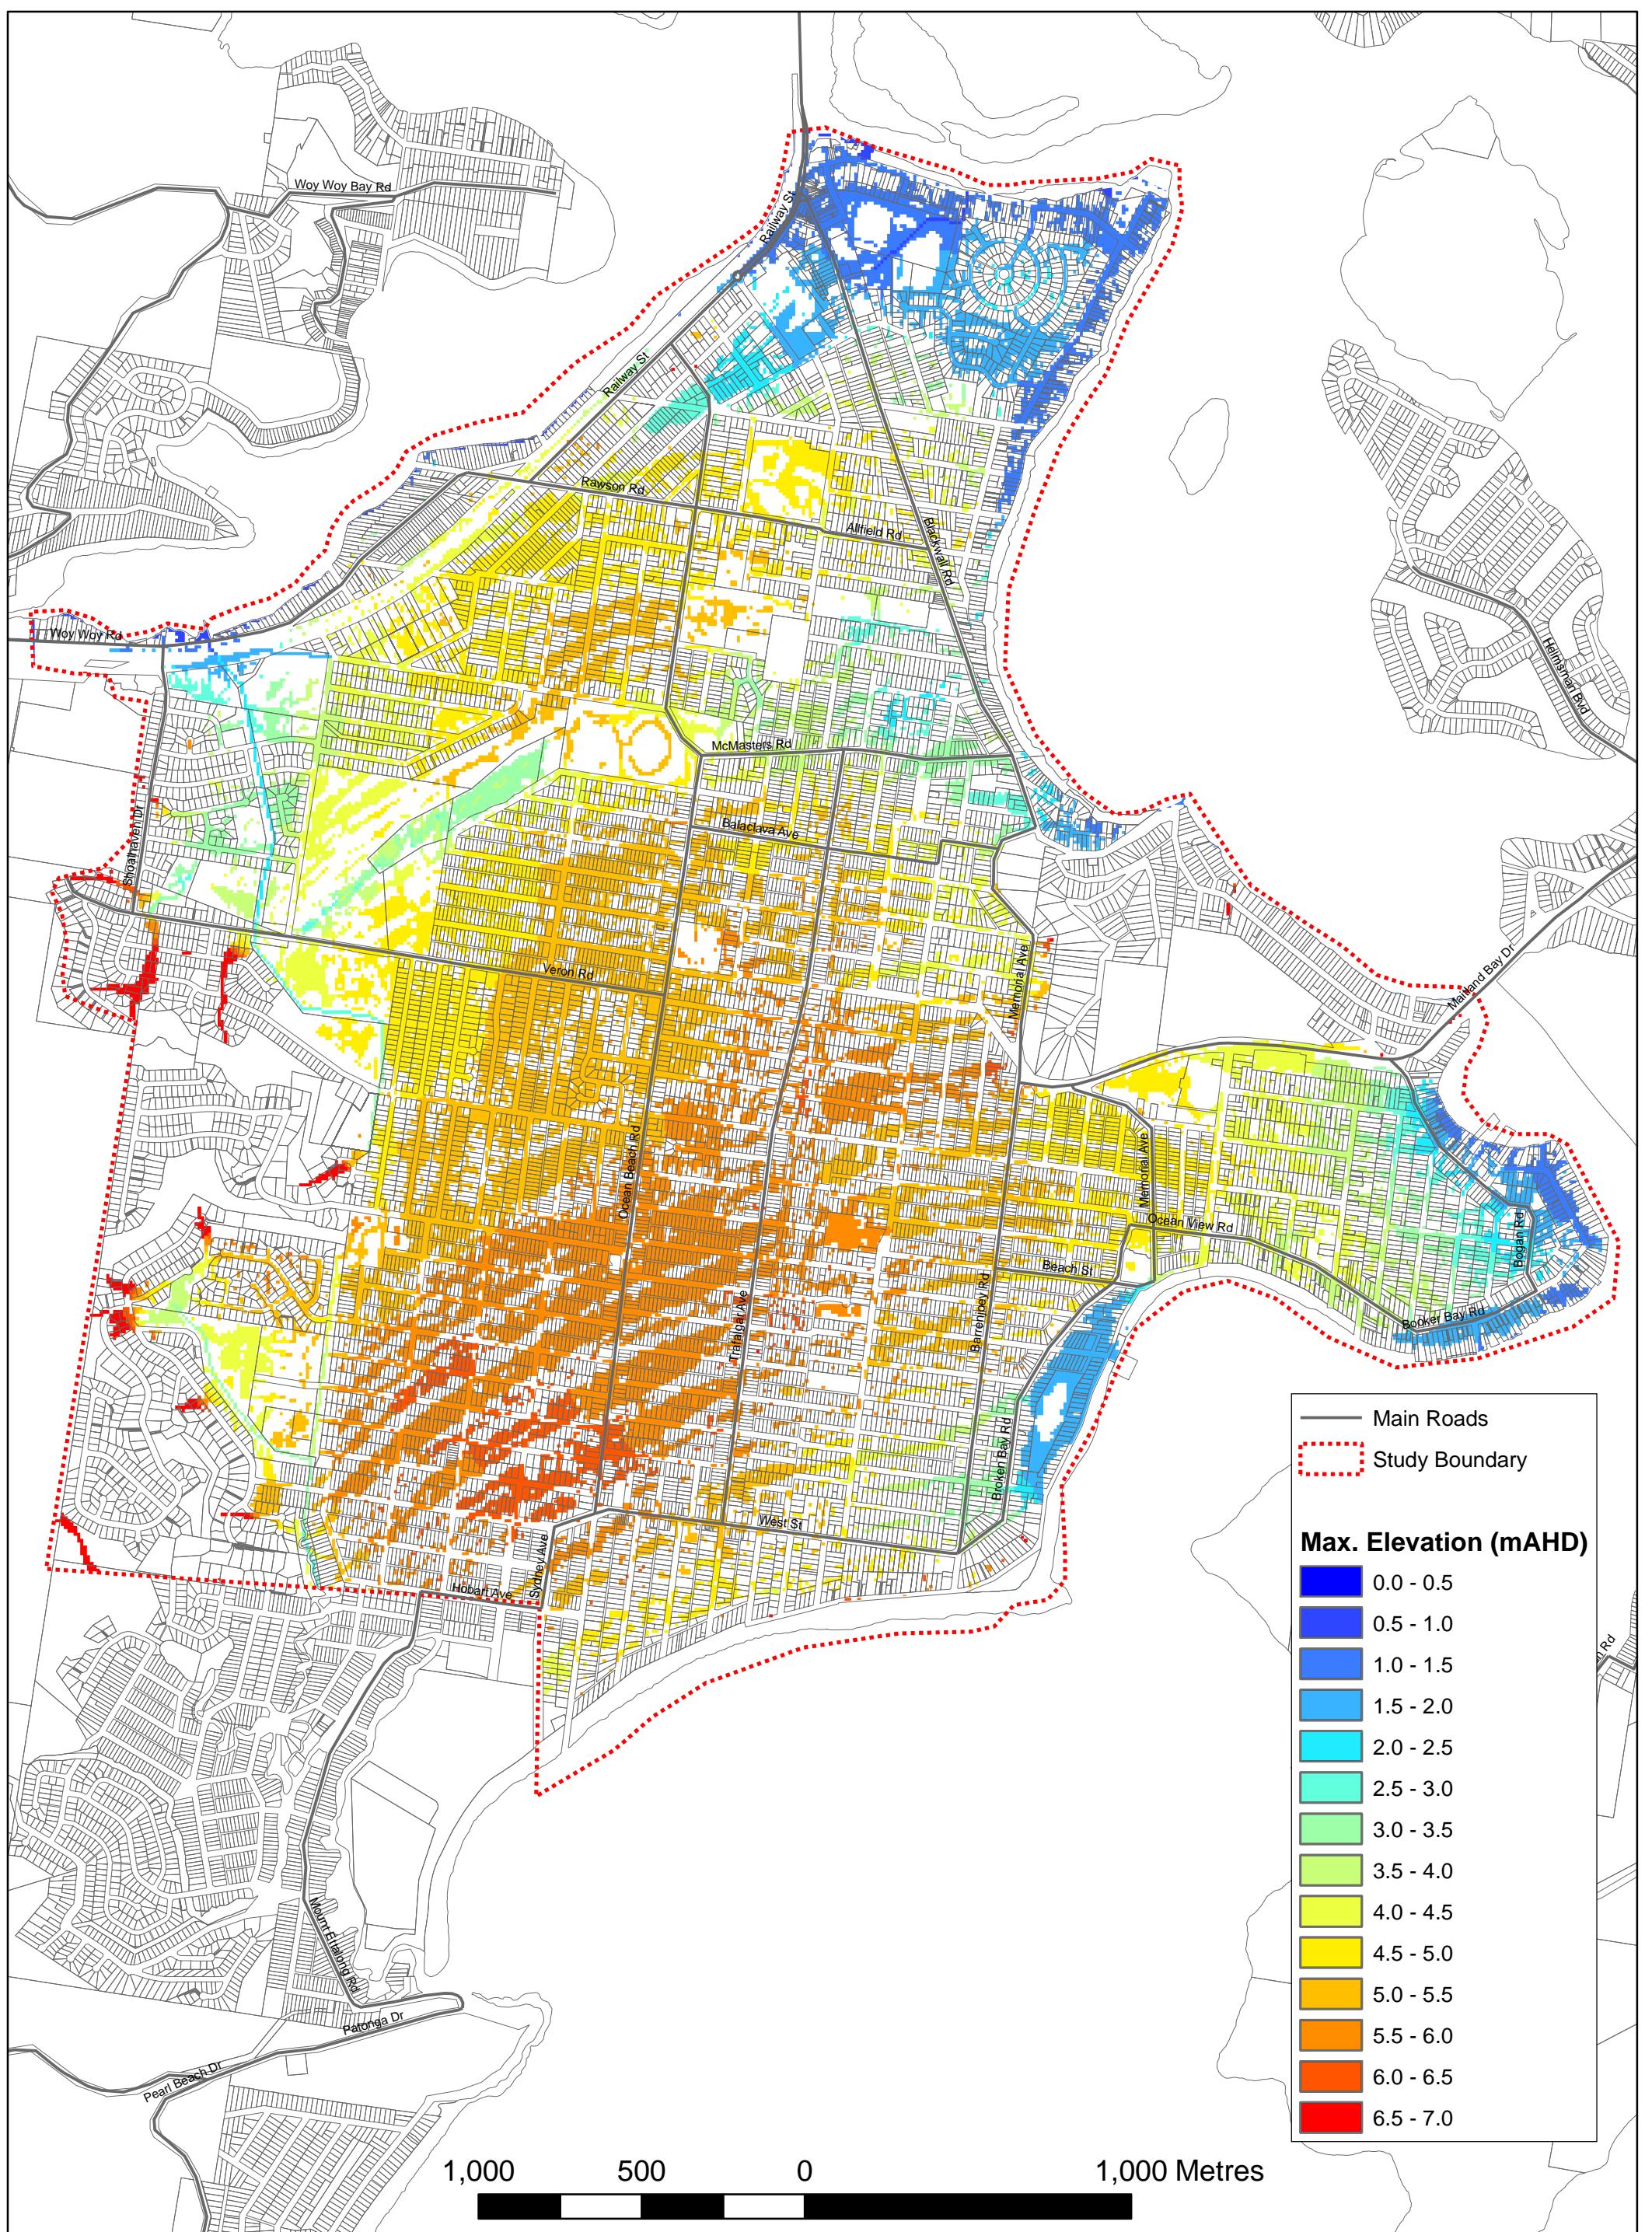

Figure 55 – Modelled Flood Elevation for 100yr ARI (1% AEP) with Future Development, 0.91m Sea Level Rise and 50% Blocked Stormwater network.
