

7a Conservation lots converted to either C2 Environmental Conservation or C3 Environmental Management. Restrictive C2 Zoning applied to land of highest ecological value, C3 Zone applied to other vegetated areas along with cleared areas in and around existing dwellings. These lots retain a 40Ha minimum lot size (no increase in subdivision potential)

7c2 Rural Residential lots converted to C4 Environmental Living. Similar land use permissibility - retain 2Ha minimum lot size

Split Zoning - dwellings and ancillary development is permissible in the C3 Zone but is prohibited on C2 zoned land i.e. - lawful residential uses can continue but environmentally sensitive land is protected.
